Summer Cut Flowers.

Paper read before the Montreal Gardeners' and Florists' Club, July 2, 1906, by Alfred C. Wilshire.

As the amount of business done in winter cut blooms is ever increasing so in proportion is that done in summer flowers. This is owing largely to the introduction of new and improved varieties and the better cultivation of all. And again stock is handled better and placed in a more tempting form before the public. It is true that during the months of July and August comparatively little is done, but even then there is a vast improvement over 10 years ago. It is now necessary to keep a fair stock on hand at all times.

The following summer flowers I consider essential to the florists' trade, indeed the same will be found equally useful to the private gardener, or an amateur who wishes to provide a succession of blooms for house decoration or other purposes. The first available flowers in spring are the Dutch bulbs. It should be so arranged the previous fall that there need be no break between those forced and those coming in outside. Some may also be retarded by covering the frozen ground above them with litter and thus extend their season for 10 days or two weeks. The most important of the Dutch bulbs outside are the tulips. Their length of stem and variety of color makes them popular for decorative work. The Gesneriana type is particularly fine.

Tulips are followed by lilacs, which are liked by all and while they last can be disposed of in large quantities. The white is a special favorite. It needs to be picked long, with foliage and carefully handled. Where possible a plantation of the improved kinds should be made for future demand, which is sure to come.

Lily of the valley can now be had throughout the year and is considered almost indispensable. While in season outside a lot more can be handled owing to its cheapness. If some care is taken in its cultivation it is undoubtedly a profitable thing to grow. So well is it liked that when its season is past and we have to go back to the cold storage article there is little kicking at having to pay winter prices for it.

Then comes the peony, a flower that justly deserves the prominent place now given it. For large decorative work they are grand and if we are wise we shall prepare for an increasing demand. The white and light pink sell the best although this season the common red one was much sought for, likely because it was the first to come in. Spireas of the Japonica type come in about this time and are very handy for madeup work. Every establishment should have a plantation of them.

Sweet peas: These are probably the most popular of all summer flowers. They have many good qualities while their comparative cheapness puts them within reach of all. There are many excellent varieties. It is not advisable, however, to grow too many kinds, choosing only those that harmonize best. Here I would like to mention that pretty little flower that goes so well with sweet peas, the Gypsophila paniculata. With a bunch of garden flowers or in madeup work it imparts a grace and beauty that nothing else will. It should be grown in every garden.

The aster in its various forms provides us with a succession of blooms till the late fall. While we are always glad to have them they seem most appreciated when brought in about the time that the most tender things are cut by frost. A sowing of Semple's Branching put in at the end of May will come in good for this. The cut and come again stocks Princess Alice and Beauty of Nice are fine for loose or madeup work. An early batch inside and later outdoors will give a good account of itself.

Gladiolus though not as a rule selling very well is a good showy thing to brighten up the window. The tips of the light shades are handy for funeral work. Lilium speciosum, L. album and L. rubrum are particularly useful, coming in good for sprays or cut short for madeup work. Arranged over asters or other stiff flowers they are very effective. Though easily grown outdoors they should be taken into the greenhouse as the buds are ready to expand to avoid damage from wind or heavy rain.

Mignonette if planted out early from pots will be in good shape for cutting now. Nothing helps more in making up an acceptable bunch for the sick room. Antirrhinum, dianthus, Phlox Drummondi, and candytuft are all good for cheap bunches.

In the late fall when nearly everything else is gone the pansy is nice when cut with foliage. A late sowing in spring will come in for this purpose and pay well. Among the best perennials for cutting are the campanulas, gaillardias, coreopses, helenium, rudbeckia and Iceland poppies. Many of the others though showy do not stand long cut. The white swainsona grown inside flowers continuously through the summer and is one of the most useful of all white flowers.

Indoor roses are now much better through the summer than formerly. Those received from the west are free from mildew and of very fair size. The best pink is undoubtedly the Canadian Queen and the best white is still the Bride. Kaiserin is soft and a poor keeper. The best carnation to stand the heat seems to be Enchantress. Some now coming in, though a little off color, are still excellent flowers. If we only had as good a white we would have little to complain of.

Grafting Pelargoniums.

The engraving represents a grafted pelargonium growing as a standard, the result of grafting scions of a variegated foliage variety on to a tall stem of an ordinary strong growing zonal pelargonium. As readers will see, the effect of a grafted pelargonium is much better than many would generally suppose, and apart from the interest which it would afford them, we think amateurs who have conveniences might with advantage adopt the method.

Although not customary to graft pelargoniums, the operation is by no means difficult. There are several methods, but the most eligible mode is that known as whip grafting. To accomplish this pot the stocks early in spring from 3-inch into 5-inch pots, and plunge them in a bottom temperature of 75°. In a fortnight they will have made fresh growth. Take off the scions as for cuttings, and as they have not been placed in heat the wood will be firm, which is all the better, as it is to be united to the firm wood of the stock. Cut off the head of the stock, leaving a few leaves upon a side branch a little above where the scion is to be inserted, which cannot be too low. Prepare the scion or graft by making a slanting cut downwards an inch in length, bringing it out a little below an eye or bud. Make a corresponding cut in the stock, removing the wood nearly half way through it, and then both cuts must correspond. Make a tongue or slit upwards in the scion, and downwards in the stock, so that the one may fit into the other. Bind tightly but not very closely with a shred of bast mat, taking care that the outer edges of the stock and scion coincide at least on one side. A little moss placed upon that and bound with matting will keep the part moist, and exclude as much air as is needed. In ten days loosen the matting, still keeping the scion bound to the stock, and close with the moss as before to keep it moist.

When the graft begins to grow keep the matting loose, and cut away the upper part of the stock down to the graft, as shown by the bar in the engraving. It is hardly necessary to observe that the stocks should be retained in the bottom heat, and should have a moist and shaded atmosphere until the operation is known to be successful. Gradually harden off, and the plants will be fit to plant out at the end of May. Crown or cleft grafting may also be practised, and when the stock and scion are of unequal size is an equally successful and more expeditious method.

Another mode of grafting pelargoniums is by approach or inarching. We have had half a dozen kinds upon one stock by this method. It is simply placing the stock near the plant furnishing the scion, and bringing the branch or shoot desired to the stock. Unite them at a smooth part of the stock by side or tongue grafting. Bind them together with matting, and upon this place a little moss, and bind lightly with matting. They will be well united in six weeks; then cut away the part of the stock above the graft, and take away the plant furnishing the scion, having cut the latter off just below the point of union.—S. T. in the Journal of Horticulture.

A Grafted Standard Pelargonium.

Journal of Horticulture.

PALMS AND FERNS.

Cultural Notes.

July weather usually brings about the proper conditions to stimulate the majority of palms into rapid growth, the warm days and frequently humid nights pushing these plants ahead in short order, provided they have been given suitable soil and proper attention.

And it is at this season that old specimens that were not repotted in the spring will be in need of some extra stimulant in order to encourage a better growth and color. Many different fertilizers are recommended for this purpose, the commonest and also one of the safest being barnyard manure in liquid form. The better plan when using this fertilizer is to strain the liquid before using, this practice avoiding the choking of the soil and drainage.

There is little danger of injury in the use of this liquid once a week in the case of root-bound palms, for barnyard manure is easily assimilated by these plants, but it is always a wise precaution when watering plants with liquid manure to make the application when the soil is not extremely dry.

Soot water is also sometimes used on plants of this character, the soot in question being that produced from soft coal. This fertilizer is rich in nitrogen, and usually builds up the color of the plants to which it is applied very rapidly, but it is advisable not to give too much nitrogen to these plants, from the fact that an over-supply of this manure is liable to make the foliage and stems brittle.

Dried blood is also a quick acting manure that contains much nitrogen and as such is of considerable value to the grower of various plants, but like the soot should be given in a cautious manner, or there may be other troubles to contend with. In some cases a top-dressing of old cow dung, with which has been mixed some bone flour, will do much to start along a palm that one cannot conveniently retub, plenty of water being given to wash the soluble portion of the manure down among the roots.

The very heavy rains that have so frequently occurred this summer have been quite a severe test for the shading material on the roofs of the palm houses, and thus increases the expense for that particular item to some extent, for at this time it does not pay to allow the glass to become bare for any great length of time, else the imperfect squares of glass, of which there are always some to be found, will so focus the rays of the sun that the best leaves of some of the plants are sure to suffer, and on a palm every leaf counts.

The observant grower usually finds what may be termed a secondary potting in some batches of stock by midsummer, from the fact that there were some young plants at the time of the spring potting that were not quite in condition for a shift. These having now made some growth both of tops and roots, will be found in condition for repotting, and this slack time furnishes a good opportunity for doing the work.

It pays to handle these successive lots of plants at the time they most need it, rather than either to pot them before they are in condition for it, or to make them wait until the houses are straightened up after the fall rush. Some of the early sown palm seeds, such as latanias and arecas may now be forward enough for potting off, and if so would better be handled without delay, for when these young plants are allowed to remain too long in the seed pots, they become thin and drawn, besides having such long roots that it is hard to disentangle them without breaking.

At the time of potting, these seedling palms should not have their roots exposed to the air any longer than is absolutely necessary, the young plants soon suffering from this cause. This exposure to the air, and the breaking of the tender roots by careless potting are the most prolific causes of the young plants

rotting off at this stage of growth, though it must also be allowed that over-watering frequently adds to the trouble.

Syringing should be thorough and vigorous on every bright day at this season, for thrips and red spiders are waiting for a chance to do their nefarious work, but there are days during the summer when the houses are better without water, owing to cloudiness and humidity, and it is on such occasions that the good judgment of the grower should be exercised.

Insects propagate very rapidly at this season, and regular fumigations with some of the nicotine preparations will be found decidedly beneficial in the palm houses, these preparations seldom having any injurious effect upon the foliage unless used in unreasonable quantities. Tobacco extract also has value as an insecticide, but is injurious to the foliage of some palms when frequently used, and when this extract drains down into the soil it probably affects the roots of most plants to a greater or less extent.

The nicotine papers are also useful in the fern houses, where an occasional fumigating is needful to keep the plants free from thrips and other insects. There is possibly less trouble from thrips on the young ferns when they are kept in cold frames during the summer months, but if this pest does get a foot-hold in the frames there may be more trouble in eradicating it there than in the greenhouse, from the fact that it may get further ahead in the frame before it is noticed. But whether the young ferns are grown in frames or in greenhouse, they must always be kept moist and given an abundance of fresh air both day and night.

At this season the various varieties of nephrolepis are all growing very rapidly, and in order to get the best results the young plants should be repotted as they require it and given space enough to develop short and sturdy growth. To get such a growth both space and light are required, and plants that are being grown by such methods will use up a great deal of water, and must have it if they are to be kept in condition.

There are few ferns that are easier to grow than the nephrolepis, but yet this needs, and deserves, some care in treatment if the aim of the grower is to supply a critical market, such as the high class retail trade of one of our large cities, and such a trade usually demands a stocky and well furnished fern, the fronds of which have strong stems and good color, and the dealer presenting such plants is generally able to get a profitable price for them, even when some of the department stores are offering fine Boston ferns at 38 cents each.

Railroad Discrimination.

J. H. Small, Jr., of Washington, D. C., has departed for the Maine coast where he expects to thoroughly enjoy himself for the remainder of the summer. Before leaving the city, in discussing the prospects for a greater commercial Washington, Mr. Small said: "I would suggest that the Shippers' Association vigorously take up the shipping question with the railroad people. Under the present service it is almost impossible to get a direct shipment to Washington from the south by fast freight. This is discouraging to business, especially in the handling of perishable goods. To present this subject more forcibly, I think it is well for business men to give specific instances in their experience of discrimination against them and Washington, and for this reason I relate the following:

"Every winter our firm orders thousands of dollars' worth of wild smilax from Alabama and Georgia. In order to insure its arrival with any degree of certainty as to time, we are obliged to have it dispatched by express. If sent by fast freight, it is necessary, owing to present railroad discrimination, to have it forwarded first to New York, and from that point reshipped to Washington.

"One can readily see the inconvenience as well as the expense involved in this method. Another point—articles of a perishable nature, intended for other large cities than Washington are surrounded, during the transmission, with every safeguard to insure their speedy delivery, while those for Washington are treated with the most indifferent handling.

"A short time ago we ordered a carload of rhododendrons. Not over 10 days at most should have been required for their transmission to us. They were not delivered for a month after having been started on their way. The invoices, however, were duly received, but notwithstanding this, the perishable plants had been sidetracked between Baltimore and Washington. In consequence of this delay the rhododendrons all died on being planted, and we were obliged to replace them at our own expense, the railroad refusing to indemnify us.

"These plants were to fill a large order for a valued customer. He was necessarily disappointed and annoyed, and we lost his trade in consequence, without any fault of our own. Thus we sustained the loss of the plants in addition. This and similar experiences, causing us annoyance and loss, have prevented us from encouraging a most lucrative branch of our business.

"It is absolutely essential for the solid progress of the city's commercial and industrial interests that the railroads grant us a through freight service to all parts. Until the railroads are made to see how crippling to our mutual interests are the present arrangements, commercially, Greater Washington will remain a theory."

THE ROSE.

Disbudding, Watering, Etc.

Just at present, and for several weeks to come, the work in the rose houses varies but little. Cultivating, tying, and disbudding being about the routine of the work for a while. It may be advisable to state that the disbudding should be intelligently handled, as this particular work is the only means we have of building up a good stocky growth.

Do not take the buds until they are about the size of the tip of the little finger; at this stage the eyes along the stem are prominent enough to discern easily the proper joint at which to cut back. The eye should be plump, and the proper eye may be near the top or several joints below the bud, as there are seldom two alike, but a little careful observation when disbudding and watching the results from time to time will soon enable the grower to tell at a glance how and where to cut. By just snipping out the bud alone the plants will become very dense in growth, and the growth will be twiggy. After a plant once gets in this condition the only real salable flowers that will make their appearance will be a case here and there from the soil.

Another thing that is liable to give some trouble is the green scum that frequently accumulates on the surface of the soil. This is more noticeable after several rainy days or continuous cloudy weather, again where the soil is naturally a little sour, this scum or fungus growth will spread rapidly. If this should be the case a light sprinkling of air-slaked lime thoroughly stirred into the soil before watering will often be of some benefit. The walks and the spaces beneath the benches should be sprinkled frequently with the lime also. This has a tendency to keep the atmosphere pure and at the same time it acts as a check to various kinds of fungus growth, often preventing in a measure cases of mildew or black spot. It is better to prevent the various diseases than to wait until a cure must be accomplished. There is seldom a case where mildew or black-spot gets the upper hand, where the grower has really tried his level best to prevent it. Do not wait for signs before applying the preventive.

Syringing with considerable pressure at the nozzle must be the rule from now on, allowing the spray to reach the under side of the foliage, reaching well in among the plants when syringing. Very often there may be a few red spiders lurking on some of the older foliage just waiting for a chance to multiply. Richmond will require the most careful syringing for, like our old friend Meteor, the form of the leaves being very much concaved underneath, it makes an excellent cover for spider.

Do not keep the soil too wet. Try to give the plants just enough water to have them require a watering daily; and until the soil is well filled with roots it will be found necessary to water the young plants individually. All the attention we can possibly give the young plants now will lessen the chances of failure later when it becomes much harder to stimulate rapid growth.

E.

THE CARNATION.

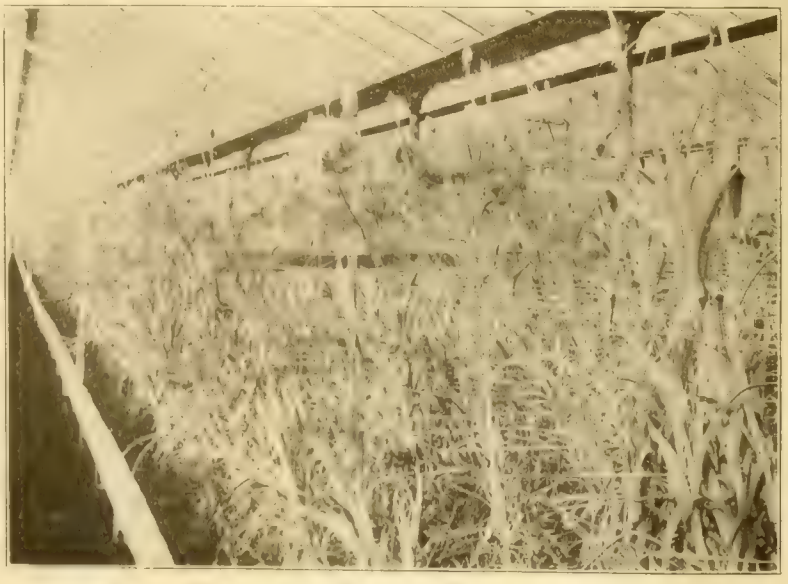
Seasonable Notes.

The extremely dry weather prevailing in the central states has had the tendency of checking carnations in the field to a certain extent and may delay housing them for a week or two, as it is extremely dangerous to lift plants in the field when they are in a half-wilted condition and then to transport them to the houses with hardly any earth about their roots and plant them in a temperature of about 100°. Under such circumstances it is better to wait a week or 10 days if necessary for more favorable weather conditions and then rush the work.

Meanwhile the benches should be gotten into shape and everything made ready for the planting. The plants in the field should be looked over very carefully and pinched as needed. Pinching back the plants after planting in the houses until the middle or latter part of August according to the size and condition of the plants will insure a good crop of blooms beginning Oct. 1.

The plants that have been kept in the houses need every possible attention. The surface of the soil should be kept loose and the weeds kept down. If the soil in the benches shows a tendency to get sour or hard a liberal application of air-slaked lime should be applied just after stirring and should then be watered into the soil. This application sweetens the soil and will prevent stem rot taking hold.

If the plants that have been kept indoors all season are not as large as those in the field, it need cause no apprehension. The field grown plants as a rule are more robust at the time of planting in the houses, but before they become established the indoor grown stock will



CARNATION WINSOME AT JOHN REIMEL'S, WOODHAVEN, N. Y.

be much ahead and will produce a better grade of blooms early in the season.

Fumigating should be kept up even if the presence of green flies has not been noticed. It is good practice to fumigate once about every 10 days or 2 weeks. In regard to what to use it is sometimes dffiicult to choose as there are so many preparations on the market.

F. R. PIERSON CO.'S ESTABLISHMENT, SCARBORO, N. Y.
New greenhouses in course of erection.

We have found nicofume as good as any we have ever tried. It is easy to handle, very effective and perfectly harmless to the plants. J.

WITH THE GROWERS

F. R. Pierson Co., Tarrytown, N. Y.

At the establishment of the F. R. Pierson Co., at Scarboro, N. Y. The building of two additional iron frame greenhouses is approaching completion. The houses are each 55x350 feet and with the previously existing house of about the same size, quite an impetus will be given the firm's carnation business, inasmuch as all three houses are to be utilized for growing carnations. The old house is already planted, and contains the new variety Winsor exclusively, some 14,000 plants being benched. The new houses will be planted with the varieties Helen Gould, Variegated Lawson, White Lawson and Enchantress, plants of which are in the field in readiness for benching. A new propagating house was recently completed, built by the firm's employes, a very creditable piece of work. It is 25x135 feet with concrete walls and cement floors, and in semi pit formation. The masonry work could hardly be beaten by union experts.

The recent addition to the nursery, comprising 27 acres, is being cleaned up, and enough locust posts are coming from it to completely bench the new greenhouses. Four acres of the new land have been planted with dahlias, the stock covering 125 varieties. When all improvements are completed, the establishment will be one of the largest, if not the largest, along the Hudson river.

John Reimels, Woodhaven, N. Y.

John Reimels, of Woodhaven, L. I., N. Y., has just completed three new houses, built on the site of three old ones just dismantled, and now has them ready for carnations for the coming season. The new houses are equipped with concrete benches. A visit to this establishment is highly interesting to any carnation enthusiast, some of the finest blooms to be found in the New York market being cut here. The standard varieties grown are Enchantress, Governor Wolcott, Genevieve, Lord, and Harry Fenn. These have for a long time given the best of satisfaction, both in point of productiveness and quality of flower. Novelties to be seen are a variegated Lawson, and Winsome, which is a beautiful light pink shown for the first time at the Boston show last spring, where it was awarded a preliminary certificate. This carnation was a seedling, originating in the establishment, and is now in its fourth year. Blooms of this variety sent to the market recently, measured 42 inches in length of stem. It is a profuse bloomer, and a vigorous grower as may be seen by the accompanying photograph. It will probably be disseminated next year. There are also two crimson seedlings to be seen here which have been on trial for two years or more. They are very promising.

European Horticulture.

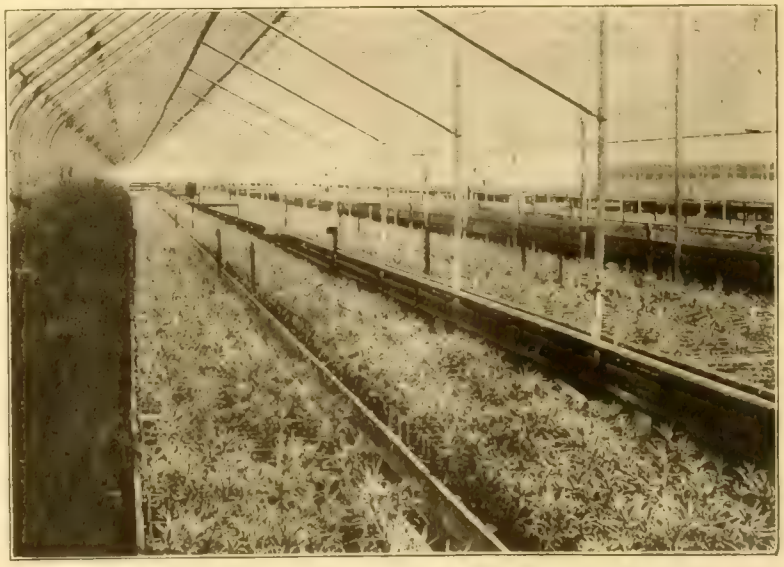
FROM THE BRITISH TRADE PAPERS.

CORNUS ALBA SPAETHII.—Of the numerous deciduous, ornamental foliage shrubs, none have greater claims on the attention of the gardener than this, for it is particularly effective throughout the whole year, and is one of the easiest possible shrubs to cultivate. When destitute of leaves, the bright red bark is conspicuous, while, when in leaf, the color of the foliage is unequaled by that of any other shrub. The major portion of the leaf is golden, the other part being made up of two shades of green, the green and yellow intermixing in an irregular manner. For planting in beds or masses it is very useful, while groups in beds or shrubberies have a very bright effect. Mature plants are often five feet to six feet high and as far through, but it does not attain that height quickly, and by pruning it is possible to keep it half that height with little trouble. With regard to soil it is not fastidious, sandy loam being better than soil of a very rich nature. To increase it, cuttings of ripened wood may be inserted in the open ground in autumn in a similar manner to currant cuttings, or branches may be layered.

LATE PROPAGATION OF BEDDING PLANTS.—Many practitioners, who have been compelled by circumstances to resort to late propagation for completing the stock of bedding subjects, must have been surprised at the splendid results that may be achieved in a short time, say, after April is in. With increased sun heat and growing power in the atmosphere, cuttings strike with a rapidity, and divisions form roots with a facility altogether unknown to early March, or late February, the favorite time for propagation. Pelargoniums, particularly the foliage varieties, marguerites, tradescantias, coleuses, and that useful plant which many still call Anthericum variegatum, but which Kew tells us is Chlorophytum elatum variegatum, may all be propagated after April is a week old, and will give good stuff for bedding out at the end of May.

IVY-LEAVED PELARGONIUMS.—The popular ivy-leaved geranium is employed in a great variety of ways, both indoors and outside, but only once have I seen it used to cover wire netting. The netting was about two feet six inches high, and ran at the back of a narrow border in an amateur's garden. At its foot, about 18 inches apart, ivy-leaved pelargoniums were planted at the end of May, and when I saw the garden at the middle of August the wire was clothed with foliage and blossoms, although dozens of trusses were picked each week. I can strongly recommend this method of growing ivy-leaved pelargoniums to anyone who has a suitable site for trying the experiment. Of course, any plant used in front of the wire should be very dwarf.

A NEW POPPY.—One of the most beautiful varieties of the eastern poppy (Papaver orientale) we have seen of recent years is named Queen Alexandra. It was shown by Amos Perry, Winchmore Hill, London, N., at a recent meeting of the Royal Horticultural Society, when it was given an award of merit. The flower is of the cupped form, which is quite a distinct feature, and the blotches are intense in color. The color of the petals is a warm salmon, touched with scarlet, a very beautiful mingling of shades.



F. R. PIERSON CO.'S ESTABLISHMENT, SCARBORO, N. Y.
House of Winsor carnations, 14,000 plants.

THE RETAIL TRADE

Alex. McConnell's New Store.

After a sojourn of many years in his old gardens at 546 Fifth avenue, New York, Alex. McConnell is established in new quarters at 571 Fifth avenue, having the largest store in the Windsor arcade. The store is 100 feet long by 25 feet wide, with mosaic floor and white finished walls. It is handsomely furnished. The show counters are of marble and bronze. There are two offices and a small reception office. A handsome white refrigerator with four doors is located near the front window. A large stock of specimen palms is distributed to advantage on the floor, and along the arcade front, which has several windows, a number of pieces of garden pottery, many of large size are displayed. The basement is of equal size with the store and is used for storage of supplies and auxiliaries. It has a convenient exit to a large corridor on which tracks are laid to an elevator at a separate entrance from Forty-sixth street, used for the entry of heavy goods. The new establishment is quite an addition to the many fine stores on Fifth avenue.

Louisville.

BUSINESS FAIR.

Business the previous week remained fair for July; however, it could have been much better. Lots of rain is helping outdoor stock which with but few exceptions is looking very satisfactory. Thrips have damaged quite a number of carnations in the field. Roses of quality are in fair supply, with a satisfactory demand. Carnations are small but good for this time of year. The supply and demand remain fair. Sweet peas are about over, and the season has been generally satisfactory. Lilium auratum of satisfactory quality is in good demand and supply. Shasta daisies move satisfactorily and are of good quality. The supply is adequate. The demand for hardy phlox is very good, but not near heavy enough for the supply. Green goods are in fair supply. Other stock is in fair supply, and has a demand up to expectations.

NOTES.

The Kentucky Nursery Co. is incorporated with a capital of $30,000, divided into shares of $100 each. The incorporators are F. Boone Gardiner, 215 shares; M. L. Gardiner, 10 shares; and R. L. Cullen, 75 shares.

Members of the Kentucky Society of Florists (jot it down right now) will hold their next regular meeting August 7. It is your duty to attend.

Wm. Walker has a bench of Richmond roses that would make anybody happy. There will surely be something doing next fall.

Ben Eschner, of M. Rice & Co., Philadelphia, was a caller Saturday with a choice line of goods.

Geo. Thompson's houses in the country are now about glazed, and his boiler will soon be in.

F. Walker & Co. have started housecleaning. F. L. S.

ALLEGHENY, PA.—E. C. Ludwig, wife and two sons have gone to Atlantic City, N. J., on their vacations.

FLORAL URN OF AMERICAN BEAUTY ROSES AND ASTERS.

By Harry Rowe, Chicago, who recently made a similar design, using carnations in place of asters.

Kansas City.

THE MARKET.

The market the past week has been practically featureless. A visit to the different stores invariably impresses one with the scarcity of stock and most of that to be seen worth mentioning is that which is shipped in. On account of the few dry weeks in the early part of the season a prevailing scarcity of the usual summer flowers is noticeable. Consequently what staple flowers are usually in stock are pretty well cleaned up each day. Weddings are a thing of the past and an occasional funeral order is all that can be looked for to fill out the daily work.

NOTES.

The regular monthly meeting of the Missouri Valley Horticultural Society was held August 21 with C. V. Holsinger, Rosedale, Kansas. The meeting was well attended. After the business was transacted a good dinner was provided and every one left complimenting Mr. Holsinger's hospitality.

W. J. Pilcher, of St. Louis, was a visitor last week. Mr. Pilcher recently disposed of his place in Kirkwood, Mo. He is quietly looking about for a good violet market.

Rube Radcliffe, of W. L. Rock Flower Co.'s greenhouse, is unable to be about on account of sickness.

A Broadway millinery house fire August 19 for a time threatened the store of Samuel Murray. But owing to the good work of the firemen the conflagration was confined within the walls of the millinery company's building.

Quite a number of cereus plants have put forth their blossoms recently—one in particular, the property of a west-sider, produced seven perfect blooms, some of them measuring six inches in diameter.

Walter Birmingham, formerly florist to the A. R. Meyer estate, is now in charge of Samuel Murray's place. According to Mr. Murray's assertions Mr. Birmingham is making a very creditable showing at his place.

All records so far reported for big yields of wheat were broken this week when A. Burkhart, near Baker, Kans., threshed a 5-acre field which threshed out 56 bushels per acre.

Fred Fromhold is spending his vacation in the Ozarks. In a recent letter he boasted of his good luck one afternoon in landing 10 three pound bass.

W. J. Barnes expects to have a fine lot of asters. They are from 10 days to two weeks late this year says Mr. Barnes.

Robt. Tindall is again busy after his illness, looking after a fine lot of asters he expects to send to the market soon.

A. Ebberfield will enjoy a three weeks' trip to eastern cities returning by way of Dayton for the convention.

Ed. A. Humfeld is in Iowa this week; we are glad to learn that Ed. is having a good time, for he deserves it.

We are glad to note that R. S. Brown is improving and hope he may soon be able to again assume his duties.

Max. Eoller had the decorations for a new department store which was opened here August 21.

Geo. M. Kellogg was in St. Louis this week on business.

Where is Lawrence Schwager?

K. C.

San Francisco.

Like the falling of rose leaves, one by one, so are the ante-disaster florists leaving the bread line and again returning to trade lines. This week a new sign at 1814 Post street announces that Joe Goldstone, florist and decorator, has returned. For many years before the city's greatest misfortune a sign like this was posted in Sixth street, near Market.

Flower merchants in both this city and Oakland have had a most excellent trade this week, owing both to good fortune and bad fortune that came into the lives of two front rank citizens, one each of the two cities named. Last week, July 12, I went to the overland depot in Oakland with J. Seulberger, a prominent florist of Oakland and prominent as a member of the Order of Elks. We went to the depot on a train of street cars labeled "Melvin Special," carrying upwards of 200 Elks and a brass band, to cheer off for Denver Superior Judge Henry A. Melvin, who is not a florist but one of the best patrons of the trade in Oakland. It became known in Oakland several days before the announcement was made that everything in Denver was working all right for Judge Melvin, and thereupon all florists in Oakland, each of whom is an Elk, was put to work on beautiful floral designs. And when in the grand lodge meeting at Denver, July 17, it was announced that Judge Melvin was unanimously elected grand exalted ruler of the Benevolent and Protective Order of Elks he was conducted to the platform and soon surrounded by between three and four dozen elegant floral pieces from Oakland, and from this floral center he delivered his address of thanks.

The largest florist-funeral trade ever known in this city came to the florists this week, all having a liberal share. The decedent was General R. H. Warfield, a grand army man, head of the national guard of California, past department commander G. A. R. of California and Nevada, past senior national commander and president of the Tamalpias Scenic railroad. It seems he was beloved by everybody in the city.

JESSE WHITE.

NEW STORE OF ALEX. McCONNELL, NEW YORK.

INTERIOR OF ALEX. McCONNELL'S NEW STORE, NEW YORK.

St. Paul.

Trade continues very good considering the season and while there is a dull day now and then there are more days that find the stock men busy. Roses and carnations are not exactly scarce but it is hard to find any first class stock. Prices have held up very well on everything and the stores which have cut prices do not seem to do any better for it. Sweet peas and Lilium speciosum and L. auratum are in full swing now and with some very good asters coming in help out materially for a variety. Locally picked fern leaves are being used to a great extent here and give very good satisfaction when handled properly.

The many friends of Carl Johnson, who was with L. L. May & Co. for many years, but now with the Powers Dry Goods Co., were very sorry to learn of the death of his wife. Carl has the sympathy of all his friends in the craft in his sad bereavement.

A. Lauritzen has purchased the houses formerly run by Carl Peterson and will dismantle them and add a new house at Warrendale.

J. H. Wallace of Storrs & Harrison was a caller on the trade.

A. L. Vaughan, Chicago, with party passed through St. Paul on his way to camp at Spirit lake, Wis.

Visitors: A. K. Kerchner, Helena, Mont.; Ed. Neberrhein, Winnipeg Floral Co.; N. Clarine, Faribault, Minn.

Toronto.

TRADE EXCEPTIONALLY GOOD.

Trade so far this summer has been exceptionally good, and in fact has almost equaled midwinter business. The remains of Walter Barwick, K. C., and Mr. Pipon, who were victims of the Salisbury wreck, were brought home this week and a large number of floral tributes were sent to both parties, giving the florists a very busy day. Stock still holds up very well, and in roses especially this market is better supplied than in former seasons. American Beauty, Kaiserin, Chatenay, Canadian Queen and Richmond roses are all in fairly good shape, while Bride and Bridesmaid blooms are only of the usual mid-summer qualities. Carnations are fairly plentiful. Lilies are over abundant, and asters and sweet peas are now arriving in larger quantities. In greens there is the usual assortment.

NOTES.

The Canadian Horticultural Association will meet in Guelph on August 29 and 30. The cheap rates which can be had to Toronto on these dates, and the short distance between Guelph and this city should enable all visitors to reach that place at a very reasonable expense. A very good programme has been arranged and the Ontario Agricultural College situated in Guelph should not only prove interesting but also good useful information to the visitors.

H. H. Groff, the hybridist and gladioli specialist of Simcoe, Ont., has already started shipping in quantities. Every customer has been favored with a pamphlet on "Cultural Instructions and Care of the Cut Flowers" and, in his own modest way, Mr. Groff advises that the information is the most practical, comprehensive and valuable ever published, and that the paper should be preserved carefully for future reference.

John H. Dunlop and family are summering in their cottage at Rosebank. Miss Alice Dunlop is making a tour of the Muskokas.

Arthur Annandale, of the Steele Griggs Seed Co., is visiting British Columbia and will return to the city about September 1.

Geo. Manton and Geo. Mills had an enjoyable day fishing for bass, and had a good sized haul.

John McKerrighan has gone abroad combining both business and pleasure.

J. S. Simmons and wife sailed for London July 26.

Visitors: A. L. Jones, of S. S. Pennock & Co., Philadelphia; J. Stevens, London, Ont.; Dr. Rowe, Georgetown, Ont. H. G. D.

Mobile, Ala.

On reading the news of this city in one of your June issues my first thought was, Why, you must have been doing all the business here of late. But a telephone interview with the pioneers, C. Ravier & Sons, soon took the conceit out of me. "Trade dead. Man, we have been having the time of our lives here lately, sent out designs by the dozen every day." "All balsams?" "Not at all. You know what that would mean in this section," was the answer flashed back from the jovial Fred.

Of our lady artists Miss Maria Minge reports at least one wedding every day besides plenty of other work. Mrs. Goodbrad and Mrs. Green both report an excellent trade during June. Duplan and Thublin were more than satisfied and the Industrial Gardens, doing exclusively a plant trade, have had a fine season, but the dry period caused sales to shorten during May and June. This covers the leading retail trade here.

As to wholesale business this city can hardly boast of any strict wholesalers so far, although the Chatogue Greenhouses are bidding fair to become a factor in this line soon. This firm has undoubtedly had a good season, but being mostly growers of roses, carnations and chrysanthemums (no balsams) are naturally out of the market for a few weeks.

Your correspondent, "G. C." is not very complimentary to our sweet girl graduates in assuming that the raking of the garden in the shape of a commencement basket should be a thing perfectly beautiful to her generally refined taste.

How does "G. C." manage the thrips when they are within reach of hydrocyanic? Thrips seem to be rather a troublesome pest to exterminate with hydrocyanic acid gas unless you want to make a clean sweep of plants and all.

PHONE 969.

Harrisburg, Pa.

Louis Salingre, gardener to Senator J. D. Cameron at "Lochiel Gardens," will enter into partnership with G. Hanson at 1023 South Cameron street. Mr. Salingre is a thoroughly up-to-date grower and should make a success in his new departure.

Harry Miller will add a new house, 20 x 200 feet, to his lately remodeled plant. This gives Mr. Miller quite a big range of glass which is devoted to roses almost entirely.

J. D. Opperman, Camp Hill, intends adding considerably to his establishment, negotiations being under way for at least one large house with a possibility of more.

Samuel S. Parker, a well known grower, has taken charge of the Melrose Cut Flower Co. at 410 Market street, having assumed that position July 1. H.

Kennett Square, Pa.

Chas. Swayne had two of his mushroom houses blown down June 30. He had just built them and the loss was quite serious to him.

The mushroom men are quite busy putting in mushrooms and the mushroom spawn is coming in by the carload.

Ellis Marshall, of London Grove, has gone out of business and his place has been abandoned.

Harvey & MacDonald have built five mushroom houses on their new farm.

F. T. Way & Bro. are making extensive additions to their plant.

Chas. Walters has added a large new house to his establishment.

Worrall & Wilkinson are building two houses 33 x 150 feet.

San Angelo, Tex.

The dull season is on and there is nothing doing except a little funeral work once in a great while. In this pure and arid climate people do not get sick, but simply keep on getting older and older and if they did not get into an argument once in a while and then die with their boots on, they would have no use for wire designs at all. Even the poor "lungers" who come here to die can not make the ripple. They parade around for a while like a walking funeral and then to their utter disgust when they see that they are getting well instead of dying, they go into some business and become in the course of time wealthy, wild and wooly. If not the first, the latter sure. If you do not believe it, come and see. J.

Utica, N. Y.

TRADE VERY GOOD.

Local business has been very good during the past week, there being a few late weddings and a great many funerals. The florists received some large orders for the funeral of John M. Crouse, one of our most prominent citizens, who died in London, England, last week.

Seward Hakes and wife, of Ilion, are spending two weeks in the Adirondacks. Theo. Schesch, wife, and family, of the same place, are spending their vacation at Atlantic City, N. J. BUD.

NEWS NOTES.

WAKEFIELD, MASS.—N. F. McCarthy & Co. are building an addition 53 x 400 feet to their already large plant.

COUNCIL BLUFFS, IA.—J. F. Wilcox lately returned from Manitoba where he made some farm land investments in the Roblin district.

LOS ANGELES, CAL.—The Signal Hill Floral Co. has moved to 349 South Los Angeles street. The old address was only a few doors above.

DENVER, COL.—C. H. Garwood, of Cheyenne, Wyo., spent the week of July Fourth in this city, looking up stock and greenhouse building materials.

ELMIRA, N. Y.—R. G. Koenig, recently appointed superintendent of the United States Cut Flower Co., is having a new residence built on Fourteenth street.

GALVESTON, TEX.—Charles Eickholt was adjudicated bankrupt July 21. Date for first meeting of creditors is set for August 2. A number of northern firms have been caught.

ANACONDA, MONT.—Instead of repairing and altering the old Butte Miner building on West Broadway, which he bought recently, J. M. King, the florist, has decided to tear down and rebuild. He has already started the work of removing the old building and in its place there will be a four-story modern business block that will cost about $30,000.

HAMBURG, N. Y.—The sixth annual carnival of flowers under the auspices of the Baptist Dorcus Society will be held July 26-27 at the opera house. Premiums will be awarded in 24 classes.

CLARINDA, IA.—C. A. Welch has sold out to J. B. Pfauder, who has moved the greenhouses and rebuilt them on a concrete base. When completed this plant will be one of the most up-to-date in this part of the country.

INDIANAPOLIS, IND.—The contract for constructing the foundation for the new conservatory at Riverside park at a cost of $5,300 has been awarded. The board expects to get an appropriation for building the superstructure next year.

PETOSKEY, MICH.—Gustave E. Anderson has started some greenhouses here, over 8,000 feet of glass, under the firm name of The Petoskey Floral Co., with a store uptown. Mr. Anderson is very much pleased with the business so far.

SAN RAFAEL, CAL.—The following, illustrating the position of private gardeners in this section, is taken from a recent private letter: "Nearly everybody has curtailed expenses and most of the employers have laid off one-half or more of the usual help."

COLORADO SPRINGS, COL.—J. B. Braidwood of this city has sold his retail store to Miss Florence Kennedy, who has been very successful at Cripple Creek for the past few years. Wm. Clark assumes charge of the greenhouses once more.

WORCESTER, MASS.—The will of F. A. Blake, of Leicester, recently filed in the probate court, provides a gift of $1,000 to the County Horticultural Society, the income from which is to be used for medals to be awarded to originators of new varieties of fruits and flowers.

COLUMBUS, O.—Rose planting still continues, although most stock is now benched. Carnations look well in the field despite the dry, hot weather.—The members of the Florists' Club contemplate setting aside a day in the near future for a general outing at Buckeye lake.—Carl.

DES MOINES, IA.—A. G. Lozier has purchased the business of the New York Floral Co., at 405 Sixth avenue, and will consolidate it with his store at 316 Sixth avenue. Mr. Lozier is operating a store in East Des Moines and announces that he expects to open branch stores in other cities.

WHEATON, ILL.—E. T. Wanzer has just finished three new houses, each 200 x 233 feet, and a lean-to propagating house 200 feet long. Mr. Wanzer makes a specialty of carnations and has a fine start on his young stock. He expects to make a good showing of high grade blooms next season.

WINONA, MINN.—Chas. Siebrecht has given up the Central Greenhouses, and the Youmans' greenhouses, which were rented during the past year by Volbrecht Bros., have been taken down. Kirchner & Son have enlarged their rose section and made other improvements. The business of this firm during the past year was all that could be desired and is increasing every year.

PARKERSBURG, W. VA.—J. W. Dudley & Son are building one of the finest cut flower stores in the state. The building will be 22 x 110 feet with a 60-foot conservatory at the rear built with the latest improvements. The store and conservatory will be ready for occupancy about October 1.

MANCHESTER, MASS.—The annual rose show of the North Shore Agricultural Society took place on the grounds of the Essex county club June 27. Mrs. Jas. McMillan won the special prize for the best display of garden grown roses and Miss M. F. Bartlett the silver medal for the best table of roses.

MELROSE, MASS.—The twenty-second annual exhibition of roses and other seasonable flowers of the Melrose Horticultural and Improvement Society was held June 18. Some of the largest displays of roses were contributed by Mrs. C. G. Schaedel, Arthur M. Willis, President L. C. Wentworth, Mrs. Charles J. Braton and Rev. Thos. Sims.

DENVER, COL.—The flower business for the month has been very satisfactory, in fact, it has been about 30 per cent better than usual. The weather continues cool and stock has held out very nicely. Carnations are still arriving in good condition, also roses. Peonies are over and fine sweet peas are now coming in.—Platte.

CHEYENNE, WYO.—C. H. Garwood states that his business was fine this spring and is good now. Summer has been backward in this section this year, there being three light frosts in the last week of June. It does not seem much like summer here by looking at the plants outdoors. Mr. Garwood is building one house, 20x80 feet.

ROCHESTER, N. H.—M. H. Folsom has formed a partnership with H. J. Neilson of Portland, Me. They have hired the Benoit photographic studio building on Railroad avenue, which they will use as a plant and flower store. Mr. Folsom will have charge of the store and Mr. Neilson will attend to the greenhouse.

MURPHYSBORO, ILL.—Louis R. Allen has sold his greenhouses to J. E. Null, of Hillsdale, Mich. Mr. Allen will take charge of the Pomoma heading and stave factory, of which company he is vice-president. His successor is a practical florist and nurseryman. For 12 years he had charge of the landscape gardening of the Lake Shore railroad.

ST. PAUL, MINN.—The regular meet- of the State Horticultural Society was held June 26 at Saint Anthony park and several hundred people attended to listen to instructive talks on fruits and flowers. Professor S. B. Green and Entomologist F. L. Washburn were among the speakers. There was a good display of fruits, including strawberries, apples, gooseberries and currants.

STERLING, ILL.—The Sterling Floral Co. is having five of the old greenhouses, the first erected at the site of the present plant, torn down, and on the site of the same the company will shortly erect a new and modern greenhouse. The structure will cost close to $3,000 and will be used almost exclusively for the raising of carnations.

NORWAY, MICH.—At his summer home on the banks of Lake Antoine John T. Jones is building a large greenhouse. In the construction of the building there is being utilized the glass that was used for a number of years in the Ferris wheel, which was recently destroyed at St. Louis.

BLOOMINGTON, ILL.—The Phoenix Nursery Co. will soon start up a fine new retail florist's store in this city. Fred Rowe, who has had charge of the retail store of the Chicago Carnation Co. at Joliet, will be the manager. This concern is building 13 up-to-date greenhouses, some of which are to take the place of old structures.

HAGERSTOWN, MD.—At a meeting of the fair board held June 18, it was practically decided to erect a new floricultural building, providing the plans can be prepared and the building finished in time for the exhibition next fall. The board also decided to increase the amount of premiums in this department from $333 to $500, with a view of encouraging local and out-of-town florists to make even better exhibits than they have in the past.

NEW BELFORD, MASS.—The Horticultural Society held a very successful rose exhibition June 27 in the city hall. The feature of the exhibit was the collection of hybrid perpetuals from the gardens of Miss Fay, displayed by M. H. Walsh, gardener to Miss Fay. Mr. Walsh has 7 acres of roses under cultivation, and 700 of the choicest blooms were shown. Miss Fay was awarded a silver medal. Jas. Garthley, gardener to H. H. Rogers, also had a notable collection.

MONTREAL, QUE., CAN.—The summer exhibition of the Horticultural Society took place June 28, at Mrs. Molson's beautiful home "Piedmont." Geo. Trussell, gardener to Mrs. Molson, was awarded first prizes for his displays of aquilegia, campanula, iris, perennials, pansies, cauliflower and peonies. C. A. Smith, gardener to T. A. Dawes, was awarded first prize for a display of delphinium. T. Pewtress was awarded first prizes for digitalis, violas, self-colored pansies and hardy roses.

MINEOLA, L. I.—The estate of Ferdinand Boulon, the Sea Cliff florist, who died last March, promises to be a matter for litigation upon the arrival in America of a power of attorney from Mrs. Boulon, who resides in France. Boulon left his estate, estimated at between $25,000 and $50,000, to a woman name Irma Leanor, who had resided with him for many years. Boulon left his wife in France 25 years ago and came to America to seek his fortune.

CLEVELAND, O.—Mrs. Louisa Kline Miller, of the Home Gardening Association, has made application to the board of education for a greenhouse at the Rosedale school where the association has established a center for the cultivation and distribution of plants to the other schools. Director Orr has already allowed funds for a toolhouse on the lot where the pupils may learn plant grafting and care of the plants, and it is planned to have a model garden, including floral sun dial and other beds.

J. B. HEISS was in New York last week on business of the S. A. F. exhibition which will be held at Dayton, O., next month.

THE columbine is again coming to the front as the national flower, the movement being pushed by the Columbine Association, the secretary of which is James Sturgis Pray, P. O. Box 2774, Boston, Mass.

The Dayton Souvenir Book.

To offset a wrong impression, created by a communication from a member of this club, recently published in the trade papers, we wish to state that the reference made to the publication of the Dayton souvenir being left to "private enterprise", was made without the knowledge of the actual conditions and does an injustice to H. M. Altick, in charge of this work.

We therefore, by action of this club, fully endorse H. M. Altick's statement of facts published in a recent issue of this paper, as correct in every respect, and herewith assure the patrons of the souvenir, and the members of the S. A. F. that their support of this publication will aid the Dayton Florists' Club in making a successful convention.

DAYTON FLORISTS' CLUB.
J. B. HEISS, Pres.
CHARLES LUTZENBERGER, Vice-Pres.
HORACE M. FRANK, Sec'y.
H. H. RITTER, Treas.

Chrysanthemum Society of America.

SPECIAL PRIZES.

W. Wells of Merstham, Surrey, Eng., offers gold, silver gilt and silver medals for six varieties of chrysanthemums, two of each on 12-inch stems. The following varieties are eligible in this competition: Mrs. H. Partridge, Mrs. D. Willia James, Merstham Crimson, Mary Ann Pockett, Beatrice May, T. Richardson, Mrs. Heaume, E. J. Brooks, Mrs. F. F. Thompson, Mrs. Wm. Knox, Mrs. J. E. Dunn and Miss May Siddon.

Prizes of $50, $25 and $10 are offered for 12 blooms on 24-inch stems, for the best seedling or sport not yet in commerce. The color to be white, pink or yellow, the name to be given by the donor of the prize.

Charles H. Totty offers prizes of $12, $8 and $5 for 12 blooms in 12 varieties, stems not over 12 inches long, introductions of 1906. Open to all.

F. R. Pierson offers a silver cup for 36 chrysanthemums, six varieties, six blooms of each, introduced in America in 1905 and 1906.

Nathan Smith & Son offer $25 for best 24 blooms of American origin, introductions of 1904, 1905 and 1906; three varieties, white, pink and yellow, eight blooms of each shown in separate vases.

Vaughan's Seed Store offers a silver cup, value $15, for the best specimen **bush** chrysanthemum plant, which has not received any other award. Open to private gardeners only.

DAVID FRASER, Sec'y.

Loss of Anton Schultheis, Petersburg, Pa.

Anton Schultheis, College Point, N. Y., writes as follows with regard to the recent serious damage by hail to the greenhouse establishment of his cousin, Anton Schultheis, Petersburg, Scranton, Pa.:

"The party in question is a cousin of mine, only five years in business. I went to his place right after the storm and there was practically nothing left of the glass beyond a few panes and all the plants were more or less totally wrecked. He, or anybody else around that neighborhood, was not insured against hail so he deserves the sympathy of the trade. None of the other florists were in the line of the storm. I sent my cousin a lot of plants to help him stock up and if you could get some friends to help him a little with some carnation plants in September or at the end of August, it would be a great benefit to him. He is now reglazing and any help at all will be gladly received. His local brother florists, about 20 in number, are going to help with the glazing. A local carpenter has offered him free services with his men for a week.

"My cousin was born in Taylor county, Pa., on the farm of his father, Henry Schultheis. Two years ago he was flooded up to the top of the benches. I call this second misfortune hard luck. The name and address is Anton Schultheis, Petersburg, Scranton, Pa."

ANTON SCHULTHEIS.

College Point, N. Y., July 19, 1906.

Greenhouse Building.

Topeka, Kans.—B. E. Rodman, addition to greenhouses, to cost $400.

Celina, O.—Ernsberger Bros., of Decatur, Ind., plant requiring 10,000 feet of glass to cost $15,000.

Minneapolis, Minn.—University of Minneapolis, one greenhouse to cost $9,500.

Chambersburg, Pa.—Byer Bros., three carnation houses, each 25 x 100 feet.

Cheyenne, Wyo.—C. H. Garwood, one house, 20x80 feet.

Cohoes, N. Y.—H. H. Sault, several new additions.

Hartford, Conn.—Wm. Myers, one greenhouse in Webster street.

Wakefield, Mass.—N. F. McCarthy, an addition 53 x 400 feet.

Kennett Square, Pa.—Worrall & Wilkinson, two houses, 33 x 150 feet each; Chas. Walters, one house; Harvey & MacDonald, five mushroom houses.

Harrisburg, Pa.—Harry Miller, one house, 20 x 200 feet; J. D. Opperman, one large house.

Lowell, Mass.—Patrick J. Riley, one house, 33 x 150 feet.

Versatile.

W. C. Cook, manager of the Dunkley Floral Co., Kalamazoo, Mich., sends us as a literary curiosity a clipping from the Kalamazoo Gazette of July 14 showing an advertisement of a man who claims to be a landscape gardener, grader, repairs and cements cisterns, builds cement walks, does carpenter work, painting, mason work, tree trimming, etc., and all work guaranteed.

Coming Exhibitions.

[Secretaries are requested to supply any omissions from this list.]

BOSTON, MASS., September 5-6, 1906.—Annual plant and flower exhibition Massachusetts Horticultural Society. Address Wm. P. Rich, Horticultural hall, 300 Massachusetts avenue, Boston, Mass.

BOSTON, MASS., November 2-4, 1906.—Chrysanthemum exhibition Massachusetts Horticultural Society. Address Wm. P. Rich, Horticultural hall, 300 Massachusetts avenue, Boston, Mass.

CHICAGO, November —, 1906.—Annual exhibition Horticultural Society of Chicago. Address Willis N. Rudd, Blue Island, Ill.

NEW HAVEN, CONN., November 6-8, 1906.—Annual exhibition New Haven County Horticultural Society. Address Thos. Pettit, 90 Prospect street, New Haven, Conn.

NEWPORT, R. I., August 13-15, 1906.—Annual exhibition Newport Horticultural Society. Address David McIntosh, Ledge Road, Newport, R. I.

PROVIDENCE, R. I., November 9-10, 1906.—Chrysanthemum and carnation exhibition Rhode Island Horticultural Society. Address C. W. Smith, 27-29 Exchange street, Providence, R. I.

RED BANK, N. J., October 31-November 1, 1906.—Ninth annual exhibition Monmouth County Horticultural Society. Address H. A. Kettel, Red Bank, N. J.

SANTA BARBARA, Cal., October, 17-18, 1906.—Chrysanthemum exhibit Santa Barbara County Horticultural Society. Address Thos. Poole, Santa Barbara, Cal.

TARRYTOWN, N. Y., October 30-November 1, 1906.—Eighth annual exhibition Tarrytown Horticultural Society. Address E. W. Neubrand, Tarrytown, N. Y.

WORCESTER, MASS., November 8, 1906.—Chrysanthemum exhibition Worcester County Horticultural Society. Address Adin A. Hixon, Horticultural hall, 18 Front street, Worcester, Mass.

Meetings Next Week.

Dayton, O.—Dayton Florists' Club, 112 South Main street, July 30.

Detroit, Mich.—Detroit Florists' Club, Cowie building, Farran and Gratiot avenues, August 1, at 8 p. m.

Lake Geneva, Wis.—Lake Geneva Gardeners' and Foremen's Association, News building, August 4, at 8 p. m.

Milwaukee, Wis.—Milwaukee Florists' Club, Quiet House, corner Broadway and Mason street, August 2, at 8 p. m.

Minneapolis, Minn. — Minneapolis Florists' Club, Latham's Conservatory, 83 South Tenth street, August 3, at 8 p. m.

New Orleans, La.—German Gardeners' Club, Fourth and Carondelet streets, August 1, at 8 p. m.

Newport, R. I.—Newport Horticultural Society, August 1.

Pasadena, Cal.—Pasadena Gardeners' Association, G. A. R. Hall, East Colorado street, August 3, at 8 p. m.

San Francisco, Cal.—Pacific Coast Horticultural Society, August 4.

Utica, N. Y.—Utica Florists' Club, Hotel Martin, August 2, at 8 p. m.

GLASS.

We have for sale a lot of 16x18 glass A. & B. D. S., at a low price.

A. DIETSCH CO.,
617 Sheffield Ave., CHICAGO.

An Exceptionally Good Opportunity in the South for a Young Man.

I have an established profitable business from which I have made a good income for years. It can be developed and made more profitable. I want to do work in other directions, and will take in one or two young men, one of whom must be a thoroughly competent grower, and the other (if two) must be a good business man with executive ability and capacity for looking after wholesale business with retail branches (already established). Both must satisfy me absolutely as to their clean character, earnestness of purpose, and willingness to work hard for reasonably sure and early success. Each must also be willing to put in a small amount of money, say a thousand dollars at least, upon satisfying himself of the sale character of the business. I will stay long enough to break in the new men, when I wish to retire from active management, retaining an interest in the business or selling out absolutely, as may be agreed upon. Key 740, care American Florist.

NOTICE

—OF—

STOCK HOLDERS MEETING.

CHICAGO, July 21, 1906.

Stockholders of the American Florist Company:

You are hereby notified that the annual meeting of the Stockholders of the American Florist Company will be held in the Beckel Hotel, Dayton, O., Wednesday, August 22, 1906, at 3 o'clock P. M., for the purpose of electing directors and officers for the ensuing term, and for the transaction of such other business as may come before the meeting.

J. C. VAUGHAN, Pres.
M. BARKER, Sec'y.

OBITUARY.

Max Munte.

Max Munte, who died at Cambridge City, Ind., July 13, at the age of 70 years, was one of the widely known men of this section, a fact due largely to his success as a grower of flowers and to his extensive knowledge of the languages. Some years ago, Mr. Munte's health began to fail and treatment had not benefited him. His chief trouble was rheumatism. A wife survives. Mr. Munte was a native of Germany but for many years he had been a resident of Cambridge City. He gave a great deal of his time to the study of botany and to various languages and was recognized as an authority on both subjects.

Joseph Forsyth Johnson.

Joseph Forsyth Johnson, we regret to note in The Florists Exchange, died July 17 at the Brooklyn hospital, Brooklyn, N. Y., aged 67 years. Mr. Johnson was known in this country as a landscape gardener and was best known in Europe as curator for a number of years of the Botanic Garden, Belfast, Ire. Mr. Johnson was a charter member of the Epping Lodge, F. and A. M., London, Eng., and one of its first officers. The funeral was held July 18, the services being in charge of the Masonic fraternity and the remains were interred in Evergreen cemetery, Brooklyn, N. Y.

LOWELL, MASS.—The old Shepard place lately conducted by P. R. Burt has been purchased by Patrick J. Riley, the well known nurseryman of this city, who is having the entire plant remodeled and is adding one house 33 x 150 feet. The entire plant is devoted to carnations and is in charge of Adolph E. E. Koch.

SILVER CITY, N. M.—Miss B. L. Boulware will have charge of the Hariston greenhouses, this city, the coming season. These greenhouses were started in July, 1903, as an experiment by Mrs. A. J. Adams and have grown into a fine business, as is proven by the fact that Miss Crawford, who leased them for one year, was sufficiently encouraged to contemplate erecting a plant of her own the following year.

WATCH US CROW.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Think of Aschmann, the great Araucaria Importer of America, before buying elsewhere.

Fill your empty houses now, and make 100 per cent on your money while you are asleep.

Notice.—When you undertake anything, do it well or not at all. This is our motto, adopted eleven years ago, when we imported the first lot of this well known pot plant, the Araucaria Excelsa, from Belgium. These everlasting green foliage pot plants are growing more in favor by the tasteful plant buyers of the land from year to year. Please watch the growth of our importations during the last eleven years. First year, 100; second year, 250; third 500; fourth, 1,000; fifth, 2,000 Now this year, 1906, is our **eleventh anniversary** since we began importing them, and they have grown up to 6,000, this spring's importation.

All these are grown for me under contract by an Araucaria specialist in Belgium. I must say, for the benefit of my customers, that they were never before so nice and large for the money as this year. Perfectly recovered from their sea voyage and well established, planted to 5½, 6 and 7 inch pots, ready ship to all points in America.

I herewith quote you special low prices on them for cash: **Araucaria Excelsa**

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old, $ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. 60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots, 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long, from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots, $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size; their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2 50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them; can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

Cycas Revoluta or **Sago Palm,** 6 to 7 in. pots, 7 to 20 leaves, 10c per leaf.

Cocos Weddelliana, 15c.

Areca Lutescens, made up plants, 4-inch pots, 25c.

Solanum or **Jerusalem Cherries,** 2½-in., per 100, $5.00; the same varieties as we sell at Xmas, for from 75c up to $1.00 each.

Ficus Elastica, Belgian importation, 4-in. pots 25c.

Ferns. A fine assortment of Ferns for dishes, large, bushy, out of 2½-inch pots $5.00 per 100.

Barrowsii ferns, 4-in., 25c; 6-in., 75c. **Scottii,** 4-inch, 25c; 5 inch, 40c; 6-inch, 50c

All goods must travel at purchaser's risk. Cash with order, please.

MIGNONETTE

NEW YORK MARKET.

This is an extra choice strain of Mignonette for greenhouse culture. Our seed is greenhouse grown, raised by a most careful grower.

The plants grow from 2 to 3 feet high and produce flower spikes up to 20 inches long, according to the quality of the soil, weather and treatment. The seed is all saved from selected plants grown from 3 to 5 shoots to the plant and was all saved from the spikes measuring 10 to 18 inches long.

Trade Directory Now Ready PRICE $2.00 American Florist Co., Chicago.

Chicago.

BUSINESS VERY DULL.

Market conditions remain practically unchanged save that the dullness has been accentuated by a shortage in stock. The shipping trade forms about the only business done and if it were not for this, many wholesalers could close their doors with very little loss. Asters have begun to flood the market and are taking the place of carnations which arrive small in quantity and flower. Good prices are being realized on asters, several houses disposing of large lots at $2 per 100. Good carnations manage to bring a fair price although most of the stock is hardly fit to ship. Roses maintain average figures and some very good Chatenay and Bridesmaid were seen. American Beauty is not over plentiful but is in sufficient quantity to supply all demands. Several houses are carrying extensive lines of Lilium candidum and L. auratum which have found a surprisingly good sale. Outdoor stock of all kinds is arriving in good quantities.

NOTES.

Now that the warm weather is fairly upon us with its consequent dull business, vacations seem to be in order. Almost every wholesale house in the city lacks a familiar face each week. First it is employe and them employer, all scurrying away in search of rest and quiet, only to return in a fortnight to face the old scenes and prepare for another year of work. Gus Alles, of Wieter Bros.', Ernest Anderson and Louis Gressenz, of Bassett and Washburn's, and Max Awizzus, of E. C. Amling's, are numbered among those this week who find time the least valuable of all their possessions.

President Eckhart of the west park board has ordered that the extensive plans for the rehabilitation of the parks outlined by Superintendent Jensen in his report last month be carried out. The preliminary plans are completed and the work will be pushed at once. One of the first improvements will be a central conservatory in Garfield park, the bids for which will be let before fall.

The Geo. Wittbold Co., whose establishment faces three streets, intends erecting glass display houses 12 feet high on Halsted street and Aldine avenue similar to the one which already adorns the frontage on Buckingham place.

C. W. McKellar is a busy man this week in the absence of his bookkeeper, Miss Walsh, who is on a vacation. He is carrying a fine line of asters as shipping stock.

F. F. Benthey has been handling some large cuts of roses of late, Killarney and Bridesmaid predominating. Over 12,000 roses were cut one day last week.

Manager J. S. Wilson, of Vaughan's greenhouses, left July 24 on a vacation trip to St. Louis, his old home, accompanied H. E. Philpott of Winnipeg.

Wieter Bros. report a good shipping business despite the slowness of the present season. They claim to have many orders originating in Duluth.

E. F. Winterson is spending a week or two at Mt. Clemens, Mich., on account of his rheumatism, having left for that place July 20.

Robert Newcome is no longer with the Central Floral Co., having left for his home in the Ozark mountains.

The E. F. Winterson Co. disposed of an exceptionally large quantity of asters this week.

The J. A. Budlong Co. has finished planting nine of that firm's new houses with carnations.

Visitors: Miss M. Doran, of Vaughan's greenhouses, Des Moines, Ia., on a vacation trip; Mr. Forsberg, manager J. C. Rennison Co., Sioux City, Ia.

St. Louis.

GOOD STOCK IN DEMAND.

Although business is practically at a standstill, there is no trouble in disposing of good carnations and roses. Outdoor carnations are now coming in and are of fairly good quality. Roses also, are improving; Mamam Cochet can be seen and when good finds a ready sale. Sweet peas are coming in slowly but are short stemmed and plainly show the effects of heat. Gladioli suffered a drop in price and large quantities can be had for practically nothing. Asters are looking well. Tuberoses, however, are very poor.

NOTES.

The Florists' Club meeting next month promises to be a lively one as there will be an election of officers for the coming year. At present the Club has about 100 members, many of them young men who intend to advertise to place the work of the Florists' Club before the public in order to stimulate the demand for flowers. They would like to double the membership next year. Several applications for membership are now on file. Wm. Adels has been instrumental in bringing in many new members.

Prof. Trelease of the Missouri Botanical Garden has issued invitations for the seventeenth annual banquet to gardeners, florists and nurserymen provided for in the will of Henry Shaw, to be given at the Jefferson hotel, August 14, at 7 p. m.

At present much interest centers in the coming picnic and a large attendance is expected. There will be games of all sorts with an abundance of good things to eat and drink.

Adolph Fehr of Belleville. Ill., was a visitor July 20. He had a large wedding contract for house and church decorations and used sweet peas extensively.

Fred W. Bruenig has been very busy with funeral work the past week. He handles quite a large number of flowers grown on his farm at Columbia. Ill.

Geo. H. Angermueller went to Paducah Ky. on an excursion as the guest of Rudolph, the carnation specialist, last week.

Fred Alvers and Geo. Angermueller intend taking a vacation early next month. They will go to Niagara Falls.

Park Commissioner Aull is engaged in planting several small parks in the crowded districts of the city.

W. F.

NAMPA, IDA.—Louis Poland, of Des Moines, Ia., is preparing to move here to go into the retail business.

A NEW FEATURE. HELP IT ALONG.

The Dayton Souvenir

WILL CONTAIN A

PICTORIAL DIRECTORY

of Leading Florists, Seedsmen and Nurserymen of the United States and Canada.

The objects being,

1. To establish your personality among the trade.
2. To aid in identification at the convention.
3. To furnish a pleasing memento of the convention, a reminder of pleasant associations.
4. A reference book, invaluable in choosing future business associates.
5. In interchange of business by mail, a likeness is next to a personal acquaintance.

Whether you attend the convention or not, it is to your interest, from a business standpoint, to be represented as a leading, up-to-date florist. One telegraphic order may more than pay the cost of your advertisement in this book, to be distributed over the United States and Canada.

Besides the usual number of fine illustrations of Dayton and vicinity, one great feature of this Souvenir will be a section devoted to civic improvement and welfare work, in which our city leads, and which will be finely illustrated, thus becoming a reference book of incalculable benefit.

Upon the receipt of $5.00 and your photograph, we will insert your business card, illustrated with your picture, and mail to you a copy of the Souvenir and your half-tone cut, prepaid. Copy must be in by August 5.

CHOICE STOCK SCARCE.

There is a great scurrying for anything good in the cut flower line on Monday mornings. All the choice stock comes from out of town, as nothing being shipped on Sunday evening by the Puritans the Quakers have to be satisfied with flowers grown in their atmosphere, which just now is very hot and humid. Thorn Hedge is sending in some nice flowers of pink and white Japanese lilies. The Robt. Craig Co. is supplying the market with auratum lilies and gardenias, the latter being very nice indeed. Orchids are all out of this market, the supply coming from New York. White and purple asters can now be kept in stock and are a great help, as also are gladioli, which make a good window effect for little money. Rudbeckia is now in and helps to make a show, but finds little demand. Tub hydangeas are now making a fine show with their wealth of heavy blooms. They may be something of a care during the winter and early spring, but they certainly pay up when called upon to do duty on the lawn at this time.

NOTES.

Speaking of hydrangeas, how about the Ohio find, this snowball found rolling wild in the woods of this woolly state? What is this that "E. G." is trying on us this warm weather? A large bush four feet high and the same in width and so covered with white flowers that one might almost mistake it, but for the season, for a snow drift, and this has just been discovered. Where are Sander and Veitch that they missed this good thing? Would it not be well for the members of the convention while in this wild and uninhabited region to take to the woods between sessions (from the photos we have seen of the hall it would seem as if they were not far away) and do a little exploring and collecting on their own account? They might find a scarlet one and then we would have the national colors. What a great show such a bed would make on the glorious Fourth. Then in some clearing a new rose or two might be discovered or an Ohio longiflorum, a beautiful healthy variety that would forever free us of the Japs and Bermudas. These native novelties would be brought triumphantly into the convention hall and keep President Kasting busy with the gavel for a little while at least.

Speaking of the convention, things are begining to warm up a little and it may be found that the transportation committee will likely have to order another car before the day of departure. All the large firms in the plant and florists' supply line are going to have fine exhibits, so that this, the strongest feature of the convention, is likely to excel all previous efforts.

Harry Bayersdorfer and wife returned from their European trip July 21. Harry says there are shiploads of goods coming and among them a number of novelties that will be in time for their display at the convention. Harry celebrated the Fourth of July at Ollioules in the south of France.

John Westcott says fishing was never better on Barnegat bay than it is at this season. One is almost sure of a catch any day and at times the fish are so plentiful and bite so readily that it seems almost wanton to haul them in.

Dictionary references: "Profession, the business which one professess to understand and practice for subsistence; a calling, occupation or vocation superior to a trade or handicraft." That's us, has been ever since so long ago that we forget the beginning. Wake up "Phil," you're slow. Again: "The collective body of persons engaged in or practicing a particular calling or vocation." The latter will do for the Daytonites in August. K.

Boston.

BUSINESS FAIR.

Business has been fairly active and favored by perfect weather, flowers are more abundant and of better quality than in the previous week. Most of the stores had plenty of funeral work to keep them busy mornings, but afternoons it was quiet, owing to the fact that the cut flower trade is almost at a standstill. The market is not deluged with stock but there is a good supply of everything with the exception of good carnations and red roses. Among the roses Kaiserin, Carnot and Wellesley take the lead, best grades selling at $1.50 a dozen. American Beauty and Liberty shortened up considerably the past week. Fair Maid still reigns among the carnations, selling easily for $2 per 100. Other indoor carnations are poor, yet they work in well in funeral designs. Asters, sweet peas and gladioli are coming into the market in good quantities. Outdoor carnations are just putting in their appearance.

NOTES.

The annual picnic and games of the growers of Park street and Music Hall markets will take place Sunday, August 5, at Childs' Farm, Waltham. One of the events is to be a ball game between the growers of both markets for a purse of $25. The outcome is looked for with great interest, as considerable rivalry exists between the two places. Wm. Nicholson, Jr., is captain and Joseph Free manager of the Park street team; Thos. F. Matthews, captain, and Harry Ward, manager, of the Music Hall nine. Another feature will be a trotting match between Pat Donahue of the Waban Rose Conservatories, and Chas. Evans, purse $25 a side. Perry Green and Bill Anderson will run a foot race, the loser to pay for the suppers of both.

Tom Pegler has leased three greenhouses, at Wallaston, which he will devote to the growing of double violets this fall. Tom, through his genial ways, has made many friends among the retailers and all wish him the greatest success in his new undertaking.

Among those on their vacations at the different stores are: August Kamp of Julius Zinn's, Wm. Winnett at W. E. Doyle's, also James J. Coleman, H. E. Hartford and W. J. Haverty at T. F. Galvin's, and Harry Kelly of J. Newman & Sons.

Tom Leamey, salesman for the Waban Rose Conservatories, left the first of the week for a two weeks' trip through New Hampshire.

Lewis R. Jackson, Woburn, is building a new greenhouse, thereby doubling his present growing capacity.

S. J. Goddard is sending to market the first of the outdoor carnations, namely, Queen and Fair Maid.

Herbert E. Caspers, salesman for John Foote, is spending two weeks down on the cape.

John Forbes, Jr., is summering at Narragansett Pier.

W. H. Elliott is cutting some excellent Kaiserin roses.

E. Sutermeister is visiting his son at Portland, Me.

Kidder Bros. are sojourning at Rangely lakes. B.

Washington.

OUTDOORS STOCK IMPROVES.

Though busines must for some time to come, continue to be rated as slow, several of the stores had large funeral orders during the past week. There is an improvement in the quantity and quality of outdoor stocks, fine gladioli being noticeable. Small lots of asters have appeared, but disease and insects are working havoc in some gardens. Water lilies are abundant and several stores with their aid have made up very creditable aquatic window displays. There are plenty of roses to supply the demands of funeral work and field grown carnations though short stemmed are just as useful for purposes of design.

NOTES.

The outing at Chesapeake beach for July 24 was indefinitely postponed on account of lack of interest among the florists. All is not lost, however. The Caledonian club has an excursion to Marshall Hall, July 25, and it is expected that a large delegation of florists will be there, led by chief clansman John Robertson.

Alfred Ellaby, of Riverside, a Maryland suburb, is also sending in asters and extra fine lots of gladioli. In a short time Mr. Ellaby has made a record as a grower of outdoor stocks.

Theodore Dietrich is sending in good asters, but complains about the bugs. S. E.

Springfield, O.

At the second gathering of florists of Springfield and vicinity, held July 16, reports were received from committees appointed at the initial meeting. A constitution and by-laws were adopted, the name of the organization to be the Springfield Florists' Club, regular meeting to be held on second Monday evening of each month. Officers to serve for one year were elected as follows: John M. Good, president; Roger H. Murphy, vice-president; Chas. W. Schmidt, secretary, and Roy McGregor, treasurer. An entertainment committee was appointed which has since announced first picnic to be held at Eichholz park on Thursday, August 2.

The Daily News of July 20 states: "Big hay wagons were used to carry 56 of the employes and their families of the Good & Reese Co. to Clifton Friday morning, where they are holding their picnic. The day is being spent in playing ball and other outdoor sports."

A new record was established this season by the Leedle Floral Co., which made its first shipment of young rose plants from early summer propagation on July 11, new stock not ordinarily being expected to be in shipping condition until early fall. G. DALE.

MARKET DEVOID OF INTEREST.

With the middle of the dull summer season almost at hand the market naturally continues to be devoid of interest. The extremely warm and humid weather, with the thunderstorms and rains experienced during the past 10 days has cut down the supply of flowers to an extent which has made cleaning up somewhat easy, but quality, particularly of outside flowers, is in general exceedingly poor. Roses of good quality are taken freely, and the supply is sufficient every day. Stock of poor quality goes at prices which are unquotable, indeed much of it cannot be given away. American Beauties have fluctuated in price during the past few days, as far as the special grades are concerned, in accordance with the volume of arrival. Lower grades have been practically steady. Richmond roses are plentiful but are not attractive, owing to their tendency to open too freely. Good Kaiserin are to be had, and bring good prices, as also does Carnot. Carnations are now at low ebb in point of supply, and such as are coming in are not wanted, if anything else will serve the purpose. Asters, although early in their season, are coming in quantities too large for consumption. Eight to 12 bunches for a dollar covers fairly good stock. Purple asters do a little better. Lilies are stronger on account of a shorter supply, and have touched 8 cents. Sweet peas are not quite so plentiful, the weather destroying a good deal of the crop. Gladioli are in good supply and move well when of good color and form. Among the outside stock arriving is swainsona and it is taken quite freely. Cattleyas are somewhat over plentiful and values suffer accordingly.

The Market, July 25.—The market is lethargic to-day and asters are a glut, the lower grades going at clean out prices.

GOOD CONVENTION DELEGATION.

From present prospects a goodly number of florists from this city and vicinity will attend the S. A. F. convention at Dayton, O., August 21-24, including many who never attended a convention before. The arrangements made by the transportation committee of the Florists' Club for a pleasant trip are perfected and visitors will be able to stop over at Niagara Falls on the return trip. One or two Pullman cars will be attached to the Southwestern Limited, one of the finest trains running out of this city, and the committee J. B. Nugent, Jr., Walker F. Sheridan and F. H. Traendly are already booking berths. As previously noted the fare for the round trip is $22.67.

NOTES.

On a recent trip of the S. S. Kaiserin Augusta Victoria the florist in charge of the florists' department carried a large stock in store and cold storage of carnations, cattleyas, sweet peas, American Beauty roses, lily of the valley, gladioli, cornflower, daisies and centaurias. Potted plants included ericas, asparagus, hydrangeas, palms, and ferns. Besides the demand met from passengers the florist supplies all table decorations and looks after all plants. It is strange that most of the stock bought in New York was supplied by a New Jersey retailer.

George T. Schuneman, Baldwin, L. I., has planted this year six of his houses with carnations. The only variety used is Goethe. The remaining three houses are planted with violets. Mr. Schuneman has often experienced trouble in getting his supply of water through the agency of a windmill, and therefore has installed in his cellar an electric pump and motor, getting contract power. He says when there is no wind for the windmill he will have plenty of power for the pump.

The vacation season is on in earnest, and those who have not already departed are preparing to do so. A. Moltz is summering in the Catskills. A. H. Langjahr has passed a short sojourn at Asbury Park. J. H. Troy leaves this week for Europe. John Seligman will go to the mountains next week. Clarence Saetford is putting in his vacation at Rhinebeck.

Philip Haas, College Point, L. I., just completed the heating of his three 85-foot greenhouses, changing from steam to hot water. Anton Schultheis' two new houses have also had their heating systems installed. The Johnston Heating Company were the contractors in both cases.

The Brooklyn water department has acquired the property of G. F. Neipp, Acqueduct, L. I. Mr. Neipp expects to continue his business in another location, but has no present plans as he will not have to vacate his establishment for a few months.

The city recently bought a 20-foot strip of the second avenue front of W. H. Siebrecht's property in Astoria, L. I. necessitating the tearing down of five of his greenhouses. He is now building seven new houses to fill the gap made by those removed.

Ice is a problem with the wholesalers just now, that is in so far as regards price. Just double in cost to what it was last year, everybody is economizing in its use, finding it better to clean out stock than pay most of its value to the ice trust.

Chas. Smith, Woodside, L. I., has purchased a large tract of land at Bound Brook, N. J., and will build one large greenhouse there this year. His Woodside establishment will be operated in the future by one of his sons.

Jack Gunther is spending the summer at Rockaway, but comes in to W. H. Gunther's store almost daily. Julius Lang is enjoying the season at Tottenville, S. I., but gets to his store about three days each week.

Henry Bullman, the Amsterdam avenue florist, sails for Europe July 31 by the S. S. Kronprinz Wilhelm.

Louis Schmutz and wife sailed July 24 for France on the S. S. Bremen, for a visit to their old home.

Baltimore.

A WORD FOR COCHET ROSES.

The earlier part of last week trade showed some briskness and pretty much all the stock offering went off at fairly good summer prices, but towards its end there was all around dragging and great quantities of flowers went Saturday night to the dump. There were thousands and thousands of Cochet roses for which there were no bidders. This beautiful outdoor rose both in the pink type and the even lovelier white spot is a great acquisition by its many admirable qualities to our garden sorts, and the white is particularly well adapted for summer cultivation under glass. But its widespread and indiscriminate planting under all conditions and in all kind of soils, and the lack of care in its cultivation seems, in this territory at least, to have produced a glut which cannot be disposed of to any advantage, if at all. Great quantities of flowers cut from young stock and pushed on the market regardless of quality only give a bad name to one of the best varieties of the season, when properly handled.

On Sunday, we had one of the heaviest rain storms ever experienced in this section. Within 24 hours over six inches of water fell, the maximum previously recorded being 5.08 inches. There were at times heavy thunder storms, but fortunately the wind, generally, was not very high. Roads were dreadfully soaked, bridges carried away and growing crops were injured or destroyed, but there are no accounts yet of any heavy individual losses, nor of any specially amongst the trade. It will take several days for outdoor stock to recover from the tremendous downpour which it encountered. S. B.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

FRENCH bulbs are now afloat and due in New York at an early date.

THE onion seed crop in California will be harvested about August 1.

THE onion set harvest is on in the vicinity of Chicago and results will soon be in shape to figure on.

VISITED CHICAGO: Arthur H. Luck of the seed department of the German Nurseries, Beatrice, Neb.

VISITED NEW YORK: Thos. Grey. of Boston, Mass.; G. Foucher, representing Denaiffe & Son, Carignan, France.

SEDALIA, Mo.—L. H. Archias and two daughters are the guests of Mr. Archias' brother, J. C. Archias, at Denver, Col., for a few weeks.

BEANS in northern New York have been doing well but have had somewhat too much rain. The crop promises at this time to be normal.

PEA crops in northern Michigan suffered somewhat from drought and hot weather the first half of July. Since that date prospects have improved.

NEW YORK.—Wm. C. Rickards, Jr., for the past 22 years with J. M. Thorburn & Co., and his brother, A. J. Rickards, for many years with Stumpp & Walter, have purchased the seed business of Alfred Bridgeman, 37 E. Nineteenth street, and will take it over at the same address August 1.

ONE of our Michigan correspondents writing July 18 says: "Peas are in good condition and if nothing unforseen occurs will harvest the best crop in several years. Early peas are being harvested under favorable skies. The stand of bean is very good and the color healthy, but the growth is short due to the cold spring. Under favorable conditions the crop will be good but if dry hot weather prevails the yield will be shortened to a certain extent."

Nebraska Seed Crops.

Waterloo, Neb., July 16, 1906.—The results of my inquiries, says one of our correspondents, is that vine seeds have not done as well as they should, cucumbers especially. Squash is best. The weather has been wet and rather too cold for this class of crop. The corn on low ground suffered from too much moisture and looks yellow, but a turn of the weather will change all that. Work on gathering onion sets was begun July 10, a lot of Australian Browns being ready then. The local acreage is about 50 acres and the yield promises to exceed the average.

Another correspondent writes July 24 as follows: "Our vine seed crops are doing as well as they should at this season, although we have promise of a fair crop. The nights are cold and there has been rather too much rain. Aphis has shown up in spots, but we hardly expect serious damage from this. Sweet corn in the later varieties is looking fine, while prospects on early kinds are not so good. On the whole the season has been an average one and an average crop will no doubt be harvested."

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.

Braslan Seed Growers Co.

WHOLESALE SEED GROWERS.

SAN JOSE, CALIFORNIA.

Connecticut Seed Crops.

Orange, Conn., July 23, 1906—Seed crops at present in Connecticut are very far from a satisfactory condition. The last three weeks in July have been exceedingly muggy and rainy, almost every day there has been a heavy shower and this at the time when carrot, beet, onion, etc. are in the blossom makes it looks as if the crop of all of these would be exceedingly light. Kale and turnip on the other hand have been badly damaged in the field after harvest by the weather, it being almost impossible to secure the seed except in a very much damaged condition.

Many fields of onion will be almost a total failure from blight and from the weeds, as it has been impossible to get into the seed for three weeks owing to the fact that seed if worked during wet weather is sure to blast.

Sweet corn is looking well at this date, but the acreage is far from as large as it was last year.

S. D. WOODRUFF & SONS.

Milford, Conn., July 14, 1906.—We can not agree with the writer of a previous article about the large acreage of onion seed. We believe the acreage is far less than in previous years. The crop looks fairly well at present, but with indications of blight thus early in the season. Regarding corn we think the crop very late, with a fairly good staud, but far less acreage than is usual. Beet seed is looking remarkably well at this writing, other seeds about an average."

EVERETT B. CLARK CO.

Onion Sets at Louisville.

Wood, Stubbs & Co., of Louisville, Ky., kindly supply THE AMERICAN FLORIST with their views on Louisville and general onion set conditions in the following letter under date of July 13:

"The acreage of onion sets sown in the vicinity of Louisville this year was about the same as usual, but owing to unfavorable weather many of the seeds did not come up altogether satisfactorily and it looked at one time as if the crop would be very much shortened.

"However, as the season has been fairly favorable for the growth of sets (not too wet) those that were thought at one time would make altogether pickle onions have turned out fairly well and we are looking for a fair average crop of sets of good quality.

"Last season, owing to the very wet weather and the continual rain during harvesting, many Louisville sets were of very bad quality, especially whites. In fact, it was almost impossible to get white sets of very good quality. We are not anticipating any such trouble this year and there will not be anything like the shrinkage there was last year.

"Some sets have already been dug, though no movement in the crop has taken place as yet. From crop reports in other sections it seems to us that sets will be somewhat higher than they were last year, and we are anticipating considerably higher prices in the winter and early spring months than ruled last year."

Free Seed Distribution.

At a meeting of the executive committee of the National Agricultural Press League held at St. Louis, Mo., recently, the following resolution was adopted:

Resolved, That the National Agricultural Press League is opposed to the government distribution of free seeds except so far as is necessary for experimental purposes in the introduction of new, rare and valuable seeds within the meaning of the original act authorizing seed distribution. The distribution of ordinary field, vegetable and garden seeds as a gift from the government is a degeneration from the original purpose and is not approved in principle or practice by self-respecting farmers or farmers' associations throughout the country, and there is no more to be said in favor of government seed distribution as at present conducted than there would be in favor of a regular distribution to farmers or any other class of citizens of free beef, free sugar or free flour at the expense of the taxpayers of the country.

It is directed that a copy of this resolution be sent to all senators, members of congress, the United States Agricultural Department, agricultural papers and to others interested.

(Signed) PHILIP H. HALE,
CHARLES F. MILLS,
JOHN M. STAHL,
Ex. Com. Agricultural Press League.

European Seed Crops.

One of the leading Erfurt growers writes as follows, July 7, 1906:

"In consequence of the long wet spell in May and the cold weather at the beginning of June everything is so backward that nothing can be said as yet with regard to the crop prospects. The few biennials in bloom, such as Campanula Medium, Dianthus barbatus, digitalis, Vienna carnations, Dianthus plumarius, matricarias and pansies are promising a good crop. Larkspurs also promise well providing the wet weather we experience at present does not continue. Open ground annuals, such as nemophilas, eschscholtzias, phacelias, etc., are healthy. Of other annuals there are only phlox, silene, and clarkias in bloom. Asters suffered from the wet, but they can still recover." Another important house writes:

"It is as yet too early to form an opinion about seed crops. The weather has been favorable so far, but fall planted pansies have suffered and did not winter through well. The outlook for the crop of this article is not promising as yet."

From a Quedlinburg grower we hear:

"The stand of the growing crops of flower seeds is in general very good.

Pansies, however, especially the choicer sorts, and asters have been somewhat injured by rain."

About Shipping Onion Sets.

During the last two or three years almost the entire bulk of onion sets shipped from the Louisville market were put in burlap bags. Formerly crates and barrels were used almost exclusively, but the weight of the package, besides its expensive cost, adds very largely to the net cost of the onion sets, transportation charges included, to the consignee.

In our opinion sets will carry in bags a long distance as well or better than in ventilated barrels, as they get more air if properly packed in cars. In car lot shipments early in the season ventilated cars—cattle cars and box cars, with doors wide open and slatted—should be used. In November and December in our latitude ordinary box cars are used. In the latter part of December, January, February and March, refrigerator cars are used.

Onion sets frozen in transit will not be hurt seriously in one case out of a hundred providing care is used in handling when they are received in this condition. When frozen even slightly they must not be emptied out of the packages in which they are received, and must be handled very carefully so as not to cause bruising. Arriving in this condition, if put in a moderately cool room and allowed to remain there until thawed out, they will return to a sound, firm condition and do not appear to be injured so far as their producing qualities are concerned.

DELAYS IN TRANSIT.

Reliable dealers use every precaution to have sets reach customers in first class order. In winter bills of lading should read, "Rush—Perishable," and the sets should be traced to their destination.

However, onion sets will sometimes arrive in bad condition, due to delay by transportation companies. Whenever serious damage results from these delays by the transportation companies, the companies are responsible, and will or should pay claims for this damage to the consignee.

In case there has been any undue delay by the transportation companies, sets should be taken out at once from the depots and the attention of the proper authorities called to delay in arrival, also if plain evidence can be shown that injury has been done, the paid freight bills must be marked, "Received in bad order" by the railroad official who makes delivery to the consignee.

If these precautions are adopted, unnecessary disputes and delays will be avoided in the collection of claims.

WOOD, STUBBS & Co.

The Spring Business.

REPORTS OF LEADING HOUSES.

Amzi Godden Seed Co., Birmingham, Ala.—Our past season's business has been fully 30 per cent greater than any previous year. The increase in garden seed proper has shown very little increase. This was doubtless due to the very much decreased acreage throughout the south in vegetable crops; and the prospective high price for cotton has had considerable to do with the acreage devoted to vegetable crops. The increase in our business can be attributed to the improved demand for all sorts of farm seed. The weather thus far has territory, which has doubtless contributed been very seasonable throughout our somewhat to the unusual demand for grass seed and forage plants of every description. Our greatest percentage of increase in business has been through the medium of our catalogue.

PLANT NOW. LILIUM HARRISII FOR EARLY FORCING.

We offer some extra choice Lilium Harrisii which has been grown for us from the original, pure stock. This is the kind of stock that you want for the very earliest forcing, as it is the true, original Harrisii. The small sizes, 5-7s and 6-7s are particularly desirable for this purpose, as they will flower more quickly than the larger bulbs. If you want to get a little of the original, pure Harrisii, try a case or two of this. As our stock of this is limited, we can offer only a few cases to a single buyer. If you have been dissatisfied with the Harrisii that you have forced heretofore, try a case or two of this, and see if it is not more than worth the difference in price over the stock that you have been buying. In ordering, ask for the pure selected strain of original Harrisii, which we offer as follows:

5 to **7**-inch bulbs, 400 to the case	per case.	**$17.00**
6 to **7**-inch bulbs, 350 to the case	per case.	**17.50**
7 to **9**-inch bulbs, 200 to the case	per case.	**18.00**
9 to **11**-inch bulbs, 100 to the case	per case.	**18.00**

EASTER COMES EARLY NEXT YEAR—MARCH 31—and a great many growers will want to use Harrisii instead of Longiflorum so as to be sure to have the plants in flower in time, as the season is going to be short for Japan Longiflorum. The crop of Harrisii this year is the shortest it has been in years, and in view of the extra demand, we advise those who have not already covered their requirements to lose no time in doing so.

For very earliest forcing—Christmas and later—we recommend the pure Harrisii offered above, but for later forcing, for Easter, our customers will find the regular stock offered below first-class stock—much better than the average stock usually offered. We can quote the regular stock as follows:

6 to **7**-inch bulbs, 350 to the case	per case.	**$14.00**
7 to **9**-inch bulbs, 200 to the case	per case.	**15.00**
9 to **11**-inch bulbs, 100 to the case	per case.	**15.00**

FREESIA REFRACTA ALBA, the true white variety. Now ready. Finest Bermuda-grown stock, $1.00 per 100: $7.50 per 1000.
BERMUDA BUTTERCUP OXALIS, $1.00 per 100: $7.50 per 100.

F. R. PIERSON CO.
Tarrytown-on-Hudson, New York.

Glen Cove, N. Y.

The regular monthly meeting of the Nassau County Horticultural Society was held at the usual place July 11. The attendance was large, with President Harrison in the chair. There was one nomination for active membership. The prize for the best exhibit of sweet peas, three varieties, 25 of each, was awarded John F. Johnston. In the competition for points S. J. Trepess scored 92 2-3 with peaches, melons and Nephrolepis Whitmani; A. Mackinzie 90 2-3 with adiantum, caladuim, and peaches; Felix Mense 81 2-3 with hollyhocks, roses, and stocks. H. F. Meyer made an exhibit of outdoor grown vegetables and fruits including lima beans, tomatoes, sweet corn, cucumbers, peppers, and blackberries, and received special mention from the judges for same. A silver match safe will be given, at next meeting, for best exhibit of six varieties of vegetables. W. Williams tendered his resignation as a member of the executive committee and F. Boulon, of Sea Cliff, was appointed in his stead.

ABUNDANCE!

Healthy stock, field-grown plants, 1st size, $12 per 100; $100.00 per 1000; 2nd size, $10 per 100; $75 per 1000; 250 at 1000 rates. Delivery 15th of August. Cash with order.

Abundance is an easy lifter, takes hold quickly and makes good sized stems on first crop.

Freesia Purity bulbs all sold out clean.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

PORTLAND, ORE.—J. B. Pilkington has gone to Europe to investigate the walnut culture and select nursery stock for his fall trade. He expects to return about September 1.

ELMSFORD, N. Y.—Wm. Scott, who has been superintendent on the Eastman estate at Tarrytown, and Jas. T. Scott, for the past two and a half years traveling salesman for the F. R. Pierson Co., at the same place, have started a general florist and nursery business here with 30 acres of land. A modern range of greenhouses is being erected. The firm, to be known as the Elmsford Nurseries, will devote its attention to such specialties as carnations, gardenias, foliage plants and grafted roses. A general line of bedding and other plans will be carried.

Pacific Coast Nurserymen.

The fourth annual meeting of the Pacific Coast Association of Nurserymen, held at Tacoma, Wash., July 11, was well attended, California, Oregon, Washington and British Columbia all being represented by strong delegations. An able program was well carried out, and there were also some notable exhibits. A feature of the convention was a trip to the Puyallup valley on invitation of the fruit growers of that region and the Puyallup board of trade. Officers for the ensuing year were elected as follows: F. W. Power, Chico, Cal., president; C. F. Lansing, Salem, Ore., W. D. Ingalls, North Yakima, Wash., C. W. Howard, Riverside, Cal., M. J. Henry, Vancouver, B. C., P. A. Dix, Salt Lake, Utah, and C. P. Hartley, Caldwell, Idaho, vice- presidents; C. A. Tonneson, Tacoma, Wash., secretary-treasurer. On invitation from the California delegation the association decided to hold a special meeting in that state in connection with their State Fruit Growers' and Inspectors' Association.

Care of Transplanted Trees.

In the work of beautifying the grounds of the Jamestown Exposition, near Norfolk, Va., many thousands of trees and shrubs were skillfully and scientifically transplanted, some of them being brought from long distances and carefully transplanted along the walks and drives of the grounds. The work was done under the direction of Warren H. Manning, the well known landscape designer, and Chas. H. Pratt, superintendent of the grounds, and the results obtained attest to its excellence. Concerning the transplanting of trees and the attention they require, Mr. Manning said:

"Watching, mulching, watering, trimming, fertilizing is the order of the day now on the exposition grounds. The trees and shrubs are being closely watched to note their behavior after the shock of removal. The removal of a plant means a loss of roots and a change in conditions that requires, especially in the larger trees, a large stock of vitality to secure a safe recovery. First, the roots that help to pump the water from the ground to the leaves to supply the loss from evaporation must get to work promptly; some trees are dead because the drainage was not good enough to take the standing water out of the holes, and the tree roots were drowned, as they surely will be if the roots are completely submerged in water for a long time. Others, we know, died because a sudden freeze following a rain storm caught the roots before sufficient top soil could be secured to cover them completely.

"Some of the cedars, as they were being rafted across the waters of the marsh, were caught in a sudden squall, and their roots were given an involuntary salt water bath; these trees seem to lack sufficient vitality to make a good recovery, or perhaps their roots were cut too short.

"With all the adverse circumstances that must come to trees moved for miles in all weather over all sorts of roads, and planted in soil only recently drained, the loss in the 1,500 big trees promises to be below the average of the first year of such planting. The loss in the shrubs is, with very few exceptions, much below the average. Some of the finest kinds, like the evergreen, wild myrtle, the wild roses, flowering dogwood and mountain laurel are almost all alive and growing vigorously..

"Mulching, that is, covering the surface over the roots, helps newly planted shrubs to gain a foothold, because it keeps an even condition of temperature and moisture at the roots. We are using coarse manure, grass and leaves for this purpose. The manure supply, always an important consideration, is here secured by supplying the contractors with bedding for their horses with the understanding that they allow the manure to be used on the plantation. Thus grass that must be cut, and would otherwise be useless is made to bring a return, just as a return of fertilizer is secured from the ashes of the brush and wood that is burned in the clearing operations.

"Where trees and shrubs are growing vigorously little or no water is required, but where they are starting slowly, then the ground about the roots is well water soaked about once a week in dry weather. About the tree holes are punched to the depth of the roots, and these holes are repeatedly filled in succession until the ground is soaked. A light daily sprinkling is often worse than useless, as it causes the surface to bake hard, a condition more favorable to rapid evaporation of moisture than is a mulched or loosely dug surface.

"Trees and shrubs were either not trimmed at all or the tops were reduced by the removal of whole branches instead of by cutting off the ends of branches and leaving unsightly stubs. The plants were thus not mutilated in appearance, and where well rooted and vigorous started at once into good growth, as have most of the shrubs. The trees are more closely watched, and where they show a tendency to start into more vigorous growth part way down the branch they are trimmed back to this point.

"Insect enemies must also be watched for, as they are likely to spread rapidly and do serious injury, so an equipment for spraying must be ready at hand for such an emergency. Raising trees and shrubs, like raising children, requires constant care."

New Orleans.

MEETING OF HORTICULTURAL SOCIETY.

The meeting of the Horticultural Society was held at 125 St. Charles street, July 19, with president P. A. Chopin in the chair. All of the officers and 37 members were present. President and Mrs. P. A. Chopin sent a letter of thanks for the pleasant remembrance of the society on their recent wedding and extended a cordial invitation to the society to visit them at their home. At a previous meeting, Chas. Wise, the aged florist, was elected the only life member of the society and a letter of thanks from him was read. One of the features of the meeting was the report of the finance committee that the treasurer holds $665 in bonds and cash. Secretary C. R. Panter's report was very gratifying, showing a membership of 50 and satisfactory conditions in every respect. Dan Newsham, nephew of the late florist of the same name, was admitted to membership by a unanimous vote.

After the meeting the members assembled at the supper room of C. Kolb's restaurant where an elegant table was spread, a highly appreciated treat of the elected officers. Here a few hours was spent and many a toast was drunk to the success of the society.

The following members expect to attend the S. A. F. convention at Dayton, O.: President O. Abele, state vice-president P. A. Chopin, W. Rehm, H. Papworth and H. Elwell.

Columbia, Mo.

Trade in this city during the past spring season has been better than ever known here before. An awakening of civic pride has struck the natives and people are beginning to appreciate the value of flowers. Thousands of flowers are now growing and blooming where only weeds grew before. This stimulus to landscape work has been largely due to the extensive and effective work done during the past 2 years on the campus of the University of Missouri.

Chas. Koeppen is rebuilding his greenhouses and store. The new building will be a great improvement over the old one and will better enable him to handle the greatly increased demand for pot plants and cut flowers.

SANTA BARBARA, CAL.—An exhibition of roses will be held here by the Santa Barbara Horticultural Society August 22 and 23.

NEW CROP SEED IS NOW ARRIVING.

10 PER CENT SPECIAL Cash Discount
On orders over $2.00 for Flower Seeds if the cash is enclosed **10 Per Cent.**

Vaughan's Giant Named Varieties:

	Trade Pkt.	⅛ oz.	Oz.
Giant White, very large, with violet eye	$0.10	$0.20	$1.20
" **Aurora,** pure white without blotches	.10	.20	1 30
" **Adonis,** light blue with a white center, very fine	.10	.20	1.20
" **Auricula Colors,** metallic shades	.10	.20	1.25
" **Black,** large true black	.10	.20	1.25
" **Beaconsfield,** upper petals light lavender, lower ones deep rich purple, almost black	.10	.20	1.20
" **Freya,** deep purple violet, with a white margin	.10	.20	1.30
" **Mme. Perret,** lovely shades of pink and rose	.20	.50	2.00
" **President Carnot,** fine blotched white	.10	.25	1.60
" **President McKinley,** fine blotched yellow	.10	.25	2.00
" **Pink,** lovely shades of pink, same as Hydrangea	.10	.25	2.00
" **Purple,** very large, rich deep purple	.10	.20	1.00
" **Violet Blue,** a very pleasing shade	.10	.20	1.00
" **Striped,** mahogany, striped and flaked white	.10	.20	1.20
" **Parisian Striped,** stripes are broader and louder than the preceding a good seller	.10	.20	1.30
" **Purple King,** a good new sort	.10	.25	1.50

	Trade Pkt.	⅛ oz.	Oz.
Giant Diana, cream color	.10	.25	1.50
" **Atrosanguinea,** blood red	.10.	25	1 50
" **Emperor William,** dark navy blue	.10	.20	1.25
" **Yellow,** immense flowers with dark eye ..4 oz.. $4.25	.10	.20	1.25
" **Cassier,** 3 spotted	.10	.20	1.20
" " 5 spotted, an A1 strain	.25	.45	3.00
" **Bugnot,** the flowers are of enormous size, perfectly round, of great substance	.25	.60	4.50

Giant Bridesmaid. Its ground color is a rosy white, rivaling in delicacy and beauty with the finest apple-blossom. Trade Pkt., 25c: ⅛ oz., 45c: Oz., $2.60.

Giant Psyche. Each flower is elegantly curled and undulated and in every respect a beauty in form and color. Trade Pkt., 25c: ⅛ oz., 70c: Oz., $5.00.

Giant Pretiosa. Each petal is marked with a very large blotch of deep violet color: these blotches are surrounded by a brilliant crimson rose background, and the ground color is margined with a pure white edge. Trade Pkt. (250 seeds). 25c: ⅛ oz., 35c: Oz., $2.50.

BOULOGNE GIANTS. This is a special selection of a French pansy grower: the flowers are of the largest size, of great substance and fine form, and are borne on particularly strong stems. They are mostly 3 and 5 blotched, delicately veined, while the colors are rich and varied. Like all high-bred pansies, they are shy seed bearers Trade Pkt., 50c.

GIANT VOLCANO. Color, bright dark red, each petal being marked with a very large dark blotch. The flowers are of large size and good substance, and the edges of the petals are curled like those of "Masterpiece, from which it is a selection. Trade pkt., 25c.

MARECHAL NIEL. The flowers are very large, without any blotches or veins, and are of the same pleasing, delicate cream color as the rose whose name it bears. Pkt., 10c.

ROSY MORN. A bright purplish crimson margined with a clear white edge. In early spring the color is very deep and rich; as the weather grows warmer, the color gradually turns a pleasing rosy carmine and the silver edge becomes wide. Trade Pkt., 25c: ⅛ oz., 60c.

SIEGFRIED. Of giant size, the flowers are borne on strong stems. They are mostly 5 spotted, with a clear white margin. The colors are of rich brown shades such as are found in the English wall flowers. Trade Pkt., 25c.

Special Mixtures:

VAUGHAN'S INTERNATIONAL PANSIES—The Worlds' Best. This is a combination of as many separate colors, types, blendings and unique kinds as can be found in the world. **It is the best general mixture in existence** and is most widely known and popular. Price per oz., $10.00: ½ oz., $5.00: ⅛ oz. $1.50; trade pkt. 50c.

VAUGHAN'S CUT FLOWER MIXTURE OF PANSY SEED. Especially made from light colored Giant varieties for florists who raise for cut flowers in the house. Trade pkt., 25c: ¼ oz., 80c: Oz., $5.50.

VAUGHAN'S "GIANT PANSY MIXTURE." This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain with its delicate veinings. We have spared no expense to secure the newest, richest and finest sorts. Price, ¼ lb., $14.00: oz., $4.00: ⅛ oz., 60c; trade pkt., 25c.

MASTERPIECE—NEW GIANT CURLED. This strain comes nearer to "Double pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across and the color variations and combinations are odd and striking. Trade pkt., 50c: ⅛ oz., 75c: ¼ oz., $1.35: oz., $5.00

VAUGHAN'S PREMIUM PANSIES MIXED. Embraces all the varieties of the Fancy German Sorts. Per pkt., 25c; ⅛ oz., 80c: ½ oz., $3.00: oz., $5.50

CHICAGO PARKS BEDDING PANSIES. "Choice mixed," pkt., 10c: ¼ oz., 30c: oz., 75c: 4 oz., $2.50

VAUGHAN'S "ELITE" MIXTURE. This is not a complete mixture like our International: it does not contain any pure white, yellow or any self colors, nor any other of the well known kinds. It is comprised of the cream of four Pansy specialists' choicest and most expensive mixtures and such new and novel kinds as listed above. Trade pkt., 50c: ⅛ oz., $1.00

NEW ORCHID-FLOWERED PANSIES. A most interesting type of Pansies of the Giant Flowered Class, containing a mixture of the most surprising, novel, unique and beautiful color combinations. The upper petals are upright and sort of plaited, which gives the flowers their resemblance to orchids. The colors range in the terra cotta shadings as well as in the flesh orange, rose, pink and lilac. Trade pkt., 250 seeds, 25c.

IMPROVED GERMAN MIXTURE. This is a mixture of three strains from different German growers and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 10c: ⅛ oz., 20c: ¼ oz., 30c: oz., $1.00

VAUGHAN'S SEED STORE,

84 and 86 Randolph Street, CHICAGO. **14 Barclay Street, NEW YORK.**

OUR PASTIMES.

At Utica, N. Y.

FLORISTS' CLUB OUTING.

The fifth annual outing of the Florists' Club was held July 17 at Three mile point, Otsego lake. Although the weather prospects were unfavorable in the forenoon there was a representative for every ticket sold and about 75 florists and friends started on the 56-mile trolley trip. The ride from Utica to Cooperstown is through the prettiest and roughtest section of central New York. Upon arrival the clouds were breaking but as it was raining lightly the party at once embarked on the steamer "Mohican" for Three Mile Point, where everything was in readiness for dinner and pleasure. The hard work had been done by Wm. Wagner and wife, of Cooperstown, who received the thanks of every one present for the success of the excursion. After spending three very pleasant hours at the point the boat "Pathfinder" called for us and we had a 22-mile ride on the smooth waters of the lake. The rain had ceased and with the fine music of a five-piece orchestra which had been taken along the ride will be remembered by all as one of the most enjoyable of their lives. During the ride the president, Frank Baker, requested that the orchestra play a wedding march in honor of two coming events. When the boat landed at Cooperstown again there were four hours to visit the many points of interest in the historic old town. Some spent the time in mountain climbing while others visited spots made famous by James Fennimore Cooper's novels, also his grave. At 8 p. m. a more satisfied crowd would have been hard to find than those waiting for the special car to start on the homeward journey, the only regret being that they could not stay for a much longer time. Among the out-of-town guests were: Mr. Coakley, of the Scranton Florists' Supply Co.; Joseph Trandt, of Canajoharie, N. Y.; E. F. Quinn, of Norwich, N. Y.; Edw. Byam, wife and children, also C. B. and Miss Humphrey, of Rome; Geo. Benedict and wife, and Wm. Owens and wife, of Whitesboro, N. Y.; Mrs. and Miss Wiesbecker, of Ilion.

AT THE UTICA FLORISTS' CLUB PICNIC, JULY 17.

Twin City Florists' Outing.

The outing of the Twin City florists is now a thing of the past and an occasion that will be long remembered as it was the first time that a river excursion was tried. The weather was perfect for a picnic day and as a result there was a big attendance of the florists, their families and friends.

The start, July 19, was made on schedule time but owing to the low water in the Minnesota river the boat was obliged to turn back and go down river where a landing was made at Red Rock and where the running races and rifle shoot took place. All the events were keenly contested and if Uncle Sam ever wants for any crack marksmen or sharpshooters he would find a small regiment of them right here among the florists.

The shooting seemed to be the most popular event of all, nearly every one trying his hand at it, the ladies as well as the men. And speaking for the ladies I will say that they did very well, one of them coming in for a prize. The prize winners were Carl Peterson, first; N. C. Hansen, second, and Miss Hartman, third.

The ladies' nail driving contest was very poular also. Ten penny nails were used and the lady using the least number of strokes in driving the nail home won the contest. Mrs. Busch won first, Mrs. Raash, second, and Mrs. Henry Puvogel, third.

Elmer Bergstrom won the race for boys under 12 years, Alfred May, second, and Julius Stern, third.

The race for girls under 12 was won by Anastacia Dill, Olivia Hiersekam, second, and Elizabeth Seeger, third.

For boys under 16 Louis Fransen won first prize, Percy Armstrong, second, and Carroll Keiper, third.

In the young ladies' race Miss Helen Latham came home first, Miss Esther Holmberg, second, and Miss Ida Busch, third.

The employes' obstacle race was one of the hottest ever run, and had to be run in heats on account of the number of entries. The course was 100 yards with two hurdles and it gave the boys a chance to show off their athletic attainments. Geo. Roatz won first, after a very hard struggle with Chris Hansen, Jr., after a tie; John Nylof, second, and Robert Topel, third.

The employers' race proved a walkaway for O. J. Olson, Wm. Swanson and Carl Haugen coming in second and third, respectively.

The married ladies' race proved quite exciting. Mrs. Gersmeyer won first, Mrs. Raash, second, and Mrs. Jones, third.

In the tug of war St. Paul proved to be the masters of their Minneapolis brethren, who were not satisfied with being pulled all over the grounds once, but tried it twice with the same result.

The prize waltz was carried off by Julius Neutzling and Miss Bertha Guerenz with first honors, Mr. and Mrs. Lundgren, second, and Otto Kronke and Miss Lane, third.

Dancing was indulged in all the time while on the boat and the young people seemed to enjoy it very much. Ice cream was served to everybody free of charge as well as cigars to the men on the return trip. A fine lot of prizes were distributed to the winners of the different events, which had mostly been contributed by merchants and consisted of all kinds of things from pocket knives to a ton of coal and cut glass dishes.

The bowling events are not scheduled to come off until next week, when teams representing St. Paul and Minneapolis will contest for the gold medal and buttons for each member of the winning team. The medal has been bowled for twice already, St. Paul winning it both times and should St. Paul win it this year it will become the club's property. A big list of prizes is being arranged for by the committee in charge for the individual bowling contest also and a big time is expected.

A. K. Kerchun of Helena, Montana, and N. Clarine of Faribault, Minn., attended the outing and had a good time.

O.

At Chicago.

There was a goodly representation of members at the bowling alleys on the evening of July 24. Among those not seen there for some time were Mrs. Hauswirth, Mrs. Fred Stollery and Mrs. Klunder. We also noted P. J. Hauswirth, James S. Wilson, Fred Stollery, Champion Stevens and H. E. Philpott, of Winnipeg, Man., among those in attendance. The games rolled on this occasion were the first on the final tri-out series for the Dayton team. Fifteen games have to be rolled before convention week and we believe that all who wish to participate can have the time of the games adjusted by conferring with the officers of the Bowling Club next bowling night, July 31, at Bensinger's alleys on Monroe street. The scores made by the ladies were as follows:

Player.	1st.	2d.	3d.
Mrs. Asmus	90	107	74
Mrs. Kreitling	157	134	101
Mrs. Klunder	54	87	64
Mrs. Hauswirth	121	111	74
Mrs. Fred Stollery	80	71	73
Mrs. Scott	120	78	94

Considering that many of the men have not bowled very much this season, the following scores will be found quite creditable:

Player.	1st.	2d.	3d.	4th.
Balluff	142	116	143	147
Hauswirth	118	150	133	151
Klunder	156	114	113	140
Bergman	183	234	169	191
Scott	180	174	143	196
Stevens	174	178	200	168
Asmus	160	150	146	181
Kreitling	180	147	179	127
Stollery	128	177	139	163
Wilson	162	190	145	..

FLORISTS' PLANT NOTES

For Early August.

BERMUDA LILIES.—Owing to a most unfavorable season a shortage in marketable bulbs of Lilium Harisii is likely to seriously interfere with the well laid plans of lily growers for the coming fall and winter. No time should therefore be lost in placing orders and securing the needed supply. Bermuda lilies intended for early forcing must be potted up this month. Bulbs of the smaller sizes are usually from 10 to 15 days ahead of the large bulbs in coming into bloom. This should be borne in mind, when selecting a grade for very early work. They are planted in 5-inch pots, using a rather heavy soil, enriched and made friable by the admixture of thoroughly decomposed stable manure, this to form about one-fourth of the prepared soil. Of the bulbs nothing but the extreme tip should show above ground after the soil has been settled to a level of about half an inch below the rim of the pot by a good watering. The pots are then placed in frames, covered to the thickness of an inch or two with old, well broken up manure, or with coal-ashes, fresh earth, sand, anything that will aid in holding moisture and as low a temperature about the potted bulbs as is possible to provide at this time of the year. In about a month this covering above the pots should be removed. It will then be found that a good many of the lilies have made a promising start, showing well advanced rudiments of roots and a first beginning in top growth. These should be chosen for the very earliest forcing, taken from the frame to a house, kept at about 60° and here brought into bloom by close attention to watering, spraying and fumigating.

OUTDOOR ROSES.—Provided roses in the field are well taken care of they will now make their finest growth. It is unlikely at this season that rains can be relied upon as furnishing the needed supply of moisture; and watering, therefore, must be resorted to as the prime factor in safely carrying the stock through this, the most critical period of open air rose culture. A good watering, one that reaches the roots, will be sufficient for four or five days in the driest kind of weather and a wetting down of the foliage every night with syringe or hose works wonders in keeping insects in check and the plants bright and healthy. An occasional dusting over and blowing through the foliage of hellebore, tobacco dust or slug-shot will drive away greenfly, slugs, caterpillars and other unwelcome guests or keep them from coming. Mildew on roses is an all-season ailment, so common that many growers have fallen into the error of not minding it very much. But the warfare against fungoid diseases must go on, if good culture otherwise is to result in good roses. Powdered sulphur, fostite, grape dust, any one of these effective remedies, judiciously made use of, is excellent in fighting mildew on outdoor roses. Disease at this season presages future trouble and a spotless, perfect foliage, so desirable in pot grown and forced roses in early spring, cannot be looked for on plants that were overrun with rust, black spot, blight or mildew the previous season while yet in the field. Rambler roses, tea and hybrid perpetual roses are ever ready to contract disease of one kind or another and to carry it with them into the following season. It is little trouble to apply reliable remedies and less to apply them in time.

VINCA MAJOR.—The stock of green, mottled and variegated vinca, so important an item in the filling of boxes and vases every spring, is never too abundant. Now is the time to forestall future scarcity. The young, winter-struck plants, set out in the field in the spring, are now beginning to stretch and the vines are gaining in length and strength. If stock is limited and immediate and rapid increase would seem desirable, recourse must be had to summer propagation by layering. Upright vines, not necessarily the stoutest, are laid down, so that they touch the ground, held in place by pegs or by being covered with soil here and there. These and the

natural runners soon form roots on several joints along their entire length and from these joints vines will be sent up, that will attain quite a length by next fall. These vines together with those from the main plants, if cut up into lengths of two joints, will furnish an abundance of cuttings, all of which will root in the fall and grow into nice 4-inch stock by next spring.

FICUS ELASTICA.—When old rubber trees become misshapen and unsightly, useless for decorative work and worthless as stock in trade, they should be made to yield a lot of new little plants of value, ready to pot off and grow on. This is done by wounding one or more of the joints right below the leafy tops of the branches and then tying a handful of moss firmly around the wounded joints. If this is kept moist it will not be long at this time of the year before the moss is penetrated by white roots. Then the branch just below the moss should be cut nearly half through, and a week or two later the rooted top may be cut away entirely and potted up.

GENISTAS.—Propagated from cuttings, struck in mid-winter or early spring, genistas should now be far enough advanced to require 5-inch pots, and if this is the case, they would now fare better outdoors than in the greenhouse. They do best plunged in spent hotbed manure, their pots covered to the rim. Regularly watered, sprayed and pinched back occasionally, fine bushy plants will be had by the time they must undergo their last shift in October. They want cool quarters during the winter and very little in the way of forcing for spring trade. For some unaccountable reason fewer of these plants are grown now than in former years, and yet their culture is the simplest and easiest imaginable and their value as Easter stock and market plants undisputed.

SHASTA DAISIES.—Never since shasta daisies were first introduced did the flowers sell faster or bring better prices than this spring. This may in great part be due to the fact that growers have been exceptionally successful in working up a fine stock by careful selection from numerous batches of seedlings, raised from year to year. More plants are now also grown of the three new and highly improved varieties sent out by Burbank a few years ago, of which Alaska is probably the best. Shasta daisies are now nearing the end of their first great crop in flowering, and if an increase of good stock by division is contemplated it should be undertaken before the plants start again. If attempted much later than the middle of August the plants will not have time to become well enough established to withstand the vigors of the coming winter.

NEPHROLEPIS.—Practice has fairly well demonstrated that the repeated advice to afford Boston ferns the full and unobstructed light should not be followed to the extent of freely exposing the fast growing plants to the excessive glare of the mid-day summer sun. At this the hottest season and at a time when the development of new and tender foliage is most rapid, a light shading during the brightest hours of an exceedingly hot day is most beneficial. It preserves the freshly verdant coloring of the fern, one of its choicest attributes, and it prevents rapid escape of moisture. When Boston ferns (the old type as well as the newer forms) are to be grown into fine specimens by constant pot culture throughout the summer, it is well to plunge them up to the rim of their pots into tan bark, spent hops or some such material, the presence of which would counteract any overheating of the pots by direct sunshine as also the rapid drying out of the soil. Such plants now need careful attention; they do not want too frequent drenching, nor should they at any time become real dry; they should be turned from time to time, repotted when necessary and afforded all the space required for the attainment of natural spread and graceful form. Ferns so grown need a lot of extra care, but they are worth it, being much superior to the stock raised by open bench culture and potted or made up in the fall. For the rapid increase of stock, however, no other method in point of efficiency and dispatch surpasses the growing of nephrolepis in a bench with three or four inches of crisp sandy soil, giving free play to the rooting of runners.

Hydrangea in Tub Packed for Shipment.

SMALL FERNS.—If anything lends grace, gives finish and pleasing outline to any sort of plant arrangement it is the unstinted use of ferns in its makeup. Florists who are constantly called upon to fill baskets, dishes and fancy receptacles with an assortment of foliage or flowering plants, and those who do much work in this line at the holidays, fully appreciate the value of small ferns, of whatever species they may be. This is a good time of the year to stock up, when seedling ferns, yet in trays, are offered at small cost. These, when received, will be found to be of various varieties and of differing sizes, but usually all of them in fine shape and just right for 2 or 2½-inch pots, the size, which is most serviceable in the work for which they are intended. These ferns will be fine, sturdy, well established plants at the holiday season.

HARDY PERENNIALS.—Where the crowding of densely spread growth in the hardy herbaceous border plainly points out the necessity of thinning, resetting, dividing, and probably the making of an entirely new plantation, the work should be taken in hand now, at least with such species as are beyond their flowering season. There is so little time in the spring for labor of this kind and so much risk if performed in the fall that no better time can be chosen than the month of August. Most of the stock replanted at this time will give little trouble in being started and will be in fine condition by next fall to carry safely through the winter. This is also a good month for the sowing of seeds of such kinds as are usually propagated in that way. Some of these will need a pricking off or transplanting before winter sets in, while others should not be disturbed until spring.

E.

Growing Hydrangeas in Tubs.

A visitor to the nursery establishment of F. R. Pierson Co., at Scarborough-on-Hudson, is attracted by a large number of bushy hydrangeas in tubs seen ranged along one side of the mammoth greenhouse. They are of the Otaksa variety and intended for the demand coming from summer resorts and watering places for lawn and porch decoration. The growing up hydrangeas for this especial purpose has long been a special feature of the Pierson establishment and large quantities are shipped every season, some orders filling a whole railroad car.

The plants are grown from cuttings taken from parent stock about the middle of June. The cuttings are planted in a propagating house, the benches having about four inches of sand in them. In from 25 to 30 days the rooted cuttings are planted in three-inch pots and kept in them for five or six weeks. At the end of this period they are planted in frames about eight inches apart each way and allowed to grow along until fall. When winter approaches boards are laid over the frames, also a good covering of manure, which keeps the frost out.

The frames are uncovered as early as possible in the spring, in fact an airing on warm sunny days at the end of winter does the plants a lot of good. After the plants have got nicely started in growth they are taken from the frames and planted in the field, about two feet apart, where they are allowed to grow along until the middle of September, when they are planted in tubs and hardened off. The plants are then placed in deep frames or pits where they are kept all winter, covered as in the previous winter and being aired whenever the weather is warm enough.

When two years old the tubbed plants will average from 12 to 14 flowers to a tub. In the picture showing the plants ranged along the large greenhouse the plants are three years old. The plants seen in the picture around the pit frame are growing along in their third year. The plants, in season, may be shipped anywhere safely by freight.

F. R. PIERSON CO.'S ESTABLISHMENT, SCARBORO, N. Y.
Two-year old hydrangeas and pit in which they wintered.

Mexican Floriculture.

We are indebted to A. J. Pieters, of the Department of Agriculture, for the following extracts from a letter he received from a valued correspondent in Mexico, showing the conditions of floriculture in that country. Mr. Pieters advises us, however, that the locality to which reference is made is not near the capital.

"It will give you an idea of the chance I have of making a living out of floriculture here if I tell you of a very characteristic experience I had today. The swellest confectionery and ice cream store here gives to-night one of its regular tri-weekly evening concerts and sent a boy to me this afternoon for 'flowers to be presented to the ladies at the concert,' without specifying the quantity or saying how much they wished to pay. This is a copy of my bill, sent with the flowers:

12 doz. carnations	$0.36
7 doz. carnations	.07
22 La France roses	.11
30 Choicest roses, ass't'd	.12
20 Standard fine roses, ass't'd	.06
	$0.72

"It is true that there were only five first class flowers among the carnations, but the La France roses were superb, and among the '30 choicest' were fine buds of Kaiserin, Pierre Notting, Antoine Rivoire, Cochet, Testout, Sunrise, Etoide de Lyon, Prince of Bulgaria, Carnot, and Golden Gate, and I think I was right in being disgusted when the boy brought me the money and a polite intimation from the house that my charges seemed a little high. I venture to say that the lot I sold for 72 cents silver, would bring $15 gold, readily in any of the northern cities.

"I can cut daily about 1,500 rose buds, mostly La Reine, at times equal to American Beauty, but all I can get for them in the market is 8 cents per 100, and as the delivery baskets carry only 350 to 400 buds, representing 28 to 32 cents value, it really isn't worth the trouble to market them, as the cost of cutting and delivering a basketful is about 13 cents, leaving but 15 to 19 cents for me, or say 75 cents if I sold all the 1,500. At this season one sees sitting along the edge of the sidewalk near the market a string of Indians offering two bunches of roses containing five flowers each for 1 cent, and on Sunday, I saw one criminal selling the old fashioned Scotch pinks in bunches of about 15 flowers at one cent also.

"It makes me envious to read of the prices paid for flowers in the United States, especially for violets which I sell during the season at $1 per kilogram of some 3,000 flowers, of which I pay 50 cents for the picking, while I occasionally find in my copy of the New York Sun a note about violets selling for perhaps $2.50 gold per 100. At that rate my 4,000 flowers per day would bring $100 gold, while I get here $1.33 silver, when I sell all the flowers ready for picking, but I never manage to sell an average of two-fifths of them.

"It is about the same with every other sort of flower, the most valuable being the Easter lily (blooming here in May) which sometimes sells for 3 cents per flower on the streets, though more commonly for 1 cent per flower. Tuberoses bring 1½ to 2 cents per stalk, gladiolus, 2 cents per stalk (except the common red, which sells for ½ cent) chrysanthemums 3 to 5 cents per dozen, cactus dahlias 5 cents per dozen (and very hard to get that much) and so on ad nauseam.

"The orchids for which the New Yorkers pay from $1 to $5 gold per spray, sell here for three sprays for 1 cent, so what can one expect with other flowers? As an experiment I yesterday made up two bunches of six of my choicest roses each and told the woman to whom I delivered them to sell them for the best price obtainable, and she managed to get 2 cents for one bunch and 3 cents for the other. In the evening I plodded through clouds of dust for six blocks to the Chinese railway beanery for supper and during the meal read in the Sun about a convention of New York florists, every single delegate to which showed up in overcoats lined with genuine Russian sable. After the convention I assume that they adjourned to Sherry's and filled up on broiled lobster with drawn butter with an accompaniment of sparkling Burgundy, that being my idea of the best use to which a multi-millionaire can put his surplus cash.

"The fact is, as I need scarcely say, that I have got to quit. Of course expenses here do not compare with those north, but at best my labor is three men and one woman, area cultivated 3¼ acres $1.95 per day, my board 90 cents, and the total of light, wash, street cars, club, newspaper, etc., etc., is at least $1.25 per day. An aggregate of at least $4.10 per day. As my rent is one-half of the gross receipts I would have to sell more than 10,000 La Reine rosebuds every day to keep even. I would not grumble if I were taking it easy and letting some one else attend to my business, but the fact is that I begin work, hard physical work, at 6 a. m. and keep it up without intermission until 6:15 p. m., and almost every night spend an hour or two transplanting, propagating, and potting.

"Work in the garden at this season

F. R. PIERSON CO.'S ESTABLISHMENT, SCARBORO, N. Y.
Hydrangeas in their second year planted in the field.

isn't fattening, either, for my chemical thermometer laid on the ground in full sun showed at 11:15 this morning, 79½° Centigrade, the boiling point of water here is about 92½°C. I have about unburdened myself and it is only fair to state that the great difficulty for me was caused by the unusually favorable season and the resulting oversupply of roses, for the usual price paid for the common sorts has been from 75 cents to $1 per 100 instead of the 8 cents now current. At the same time I must confess that the people here are notorious all over civilized Mexico for their stinginess, and I'll certify to their utter want of good taste in the rose line.

"They'll rave of the poor weakling Sunrise and admire the Prince of Bulgaria but secretly they prefer a big 'Rosa Fe Blanca' (Lamarque). American Beauty and Paul Neyron are not wanted because they 'look just like a Reina.' As a fact, a well developed Le Reine blossom is splendid, and when an American woman here gets a chance to wander through a rose garden and cut what she likes the chances are ten to one that she will cut little except this variety, to the open-mouthed astonishment of the 'gente.' There is one flower that our people will pay for. A good Camellia alba plena imbricata will usually fetch $1 to $1.50, but only from men in love."

F. R. PIERSON CO.'S ESTABLISHMENT SCARBORO, N. Y.

Three-year old hydrangeas coming into bloom.

Floriculture at the Illinois State Fair.

As superintendent of the department of floriculture at the Illinois state fair, I would request that on behalf of your subscribers, who may be interested, that you would mention in the next issue of your paper, that the Illinois State Board of Agriculture, is anxious to see a nice display of floriculture at the next state fair, to be held from September 28 to October 5, and that the board has allowed me an appropriation of $1,500 for premiums.

I have revised the premium list of my department, with size of exhibit as well as the amount of premiums, to a point where florists should be interested. There will be nearly $1,500 in premiums given this fall in this department, and I would like to make the department a success.

If I should succeed in getting florists to take an interest in making a nice display at the state fair next fall, and also the year following, I believe I could get an appropriation from our board, for a special building on our fair grounds for floriculture, and also a larger appropriations for premiums.

It now lies with the florists of the state to see that the matter is a success, and I am sure that your subscribers as well as the Illinois State Board of Agriculture would appreciate the publication of the substance of this statement in your paper. R. O'DWYER.

SOUTH BEND, IND.—The South Bend Floral Co. held an annual stockholders' meeting July 14 at its offices, 804 E. Dubail avenue. Clem W. Studebaker was elected president, Wm. Studebaker, secretary, and Irving W. Gingrich, treasurer and manager. Special attention will be given gladioli.

WITH THE GROWERS

Arnold Schmidt & Son, Nashville, Tenn.

One of the most enterprising florists around this city is Arnold Schmidt, who for several years has conducted a market garden in connection with his flower growing. He has lately associated his son in business with him and he now uses the business firm name of Arnold Schmidt & Son. They have five acres in the little suburban village of Waverly, which has recently come into the corporate limits of the city.

They have 15,000 feet of glass and are very successful in growing carnations, chrysanthemums, Easter lilies and violets. They make a specialty of spring bedding plants and were so fortunate this year as to dispose of their entire supply. They have violets through the entire winter season and like other florists in this vicinity grow them in cold frames. They have no uptown store but use a stall in the market house for the sale of both their flowers and vegetables. They have been very successful in having greenhouse grown cucumbers, which coming in at a season when they command a fancy price is quite a profitable source of revenue.

One of the most interesting things about their establishment is the system of irrigation which insures fine flowers and vegetables. The entire five acres is equipped with Skinner's irrigation system, which they have found very satisfactory. They have lettuce the year around, also tomatoes, cabbage, radishes, pepper and other vegetables. They make no floral designs but sell quantities of cut flowers. M. C. D.

Anton Schultheis, College Point, L. I., N. Y.

At few establishments in the country is the policy of looking ahead, determining early what to do, and doing it, so completely demonstrated as at the establishment of Anton Schultheis.

AT ANTON SCHULTHEIS' ESTABLISHMENT, COLLEGE POINT, N. Y.

House of chrysanthemums, standards and bushes; front section of middle bench shows plants pinched for the last time.

AT ANTON SCHULTHEIS' ESTABLISHMENT, COLLEGE POINT, N. Y.
House of Pandanus Veitchii.

The 37 greenhouses in the plant are all in service, and are factors in the production of a miscellaneous stock which is very extensive. Three houses are utilized for chrysanthemums, which here are grown in pots exclusively, both in standard and bush form. Most of the early varieties have already been pinched for the last time. Among the early varieties grown are Glory of Pacific, Polly Rose, Lager and L. Jones White, a superb white variety originating in the establishment. Other varieties to be seen are Robert Halliday, Col. Appleton. Mrs. Robinson, F. A. Balfour, Golden Wonder, Nonin, W. H. Lincoln, Miss Carrington, Jerome Jones, Dr. Galloway, American Beauty, Mutual Friend, Major Bonaffon, White Bonaffon, Timothy Eaton, Mrs. Wicks, Mrs. Coombs, Mrs. Perrin, Nellie Pockett, Mme. Leger, Mrs. Buehls, Black Hawk, Brutus, and Gretchen Buettner, a very fine white. The pompon varieties include Baby, Tennessee, Jac Bon, Dinzulu, Dundee, Edna, Rhoda, and Dawn.

Another house is filled with araucarias and Scottii ferns, the latter nice shapely plants in 7-inch pots and well grown. In a house of kentias, all sizes, in excellent shape, also are to be seen rows of cattleyas suspended from the rafters. Some grand cattleya blooms have been sent into the market from this house during the season. Another house is filled with araucarias and Boston ferns, and yet another entirely with Boston ferns, in about all commercial sizes, compact and shapely plants. Begonia Gloire de Lorraine fills another house and the plants are in splendid condition, perfect in color and form, and should be in tip-top shape by Christmas. Daisies and ardisias are coming along together in another house. The ardisias are well berried and shapely.

Two houses have just been equipped with a low pressure steam heating system. Under this system steam can be raised in 17 minutes, and in 30 minutes seven pounds of steam is produced, sufficient to give a required temperature under any conditions. These houses are utilized for orchids and dracænas. The orchid house is now in course of arrangement, with about half of its complement of plants on the tiers. The dracæna is full of fine stock, principally D. terminalis, which is carried on a cinder bench and not plunged as elsewhere. Two narrow lean-to houses, 160 feet long, are used for growing lily of the valley. The stock from these houses was among the finest coming to the New York market this season, the sprays bearing extra large bells and unusually long in stem. About 450,000 sprays are cut here within a year.

is a house of Cycas revoluta containing specimens in all sizes and of rare quality. Asparagus plumosus with English ivy fills another house. Asparagus deflexus is being tried out here. It is similar to A. Sprengeri but much more delicate. A. robustus is another new asparagus, similar to A. plumosus, but exceedingly velvety in appearance, smaller and more compact. A house is devoted to cypripediums and the plants are already showing buds.

Two Weathered houses, built last year, each 28 x 100 feet, are prime objects of interest to visitors. These houses are divided in halves so that the sections may be kept cool or warm as desired to suit the stock. Half of one house is utilized for gardenias, and the benches appear to be in excellent condition for the crop to come. The other half is filled with Cibotium Scheidei and miscellaneous stock. Half of the other house is used for livistonas and specimen pandanus. The other half of the house is filled with Pandanus Veitchii, some grand clean stock in several sizes. A house of fern balls is quite a sight at this time, and a house of aspidistra, and asparagus in pots is ready for the demand for these plants, which is quite staple in this section.

The acreage around the greenhouses is entirely taken up with a variety of stock planted out and cold frames. Ericas are grown here in quantities, one patch containing over 2,000 plants mostly E. fragrans. E. translucens is also largely grown. The dahlia Countess of Lonsdale is now in bloom, and is quite conspicuous. Other things seen in the grounds are azaleas, growing along under a roof of sash with slat frames; genistas, acacias. Dracæna indivisa, Jerusalem cherries, roses, Manetti stock,

AT ANTON SCHULTHEIS' ESTABLISHMENT, COLLEGE POINT, N. Y.
House of dracaenas. D. terminalis on front main bench.

A rather uncommon sight in this section is a house of anthericum, but it may be seen here just now in perfection. Another house contains specimen ferns in two or three varieties, with a bench of Nephrolepis Whitmanii, which appears to be in grand commercial shape although rather small in size yet. There

boxwood plants potted and plunged, and a good stock of bay trees. Oranges and lemons are being brought along in frames. A fine lot of oranges are seen. Single shoots, when planted about two months ago, they are now vigorous bushy plants, some of them with fruit well set.

Other frames are filled with cyclamens and Primula obconica, all well protected from sun and weather but open to the air. Mr. Schultheis believes in having all his working material under cover, consequently both manure and compost are sheltered from the weather. All the flower pots are sorted and kept in five sheds, under one man's particular care. There is a small house for leaf mold, and another for moss, boxes and flats of all kinds. A new packing shed, 45 x 66, is now in course of erection and will be a continuation of the wagon and bulb shed which nas proved too small for use as a packing house.

Not the least interesting feature of the establishment is the greenhouse plant of the junior Schultheises. Mr. Schultheis has seven sons, the eldest something over 16 years old, and the youngest just old enough to be working partner in the firm of Schultheis Bros., which includes all the brothers and operates four small greenhouses which they have built and paid for out of the profits made in the business which is their own. They grow carnations and a variety of other flowers and market them in a businesslike way, and take a delight in their business. And their energy and thrift is no less a delight to their father, who sees in the boys the successors to his own large business.

Dayton Convention Notes.

The officers of the Dayton Florists' Club met July 27 at the exhibition grounds, in company with all concessionists, to make final contracts for lighting the grounds, surrounding the buildings, laid out for this occasion. Everybody was astonished to see how things show up. All were unanimous in their praise of Mr. Freudenberger and Henry Hassey. Both of these gentlemen enjoy in this section of the country the very best reputation, one as a landscape gardener the other as a decorater, but what we beheld left our expectations far, far behind. The beautifying of the grounds is chiefly due to the untiring efforts of Mr. Freudenberger. These unassuming young men, having in charge about 800 acres of park land, besides making one new park of 1,200 acres and another of 400 acres, have spent every spare moment in the most unselfish way for the benefit of the craft and this association.

A thousand thanks to John H. Patterson, of the National Cash Register Co., for his generosity in turning over to Mr. Freudenberger his men, teams, tools, and materials free of charge to beautify the outdoor surroundings. This name, of John H. Patterson, should be written in gilded letters at every convention henceforth of the national society. It is through his untiring efforts that the city of Dayton is in landscaping what it is to-day. There are no more slums; there are no more tenements. This, verily, is a city of homes, as it is commonly termed, through the untiring efforts of John H. Patterson in making the people love all that is great and good in nature, surrounding their homes with beautiful flowers, shrubs, and trees. Where will you find another man that will ask his most humble neighbor, "Please fix up your property," and if the poverty racket is brought forth ask this very man to give him permission to fix up his property at his own expense and tell him to come to get his seeds and shrubs to improve his property? However, I do not want to say too much; visitors at the convention will judge for themselves.

At one of the last meetings of the club changes were made on the committee of interior decoration and Mr. Freudenberger was chosen unanimously as chairman of the same. The entire club was glad to discover a hidden talent and all were anxious to give him full swing to exercise his taste and ability to the very best of his knowledge.

People are waking up now to the beauty of perennial stock and it is with regret that we say that the contemplated outdoor exhibit did not show up as well as was anticipated. A large lot of ground was prepared for such an exhibit, but exhibitors stayed out, and finally the club passed a resolution to fill up the empty exhibition spaces. The smallest and most humble brought whatever he had, and Mr. Freudenberger took it unto himself to plant out these empty spaces intended for exhibitors originally, with the material that was forthcoming from the members of the club, as ornamentally as he could. And when you come, ladies and gentlemen, you will see that his efforts were not in vain.

As I said before, people are waking up to the value of perennials. Now, you gentlemen that neglected to make an outdoor exhibit send some material for indoors. It will be well protected. If you can't send the plants send cut flowers. It will open up new avenues of trade and will be quite instructive to a great many members who are not well versed as to the beauty and value of perennials.

Here is another pointer for you gentlemen of the horticultural building trades. Contracts will be let out this fall by one large concern alone for a $20,000 conservatory. The eyes of this firm are contered on this convention. Now, gentlemen, be alive to the situation and be in the swim.

As I stated before, the Dayton Florists' Club will offer a few prizes for the best plans for landscaping gardening. Now, you enterprising landscape architects, take a few hundred feet of exhibition space and show plans of parks that ought to be constructed now, even unfinished. Make the trade familiar with what you are doing and don't put your light under a bushel. We have to introduce novel features in every convention and this will be one most beneficial to all the trade. Come forward, if it is only a few pencil sketches, and instruct the members of this association what can be done with a small amount of money to make even the most humble home a thing of beauty. Show them what you are doing to elevate citizenship and make better men and women of us all.

It is only three weeks more until this convention will start. Things are in tip-top shape, peace and harmony reign all the way around, and the twenty-second convention promises to be the largest in the society's history as far as exhibition, lectures, entertainments, etc., are concerned.

The exhibition probably will be the largest in the history of the society. This is chiefly due to the untiring efforts of the superintendent of exhibits to gain this end. The country has shown up well in exhibits, as well as in advertisements.

We cannot more than urge all to come prepared to treat exhibitors and advertisers liberally. Come prepared, gentlemen, to buy at least part of some man's exhibit. It is a tremendous task and a very great expense these gentlemen to go to make a display at our convention. It is the solemn duty of everybody to draw the channels of trade during this convention to the exhibitors and advertisers.

Glaring banners will stare you in the face that will inform you of the leaders in the parade. A large bulletin board will be put up in the office, where you may leave your name and time of appointment to the one you desire to meet and have not known. If you have a greenhouse to build, if you have to figure on fittings or pipes, if you have to buy glass, paint or putty, if you do not see the exhibits you will see the banners of the representative firms floating in the exhibition hall.

If you have steamboat orders to send out of New York harbor, a gigantic sign will inform you of the name of the party. If you do not know them, leave

AT ANTON SCHULTHEIS' ESTABLISHMENT, COLLEGE POINT, N. Y.

House built for the young Schultheis' and run by them at a profit.

your name and address at the office and the required gentlemen will be pleased to meet you. All your supply orders, plant and import orders,—save them for the convention. You will meet all representatives and every one of them is worthy of your patronage.

President Heiss of the Florists' Club, has been in New York for one week, because there was a wrong impression abroad that this convention was more or less a western affair. Mr. Heiss was well received by the craft, was aided liberally in the undertaking of this convention, and the New York merchants grasped the opportunity at a moment and saw the advantage of exhibiting and advertising during this convention. Mr. Heiss would like to extend his personal thanks for their liberal contributions, to advertisers and exhibitors and for the cordial treatment he received from all the New York trade.

It would be desirable if some of the large leading firms would put up some large electric signs, which can be furnished by the club in 10-inch letters at $5 a letter burning for four nights, these to be placed in the outside grounds. Some other firms ought to come forward and do like the enterprising New York brethren, who have put signs and banners pertaining to their firm and business in the Exhibition hall. Such signs can be furnished, 5x15 feet, for $15.00; larger in proportion.

To wind up, there is no question but that this will be the largest and best convention in the history of the national society. The Dayton Florists' Club is straining every nerve to the best of their ability to make the whole affair a grand success. The way it looks now it may be that some of the entertainments will have to be cut out on account of a lack of time. However, such will be decided later and announced.

J. B. HEISS.

MINNEAPOLIS, MINN.—A building permit has been issued to the University of Minnesota for the erection of a greenhouse at University and Thirteenth avenues, at a cost of $9,500.

PEOPLE WE KNOW.

John F. Huss.

A short sketch of the life and career of John F. Huss, who was recently elected for the third time president of the Hartford, Conn., Florists' Club, will be of interest.

AT ANTON SCHULTHEIS' ESTABLISHMENT, COLLEGE POINT, N. Y.
House of livistonas

Mr. Huss is a native of Bern, Switzerland, and is today a striking example of the all around plantsman who has lived the strenuous life and established an honored name in his profession. He began his career with a three years' course in the horticultural college of his native canton, on the completion of which he served a regular apprenticeship with the then prominent plantsman R. Batschi, of Bern. He then moved to Vevey, and served a year with Louis Planc, whose establishment was noted for its splendid collection of azaleas and camellias, in addition to its extensive nurseries and general greenhouse stock.

Mr. Huss then proceeded to Paris to fill a position in the forcing establishment of Henri Voight, at Bourg-la-Reine, where the specialties were fruits and violets for the Paris market. It is worthy of note that Voight's plant adjoined the well known nurseries of Jules Margottin, whose name still figures prominently in all rose catalogues. He next served two years in the parks department of Paris, under Barrillier, famous for his skill in park architecture. On leaving here he took a position with Leon Prevost, a Parisian landscape gardener, who was widely known for his French system of gardening, with whom he served 2 years. He was then appointed greenhouse foreman at the historic Chateau des Ombrages a la Port Buque, Versailles, owned by the aristocratic André family. Mr. Huss was here during the epoch making years, 1870-71, and when in a reminiscent mood can recount stirring tales of the Franco-Prussian war and the terrible time of the commune. It was at this famous chateau that the crown prince of Prussia had his headquarters during the war, and his staff and 300 soldiers were billeted on the property. Mr. Huss feelingly recalls how he had to put his men to work to empty their splendid plant house 60x100 feet to make sleeping quarters for the prince's bodyguard. Mr. Huss also tells with exceeding good grace that during this decidedly strenuous time it was part of his duty to decorate the dining rooms and parlors occupied by the prince and his staff. To show how efficiently Mr. Huss performed his duties, under the most trying conditions, he was presented, just before the evacuation, with $500 in gold, and was offered a position in the imperial gardens at Potsdam. This offer he declined, however, and shortly afterward he proceeded to London, England, where he promptly found a position in the establishment of John Fraser, at Walthamstow, and was placed in charge of the new foliage plants and ferns.

After a short stay there he secured

AT ANTON SCHULTHEIS' ESTABLISHMENT, COLLEGE POINT, N. Y.
House of gardenias.

John F. Huss.

a position with the firm of Hugh Low, Upper Clapton, London, as foreman of the department of stove plants and exotic ferns. Mr. Huss held this position for 3½ years, and then decided to set out for the United States. Arriving in Philadelphia early in 1875, he secured his first position in this country with John Dick, of Philadelphia. He was shortly thereafter appointed propagator to S. Parsons & Co., Flushing, L. I., N. Y., where he remained until 1877. He then returned to Philadelphia as foreman and propagator with the firm of Robert Buist.

In 1880, Mr. Huss took the position of superintendent of landscape work with the firm of Calvert Vaux, Parsons, Jr., & Redford, New York, and had charge of large operations in New York, Newport, R. I., Lenox, Mass., and various other parts of the country. In 1885, he was appointed general foreman of construction in the new city parks, New York. Here, with an army of men, he conducted operations in all the new park properties which had then been acquired by New York city, including Van Cortland, Pelham, Tremont, Bronx, Crotona, Riverside and Morningside, and finally had charge of the new work and planting in Central park.

Mr. Huss went to Lenox, Mass., in 1890, as superintendent on the country estate of Mrs. Morgan. He remained there 8 years, when, on the death of Mrs. Morgan, he decided to return to Switzerland, and there make his permanent abode. However, even the glory of alpine scenery soon became irksome and monotonous, and he felt impelled to return to the United States and to active life. Before leaving Switzerland in 1900 Mr. Huss was offered, and accepted, the position of superintendent on the beautiful estate of J. J. Goodwin, Hartford, Conn. During the five years he has been connected with this place Mr. Huss has, to a large extent, transformed it and has given it a proud position among the show places of New England. A fine modern range of glass has been erected and splendid collections of roses, hardy herbaceous plants and rare ferns have been skilfully laid out. Here, too, is established one of the finest alpine gardens in the country.

Mr. Huss is a prominent figure in various fraternal orders, and is a 33d degree Mason. Socially he is noted for the staunch sincerity of his friendship, for his kindly, genial disposition, for his warm hospitality as a host, and for his prompt readiness to give real assistance to every worthy cause.

ALEX CUMMING.

Otto Abele.

Otto Abele, president of the New Orleans Horticultural Society, was born in Gundelsheim, Germany, 33 years ago, and came to this country when but a boy. Soon his great love for plants and flowers was apparent, and induced him later on to become a florist. Having served in several establishments he started while still very young in business for himself as landscape gardener and grower of pot plants. Strict devotion to his chosen trade, together with fair business methods, assured him success from the start. In 1894 he formed a partnership with his brother Paul under the firm name of Abele Bros., one of the enterprising young establishments of the Crescent city. Otto Abele is also a very active member of the German Gardeners' Club, the oldest German singing society and several other organizations.

CRESCENT.

The Late E. D. Clark.

See obituary.

LONDON, ENG.—H. B. May, of the well known Dyson's Lane Nurseries, Upper Edmonton, has taken into partnership his two sons, Robert H. and Herbert J. May.

LEOMINSTER, MASS.—Geo. M. Kendall in setting out 10,000 young plants for his fall tomato crop encountered a temperature in his big greenhouse of 152°. Six thermometers graduated to 150° burst.

OBITUARY.

Peter H. Murphy.

Peter H. Murphy, one of the oldest florists of Springfield, O., died at his home in North Limestone street at 4 o'clock, July 23. He had been in ill health for some time, but was critically ill only about two hours prior to his death. Mr. Murphy was about 80 years of age. He had been engaged in the business of growing flowers for the past 30 years, and was widely known among a large circle of friends. He is survived by his wife, there being no children. Burial took place in Ferncliff cemetery July 25.

Edward D. Clark.

Edward D. Clark, proprietor of Clark's Rose Houses, passed away July 26, at his home in Providence, R. I. Mr. 54 years ago, coming to Providence as a boy of 19 to serve as a gunsmith and toolmaker with the Providence Tool Co., where his uncle was instrumental in placing him. His love of growing flowers had a strong hold upon him in those early years and it was not long before he had a small experimental greenhouse on lower Wickenden street, although this obtained only his spare time from the regular occupation as gunsmith. About 30 years ago he built his first 100-footer on the corner of Tockwotton and East streets, which was uniquely situated on a steep bank hanging over the Old Colony tracks. This was increased and the range of rose houses rebuilt from time to time, Mr. Clark being a rosarian of the old school and preserving that especial flower as his life favorite. Being among the east side residents his business mostly came from that quarter of the very rich and educated people of the city, whose demand was for American Beauty, La France, and hybrid roses. Catering to this class of trade seemed to actuate Mr. Clark with the keenest desires to excel and his list of customers included university scholars nearby who

Otto Abele.

President New Orleans Horticultural Society

marveled at the man and his painstaking devotion to his work in detail. Mr. Clark was a great lover of Caroline Testout and it has always been thought by local florists that he was the first to grow it in New England if not the country. His memory will always be associated with that rose, although he was a pioneer American Beauty grower and sent many retail orders to all nearby points for several years before that rose was generally grown in this section. Two active sons succeed to the business.

M. M.

AUTOMOBILE RIDE OF HORTICULTURISTS GIVEN BY OMAHA FLORISTS' CLUB.

Mrs. Christina Maitre.

In the death of Mrs. Christina Maitre, July 27, there passed away one of the most remarkable women in the city, says the New Orleans Picayune. Mrs. Maitre had been in the florist business in this city with her husband since 1857, and was the first woman to engage in the business here. She was probably better known among the people interested in that line of business and among the German people and citizens generally than almost any woman in the city.

She was the wife of the late Reinhard Maitre and was a Miss Rehm. She was born in Bavaria and was 64 years and 6 months old at the time of her death. When she came to New Orleans with her family she was but 2 years old. Mr. Maitre was at first gardener for Jas. Robb, a weathy business man, and afterwards for Burnside at the place where the H. Sophie Newcomb college stands. They had a garden at Magazine and Foucher streets, and afterwards the business was run by Maitre & Cook, the latter being Mathew Cook, the Carrollton florist. Mrs. Maitre and her husband moved to Carrollton in 1884, and lived on St. Charles avenue until recently. Mr. Maitre retired from business in 1893, and died in April, 1896.

The Maitres had a store on old Camp street years ago, then moved to 602 Mazagine, and later built the place now occupied by the Lafayette Insurance Co., between Jackson and Josephine. Then they moved to a building on Camp street, near Canal, where the Morris building now stands, and after several years went to the Pickwick building, where they were at the time they retired from business.

The only one of the original family left is Mrs. Cook, though Mrs. Maitre leaves several nephews and nieces.

Alexander Emslie.

Alexander Emslie, the florist of Barre, Vt., died July 25 after a long illness with consumption. He was taken sick a year ago last June and since that time has been able to do little work. His twin brother with whom he was associated in the greenhouse business died less than a year ago.

Mr. Emslie was born in Aberdeen, Scotland, 38 years ago, coming to this country when a young man. About six years ago, with his brother, he went into the greenhouse business building houses on the road from Montpelier to Barre. His business increased rapidly and he was obliged to build additions from time to time. Three years ago last July he purchased the greenhouse in Montpelier owned by Ernest Jacobsen, who had worked up a large and extensive business here. About two years ago Mr. Emslie went into partnership with Alexander Broadfoot and new houses were built and the business increased with rapid strides. Within the past month Mr. Broadfoot acquired Mr. Emslie's interest in the business and is now the sole proprietor.

He was a member of Clan Gordon, No. 12, O. S. C., was an Odd Fellow and a Mason. He leaves a wife and two children, two brothers, George and William, who will conduct the Barre greenhouse, and some other brothers and sisters in Scotland.

The funeral was held at his late home on July 27.

Omaha.

Hot weather's dull business has set in. Roses are plentiful and of good quality for this time of the year. Carnations are poor and scarce as most of the dealers are replacing them now with new stock. Asters are showing up and are a much looked for flower. Gladioli are at their best as are all kinds of outdoor blooms.

The Nebraska Horticultural Society held its summer meeting here July 11 and 12 in one of our city parks. It was one of the best attended meetings ever held. The meeting was opened by Rev. T. J. Mackay, address of welcome by Mayor Dahlman, greeting by J. Y. Craig, president of the city parks board, and response by J. J. Hess, president of the Florists' Club. Very interesting papers were read and discussed on ornamental horticulture and floriculture. W. R. Adams, superintendent of our city parks, read a paper on "Shrubbery;" M. Stauch, of Council Bluffs, Ia., on "How to Grow Roses;" C. Frey, of Lincoln, on "Carnations," and J. Bath, of this city, on "How to Handle Cut Flowers." The florists gave an automobile ride to the horticulturists July 12 through the parks and boulevards and landed at P. B. Floth's new residence for a well arranged lunch, the climax of the day.

J. J. Hess and wife have returned from their Colodaro trip. GRIPPE.

PASCOAG, R. I.—Amos F. Darling is adding a large greenhouse to his already extensive plant.

WASHINGTON, D. C.—W. F. Gude expects to leave for Red Mountain, Col., August 11, but will return in time for the Dayton convention.

HORTICULTURISTS AT OMAHA.

WHOLESALE AND RETAIL BASEBALL TEAMS OF THE ST. LOUIS FLORISTS' CLUB.

Our Pastimes

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to J. H. Pepper, 1133 Broadway, New York; Robt. Kift, 1725 Chestnut St., Philadelphia; or to the American Florist Co., Chicago.

At Chicago.

The second round of the try-out games was rolled July 31 with increased attendance and enthusiasm. In the men's games Wilson rolled an extra game on account of one missed July 24. Only two nights remain to qualify, August 7 and 14, Bensinger's alleys, Monroe street, at 8 p. m.

Player.	1st.	2nd.	3rd.	4th.	5th.

At St. Louis.

The picnic held at Romana park, July 26, was the best and largest ever given by the Florists' Club. Interest among the wholesalers especially kept the retailers busy and both alike worked like beavers for its success. Especially hard did Frank Weber work to get up the entries for the various games. Shortly after 10 o'clock the florists began to arrive, among the earliest arrivals being F. C. Weber, Theo. Miller, Chas. Beyer, Frank Fillmore and their families. About 1 o'clock a heavy thunder storm broke out and threatened to keep down the afternoon attendance, but after an hour's downfall the sun came out and everyone was happy. The florists by 2 o'clock were out in full force. The presence of outside florists helped naturally to make things hum. Among the visitors were: Jas. S. Wilson, from Vaughan's Greenhouses, at Western Springs, Ill.; H. E. Philpott, Winnipeg, vice-president of the S. A. F. for the Manitoba district; C. De Wever, Clayton, Mo.; B. Escherer, with Rice & Co., Philadelphia; J. L. Ammann, Edwardsville, Ill.; E. W. Guy, Belleville, Ill.; Adolph Fehr, of Belleville, Ill. Music, dancing and boating was indulged in by the old as well as the young members.

Dash, one hundred yards, 12 entries; prize, silk umbrella. Won by A. Hartmann, Kirkwood, Mo.

Hop, step and jump, 11 entries, distance 36 feet; prize, gold tie pin. Won by Fred Alves.

Running broad jump, 13 entries, distance 15½ feet; prize, gold cuff buttons. Won by Fred Alves.

Ladies' race, single; prize, fan. Won by Miss Eugenia Reeb.

Egg and spoon race, married ladies, 17 entries; prize, bracelet. Won by Mrs. Beyer.

Girls under 16, 6 entries; prize, brooch. Won by Miss Alice Jablonsley.

Boys' race, 12 to 14; prize, base ball and bat. Won by Otto Bentzen.

Fat man's race, 200 lbs. or over, three entries; prize, beer mug. Won by Chas Beyer.

Potato race, boys and girls, 11 entries; prize, box of candy. Won by Adolph Steidle and Miss Dora Miller.

Tug of war; prize, box of cigars; two teams, six each, captained by C. Beyer and J. J. Beneke. Won by C. Beyer's team.

Sack race, boys 14 to 18; three entries; prize, combination fishing pole. Won by Lewis Vogel.

Old man's race, six entries; prize, box of cigars. Won by J. J. Beneke.

The base ball game between the wholesalers and the retailers was the feature of the day's sport. The batters for the wholesalers were: Geo. Schriefer, pitcher; Fred Alves, catcher. Retailers: J. J. Beneke, pitcher; Herman Weber, catcher. The game was 5 innings and the score was 10 to 2 in favor of the wholesalers. E. W. Guy and Fred Ammann acted as umpires.

At Philadelphia.

The gentlemen of this city who take an interest in the jolly game of bowls, as W. R. Smith, of Washington, is wont to call it, are having their usual strenuous time splitting the air or the pins in endeavor to make the team that is to have the honor of representing this city at the convention tournament in Dayton. Nine games in a series of three matches have been rolled, one on the home alleys and two on public or strange alleys. Two more matches of three games each, one on a public and the last on the club alleys, wind up the series and the first six players counting averages of all games bowled will comprise the team and substitute. The following are the averages of the nine games played:

Player.	Average.
Connor	169
Robertson	168
Adelberger	165
Falck	164
Graham	162
Dunlap	160
Batchelor	151
Kift	150
Harris	138
Westcott	138

The first six have an average of 164, which is not so bad.

BURTON VERSUS THORN HEDGE.

Teams of baseball players selected from the employes of the Burton and Battles nurseries engaged in a social game at Thorn Hedge on Saturday last. As an exhibition of good amateur ball playing it was all that could be desired, it being nip and tuck from start to finish with an extra inning thrown in, as at the end of the ninth each side had an even dozen runs to its credit. In the tenth tussle the Thorn Hedge boys said they simply had to get the extra run and win, as Mr. Battles had told them he would give them a good hiding if they didn't. So with a little extra steam on they captured the necessary tally and won out, much to the relief of Mr. H. H., whose word being as good as his bond was seen to be getting very nervous just before the finish. The feature of the game was the spick and span appearance of Captain Billy Stevens of the Burtons, who wore his glad rags in honor of the occasion. He did great work behind and at the bat and after the game said anyhow he'd sooner lose than win with a 13

OUTING OF THE BOSTON GARDENERS' AND FLORISTS' CLUB.

The tug of war.

score. The veteran pitcher, Billy Dunning, together with Al Thomas of the Julius Wolf Force, were interested spectators. Farmer Wm. Davis gave great satisfaction as umpire. A sumptuous lunch was served after the game.

K.

At Boston.

GARDENERS' AND FLORISTS' PICNIC.

The committee in charge of the picnic of the Gardeners' and Florists' Club, T. E. Palmer, David Lumsden, John W. Duncan, Peter Miller and Jas. Wheeler, must certainly have been in the good graces of the weather man, for after 10 days of the most disagreeable weather known to the oldest inhabitant, the sun rose clear and bright and the cool north wind blew on one of the pleasantest days of this summer, when the members of the club, with their wives, daughters and sweethearts, took the special electric cars that carried the party to Waushakum Grove, at South Framingham, July 25. The urgent call of the secretary was well responded to for during the day it is estimated that about 450 people graced the occasion with their presence. The committee in charge were fully prepared to fulfill their duties and everything went off like clockwork. Each lady was presented with a box of candy and over 500 bags of peanuts were distributed among the boys and girls.

OUTING OF THE BOSTON GARDENERS' AND FLORISTS' CLUB.

Married ladies' race. Young ladies' race.

It was an old-fashioned picnic, every one carrying their own lunch and the programme much resembled those issued by the Scottish clans. The list of contests was quite lengthy and the prizes were donated by members and friends of the club and the committee had plenty to do to keep the successive events moving in order to take the return cars at 6:30 p. m. Success crowned their efforts, and every one returned having spent a most pleasant day and full of compliments for the committee having charge of the most successful picnic ever held by the club. Following are the list of contests with prizes and winners:

Base ball, married vs. single.—Lord and Burnham prizes, nine pairs cuff links; single, Capt. Johnson 14, married, Capt. Fisher 9.

Base ball, boys under 16—W. E. Doyle prize, nine ball gloves. Capt. Hodgson 16, Capt. Wheeler 3.

Base ball, girls, no age limit—Welsh Bros. prizes, nine chatelaine pins; Capt. Ella Palmer 10, Capt. Ira Wheeler 9.

Cricket, commercial vs. private growers.—Edward Hatch prizes, 11 pins; private 23, commercial 20.

Fifty yards race, boys under 10—Bay State Nurseries prizes, first, magnet watch; second, knife; third, Rugby ball; first, Thomas Iliffe; second, Theodore Palmer; third, Victor Lumsden.

Fifty yards race, girls under 10 years.—H. M. Robinson & Co.'s prize, first, locket and chain; second, brooch; third, brooch; first, Helen Vearse; second, Lillian Vearse; third, Harriet Coles.

One hundred yards race, boys 10 to 16 years.—W. W. Edgar Co.'s prizes, first, foot ball; second, catcher's mitt; third, junior ball; first, Geo. Palmer; second, Jas. Harbison; third, Clarence Dolen.

One hundred yards race, girls 10 to 16 years.—Braman, Dorr & Co.'s prizes, first, tennis racquet; second, pair handy pins; third, locket; first, Florence Lumsden; second, Helen Vearse; third, Florence Eisenhardt.

Fifty yards race, married ladies.—A. H. Hews & Co.'s prizes, first, suit case; second, umbrella; third, hammock; first, Mrs. Robt. Edgar; second, Mrs. A. Eisenhardt; third, Mrs. T. Neal.

One hundred yards race, young ladies over 16 years.—First, Houghton & Clark prize, manicure set; second, David Lumsden's prize, camera; first, Ella Palmer; second, Ethel Roy.

One hundred yards race, club members only.—First, J. Breck & Son prize, barometer; second, T. J. Grey & Co.'s prize, cup; third, D. Finlayson's prize, watch fob; first, Thos. Brown; second, A. E. Shedd; third, F. Cannell.

One hundred yards race, open to all.—Daniel Iliffe's prizes, first, clock; second, knife; first, Alexander Burr; second, J. McCarthy.

One hundred yards race, fat men over 200 pounds.—Schlegel & Fottler Co's prizes, first, clock; second, umbrella; first, W. R. Nicholson; second, James Wheeler.

Fifty yards race, men over 50 years.—W. W. Rawson & Co.'s prizes, first, umbrella; second, paper knife; first, Wm. Miller; second, J. Keady.

Potato race, for ladies.—H. H. Barrows & Son' prizes, first, umbrella; second, collar box; first, Louise Eisenhardt; second, Jean Westwood.

One hundred yards, three legged race, open to all.—Henry Penn's prizes, first, two pair cuff links; second, two pins; first, Thos. Brown and Harry Coles; second, A. Lowe and A. F. McDermott.

Handicap, 240 yards.—First, T. Grey's prize, silver cup; second, Wm. Sim's prize, military hair brush; third, Wm. Sim's, watch fob; first, F. Cannell; second, A. E. Shedd; third, F. E. Palmer.

Quoit match.—First, Julius Zinn's prize, meerschaum pipe; second, Alex. Montgomery's prize, clothes brush; first, Wm. Munroe; second, Wm. Robb.

High jump.—H. H. Barron & Son's prizes, first, umbrella; second, collar box; first, Frank Edgar, 4 feet 9 inches; second, Frank McDermott, 4 feet 8 inches.

Long jump.—Framingham Nurseries' prizes, first, Waterman fountain pen; second, shaving set; first, W. Johnson, 13 feet 8 inches; second, Frank Edgar, 13 feet 4 inches.

Putting 16-pound shot.—First, W. J. Stewart's prize; second, sporting committee's prize, fancy silk suspenders; first, W. R. Nicholson, 25 feet 1½ inches; second, D. McKenzie, 24 feet 10 inches.

Throwing 12-pound hammer.—Sporting committee's prizes, first, umbrella; second, clothes brush; first, Wm. Munroe, 94 feet 4 inches; second, Wm. Robb, 92 feet 6 inches.

Tug of war, commercial vs. private growers.—Sporting committee's prize, box cigars; private growers won.

Handicap, 240 yards, boys 10 to 16 years.—A. F. Scott's prizes, first, rod and reel; second, punching bag; third, knife; first, Geo. Palmer; second, Wm. Iliffe; third, Jas. Harbison.

One hundred yards race, open to all.—Shady Hill Nurseries' prizes, first, umbrella; second, pocketbook; first, J. Lally; second, Thos. Brown.

MAKE convention preparations early.

ALL indications point to a banner convention attendance.

WE are in receipt of the preliminary report of the S. A. F. convention and will refer to it more fully in a later issue.

THE date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscriptions promptly on expiration to make certain of receiving your copy of each issue.

Correction.

E. T. Wanzer writes that the three greenhouses he is building are each 23 x 200 feet instead of 200 x 233 as our types indicated in a previous issue.

Exhibition for Flower Shippers.

The Paris-Lyons railroad has announced that it will organize, with the assistance of the general commissioner of the Colonial exposition, now being held in Marseilles, a national exhibition of baskets and cases for the packing and shipping of flowers, fruits, vegetables, etc. This exhibition will include a force of men and women, who will prepare, in the presence of a jury, packages of flowers, fruits and vegetables, which will be furnished by the commissioner of the exposition. This competition will probably be held on September 8, in the buildings of the Colonial exposition at Marseilles.

Says Office Should Seek the Man.

ED. AMERICAN FLORIST.—

Would it not be wise for the members of the S. A. F. to give some attention to the selection of a suitable and logical candidate to fill the position of president for the ensuing year, rather than to wait and leave it altogether to canvassing and buttonholing members at the last moment, or until they have unwittingly pledged themselves to some friends on personal grounds alone? It seems to me that the best interests of the society often point to some man who would never dream of seeking office in any way.

I am expressing my belief that H. B. Beatty, for many years a faithful member and efficient officer, serving as he has year after year, never wavering in his devotion to the best interests of the society, is such a man.

He is too modest a gentleman to seek the office. Let us see to it that the office seeks the man.

ADAM GRAHAM.

Dayton Delegates Invited to Chicago.

An informal meeting of the Chicago Florists' Club was held July 27 at 11 a. m. in the office of F. F. Benthey, for the purpose of inviting to Chicago, eastern members of the S. A. F. who might wish to extend their trip to this city. It was the intention of the meeting to plan some form of amusement for them but as it was impossible to obtain any estimate of the number who might come, it was finally decided to draw up the following invitation:

"Convention visitors who may decide to make a further western trip during the week following the Dayton meeting are cordially invited by the Chicago Florists' Club to advise its secretary when they will be in the city in order that an afternoon or evening meeting with the club can be arranged."

L. H. WINTERSON, Sec'y.,
49 Wabash avenue.
P. J. HAUSWIRTH, Pres.,
227 Michigan avenue.

Those who attended the meeting were: P. J. Hauswirth, J. C. Vaughan, L. H. Winterson, N. Wietor, F. F. Benthey, L. Coatsworth, Geo. Asmus and A. L. Randall.

Monument to Alphonse Karr at Hyeres.

At St. Raphael, April 8, a monument was unveiled in the name of literary France and in the name of horticulture of the Cote d'Azur, to Alphonse Karr, journalist and gardener of repute, and who created at Nice 50 years ago the industry of exporting cut flowers in the winter, which is today a source of revenue for all the region. The monument which perpetuates his memory is erected facing the sea, not far distant from the famous "Maison Close," which, as M. Nardy, Sr., recalls, has never been closed to gardeners.

M. Parsons, chief assistant of the cabinet of public instruction, presided at the ceremony assisted by a delegate of the prefect of Var, by M. Basso, mayor of St. Raphael, M. Claudon and Vana, assistants, M. Drageon, consul of Norvege, M. Nardy, Sr., the venerable horticulturist of Hyeres, and a large number of other prominent persons. The addresses were given by M. Jean Aicard, M. Jules Claretie and M. Parsons. M. Nardy rendered homage to the memory of Alphonse Karr in the name of the gardeners of St. Raphael and of the coast. A telegram was read from the mayor of San Remo acknowledging the sympathetic remembrance of the gardeners of the Cote d'Azur Italian. The fete closed with a pilgrimage to the "Maison Close" and a banquet.—Revue Horticole.

Meetings Next Week.

Butte, Mont.—Montana Florists' Club, Columbia Gardens, August 10.

Chicago.—Chicago Florists' Club, Handel hall, 40 Randolph street, August 9, at 8 p. m.

Chicago.—Gardeners' and Florists' Union No. 10615, 10-12 Clark street, August 8.

J. C. VAUGHAN, Pres.
M. BARKER, Sec'y.

WATCH US CROW.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Think of Aschmann, the great Araucaria Importer of America, before buying elsewhere.

Fill your empty houses now, and make 100 per cent on your money while you are asleep.

Notice.—When you undertake anything, do it well or not at all. This is our motto, adopted eleven years ago, when we imported the first lot of this well known pot plant, the Araucaria Excelsa, from Belgium. These everlasting green foliage pot plants are growing more in favor by the tasteful plant buyers of the land from year to year. Please watch the growth of our importations during the last eleven years. First year, 100; second year, 250; third, 500; fourth, 1,000; fifth, 2,000. Now this year, 1906, is our **eleventh anniversary** since we began importing them, and they have grown up to 6,000, this spring's importation.

All these are grown for me under contract by an Araucaria specialist in Belgium. I must say, for the benefit of my customers, that they were never before so nice and large for the money as this year. Perfectly recovered from their sea voyage and well established, planted to 5½, 6 and 7 inch pots, ready ship to all points in America.

I herewith quote you special low prices on them for cash: **Araucaria Excelsa**

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old.$ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long, from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots, $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size: their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2 50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them; can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

Cycas Revoluta or **Sago Palm,** 6 to 7 in. pots, 7 to 20 leaves, 10c per leaf.

Cocos Weddelliana, 15c.

Areca Lutescens, made up plants, 4-inch pots, 25c.

Solanum or **Jerusalem Cherries,** 2½-in., per 100, $5.00; the same varieties as we sell at Xmas. for from 75c up to $1.00 each.

Ficus Elastica, Belgian importation, 4-in. pots 25c.

Ferns. A fine assortment of Ferns for dishes, large, bushy, out of 2½-inch pots $5.00 per 100.

Barrowsii ferns, 4-in., 25c; 6-in., 75c. **Scottii,** 4-inch, 25c; 5 inch, 40c; 6-inch, 50c

All goods must travel at purchaser's risk. Cash with order, please.

BUSINESS IMPROVES.

There was some relief from the ennui of the past fortnight by a slight improvement in the local trade this week. The shipping business was a trifle greater than it has been and the change was decidedly welcome. Summer stock of all kinds came in quite freely with the possible exception of carnations. The white varieties were sufficiently abundant to supply all demands but there was a noticeable shortage of the colored material. Carnations are being replaced these days by asters, which can be had in great profusion at very low prices. Large quantities were sold for 25 cents per 100. Roses are fairly plentiful and the quality is as good as could be expected. Several houses brought in some very fine long stemmed American Beauty which found a ready sale. Bridesmaid, Richmond and Chatenay are abundant, but there is a shortage in Carnot and Kaiserin. Tuberoses are beginning to make their appearance and some water lilies were seen. A commission house showed three or four yellow chysanthemums, which attracted much attention. Lilium auratum is in abundance and sells at fair prices.

NOTES.

Peter Reinberg has returned from his western trip. During his absence seven houses were rebuilt and have been planted with carnations and Asparagus plumosus in addition to the installation of two boilers for the 11 new houses just completed. Leonard Kill says that the chrysanthemums promise exceptionally fine this year. A. Spencer, of the same firm, is now away on his vacation.

The Florists' Union will open a flower store in the downtown district. The union has adopted a union label and every rose or bunch of flowers sold will have the label attached. Members of unions will be urged to purchase flowers for funerals, weddings and parties.

The E. F. Winterson Co. is much interested in specimens of some water lilies which that firm expects to handle next season. The lilies are of various shapes, some small and others large, while they show a great variety of color, pink, blue and white predominating.

The vacation fever has struck the J. A. Budlong Co. P. Schupp and family have gone to South Haven for a few days' outing, while Bert Budlong can now be located at Lake Geneva where he will be joined by Chas. Zaffe for a week at the Budlong cottage.

E. L. Hess says that several of the large mushroom growers in the city report favorable results in tests of pure culture spawn. Paul Swanson has obtained some very satisfactory results from the June spawning for tests.

D. Robertson, of the Ernst Wienhoeber Co., has returned from Denver, Col., where he spent a month's vacation. Frank Pasternick, of the same firm, rusticated three weeks at Oshkosh, Wis.

B. F. Vandervate, of Galena, Ill., suffered a loss of $1,800 in broken glass caused by a hail storm last week. He spent several days in the city purchasing material to replace it.

John Sinner is again to be seen at his old stand in the Flower Growers' Market. He has been spending the time at his carnation patch in Rogers Park.

Zech & Mann are handling a large quantity of excellent carnations. It is first class stock and some of the best that can be had at this time.

W. J. Smythe is taking advantage of the dog day dullness to remodel his Thirty-first street store front. Will knows how to do it right.

Miss Furlong of the Weiland & Risch establishment left the city July 23 for a three weeks' trip to the Thousand Isles.

Miss Emmett of the J. B. Deamud Co. spent last week at home with her mother who has been seriously ill.

Geo. Wienhoeber, who has been at home for some weeks, expects to return east soon.

H. E. Philpott, who went to St. Louis several days ago, is again in the city.

Alex Newett is back again from his vacation trip to Joliet.

Chas. Balluff is up north on a vacation.

Visitors: Fred Heinl, Terre Haute, Ind.; S. E. Morris of the Manistee City Floral Co., Manistee, Mich.; F. Wm. Heckencamp, Jr., Quincy; Otto Will, Minneapolis, Minn.; B. Eschner, of M. Rice & Co., Philadelphia, Pa.; J. R. Falkenstein, Naperville; and Mr. Crawford of Chas. Fruch & Sons, Saginaw, Mich.

Chicago to Dayton Via Big Four.

The Chicago Florists' Club has concluded arrangements for the special train over the Cleveland, Cincinnati, Chicago & St. Louis Ry., leaving the Michigan Central passenger station, Twelfth street, Chicago, at 12:45 Monday, noon, August 20, and due to arrive in Dayton, via Kankakee, Lafayette and Indianapolis about 8:40 p. m., practically a daylight ride all the way. The train will consist of three or more new day coaches, one combination car, and one dining car to serve luncheon and dinner a la carte.

The rate by the certificate plan for the round trip is only $9.70. These tickets are good on all trains August 17, 23 and for the return trip the validated certificates will be honored up to and including August 31.

The Chicago Florists' Club cordially invites the florists of the WEST, NORTHWEST and SOUTHWEST, delegates to the convention, to join this special train at Chicago Monday, noon, as above stated, and see that when they buy their tickets and secure their certificates for the same that these tickets read "Via Big Four Route" from Chicago to Dayton.

Delegates who can join us at any point along our route are requested to do so. The committee will be glad to hear as early as possible from all who decide to join our party, so that the necessary arrangements can be made in time. Delegates buying tickets in Chicago will secure them at the city ticket office of the Big Four, 238 S. Clark street, with certificates.

Committee on transportation for the Chicago Florists' Club—J. C. Vaughan, Willis N. Rudd, George Asmus.

P. J. HAUSWIRTH, Pres.,
L. H. WINTERSON, Secy.

ELMIRA, N. Y.—Early one morning recently four masked men overpowered Jas. Barton, night watchman at the United States Cut Flower Co.'s plant north of the city, and blew open the safe. They secured $12 from the safe and took $6 and a revolver from the night watchman.

DECATUR, IND.—Ernsberger Bros. are arranging to meet the demands of their rapidly increasing business and to do this will erect a $15,000 plant at Celina, Ohio. They located here a few years ago and have grown rapidly, their buildings now covering every available foot of ground in their immediate locality. They have contracted with the city of Celina for exhaust steam and water for 15 years and expect to put up a plant that will require 10,000 feet of glass.

MARKET DULL.

Dullness now reigns supreme over the trade. The market is over stocked with goods of the lower grades which the growers dispense with for little money and the past week found plenty left after the buyers departed from the markets. The changeable weather showed its effect mostly on sweet peas. There are plenty coming in but of poor quality. The few good ones are eagerly purchased by first class buyers. Asters are very abundant. Easter lilies are again putting in an appearance. L. lancifolium is quite plentiful and is bringing a fair price. A few outdoor carnations are brought to market and are sold to early buyers. Among the roses, Kaiserin, Carnot and Wellesley still hold the lead, yet they are nothing alarming. Bride, Bridesmaid and Liberty are very small and of poor quality. American Beauty is still scarce, the retailers relying on outside sources to meet the demand.

For the weekly exhibition of the Massachusetts Horticultural Society July 21, there was a special exhibit of sweet peas. The weather being perfect the exhibitors displayed some fine blooms. Among those most admired were Dorothy Eckford, American Queen, Helen Pierce, Lady Hamilton, Miss Willmott and King Edward VII. O. B. Kenrick, of Belmont, a schoolboy just starting in the trade, displayed some fine blooms, taking a prize in each class in which he competed. There was also an exhibition of other flowers and plants from the private gardens of the suburbs.

Among those who started on their vacations July 28 are Manger Jas. H. McManus, Thos. Welch and Miss Lyons of Galvin's; T. F. McAndrews, of Houghton & Clark's; Seymour Grose, of Carbone's, and Dell Cartwright, of the Waban Rose Conservatories. Frank T. White and wife are spending two weeks at Lake Ossipee.

We regret to announce the death of the youngest daughter of D. Robinson, of Everett, which occurred July 25.

Visitors: Thomas Knight representing Julius Roehrs, of Rutherford, N. J.; Daniel McRorie, representing the W. A. Manda Co., of So. Orange, N. J.; Mrs. Geo. Knoch, of Detroit, Mich., who is making an extended tour of the eastern states.

B.

WORCESTER, MASS.—Secretary Adin A. Hixon of the County Horticultural Society is at Story's tavern, Lake Winnipesaukee, Weirs, N. H., with Mrs. Hixon for a few weeks' vacation.

Baltimore.

MARKET VERY SLOW.

Trade the past week has been very druggy and at the end much stock was lost. Great quantities of outside material are being received, especially Cochet roses, the earlier asters, phlox, etc. Roses are improving in quality, but the requirements of the market cannot begin to absorb the large shipments.

NOTES.

The new house at Govanstown of Stevenson Bros., 30 x 173 feet, is completed, planted and the roses have all been once tied up, and it is a model of modern construction and neat arrangement. There are four beds, all of grafted Bridesmaid. The beds show a marked departure from the generally accepted plan. They are only six inches deep, without artificial drainage, and were put down on the natural soil, which was not even disturbed. A good many growers would hesitate at adopting such an innovation as this, but these young men are observant, intelligent and alert, and may be depended upon to know what they are about. The house which is from the latest plans of Lord & Burnham has the glass laid the 24-inch way, with iron posts, and is about as light and airy as any structure can be for plant production.

Clarence Ritter, who was connected with The Fernery, on North Charles street, has left that establishment and rejoined his father, J. A. Ritter, a few blocks further north on the same street. A little later, it is understood, they will open a new store farther downtown.

Frank C. Bauer, of Govanstown, is thoroughly overhauling his pansies this year, but instead of adding new houses is building a commodious and neat front addition to his dwelling to accommodate the regularly increasing number of its inmates.

Attention is being directed toward the Dayton meeting, and it seems probable that the trade here will be more largely represented than it has been for several years past at these meetings.

S. B.

Buffalo.

BUSINESS SLOW.

Continued warm weather which is ideal for those on their vacations is what we are having, while some are bewailing their luck and wishing for rain which is very badly needed at present. Some rain Sunday and Sunday night has done a little good but not nearly what we must have. Sweet peas and asters are suffering and gladioli are not as large as they should be. Funeral work is helping business but there is nothing outside of that.

NOTES.

S. A. Anderson and wife and family leave this week for a vacation on the shores of Lake Erie, Port Maitland being the place.

E. L. McGrath, manager for Breitenstein and Flemm, Pittsburg, Pa., was a caller enroute to Niagara Falls and Toronto.

Edward Slattery, superintendent for W. J. Palmer, is making active preparations for his trip to Milwaukee.

W. H. Greves, of W. J. Palmer & Sons, has returned from a vacation at Crystal Beach.

W. J. Palmer and family are now in Muskoka.

BISON.

Montreal.

STREET VENDORS ARE BUSY.

Business is almost at a standstill at present, the flower buying public being at the seaside or in the country, and the only business done is practically all funeral work mostly smaller pieces being asked for. The market in cut flowers is readily cleared at low prices by the street vendor. There seems to be no limit to his selling powers. He sells on the street, in the park, he invades excursion boats and trains, he jumps the trolley car, and does business at Sunday amusement places. I heard a very prominent grower say he is a nuisance in a greenhouse but he leaves always a lot of cash behind him. Outdoor stock has been suffering of late for want of rain, specially carnations in the field in light ground have made little growth. Early asters have made their appearance and are promising well. Of the late ones it is too soon to speak, depending a good deal on the work of the aster bug. Sweet peas are good but those out of the reach of the hose are suffering badly.

NOTES.

At the last meeting of the Gardeners' and Florists' Club quite a few members signified their intention to attend the convention of the Canadian Horticultural Association to be held August 29 and 30 in Guelph, Ont. The official programme is out and promises to be an interesting and instructive convention.

Joseph Bennett is rebuilding two of his old houses into up-to-date ones.

LUCK.

We Are Headquarters for **PRINCESS VIOLET STOCK**

The **Princess of Wales** is still the leader of all single violets. There is no other variety on the market that can compare with it as a commercial violet, because it blooms from Sept. 15th to May 1st; every bloom is marketable. It has size, it has color, it has length of stem. It has fragrance. It sells when any other variety, single or double, cannot be given away. The people want it.

So great is my confidence in this violet that the following Autumn I will devote 80,000 feet of glass to the growing of this variety. I have about 200,000 nice young divisions now ready to ship at the following prices:

$2.00 per 100. $15.00 per 1000. 500 at 1000 rates. Lots of 5000 at $14.00 per 1000. Lots of 10,000 at $13.00 per 1000.

STOCK DIFFICULT TO MOVE.

This week sees the end of the first half of the dull season, and a retrospective view of the market would seem to warrant the assertion that business for the period commencing July 1 has in the aggregate been no worse than in previous years. Summer conditions are always hard, whether the experience is that of the grower, wholesaler or retailer. With a curtailed demand from consuming sources little tone to the market could be expected, and with the ordinary clean-out channels closed for the time being the resources of the commission men are taxed to the utmost as far as a general movement of stock is concerned. Roses are in plentiful supply, but quality improves slowly, and inferior stock continues to form the bulk of arrivals. Really good stock goes off without pushing, but the quantity of this grade arriving is small and barely enough to meet demands. Good white roses are rather short in supply. Several of the growers shipping to this market declare that Bride roses are not yielding as good crops as formerly and many talk of the abandonment of this variety. What they will fill in with is a matter of conjecture, as the market in pink roses is rather overdone and it is beyond reason that the supply of roses of this color is to be increased. American Beauty roses in the special grades are not over plentiful, but arrivals seem to meet the existing demand and probably will bring prices no lower than present quotations for the rest of the dull season. Carnations are in fair supply, but the quality of arrivals is very poor and the blooms are in many cases from stock which should be thrown out. Lily of the valley is plentiful but very sluggish in movement. Quotations on this product run to the limit, much stock going at minimum prices for funeral work, which seems to make the best outlet for it at this time. Lilies are a fairly good thing, and move well on account of a short supply. Calla lilies are in unusually good supply for the time of year and are taken quite freely. Gladiolus is flooding the market, the products of some large acreages reaching the market and passing at prices as low as 40 cents per 100 on unselected stock. Asters have been on the glut side, but for the present seem to be at bottom with a price of 25 cents per 100 for lower grades. Cosmos and bouvardia are among the pre-season offerings seen in the market and meet ready purchases. Dahlias are coming in regularly, but the influx is confined to the coarser and earlier sorts and prices realized are hardly worth mentioning. Sweet peas are near the end, although such as arrive in good condition unaffected by the recent weather go off pretty well.

THE MARKET, August 1.—The market is very slow today, avalanches of asters arriving and really good stock going off at 2 cents per bunch.

NOTES.

Chrysanthemum enthusiasts will regret to learn that there is to be no chrysanthemum show this year in this city, at least nothing approaching the shows of recent years. Aside from the fact that the Macy hall in Herald square cannot again be rented, the American Institute, which has conducted the shows, finds itself, owing to a drain on its funds to keep up certain of its real estate investments, financially unable to run a show this year except on a small scale and in its own rooms at the Berkeley lyceum. The season is too far advanced probably to allow of any other organized body to take up the project, but something in the way of local shows should be possible. The local Florists' Club has had the exhibition question before it for consideration several times within the past few months, but nothing has come out of its deliberations. The idea has been mooted in the trade that a successful chrysanthemum show could be held in one of the thickly populated residential districts—Harlem for instance. This would be taking the show to the people who are largely interested in flowers and who it is thought could be relied upon for a goodly sum in the way of paid admissions. There are many who believe that a downtown show could never be a financial success owing to the multitude of counter attractions running in the same section.

Arverne, the Long Island seashore resort, is to have a carnival of flowers August 25. Cottagers, hotel keepers and business men have formed an association to assure the success of the project, and committees are hard at work effecting arrangements. Cedarhurst, Far Rockaway, Bayswater, and Wave Crest will all unite in the effort made to promote a successful affair. A. Warendorff is a member of the committee appointed to arrange details for a night carnival.

The rumor which has been current for some time that a syndicate was seeking to lease the large store in the Coogan building, corner of Twenty-sixth street and Sixth avenue, with a view to running a retail flower business on a cheap plan with expected prestige from the fact that two flower markets are established in the building, has been disposed of through the leasing of the store to R. H. Ingersoll Co., of cheap watch fame. The rumor was substantial in fact, but the owner of the building refused to prejudice the interests of his other florist tenants.

Wernz & Koehne is the name of a new firm which has taken over the florists' business of C. S. Christianson, of 67 E. Tenth street. Mr. Wernz was associated with Mr. Christianson for a number of years, and Robert Koehne is well known in the trade as having been in charge of the cut-flower department of Bloomingdale Bros. for some time.

J. F. McConnell, L. M. Noe's salesmanager, has left for the Berkshire hills on his annual vacation. Geo. Sallford is taking a vacation among the Thousand Isles, as also is W. C. Mansfield, the florist of Eighty-first street and Lexington avenue. Michael Ford, of Ford Bros., is passing a few days in Pennsylvania.

Wm. H. Donohoe, the Twenty-ninth street and Fifth avenue florist, is taking advantage of the dull season to rearrange the appointment of his store. He has just installed a handsome refrigerator in a prominent part of the store, which will add to his show effect and increase his storage capacity.

Chas. G. Nix, of Crawley, Sussex; Eng., chairman of the fruit committee of the Royal Horticultural Society of Great Britain, has been spending two weeks in this city, the guest of Jas. Wood, president of the Horticultural Society of New York, who resides at Mt. Kisco.

Andrew Wilson, Summit, N. J., had the floral work for the Manley funeral at Summit this week. In addition to several pieces he furnished a very handsome casket cover of white roses with a sash of lily of the valley.

Mr. Nash of Moore, Hentz & Nash had arranged to start this week on a well earned vacation, but received news of the very serious illness of his married son in Denver, Col., and was obliged to abandon his plans.

The New York Cut Flower Co.'s quarters in the Coogan building have been renovated throughout and are light and attractive once more.

In last week's notes the departure for Europe of Henry Bullman was announced. The item should have read Henry Bantelman.

H. E. Froment is receiving daily a lot of extra fine asters, some of them over two feet long in stem and having grand flower heads.

James Coyle, manager for Horace E. Froment, has returned from a two weeks' trip to the New Jersey coast.

Phil. F. Kessler is handling some very fine white bouvardia, long in stem and extra large florets.

John Krall, Mr. Nash's lieutenant, is enjoying a vacation in Westchester county.

L. B. Craw, of Lord & Burnham, left on Saturday for a Massachusetts shore resort.

Jas. McManus is back from an enjoyable trip to Denver.

F. H. KRAMER, 916 F St., WASHINGTON, D. C.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

VISITED CHICAGO: H. M. Wall, lithographer, New York.

THE S. S. Bermudian arrived at New York July 27 with a cargo of lily bulbs.

CONNECTICUT reports sweet corn looking well, but the acreage of evergreen not large.

THE onion set harvest is now on with full force of help among all the Chicago growers. With the exception of one severe rain storm the weather has been favorable.

A MEETING of the creditors of the L. E. Archias Seed Co., in bankruptcy, will be held at Joplin, Mo., August 6. It is expected that 10 per cent dividend may be paid.

M. L. MCDONALD, of the firm of Henry Field, Shenandoah, Ia., will soon enter the Iowa State College at Ames for special training along the line of seed breeding.

DES MOINES, IA.—The Iowa Seed Co. has just broken ground for the erection of six new greenhouses 180 feet long, for the growing of carnations. This will give them complete about 50,000 feet of glass.

DUTCH growers claim tulip crops are only medium and of double varieties the crop is poor. A shortage seems certain and prices are advancing every day. Some named hyacinths, on account of continued disease and poor weather this year, are hard to get.

BISMARCK, N. D.—Oscar H. Will and family have just returned from a seven-weeks' visit to Boston, Mass., and Syracuse, N. Y. Geo. F. Will has returned from Harvard, having graduated with honors. Crops of all kinds in this section are good. Onion sets will be harvested about August 15.

PORTSMOUTH, R. I.—State Representative Henry C. Anthony, the well known seed grower and dealer of this place, has the sympathy of the trade in the loss by drowning of his son Joseph C. Anthony, age 25, the latter's wife, age 24, and daughter, age 4, July 22, in Narragansett bay. The young man was giving his family an outing. Mr. Anthony's infant daughter, who was also taken on the little excursion, was saved in a very remarkable way. It appears that Mr. and Mrs. Anthony did not remove her from her baby carriage when they took her aboard the boat, and the carriage was found floating, supported by two oars which had in some way got caught in the wheels of the vehicle. The baby was not even wet. Mr. Anthony was a prosperous young farmer.

JOHN F. BARTER, the well known English mushroom grower and maker of spawn, is the author of a new book entitled "Mushrooms and How to Grow Them." The book contains some 44 pages, with 10 excellent illustrations, including a portrait of the author, and the subject is covered concisely and in the direct terms of one who thoroughly understands it. Slightly more than three pages are devoted to a description of mushroom culture in the Paris quarries.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.
Braslan Seed Growers Co.
WHOLESALE SEED GROWERS.
SAN JOSE, CALIFORNIA.

Boston.

Maurice Fould is now business manager for the W. W. Rawson & Co. who

A. J. Pieters.

are now preparing for the fall trade at their new store, No. 5 Union street.

The local dealers have just received their first shipments of Bermuda lilies, freesia and oxalis, and are shipping all early orders.

After four years' absence James H. Cheyne is again located with the Schlegel & Fottler Co. as a traveling salesman.

John Fottler is spending a number of days in Jackson, N. H., on a fishing trip.

B.

A. J. Pieters.

A story has been told of a certain premier of England, when visited by a delegation of nonconformists who were not well pleased with the attitude which the church of England had assumed toward them. The premier, it is said, told them in reply to their complaints, that he didn't care a dash for the church of England, but added, "I am for it because it exists." That was doubtless a very worldly view, but there is point in his remarks to the extent that any institution which has grown and flourished cannot be ignored.

The free distribution of seeds to farmers by the United States government, from a very small beginning, in the early years of the republic, has increased until now the work is allotted to a separate bureau of the Department of Agriculture. Personally, the writer has always been, and is now, opposed to this particular form of paternalism. The seeds may be good, but there seems to be no good reason why the government should give them away. Futhermore, with the annual seed distribution there always comes, from newspaper offices, a crop of wretchedly poor jokes, supposed to be at the expense of everybody connected with free seed distribution. Laying aside the question of propriety involved in congressional seed distribution, it is satisfactory to reflect that if this work must be done it is done in the careful, systematic and businesslike manner. A. J. Pieters, who has for a number of years been at the head of this branch of the government service, is a trained botanist who knows all about seeds. A gentleman of taste and culture, he is deservedly popular with those who have been so fortunate as to make his acquaintance. The following brief sketch of his career should therefore interest readers of this journal:

Mr. Pieters, after graduating from the University of Michigan in 1894, spent the greater part of one year at Cornell University, studying horticulture under Professor Bailey, and accepted an appointment in the seed laboratory of the Department of Agriculture in the spring of 1895. During the next seven years he was connected with the laboratory as seed expert and also in making tests of the germination of seeds and the investigation of the conditions controlling the germination of seeds. The results of his work have appeared from time to time in the publications of the department, especially in the yearbooks and the farmers' bulletins. After the death of G. H. Hicks in 1898, Mr. Pieters was placed in full charge of the seed laboratory and in 1902 was appointed chief of the office of seed and plant introduction and distribution. In this office were combined the work of the congressional distribution of seed and the section of foreign seed and plant introduction.

In handling the congressional seed distribution it has been his aim to improve the character of the distribution itself by securing seeds of good quality and at the same time to conduct the work so as to do as little injury to the seed trade as practicable. To this end his policy has been to purchase, as far as possible, whatever surplus seeds were left in the hands of seedsmen and growers rather than to make contracts for the growing of seed, realizing that the contracts for growing seeds would be very likely to give rise to increased surpluses whereas the purchase of surpluses on hand would tend to relieve the market of one serious cause of depressed prices. Mr. Pieters will leave the department in August to engage in the business of seed growing in California. His location will be announced to the trade in due time and he expects to call upon members of the seed trade during the coming winter. Mr. Pieters proposes to pay especial attention to the growing of stocks of high quality and will aim at this rather than the production of large quantity of seed.

S. E.

European Seed Crops.

Sluis & Groot, of Enkhuizen, Holland, have issued the following report, dated July:

Last autumn, and the latter part of the summer, when various biennials were sown or planted, the weather was very dry; consequently many plants have developed poorly. This applies specially to cabbages, swedes, beets and mangels so that in general the plantations are considerably smaller than last year. The mild winter was favorable to the crops and only a few plants have been killed, so that not many sorts will fail entirely. Generally speaking, crops, owing to exceptionally cold weather in the spring, are somewhat backward.

Cauliflower.—Stand fairly good.

White, red and savoy cabbage, brussels sprouts and borecole.—Very small plantations and generally middling stands, a part even considerably under middling.

Turnip.—Exceptionally small acreage, stand fairly good.

Swedes.—Very small plantation, with poor prospects of crop.

Kohlrabi.—Little sown; stand fairish.

Mangel, sugar beet and beet.—Fairly good.

Carrot.—As a whole they promise a fair crop; stand rather thin.

Parsnip and scorzonera.—Very good, not much planted.

Corn salad.—Excellent crop.

Radish, summer.—Suffered considerably from insects, so that a considerable acreage was lost; what was left is fairly good.

Radish, winter.—Not much planted; stand pretty promising.

Onion.—Small plantations; stand good.

Garlic bulbs.—Good.

Parsley and celeriac.—Middling stand.

Borage.—Looks good but rather late.

Chervil.—Average crop, but considerable acreage was lost; curled almost total failure.

Spinach.—Promises an average crop.

Cucumbers.—Pretty good.

Peas.—Generally very good.

Dwarf and runner beans.—Promise a middling crop although rather late owing to very cold weather in the spring.

English beans.—Excellent crop.

FLOWER SEEDS.

Prospects of the growing crops are not so favorable as last year being somewhat backward, owing to the cold weather we had in May. We expect, however, if the weather continues favorable, that the crop as a whole will be still an average one.

Antirrhinum.—Excellent.

Calliopsis.—Looks good, small plantation.

Campanula.—Owing to the dry weather of last autumn most plants remained too small and consequently did not run to seed. Very small crop in several sorts.

Candytuft.—Middling crop.

Centaurea.—Very good stand; not much sown.

Convolvulus.—Stand very good.

Dianthus.—Looks very promising.

Escholtzia.—Very good.

Gypsophila.—Good.

Helichrysum.—Looks promising until now.

Lobelia.—Stand fair.

Mignonette.—Average crop, rather thin.

Mimulus.—Excellent crop.

Myosotis.—Fairly good.

Nasturtium.—Very fairly good.

Nemophila.—Good.

Pansies.—Average crop, small plantations.

Papaver.—Good crop.

Petunia.—Fairly good, rather late.

Phlox.—Average crop.

Rhodanthe.—Pretty good.

Stocks, Ten-week.—Rather late.

Stocks, Virginian.—Little sown; stand very good as yet.

Sweet peas.—Little sown; looks good.

Verbena.—Very good.

Wallflower.—As campanula; crop apparently under middling.

PANSY SEED.

Brown's extra Select superb giant prize Pansies awarded silver medal St. Louis Exposition, 1904. My own grown, new, 1906 crop, ready.

PLANT NOW. LILIUM HARRISII FOR EARLY FORCING.

We offer some extra choice Lilium Harrisii which has been grown for us from the original, pure stock. This is the kind of stock that you want for the very earliest forcing, as it is the true, original Harrisii. The small sizes, 5-7s and 6-7s are particularly desirable for this purpose, as they will flower more quickly than the larger bulbs. If you want to get a little of the original, pure Harrisii, try a case or two of this. As our stock of this is limited, we can offer only a few cases to a single buyer. If you have been dissatisfied with the Harrisii that you have forced heretofore, try a case or two of this, and see if it is not more than worth the difference in price over the stock that you have been buying. In ordering, ask for the pure selected strain of original Harrisii, which we offer as follows:

5 to **7**-inch bulbs, 400 to the case	per case,	**$17.00**
6 to **7**-inch bulbs, 350 to the case	per case,	**17.50**
7 to **9**-inch bulbs, 200 to the case	per case,	**18.00**
9 to **11**-inch bulbs, 100 to the case	per case,	**18.00**

EASTER COMES EARLY NEXT YEAR—MARCH 31—and a great many growers will want to use Harrisii instead of Longiflorum so as to be sure to have the plants in flower in time, as the season is going to be short for Japan Longiflorum. The crop of Harrisii this year is the shortest it has been in years, and in view of the extra demand, we advise those who have not already covered their requirements to lose no time in doing so.

For very earliest forcing—Christmas and later—we recommend the pure Harrisii offered above, but for later forcing, for Easter, our customers will find the regular stock offered below first-class stock—much better than the average stock usually offered. We can quote the regular stock as follows:

6 to **7**-inch bulbs, 350 to the case	per case,	**$14.00**
7 to **9**-inch bulbs, 200 to the case	per case,	**15.00**
9 to **11**-inch bulbs, 100 to the case	per case,	**15.00**

FREESIA REFRACTA ALBA, the true white variety. Now ready. Finest Bermuda-grown stock, $1.00 per 100; $7.50 per 1000.
BERMUDA BUTTERCUP OXALIS, $1.00 per 100; $7.50 per 100.

Seed.

LOUISVILLE, KY.—The Kentucky Nursery Co has filed a charter, capital stock being $30,000, divided into shares of $100 each. The limit of debt is $5,000. The incorporators are F. Boone Gardiner, 215 shares; M. L. Gardiner, 10 shares, and R. L. Cullen, 75 shares.

BUCKATUNA, MISS.—The incorporation of the Southern Floral Nursery Co. was completed July 14 by the election of officers and directors, as follows: J. B. Bridge, president; L. H. Read, vice-president and general manager, and Alex. B. Brown, secretary and treasurer. The same gentlemen constitute the board of directors. This firm claims to have already booked 15 per cent more orders for cannas than their entire sales for the past year.

Herbaceous Plant Notes.

Silene acaulis (moss pink) forms a dense, compact, mossy cushion over the ground. The leaves are linear, less than a half inch long and closely set along the prostrate, interweaving stems. The flowers are freely produced, slightly above the mosslike mass of green. In color they are of a very bright deep pink, one-half inch in diameter and they continue to open out in succession from June to August. It is a most beautiful little plant, only two inches high and succeeds most anywhere in fairly good garden soil, when not overshadowed or crowded by larger growing plants. In low, moist places the plants should be grown on ridges, elevated above the level, because moisture settling among the dense growth causes decay of leaves and stems in the heart of the plant. The same trouble may follow where plants are covered in winter with litter, manure or straw, which packs down closer and closer after each snowfall and thus allows of no circulation of air to dry up moisture gathering in the mossy cushion; evergreen branches or a very thin layer of long straw material should be used for this purpose where protection is thought necessary.

Silene Elizabethæ is another rare gem among the silenes. The flowers are considerable larger than those of S. acaulis and they are produced in terminal, branched panicles, 8 to 12 inches high, produced freely during June and July. The size of the individual florets reaches one and a half inches and they are of a fine shiny rose color. The leaves are lanceolate, two to three inches long, shorter and narrower along the stems. Propagation is by careful division and after flowering or by young cuttings taken with a heel in early spring. An open situation should be provided for the plants, allowing free access of air and sun. As to soil they are not very fastidious, providing they have enough moisture to live on in dry weather.

Silene maritima, fl. pl., is a prostrate, very free flowering perennial with loosely branching flower stems spreading over the ground and small silvery grey, oblong painted leaves. The flowers are pure white, large, an inch or more in diameter, compactly double and the plant is continuously in bloom from June to September. It does well wherever we plant it, but is best suited for the rockery, the numerous flower stems forming a net work over the stones. It does not divide readily, but can be increased by cuttings of young growths in spring. Shoots springing from the base or root stock of the old plant root nicely at any time during the growing season under ordinary care.

Silene alpestris is another dwarf ground covering species with short, broadly lanceolate, but rather small foliage and ascending simple flower stems, bearing a loosely arranged small panicle of glistening white flowers from one half to three-quarters of an inch in diameter. It begins to bloom in May, but is still covered with flowers and will usually last in perfection until the end of August. The plant rarely exceeds six inches in height and is compact and neat in appearance.

Calimeris incisa (Aster incisus) is one of our best early flowering asters, forming always a compact mass of stems, branched almost down to the ground. The height is rarely over 18 inches. The rays of the flowers are pale bluish lilac, large and produced in great abundance during July and August. It is easily grown in any open, airy situation, always a pretty object in a border and also useful for cutting.

CALIFORNIA ROSE CO.,
POMONA, CAL.,
Wholesale Growers Field Roses on own Roots

Coreopsis verticillata, a very showy summer flowering perennial with deep bright golden yellow flowers, one and a half inches across, produced freely all summer with long, erect stems. The plant forms an upright bush about one and a half to two feet high. The stems are wiry, much branched and subdivided, each division being capped with a flower. The leaves are divided and lacerated into narrow linear segments. It is a fine plant for the border in any kind of ordinary garden soil and excellent for cutting purposes.

Heracleum giganteum (villosum), a gigantic plant, is ornamental in any stage of growth and a grand object when planted by itself in a lawn where it will form a symmetrical specimen. The flower stem rises from the mass of foliage to a height of 8 to 12 feet bearing numerous immense umbels of white flowers. The leaves are pinnatifidly divided and deeply incised and cut, and are from three to four feet long. It requires a good rich soil and an abundance of water to grow a perfect specimen. An occasional dose of liquid manure will greatly assist in developing a perfectly shaped plant.

JACKSON & PERKINS CO., Newark, Wayne County, New York.

HIBISCUS SYRIACUS MEEHANII

WE now offer to the trade our new hardy variegated leaf Hibiscus Syriacus Meehanii. This plant attracted much attention when exhibited at the American Nurserymen's Convention at West Baden, Ind., and American Florists' Exhibition at Asheville, N. C. Foliage beautifully variegated; never sun-scalds or reverts to the green; flowers single, very large, satiny lavender; blooms during four months; prices on application. Orders booked now.

P. J. BERCKMANS CO., Inc., Fruitland Nurseries, AUGUSTA, GA.

Order Peony Plants Now

	Trade Pkt.	⅛ oz.	Oz.
Giant White, very large, with violet eye	$0.10	$0.20	$1.20
" **Aurora,** pure white without blotches	.10	.20	1 30
" **Adonis,** light blue with a white center, very fine	.10	.20	1.20
" **Auricula Colors,** metallic shades	.10	.20	1.25
" **Black,** large true black	.10	.20	1.25
" **Beaconsfield,** upper petals light lavender, lower ones deep rich purple, almost black	.10	.20	1.20
" **Freya,** deep purple violet, with a white margin	.10	.20	1.30
" **Mme. Perret,** lovely shades of pink and rose	.20	.50	2.00
" **President Carnot,** fine blotched white	.10	.25	1.60
" **President McKinley,** fine blotched yellow	.10	.25	2.00
" **Pink,** lovely shades of pink, same as Hydrangea	.10	.25	2.00
" **Purple,** very large, rich deep purple	.10	.20	1.00
" **Violet Blue,** a very pleasing shade	.10	.20	1.00
" **Striped,** mahogany, striped and flaked white	.10	.20	1.20
" **Parisian Striped,** stripes are broader and louder than the preceding a good seller	.10	.20	1.30
" **Purple King,** a good new sort	.10	.25	1.50

	Trade Pkt.	⅛ oz.	Oz.
Giant Diana, cream color	.10	.25	1.50
" **Atrosanguinea,** blood red	.10.	25	1 50
" **Emperor William,** dark navy blue	.10	.20	1.25
" **Yellow,** immense flowers with dark eye ..4 oz., $4.25	.10	.20	1.25
" **Cassier,** 3 spotted	.10	.20	1.20
" " 5 spotted, an A1 strain	.25	.45	3.00
" **Bugnot,** the flowers are of enormous size, perfectly round, of great substance.	.25	.60	4.50

Giant Bridesmaid. Its ground color is a rosy white, rivaling in delicacy and beauty with the finest apple-blossom. Trade Pkt., 25c; ⅛ oz., 45c; Oz., $2.60.

Giant Psyche. Each flower is elegantly curled and undulated and in every respect a beauty in form and color. Trade Pkt., 25c; ⅛ oz., 70c; Oz., $5.00.

Giant Pretiosa. Each petal is marked with a very large blotch of deep violet color; these blotches are surrounded by a brilliant crimson rose background, and the ground color is margined with a pure white edge. Trade Pkt. (250 seeds) 25c; ⅛ oz., 35c; Oz., $2.50.

BOULOGNE GIANTS. This is a special selection of a French pansy grower; the flowers are of the largest size, of great substance and fine form, and are borne on particularly strong stems. They are mostly 3 and 5 blotched, delicately veined, while the colors are rich and varied. Like all high-bred pansies, they are shy seed bearers Trade Pkt., 50c.

GIANT VOLCANO. Color, bright dark red, each petal being marked with a very large dark blotch. The flowers are of large size and good substance, and the edges of the petals are curled like those of "Masterpiece, from which it is a selection. Trade pkt., 25c.

MARECHAL NIEL. The flowers are very large, without any blotches or veins, and are of the same pleasing, delicate cream color as the rose whose name it bears. Pkt., 10c.

ROSY MORN. A bright purplish crimson margined with a clear white edge. In early spring the color is very deep and rich; as the weather grows warmer, the color gradually turns a pleasing rosy carmine and the silver edge becomes wide. Trade Pkt., 25c; ⅛ oz., 60c.

SIEGFRIED. Of giant size, the flowers are borne on strong stems. They are mostly 5 spotted, with a clear white margin. The colors are of rich brown shades such as are found in the English wall flowers. Trade Pkt., 25c.

Special Mixtures:

VAUGHAN'S INTERNATIONAL PANSIES—The Worlds' Best. This is a combination of as many separate colors, types, blendings and unique kinds as can be found in the world. **It is the best general mixture in existence** and is most widely known and popular. Price per oz., $10.00; ½ oz., $5.00; ⅛ oz. $1.50; trade pkt. 50c.

VAUGHAN'S CUT FLOWER MIXTURE OF PANSY SEED. Especially made from light colored Giant varieties for florists who raise for cut flowers in the house. Trade pkt., 25c; ¼ oz., 80c; Oz., $5.50.

VAUGHAN'S "GIANT PANSY MIXTURE." This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain with its delicate veinings. We have spared no expense to secure the newest, richest and finest sorts. Price, ¼ lb., $14.00; oz., $4.00; ⅛ oz., 60c; trade pkt., 25c.

MASTERPIECE—NEW GIANT CURLED. This strain comes nearer to "Double pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double The flowers are of enormous size, often 3 inches across and the color variations and combinations are odd and striking. Trade pkt., 50c; ⅛ oz., 75c; ¼ oz., $1.35; oz., $5.00

VAUGHAN'S PREMIUM PANSIES MIXED. Embraces all the varieties of the Fancy German Sorts. Per pkt., 25c; ⅛ oz., 80c; ½ oz., $3.00; oz., $5.50

CHICAGO PARKS BEDDING PANSIES. "Choice mixed," pkt., 10c; ¼ oz., 30c; oz., 75c; 4 oz., $2.50

VAUGHAN'S "ELITE" MIXTURE. This is not a complete mixture like our International; it does not contain any pure white, yellow or any self colors, nor any other of the well known kinds. It is comprised of the cream of four Pansy specialists' choicest and most expensive mixtures and such new and novel kinds as listed above. Trade pkt., 50c; ⅛ oz., $1.00

NEW ORCHID-FLOWERED PANSIES. A most interesting type of Pansies of the Giant Flowered Class, containing a mixture of the most surprising, novel, unique and beautiful color combinations. The upper petals are upright and sort of plaited, which gives the flowers their resemblance to orchids. The colors range in the terra cotta shadings as well as in the flesh orange, rose, pink and lilac. Trade pkt., 250 seeds, 25c.

IMPROVED GERMAN MIXTURE. This is a mixture of three strains from different German growers and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 10c; ⅛ oz., 20c; ¼ oz., 30c; oz., $1.00

Wire supports, model extension carnation supports, galvanized wire rose stakes, tying wires, single and dbl. pot hangers. Igoe Bros., 63 Metropolitan Ave., Brooklyn, N. Y.

Kansas City.

THE MARKET.

Electric fans, ice water and cool places have been things much sought the past week. Even these requisites prove to be of little comfort to the sweltering humanity. The city the past week has experienced a touch of genuine summer, the thermometer registering from 80° to 90° daily. Growers are planting stock with much difficulty as it is an everyday occurrence for three or four men to drop out on account of the heat. Trade among the retailers is practically at a standstill. In the fashionable residence districts curtains are drawn, and a deserted appearance is noticeable. Without a doubt, the egress to other lands this summer is greater than at any previous season. The cut stock situation is showing a slight improvement in both quality and quantity. American Beauty roses are small and presentable blooms are almost unobtainable. Kaiserin is about the best thing to be seen in the market and these find ready sale. Bride, Bridesmaid, Chatenay, Richmond and Liberty are fairly good but hardly deserve a quotation on account of scarcity. Killarney, from all appearances, is making a splendid summer rose, chiefly due to its splendid keeping qualities. Carnations are scarce and poor. When shipped in during this warm weather, we find they do not stand to be displayed outside the ice box. Asters and gladioli are everywhere. Phlox, lilies, golden glow, and all outdoor flowers are arriving in larger quantities.

NOTES.

Signs of rebuilding, repairing and cleaning up prevail at every establishment. Geo. M. Kellogg is making extensive improvements at his store.

Frank Menchart, of Leavenworth, Kans., was in the city recently purchasing fixtures for a new store he proposes to establish in that city.

John Schneider undoubtedly anticipated the advent of the warm spell. He left a few days ago for the vicinity of Salt Lake City.

We are pleased to report that R. S. Brown has fully recovered from his illness and is again able to be at his duties.

W. L. Rock is in Chicago this week purchasing material for 10 new houses which his company will erect this fall.

Chas. Heite has about finished benching his carnations which he thinks are the best planted so far.

Miss Daley manages to have on hand a nice assortment of stock in spite of the prevailing scarcity.

Wm. Bastain has about the finest gladioli in the market; they came from Lexington, Mo.

M. E. Chandler is supplying the trade with a large amount of asters.

H. Lambach, of L. Baumann & Co., Chicago, was a recent caller.

Fred Fromhold has returned.

K. C.

St. Louis.

TRADE SLOW.

The market the past week was very slow. At the wholesale houses there is nothing doing. No orders on the files. Very little shipping, though occasionally an order or two. Gladioli have been very plentiful but at time of writing appear to be shortening up. Asters are plentiful. Some good Semple asters are in which bring good prices. A few good roses are in the market but the majority of the new crop is very small and almost unsalable. A few good Richmond roses are coming in, but the retailers don't seem to care for them, as their keeping qualities are very poor these hot days. American Beauty is improving a little in color and size. Some good double tuberoses are in the market.

NOTES.

Geo. M. Kellogg, of Pleasant Hill, Mo., who was in the city last week, was hunting a good carnation grower. He expects to go largely into carnation growing this fall, also he is going to increase his American Beauty supply.

A rate of $12 to Dayton has been obtained. It is expected a large delegation will leave St. Louis.

W. W. Stertzing is bringing some good carnations and fine double tuberoses.

C. A. Kuehne is receiving some fine Semple asters, also some first class roses.

Jas. Arado, with Young & Sons, has just returned from his vacation.

Andrew Meyer was very busy the past week with funeral work.

W. F.

Louisville.

BUSINESS SLOW.

Business was very slow the past week, probably due to the very few funerals, and naturally stock in general was in very good supply. Carnation planting from the field has now begun, and nearly everyone is planting earlier than usually is the case. Plenty of rain has no doubt caused them to get the required size earlier. The supply of roses is good, and the quality and demand satisfactory. Carnations are very poor in quality, and the supply and demand are slow. Asters are of fair quality, the supply and demand being up to expectations. Lilium auratum is not so plentiful, the quality and demand being satisfactory. The supply of Shasta daisies is shortening; however, there are plenty to supply the demand. Hardy phlox remains in good supply with the demand fair. Green goods are in adequate supply. Other stock can be had in suitable quantities, with an occasional demand.

NOTES.

The Kentucky Society of Florists will hold its regular monthly meeting at 8 p. m., August 7. Members will confer a very appreciative favor upon the officers by attending, expressing their views, etc., and helping in general in putting the club where it belongs.

Too bad more of the bowlers didn't see Louis Kirch break the record Saturday night. Get him to tell you about it.

Wm. G. Walker, son of Wm. Walker, left Saturday morning for Niagara Falls and other points of interest.

Jacob Schulz has about finished carnation planting.

F. L. S.

Toledo, O.

The monthly meeting of our Florists' Club was held July 26, only 15 members attending. We had quite a lively time as convention matters were on the programme. The Detroit club asked us to come to Detroit and join them on a boat ride to Cleveland, whence we could go with the Clevelanders to Dayton, but this idea did not seem to have many supporters among our members. We have in a way set our heart on a trolley ride in one of those new limited cars to Dayton, the trip only taking 4½ hours and if we go this will be the way. It is a question if very many will go, most are so situated that they cannot very well leave their places.

Our club is trying a new scheme to attract its members. Prizes for cut-flowers are on trial and a grand prize of $1 has been offered for the best collection of at least six different cannas, to be shown at the next meeting. Geo. Bayer has offered a prize of $3 for the best blooms of asters at the next meeting. There must be a dozen of each color, white, pink, purple and lavender, any variety and the prize may be divided among different competitors in case no one can show all the four colors.

Heavy rains have been the daily routine of business for the last few weeks, hail-storms have done heavy damage to the nearby farmers, but the florists suffered no loss as far as glass is concerned. The leaves of cannas are all ripped in shreds and all are glad that they got off so easy.

S. N. Peck is getting nervous, because the builders are slow in sending his greenhouse material; it was promised a couple of weeks ago, but nothing doing so far.

The Street Flower Merchant.

In THE AMERICAN FLORIST of June 16 our Philadelphia correspondent referred to this well known character as follows:

"Chas. Meehan, in speaking of the marketing of flowers, said things were often done that the average small florist or dealer did not understand. He is often asked, How is it that the men in the street sell flowers so cheap, as many as a bunch of 25 flowers being sold for 10 cents?

"Where can the men buy them to sell for this figure? Such a question was asked by an out-of-town customer of Mr. Meehan last week, and he replied: 'Well, I guess some of them come from us. If you will drop in here next Friday afternoon or Saturday morning, I will sell you 2,000 to 5,000 or even 10,000 carnations, the accumulations of the week, many of them very good, but just as they run, at $2 per 1,000. That is what I sold them at last Saturday.'

"'Five thousand; oh! I could not use such a quantity as that. From 300 to 500 is my limit. I would not know what to do with so many.'

"'No,' said Mr. Meehan, 'nor would my street customer know how to dispose of your small select order at the higher prices.

"'He must handle large lots at quantity prices, figures so low that the thousands of people that hourly pass his stand are tempted to buy, not because they particularly want the flowers, but because the price put them within reach of those who would not think of going into a store, and sales are made and some sort of returns realized for the growers that are better than the oblivion of the waste barrel.

"'We would rather sell to regular retail florists at these prices, but they will not take such quantities at any price. They say they can not handle them and so they have to go in quantity to the man who has trade for them at the lower figures.'"

A NEW YORK OPINION.

I coincide with Mr. Meehan's interpretation of this problem. Like all articles of merchandise, sulplus stock which is generally inferior is frequently disposed of at a sacrifice.

The grower must realize some return for his expenditures. The retailer who has high class patronage can offer for sale only selected goods, the finest of the best, in order to hold his fastidious clients, many of whom are excellent judges of fine flowers and can discern the difference in quality and are willing to pay a fair price for a superior article.

ALEX. MCCONNELL.

A WASHINGTON VIEW.

On this subject Wm. F. Gude, Washington, D. C., comments as follows:

"In reference to the note under Philadelphia in THE AMERICAN FLORIST of June 16, about the small retail flower dealer not understanding why roses are sometimes sold at 25 cents a dozen on the streets, I can only say that I am not surprised that many small florists do not understand how that is done when roses are quoted from $4 to $12 per 100. The fact is, that it is so, and will remain so as long as flowers are grown by modern methods. To my way of thinking it is absolutely right that it should be so, as at certain seasons of the year it is more profitable to permit the plants to bloom, cut the flowers and sell them for any price they may bring, rather than to allow them to go to waste on the bushes by trying to decrease the production.

"Again, from personal observation, I am thoroughly convinced that the fellow on the street corner has done a great deal more than he has been given credit for in creating an appetite and love for flowers among a class of people who would never have been reached by an up-to-date flower store. Hence, to my mind, it is right and proper at certain seasons of the year that the general public have an opportunity to buy flowers at the smallest possible cost, because it does not matter what the occasion may be one cannot buy flowers and save them up. But, as quoted by your Philadelphia correspondent, many a person who has no idea about flowers and sees them on the street thinks of the loved ones at home, or some friend on his way home, and invests 10 cents, or probably 25 cents.

"The inevitable result is that the amount of happiness created by a small purchase will lead him or her to spend a dollar or two in some nearby flower store, when he cannot buy them on the street, thus making flower buyers of people who never would have started to

spread happiness in this commendable way had it not been for the flower seller on the street."

A CHICAGO VIEW.

How is it the men in the street sell flowers so cheaply, as many as 25 in a bunch being sold for 10 cents?

This is the question asked the city florist almost daily by his customers during the summer months. Out-of-town florists, visiting the large cities where the street vender plies his trade, wonder how he can sell so cheaply and where his stock is purchased.

The street vender's place of business is the curbstone, stairway or elevator entrance or nook in a building along streets where a number of people pass during the day. The city florist occupying stores along the thoroughfare often feels the competition of his curbstone rival who conducts his business alone under small expense.

In a measure the commission men are responsible for the congested condition of the flower market which makes the curbstone dealer possible. Good stock can always be sold and sold promptly. Second grades sometimes require pushing to sell, but the difficult proposition for the commission man is to sell the cheaper grades of all kinds of flowers so as to realize a satisfactory return to the grower, and still protect the market.

Chas. Meehan of Philadelphia, is quoted in THE AMERICAN FLORIST of June 16, stating that the accumulated stock of his concern for a week was from 5,000 to 10,000 carnations which he sold to a street vender at $2 per 1,000 at the end of the week for the entire lot. He would have preferred to sell them to a florist but a florist could not dispose of such large quantities of that quality, 300 to 500 being his limit for a purchase.

The street vender is always willing to take a chance. The quality of his goods requires an immediate sale as a sudden rain storm or change in the weather renders his investment an almost total loss. In Chicago a pool is often formed, one doing the buying and the stock purchased being divided proportionately according to the amount invested by each individual. Purchases amounting to $50 are frequently made.

The commission man once or twice a week has these clearing sales, simply because it is either that or the waste barrel for the surplus stock on hand. They have been trying hard all the week to get 75 cents and $1 per 100 for flowers from the city florists and they finally sell to the street venders at 20 cents per 100 at the end of the week.

If they had sold out daily all surplus stock at a reduction from the prevailing market rates they would have secured better returns for the growers.

The rule of one of the largest and most successful cut flower commission houses in Chicago is to sell out all stock received daily, never carrying flowers over to the next day even if stock is scarce and the market likely to advance. They maintain that their business is to sell flowers and while they are selling other men are working to grow them.

Of course they endeavor to secure the best market prices possible, but after the trade during the rush hours is over, if a surplus is on hand, then the strenuous work begins. City customers are advised by 'phone and country customers by wire of the bargains on hand. Prices are sometimes cut in half. What is the result? The close of business daily finds them without stock, ready to begin business next day with a fresh supply of flowers.

Customers soon discover that their stock is always fresh and patronize them in preference to other houses. If a wholesale house can build up its trade by giving its customers fresh stock daily and the benefits accruing from occasional bargain sales why can't a retail florist do likewise?

Aside from making a reasonable profit in the sale of cut flowers I believe wholesale and retail florists should give greater attention to giving their customers value for their money. The first 72 hours of the cut flower's life constitute the period of its most satisfactory usefulness. This allows 24 hours' time from the grower to the commission man, 24 hours in the retail florist's hands and the remainder to serve the flower-purchasing public. In shortening the time of transit from the grower to the consumer the customer receives more value for his money.

Personally, I think there is something to be said in favor of the street venders. On special occasions they relieve the market when other channels of consumption for a particular quality of flowers are congested. In growers' markets or exchanges an auction held daily from 1 to 3 o'clock p. m. might be advantageous in disposing of the day's surplus stock.

The street vender in plying his vocation on small capital requires perseverance and patience. He flourishes only when flowers are cheap. Winter and high prices find him dormant waiting for the return of lucrative summer days.

Nobody ever hears of the street vender's troubles. He bears them in silence. While he may be selling carnations at the rate of 25 for a dime, roses may be scarce, and the same number would cost in the wholesale market $1, or when selling roses, carnations may be high priced and out of his reach. His customers are often recruited from the ranks of those who would not enter a store, being persuaded to buy because of the remarkably low price.

I am inclined to think that a certain proportion of these occasional customers may eventually develop into regular ones. In this case, a demand for flowers of better quality would sometimes lead them into the flower store. Of course, I do not include that class of customers who are asking the street vender when he will sell them "25 orchids for a dime."

HORACE R. HUGHES.

ANOTHER WASHINGTON VIEW.

The marketing of flowers, I take it, means that exchange whereby the grower or producer receives the currency or other equivalent for his product.

Floriculture has been in existence for a very long time; indeed, we may safely say since the beginning of man, for we are told that the garden of Eden was beautiful, containing all the fruits and plants which were required for the happiness of man. There surely must have been flowers there, too. But the growing of flowers to sell, that is, for commercial purposes, is of much more recent date, contemporaneous with which arose the question of the best means of disposing of them.

If you will go to any market stand where the little trucksters come in from the country with their wagon load of produce several times weekly, bringing incidentally a few bunches of snowballs, sweet william, phlox, etc., you will see the beginning of the floral trade. The evolution of this has brought to us the magnificent floral establishments of to-day.

With the increased production of flowers a better means of reaching the public was sought. Hence the establishment of flower stands, retail and wholesale flower stores and commission houses. These different stages of development have each come to us as the necessity has demanded, for "necessity is the mother of invention." The

Growing chrysanthemums in the open; showing base for rafters for sash or other covering.

wholesale commission florist probably represents the latest phase of development in the business. It is strictly a nineteenth century institution and the fact that it has had a steady and healthful growth is evidence that it was demanded by the existing conditions. Although it is decried at times by some it seems to be the only adequate means of distribution and it is a significant fact that the business is more progressive and thrifty in those centers where we have good live commission men. Of course, the commission man is dependent upon the grower for his stock, but at the same time it is absolutely necessary for the grower to have an outlet for his product. Each must depend on the other and by mutual co-operation the greatest mutual benefits accrue.

Contracts direct between grower and retailer as a rule are unsatisfactory and impossible. For instance, a retailer agrees to take the entire cut of carnations of a certain grower. If the cut is sufficient to supply the retailer's trade during December and January, he will find that during March and April he will be surfeited, probably, having two or three times as much as he can use. If this contract system were used throughout the entire stock of flowers, that is, with the roses, violets, sweet peas, etc., at the end of the year the retailer would find that his entire profits and perhaps part of his business, had gone in the waste. Under such conditions business would be impossible for him, and the grower being deprived of his output the result would be disastrous to both.

Referring to a particular case which came under my observation, a store agreed to take the entire cut of carnations from a grower. The cut ran from 6,000 weekly around December and January to as many as 15,000 in April. The price paid for them was on a scale averaging about 2 cents straight through for the season. This was as cheap as the grower could produce such stock and make a living. Notwithstanding a phenomenal business, the net profits to the retailer buying at this low price did not exceed 10 per cent. Many times when there were hundreds of these flowers in good condition on hand it was found necessary to go out and buy carnations of some special variety. And again many times hundreds would go to waste when some other florist, perhaps a few squares away, could have used them very profitably.

This unnecessary waste if obviated would mean a saving of thousands of dollars each year. In many instances it would mean a difference between success and failure. The only solution of this unnecessary evil seems to be found in the establishment of distributing centers. What constitutes the best form of distributing centers is the question in which all florists, both growers and retailers, are deeply concerned. In my opinion the question is amply answered in the ideal wholesale commission florist.

Z. D. BLACKISTONE.

AN INDIANAPOLIS VIEW.

That the vender of quantities of cheap flowers in a large city is or is not as necessary to the trade as the small florist who handles select lots at a wider margin has been a much used subject with the florists in the past few years and one which remains to be satisfactorily settled.

It seems to have been the experience in the larger centers that the street venders do not injure the storeman though he was received with many misgivings and instilled terror in the hearts of many for sometime. The street stand with its masses of stale flowers inspires a love of them. Customers buy these cheap flowers for ordinary occasions and resort to the fancy stores for flowers intended on a particular occasion.

The storeman can not hope to have enough good stock in the winter months and not have a surplus in the spring. The street vender is a natural business outcome and the average small florist must not expect to receive the best stock at a figure the same as offered the vultures who prey only on the carrion of the commission house. The writer at heart, like the small dealer, is not in accordance with his scribblings, as he has not passed through the ordeal as presented in the larger cities and has accepted the logical facts. The storeman and the street vender are both benefits to the trade.

The fact that the street merchant's stand rests on public property and that this is unlawful is a phase not discussed here, but the stimulus the trade receives from putting quantities of flowers under the very noses of the masses is a fact which cannot be overlooked. The heavy bank account derived by the grower and commission man is another, so the small dealer should rest content with the state of affairs as the world will have them. Far more harm is done by the business man who would be a wholesaler and a retailer as the occasion demands.

IRWIN BERTERMANN.

FROM ALLEGHENY, PA.

The dealers on the street seem to reap the benefit which should go to the florist. It is now something regular for them to get bargains. They have a good supply nearly all the year round, and always sell cheaper. The street dealers who do not buy more than some florists, will get them much cheaper, and seem to get as good a quality and selection. Besides, the street dealers will not take much except roses, carnations and violets (when in season) and very little of anything else. The accumulation might be avoided if the inducement is made to the florist early who no doubt would buy more and sell more.

GUSTAV & J. W. LUDWIG.

AT OTTO GRUNDMAN'S ESTABLISHMENT, SECAUCUS, N. J.
Growing chrysanthemums in the open; showing enclosure with rafters and one row of sash covering.

WITH THE GROWERS

Emile Savoie, Secaucus, N. J.

Emil Savoie of Secaucus, N. J., who acquired the greenhouse property which he occupies at County Line road, last April, is getting into shape for the coming season's trade. Two of his five houses are about to be torn down, and two modern houses erected in their stead. Plants will be his specialty, and he is already getting into shape some very fine stock. He is bringing along some grand fern stock, Boston, Scottii and Cibotium Schiedei. He has also some good palm stock. Azaleas will be a feature with him for the Christmas trade.

Otto Grundman, Secaucus, N. J.

At the establishment of Otto Grundman, Secaucus, N. J., the greenhouses are utilized mainly for small and large ferns, the latter covering Scottii and Boston, good commercial stock. Perhaps the most interesting feature of the establishment just now is the preparations made for growing 50,000 chrysanthemums for cutting. A large fenced enclosure has been made with four narrower enclosures running off from it. One of these enclosures carries rafters, and rafters will be added to the others as required. The chrysanthemums are well started, and the idea is to cover them as the weather may necessitate, or as the temperature required may dictate.

It will be noticed in the pictures herewith that one of the enclosures, or houses, for that is what they really are, has already a row of sash on each side. Later other rows will be added until

the structure is wholly enclosed for flowering the plants. The same course will be followed with the other enclosures. Mr. Grundman had a lot of unused sash on his place and decided to put it to this use. The plants look vigorous and healthy, and he expects to have his early varieties in the market in good season, as well as his medium to late varieties. The structures are of a permanent character, and will be used again for following seasons.

Dayton Convention Notes.

The official preliminary programme is at hand. On August 8 the entertainment committee met and made the final arrangements for all entertainments. Boys, you certainly will be treated fine. The Dayton Florists' Club held an overflowing meeting July 30 and further arrangements were made in the details for this great convention. Everybody is afire and aflame and prepared to give you a most hearty welcome.

Miss Bessie Evangeline Dornbusch has composed for our convention a most beautiful poem, which she read before the club, and deafening and thunderous applause was her reward. This young lady, a daughter of one of our members, is a young woman of no mean poetical ability and a most excellent elocutionist. It was decided last night that she should deliver this poem immediately before the great illustrated lecture on landscape gardening takes place at Far Hills and following the banquet, all in the open air on the big lawn.

Quite a few more surprises have been added on the exhibition grounds and even the members of the club are in the dark as to what the surprises will be. However, I can tell this much—that it will be wonderful. All members who are still hesitating about an exhibit, please hurry up. Time is getting short and space is getting scarce. If you want to be in the swim put a move on yourself and if you want to be a leader in the parade be a generous exhibitor or advertiser.

From all indications so far this convention will be a hummer. Come one and all. All the boys will receive you with the most generous spirit and open heart and we shall see that the city is turned over to you. Those who want to be assisted in getting lodgings in hotels or private houses, please don't wait until the last day, for the chairman on hotels has other duties to perform besides looking out for your comfort. Please make up your mind in time, and send all communications, if you want to be assisted, to the undersigned.

The president's reception will take place at Far Hills the evening of August 21 at 7 o'clock p. m. on the first day of the convention. This will be the peer of any similar reception ever before held both in interest and in the novelty of its features. Many letters have been received from those in nearby states who will only come to the first day's meeting. We would like to see everyone stay through the entire convention. John H. Patterson has donated for this night for the use of the national society, his palacious home and most beautiful park, Far Hills. The illumination of Far Hills will be beyond anything ever seen before. There are no stiff buildings that are to be illuminated with electric lights on the grounds, but the planting of nature itself will be illuminated in the most beautiful way.

Imagine large oak and elm trees, for instance, each one decorated in different colors and a multitude of lights. The planting of the shrubbery will be illustrated in fire and flame, and large climbers will send forth their flowers in electricity, such as clematis, Crimson Ramblers, etc.

The National Cash Register band will furnish the music for the night's entertainment. Mr. Patterson will provide a lunch on the big lawn. There will be read a poem by Miss Dornsbuch, and after that the grand illustrated entertainment on "Landscape Gardening and Garden Architecture" will commence, delivered by the foremost expert on this matter, the slides absolutely true to nature, some of them procured under the greatest difficulties, and colored by the foremost artists. This lecture will begin with the ground upon which the assemblage stands and will show how what was one of the most unattractive parts of the city was improved through landscape gardening, as it stands to-day. It will show in short the work of our art in making better citizens of us all. It will show how a single citizen in the inspiration of his love for nature has demonstrated practical philanthropy through the art of floriculture. It will show the tremendous task it was to accomplish the end, and show the results. The hearer will be informed how this was accomplished after a search through the entire world to gain the highest standard of such an undertaking.

Following Mr. Patterson on his search from his home and visiting parks and palaces as well as the homes of the humble, the audience will be taken in imagination to New York, then through Ireland, Scotland, England, France, Germany, Belgium, Holland, Austria, Switzerland, and Italy and take a trip across to Egypt; from there to the oases of the African desert in order to get a true idea of nature in its most disadvantageous form; to Ceylon, India, and farther India, Burma, and Siam; inspect the immortal gardens of China and dwell at some length in Japan with its wonderful horticultural art. From there the traveler will proceed to New Zealand and Australia with their luxuriant vegetation, then to the Sandwich islands; thence to San Francisco and by the way of Chicago back to the starting point.

A great many requests are pouring in for cards of admission for members and non-members for the big entertainment and reception. Now all members desiring to bring a friend for this occasion must send in the names at once and receive the cards of admission to Far Hills for the president's reception at the office and the exposition building from Mr. Stewart. We must know how many people we have to entertain on account of the banquet. This lunch is a compliment of Mr. Patterson to the national association and the Dayton Florists' Club. Do not wait to put Mr. Patterson to any unnecessary expense as to preparing for a lot of people that never show up.

J. B. HEISS.

Convention Sports.

In addition to the regular bowling tournament, for which elegant team and individual prizes have been provided, a suitable number of prizes will be provided for competition by the trap shooters. The skill of the florist shooters having been exploited in this city has called forth a challenge from one of our local clubs, for a friendly team shoot, either five men or ten men teams. We hope that all shooter florists skilled in this sport will bring their guns with them so that we may qualify a team that will uphold our reputation and that will be able to hustle those local shooters, and there are some "good ones."

H. M. ALTICK,
Chairman Local Sports Committee.

Concerning Arrival in Dayton.

The exposition hall will be a thing of beauty, and the exhibition large. The leaders of the trade have been coming forward like men. Now let the members of our association be liberal with their patronage, and encourage these men to do likewise at the next meeting place. The huge signs floating in the great dome will inform you of the foremost leaders in the business without having made an exhibit.

When you arrive in Dayton, make free use of the bureau of information at the depot. It will be conducted by the mer-

THE SUNKEN GARDENS, FAIRMOUNT PARK, PHILADELPHIA, PA.

NYMPHAEA DENTATA MAGNIFICA AT "TWIN OAKS," WASHINGTON, D. C.
Peter Bisset, gardener.

chants' police of Dayton, under the control of the Dayton Florists' Club. Do not forget to register at once with the national secretary, Mr. Stewart, at the exposition hall. The club has made arrangements with the Xenia Traction line to give us a five minutes service from the Algonquin hotel to the fair ground; there will always be a car awaiting coming and going and signs on the cars will inform you that this is the official line. Take no other line. Members will benefit the national association and the Florists' Club in part by patronizing this line only and in not boarding the car at the front gate as the Dayton Florists' Club was unable to get any concessions whatsoever as to service from this line, which is called the Southern Ohio Traction Co.

Also arrangements have been made with the official line to sell 6 tickets for 25 cents or 25 tickets for $1.00 with the privilege of transferring to any line in the city of Dayton either way. You can procure your tickets from the conductor or else at the office in the exposition hall of the secretary. In order to reach Far Hills for the president's reception, special arrangements have been made with the Oak Wood line that will give two minutes service either coming or going to Far Hills until 11:30 p. m.

All visitors are requested to stay the full length of time if possible for the last day will be just as instructive and entertaining as the first one.

As I stated before, you will find furnished on the ground all requirements for the inner man at the most reasonable prices, and under the control of the Florists' Club. However all concessions are given out free of charge, and should there by any discourtesy or inattention of waiters, please report at once to the chairman, J. B. Heiss. The book for complaints you will find at the secretary's desk, and everything will be remedied at once.

On arriving in the city baggage checks may be left at the depot with the official baggage master who will take charge and see that the baggage is delivered to your hotel, or boarding-house at once.

Do not hesitate to make known your wants if you desire any help in finding accommodations either at hotels or boarding houses. J. B. HEISS.

Convention Programme.

We are in receipt of the preliminary programme of the twenty-second annual meeting and exhibition of the Society of American Florists, to be held at Dayton, O., August 21-24.

TRANSPORTATION.

A reduced rate of one and one-third fare, on the certificate plan for the round trip, has been granted by all railroad and steamship lines in the United States represented in the trunk line and passenger committees, except in the state of Ohio, where a uniform rate of two cents per mile has been established by law. The following directions are submitted for the guidance of members:

1.—Tickets at full fare for the going journey may be secured within three days (exclusive of Sunday) prior to and during the first day of the meeting. The advertised dates of the meeting are from August 21 to August 24, consequently you can obtain your ticket not earlier than August 17 nor later than August 21, except that from stations from which it is possible to reach the place of meeting by noon of August 22, tickets may be sold for morning trains of that date. Be sure that, when purchasing your going ticket, you request a "certificate." Do not make the mistake of asking for a "receipt."

2.—Present yourself at the railroad station for ticket and certificate at least 30 minutes before the departure of train.

3.—Certificates are not kept at all stations. If you inquire at your station you will find out whether certificates and through tickets can be obtained to place of meeting. If not, agent will inform you at what station they can be obtained. You can purchase a local ticket thereto, and there take up a certificate and through ticket.

4.—On your arrival at the convention hall, present your certificate at once to Secretary Stewart, accompanied by a fee of 25 cents, who will return the certificate to you after it has been duly validated, for return journey. No refund of fare will be made on account of failure to have certificate validated.

5.—It has been arranged that the special agent of the Central Passenger Association will be in attendance at the secretary's office in the convention hall, to validate certificates on August 22, 23, and 24.

If you follow the above instructions, and your certificate is duly validated, you will be entitled up to August 31, to continuous passage ticket to your destination by the route over which you make the going journey, at one-third the limited fare.

HOTELS IN DAYTON.

All hotels are within one square of all street cars, taking you to the exhi-

bition grounds within ten minutes. Following is a list with capacity and prices of the leading hotels:

American Plan.

Hotel.	Capacity.	Per day.
The Algonquin...	300	$2.50 to $5.00
The Beckel.....	200	3.00 to 4.00
The Phillips.....	150	2.00 to 2.50
Hotel Daytonia..	100	1.00 to 1.50
The Aldine	25	1.00 to 1.50
The Vendome....	25	1.50

European Plan.

The Atlas.....	75	$1.00 to $2.00
The Wehner.....	50	.50 to .75
The Stag Hotel..	25	.50
The Urban.....	60	.50 to 1.00

The hotel committee has also on its list a number of smaller hotels and a whole lot of private houses, prices from 50 cents to 75 cents for single rooms. If enough applications are made a camp will be established, with well-furnished double roof tents, four cots to a tent, at a nominal cost of from 50 cents to 75 cents each. Anyone wanting accommodations, if no individual arrangements are preferred, should make application as soon as possible to J. B. Heiss, chairman of hotel committee, who will see that all are satisfactorily accommodated.

THE TRADE EXHIBITION.

The trade exhibition will be located in the central pavilion at the fair grounds. Growers of plants, seeds, bulbs, shrubs and trees, dealers in florists' supplies, greenhouse requisites, building material for greenhouse construction, heating apparatus, etc., can here meet the best buyers in the horticultural profession, and no better opportunity for directing attention to the special merits of their goods can be found.

N. B. Exhibitors are reminded that the duties of the judges are limited to the consideration of and making of awards to novelties and improved devices only. Exhibitors are required to make previous entry of all such exhibits with the superintendent in writing. Full rules and regulations, together with diagrams of the exhibition hall, may be obtained from Horace M. Frank, superintendent, 112 South Main street, Dayton, O., to whom all applications for space should be made as early as possible.

OUTDOOR EXHIBITION.

This convention offers the first opportunity in the society's history to make a display of outdoor planted material. A number of exhibitors have contributed to this department. There is yet room for the placing of others and dealers having pot-grown stock to offer can have same properly set out, labeled and cared for without extra charge, until the convention, by making prompt application to Harry M. Altick, vice-president, who has charge of this department.

BULBS FOR TESTING.

American growers of any forcing bulbs, plants or seeds of sorts not yet grown in this country in commercial quantity, or dealers controlling stocks of such goods, are invited to send samples of their product to the trade exhibition, where they will be given space free of charge, provided they then become the property of the society for testing purposes as to their forcing qualities, results of said testing and awards for quality to be published the following season. Please make entries with the secretary.

PAYING DUES.

Members will greatly promote their own comfort and convenience by forwarding their dues to the secretary in advance, the possession of a badge and membership receipt for 1906 being absolutely necessary before any individual can sign the roll book and receive invitation cards for any entertainment provided. On receipt of $3 from those who have paid membership dues for 1905, and $5 for all others, certificate and numbered badge for 1906 will be mailed from the secretary's office. Preserve your certificate and bring it to the convention with you. The secretary's address is 11 Hamilton place, Boston, Mass.

BADGE BOOK.

In accordance with the instructions voted by the society last year in Washington, a system of numbered badges and key-book to correspond has been put into operation this year under the direction of the executive board. It is believed that the members will find these numbers valuable as a convenient means of identification of one another. The names of all new members joining prior to July 15 this year, have been included in the list. Each member of the society will be supplied with a copy of the book.

PROGRAMME.

Opening Session, Tuesday, August 21, 2 P. M.—The opening session will be devoted to an address of welcome by Mayor Chas. F. Snyder, response by Ex-president Patrick O'Mara; the annual address of the president, and reports of secretary, treasurer, state vice-presidents, committees, and other officials of the society.

Judging Exhibits.—Judges will examine and prepare their reports upon the novelties and new inventions in the trade exhibition immediately after the close of the opening session.

President's Reception, 7 P. M.—This always popular social feature will be held on Tuesday evening at Far Hills, the private estate of John H. Patterson, under the auspices of the Dayton Florists' Club. Music, refreshments, and grand illumination of the grounds.

Second Day, Wednesday, August 22, 9:30 A. M.—Following reports of judges at the morning session, Wednesday, August 22, the prize essays prepared by members on the subject of "The Best Method of Marketing the Product of the Wholesale Plant and Flower Grower," will be presented and the awards announced.

Selection of Next Meeting Place and Nomination of Officers.—The selection of the location of the next meeting (polls open one hour), nomination of officers and roll call of states for nomination for state vice-presidents for next year will take place at this session.

Address.—"Teaching Horticulture in the Public Schools," by E. V. Hallock, N. Y.

Discussion.

Amendments to Constitution and By-Laws.—The executive board recommends the passage of the following amendments: Article 11, section 2, to be amended by striking out in paragraph (d) the words "12 o'clock noon" and inserting "11 a. m." The following to be added to paragraph (d) "In case of failure to elect on first ballot, the president shall order a new ballot immediately, polls to remain open one hour; should this ballot fail to elect, the president shall order a third ballot, polls to remain open one hour; this ballot shall be limited to the two candidates receiving the highest vote on preceding ballot."

Bowling Tournament, 1:30 P. M.—The bowling contests between teams representing the various florists' clubs, will take place at the bowling alleys, Fairview park. Preliminary individual rolling and the ladies' contests will take place at Lakeside park. Many valuable trophies have been donated. For instructions as to entries, etc., address George Asmus, 897 Madison street, Chicago.

Promenade Concert.—There will be a promenade concert at the Exhibition building during the afternoon for the entertainment of those who do not attend the bowling tournament.

Florists' Hail Association of America, 3 P. M.—Annual meeting at convention hall.

Illustrated Lecture, 8 P. M.—Title and lecturer to be announced later.

Question Box.—The question box will be opened after the close of the lecture, and a general discussion will be in order upon a number of practical topics.

American Carnation Society.—There will be a meeting of members of the American Carnation Society at the Algonquin hotel, immediately after adjournment of the evening session of the S. A. F.

Third Day, Thursday, August 23, 9:30 A. M.—Subjects for discussion at the morning session, Thursday, August 23, will be: "Recent Improvements in Retailers' Methods of Offering Flowers," by Wm. F. Gude, Washington, D. C. "The Ideal Private Gardener and his Work," by Fred E. Palmer, Brookline, Mass.

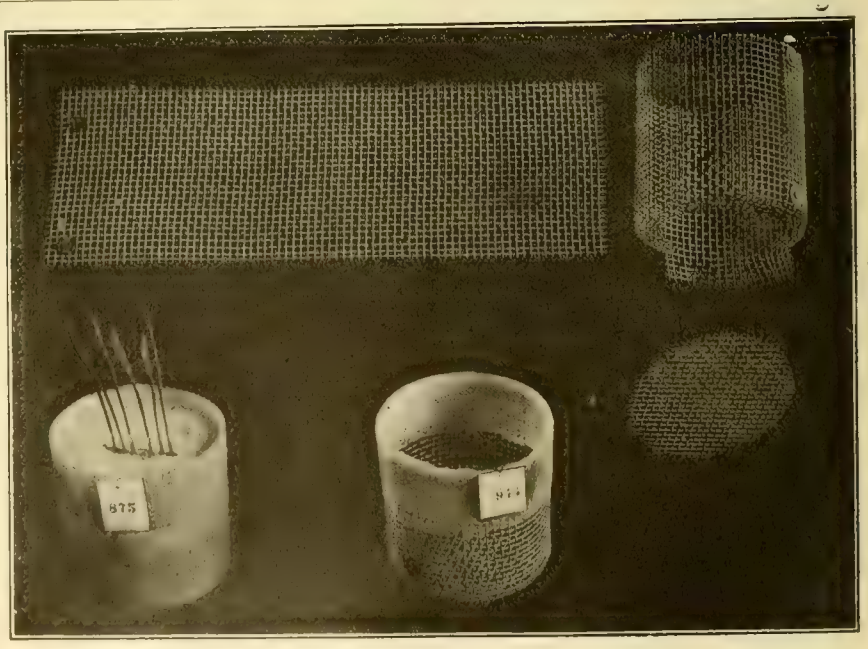
Election of Officers, 10 A. M.—During the discussion the election of officers for 1907 will take place, the polls being kept open two hours.

Question Box.—The question box will be opened during the voting.

Exhibitors' Day.—By vote of the executive board, Thursday afternoon will be devoted exclusively to the interests of the exhibitors. There will be band concerts in the exhibition hall, and in the grounds outside, noon and evening.

Evening Session, 7:30 P. M.—The main topic for this evening, as announced from the platform at Thursday's session.

Friday, August 24, Dayton Florists' Day.—The programme as arranged for the fourth day, Friday, is as follows: At 10 A. M., a trip to the National Cash Register Co., the model factory of the world. In the afternoon at 2:00 o'clock, a street car ride to Soldiers' Home; band concert at the home by Uncle Sam's band; address at Memorial hall. Further details will be announced from the platform at Thursday's session.



SOIL FERTILITY.

Fig. 1.—Constructions of wire baskets.—Whitney, Bureau of Soils, U. S. Dept. of Agriculture.

Nymphaea Dentata Magnifica.

Few additions have been made of late to the list of tender nymphæas. A number of varieties have been raised, but few were worthy of distinction or superior to existing varieties. N. dentata for a number of years has been the best white tender nymphæa. N. dentata mignifica, sent out by Henry A. Dreer, has been tested under close scrutiny for several seasons and its merits were determined and verified before offering it to the public. It also had the recognition of the Rhode Island Horticultural Society and was awarded a certificate of merit and honorable mention by the Massachusetts Horticultural Society in 1905.

N. dentata is well known as a vigorous and free flowering variety, blooms pure white, petals long and pointed, flowers flat when fully expanded and with rain or heavy dew the petals droop. N. dentata magnifica is even more vigorous, flowers bold and massive, 10 to 12 inches across, cup-shaped, of a creamy whiteness and without the tendency to drooping the petals. It resembles in form and build N. Sturtevantii and may be well called a white Sturtevantii, with the vigor and freedom of N. dentata.

W. T.

Manurial Requirements of Soil.

METHOD OF DETERMINING THEM.

Milton Whitney, Chief of the Bureau of Soils, Department of Agriculture, in Bulletin on "Soil Fertility."

The method of determining the manurial requirements of soils consists in growing plants in small wire baskets containing soil to which have been added fertilizers of different kinds and in different quantities. The baskets, or pots, are planned to make possible a comparison of the several fertilizing ingredients within a period of about three weeks by means of the appearance and growth of the plants, or the effect of the treatments may be actually measured by cutting and weighing the plants or by measuring the transpiration during the period of growth.

In addition to the wire baskets, the construction of which is presently to be described, the necessary apparatus includes some paraffin, an inexpensive substance that can be procured from any drug store, and for the weighing tests a pair of scales which will weigh accurately to ¼ ounce. The baskets, or pots, are made from galvanized wire net having a ⅛-inch mesh, and are of simple construction. The net is cut into strips 3½ inches wide by 10 inches long. The ends are brought together and fastened by short rivets. At intervals along one end of the cylinder thus formed vertical incisions one-half inch long are made, and the ends are turned in to hold the bottom, which consists of a disk of the same material. The top of the basket is then dipped into hot paraffin to the depth of about 1 inch, removed, and dipped again, until a rim of paffin is formed. Numbers are then attached to the pots for the purpose of identifying them, and in order that a record of each may be kept in case it is so desired. For convenience in handling it is advisable to place the pots in shallow boxes or trays, 20, more or less, in each. This completes the construction of the wire pot up to the time of filling it with soil. Fig. 1.

The soil to be tested should be representative of the field from which it is taken. A representative sample is usually secured by taking a number of small samples from different parts of the field and thoroughly mixing them together. From this mixture the portions that are to be treated with fertilizers are taken, the number of portions required being one greater than the number of kinds of treatment it is desired to test.

The quantity of fertilizer added should correspond closely to the quantity commonly used in field practice. To add these fertilizers in the proper proportions to the samples to be tested the following procedure is suggested: To 7¾ pounds of dry, well-pulverized soil add 1 ounce of the desired fertilizer. Mix very thoroughly and pass through a sieve at least twice. This mixture is still much too strong for use, and is further diluted by adding 1 ounce of it to 5 pounds more of soil, mixing thoroughly, as before. This new mixture contains fertilizer at the rate of 200 pounds per acre. When larger applications are desired, proportionally larger quantities of the first mixture should be taken. For the lime treatment use only 11½ ounces of soil to 1 of lime instead of 7¾ pounds, as in the case of fertilizers. Cowpea vines and manure, being used in even greater quantity than the lime, require a still further reduction of the amount of soil in the first mixture, i. e., 4 ounces of soil to 1 of cowpea vines and 1½ ounces of soil to 1 of manure. One ounce of each of these mixtures when added to 5 pounds of soil will supply lime at the rate of 1 ton, cowpea vines 5 tons, and manure 10 tons per acre.

The following table shows the treatments commonly used in the work, but these are often varied to suit conditions, and any commercial fertilizer which it is desired to test may be added to the list:

1. Untreated.
2. Dry manure, 5 tons per acre.
3. Lime, 1 ton per acre.
4. Nitrate of soda, 200 pounds per acre.
5. Sulphate of potash, 200 pounds per acre.
6. Acid phosphate, 200 pounds per acre.

SOIL FERTILITY.

Fig. 2.—Finished baskets and growing plants—Whitney, Bureau of Soils, U. S. Dept. of Agriculture.

7. Nitrate of soda and sulphate of potash, 200 pounds each per acre.
8. Nitrate of soda and acid phosphate, 200 pounds each per acre.
9. Sulphate of potash and acid phosphate, 200 pounds each per acre.
10. Nitrate of soda, sulphate of potash, and acid phosphate, 200 pounds each per acre.
11. Nitrate of soda, sulphate of potash, and acid phosphate, 200 pounds each per acre, + lime, 2,000 pounds per acre.
12. Cowpeas, 5,000 pounds per acre, + lime, 2,000 pounds per acre.

After the fertilizers have been added to the soil it is allowed to remain in pans or other suitable receptacles for several days, being moistened occasionally with rain water or water from melted ice and frequently stirred, so that the fertilizers may become thoroughly distributed. At the end of this time the soil in each pan is moistened again with water, which is added until the soil is in the most favorable condition for plant growth. This varies with different soils, but with a little experience the operator can judge it quite accurately. It is important that the water used in moistening the soil should be rain water, as water from wells, springs, or streams may contain mineral matter that would affect the plants, and thus vitiate the results of the tests. The soil in each pan is then divided into five nearly equal parts, and each part is placed in a wire basket, care being taken to press the soil well into the bottom and sides of the basket. The basket should be filled to within about ½ inch of the top. After filling, the soil which projects through the meshes of the wire is carefully

brushed off, and the baskets are ready for planting.

One or 2 days before the time for planting a sufficient quantity of wheat is placed between moist cloths, covered with wet sand, and placed in a favorable place for germination. From these sprouted wheat grains those of uniform size and about the same stage of development are selected, six being planted in a row and to the same depth in each basket. The surface of the soil is then covered to a depth of about one-fourth inch with clean dry sand. The pots are then dipped bottom down into hot paraffin until an impervious layer is formed over the lower part of the basket, connecting with the rim around the top. In coating the basket the paraffin is kept at an even temperature and the basket is dipped and quickly removed to allow the paraffin to harden, when it is dipped again, and so on until the coating has the proper thickness, about one-sixteenthh of an inch. The baskets are then placed where they will be under as favorable conditions of light, temperature and moisture as possible, care being taken to keep the pots of each set together.

The pots should be watered at frequent intervals during the growth of the plants, care being taken not to allow them to become too dry nor to make them too wet. As a guide to the amount of water required by the pots it is a wise precaution to weigh and record the weight of some of the pots when they are paraffined and planted, at which time the moisture content of the soil is favorable. By weighing these pots at intervals during the tests the amount of water necessary to bring the soil to a favorable condition can be ascertained and an equal amount added to all other baskets that show an equal growth. At the end of 15 or 20 days a comparison of the growth of the plants will enable one to estimate the value of the different fertilizers. (Fig. 2.)

It should be borne in mind that this is a method not for the study of the requirements of plants, but for the study of the fertilizer requirements of soils, in which the plants are used as an indicator. It is, therefore, not necessary to grow the plants to maturity; in fact, it would not be possible to do so successfully in the small quantity of soil used. Where differences occur as a result of the fertilizer they manifest themselves almost from the beginning of plant growth, and it is not necessary or advisable to grow the plants for periods of time exceeding 20 or 25 days from the date of planting the seed.

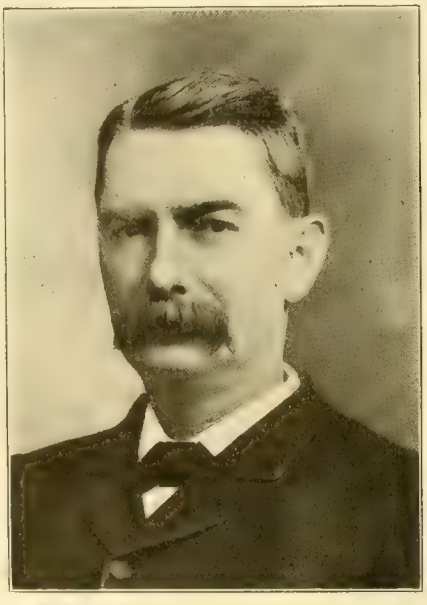
National Sweet Pea Society of England.

EXHIBITION AT LONDON, JULY 5.

There was an enormous exhibit, says the Horticultural Advertiser, the whole hall being filled, with overflows into the annexes and council room upstairs. Of course, as was inevitable, the same varieties were repeated over and over again, both in the competitive classes and in the trade exhibits. The frequent recurrence of certain varieties emphasized their merits, as exhibitors would not put them up unless they thought that they would tell with the judges.

One conclusion we came to was that many varieties, which are very telling on the exhibition stands, will never become popular garden flowers; such varieties as Henry Eckford, Evelyn Byatt, Scarlet Gem, etc., burn so fearfully that they are quite useless if not carefully shaded. It also seems to us that there are getting to be far too many varieties, with too little distinction. To take one color only, pink, we saw the following, which run extremely close in form and color: Countess Spencer, Enchantress, Pink Pearl, Gladys Unwin, and Mrs. Hardcastle Sykes, which is certainly distinct, but only a shade or two lighter than several of the others—all good things, but do we want so many of one class of color?

Of the newer varieties exhibited, we admired Princess Mary of Wales, Horace Wright, Helen Pierce, Helen Lewis, Etta Dyke, Miss Audrey Crier, Jessie Cuthbertson and Agnes Johnson.



The Late James Weir, Jr.

Of the older varieties for ordinary growing without shading and special attention, the following are well tried and reliable: Dorothy Eckford, the best white; Hon. Mrs. Kenyon, best lemon; Janet Scott, delicate pink; Miss Willmott, salmon pink; Prima Donna, pale pink; King Edward VII, deep fiery red; Lady Grisel Hamilton, Mrs. Walter Wright, Dorothy Tennant, shades of mauve; Triumph bicolor, navy blue, and Captain of the Blues, and Black Knight, or Othello, dark maroon.

AWARDS.

Miss Audrey Crier (Breadmore), beautiful pale bright pink, with waved standard; first class certificate, also silver medal as the best novelty exhibited.

Dora Cowper (Breadmore), a large pale primrose, after Hon. Mrs. Kenyon style, but larger; slightly hooded; award of merit.

Elsie Herbert (Breadmore), very pale blush, almost white, wavy standard; award of merit.

Etta Dyke (Breadmore), a white Countess Spencer; award of merit.

Horace Wright (Eckford), very dark navy blue, with purple shade; award of merit.

Maude Guest (Eckford), nearly pure white, wavy standard; award of merit.

Princess Mary of Wales, bright cherry red, rather after the style of coccinea; in our opinion, the most distinct of any of the novelties; award of merit.

Queen of Norway (Bolton), a very full and wavy flower, color rather like Dorothy Tennant, but lighter and brighter; award of merit.

Medals were given to the following trade exhibits: Gold medals to Messrs. Eckford's, Wem, Salop; C. Breadmore, Winchester; R. Bolton, Warton, Carnforth; Dobbie & Co., Rothsay; H. Cannell & Sons, Swanley; W. J. Unwin, Histon, Combs; Baker's, Wolverhampton. Silver gilt to G. Stark & Son, Great Ryburgh; Carter & Co., High Holborn. Silver to E. W. King, Coggeshall; Gilbert & Son, Dyke Bourne, Lincs.; R. H. Bath, Ltd., Wisbech.

OBITUARY.

William H. Watkins.

Wm. H. Watkins, one of the landmarks of the florists' trade in Baltimore, was buried in Bonnie Brae cemetery August 4 after a solemn high mass at St. John's Church. For more than half a century, since a boy of nine years, he has been employed in various capacities by the three generations of the Hallidays. Of late years he has been in the store of Halliday Bros. In his long term of service he won the respect and esteem of all who came into touch with him, and by his promptness, honesty and devotion to the duties laid upon him, established a reputation of which anyone might be proud.

James Weir, Jr.

Jas. Weir, Jr., one of the oldest established florists in Brooklyn, died suddenly August 1, on his yacht, at Shelter Island. Mr. Weir took considerable interest in yachting and was formerly commodore of the Shelter Island Yacht club, the annual meet of which he was attending on board of his own yacht, Senta. Other clubs being present in the same waters, a series of races were being held. Mr. Weir, with Albert Jones, a friend, was sailing the Senta in a race, and while at the helm was suddenly stricken with heart failure, handed the wheel to his captain, and managed to reach the cockpit, where he collapsed. Mr. Jones vainly tried to resuscitate him, and signaled for assistance. The power boat Ariel responded, as also did the Ethelda of the Rhode Island Yacht club, with Dr. Kemble, the fleet surgeon, on board. In spite of stimulants and immediate medical attendance, Mr. Weir died five minutes after he was stricken. The cause of death was pronounced to be rupture of the heart. The body was removed to the deceased's summer home on Shelter Island Heights, and August 3 was brought to his Brooklyn home. A reception planned for the visiting yacht clubs was abandoned as Mr. Weir was on the reception committee. The colors of the fleet were all lowered as a token of respect to the deceased.

Mr. Weir was born in the suburbs of London, Eng., October 17, 1843. His father was gardener on a large private estate, and came to the United States with his family in 1844, settling in Brooklyn. Mr. Weir at an early age

attended public school No. 2 in Brooklyn, and finished his education at the Polytechnic Institute. In 1856 he embarked in the florists' business, a few years later opening a shop on Fifth avenue, corner of Twenty-fifth street, Brooklyn, subsequently building and operating several greenhouses. He was still active in the large business built up in this location at the time of his death. In 1864 he married Miss Matilda Waters, of New Utrecht, L. I. Some years later his son J. Ebb Weir became his partner in the business.

Mr. Weir was connected with many social organizations. He was one of the early members of Ridgewood lodge, F. and A. M. He also belonged to the Shelter Island Yacht club, of which he was ex-commodore; the Atlantic Yacht club, of which he was rear commodore; the Crescent Athletic club, and the Staten Island Yacht club. Yachting was his hobby, and his leisure time was wholly devoted to it. In winter he took his yacht to Florida waters, and his summers were usually spent at his home on Shelter Island, with cruises to other points in the north. His nautical knowledge and skill were recognized by the board of education of Brooklyn, for which body he acted as chairman of the nautical committee, which had the direction and care of the training schoolship St. Marys.

Mr. Weir was a democrat in politics. From 1879 to 1883 he represented the old eighth ward of Brooklyn in the board of aldermen, and was appointed on the Greater New York board of education in 1886, a position which he held until the city of Brooklyn was consolidated into Greater New York in 1898. Mayor Van Wyck appointed him on the Greater New York board of education in 1902, and he was reappointed by Mayor McClellan for the term expiring with 1906. He devoted considerable time to educational work, and served on many important committees, until last February, when his prolonged absence from the city necessitated his retirement. The flags on all the vacation schools in Brooklyn were half masted for three days as a token of respect for the deceased.

A funeral service was held at his Brooklyn home August 4, and interment was privately made later in Greenwood cemetery. Mr. Weir left a widow, his second wife, a son, and three daughters.

James Hartshorne.

James Hartshorne, the well known manager of the Chicago Carnation Co., Joliet, Ill., died suddenly August 6 at his home, following an operation for appendicitis, aged 39 years. Mr. Hartshorne was known throughout the country as a carnation expert and many varieties which he introduced are familiar to all growers. Among varieties of his own raising are Marshall Field, Mrs. Potter Palmer, Harlowarden, Crusader, etc. He was in a measure instrumental in developing the fame of Mrs. Thos. W. Lawson, Peter Fisher's well known production. He introduced Dorner's Fiancee and he had secured Witterstaetter's Aristocrat for introduction next year. He was very popular with his many friends in the trade and his absence at social and business gatherings will be greatly felt by his associates for a considerable time. He had little or none of the old school training in horticulture to aid him in his endeavors and it is therefore all the more to his lasting credit that he made such a pronounced success of those specialties which he took in hand.

Mr. Hartshorne was born in Shropshire, England. He came to America in 1888, locating at Boston, but going shortly to Exeter, N. H., to become gardener to the late Chas. Burley. In 1892 Mr. Hartshorne located at Chicago with a view of participating in the floricultural work at the World's Fair, but he was tendered an excellent offer by John C. Ure at Argyle Park, where his success with carnations did much to enhance the already excellent reputation of that establishment. In 1897 Mr. Hartshorne became head gardener to H. N. Higinbotham, who has a fine residence on Michigan avenue in Chicago and an estate of 1500 acres just outside of Joliet. It was Mr. Hartshorne's recognized proficiency as a carnation grower which led to the organization of the Chicago Carnation Co. and the construction of its model range of houses upon the Higinbotham property.

The Late James Hartshorne.

Mr. Hartshorne was an ex-president of the American Carnation Society, having been elected to that office at the Detroit meeting in 1904. He was also a member of the Society of American Florists, the Horticultural Society of Chicago, the Chicago Florists' Club and he was a prominent factor in the organization of the Illinois State Florists' Association. He was likewise prominent in social circles, being a member of the Masonic fraternity, Sons of St. George, the Eagles and the Elks. The Masons had charge of the funeral, which took place August 8, the florists being represented by P. J. Hauswirth, Geo. Asmus, P. J. Foley, J. B. Deamud, Leonard Kill and Edgar F. Winterson as honorary pall bearers. The floral offerings were very numerous and elaborate.

Some 300 persons attended the funeral, the services being conducted by an episcopal clergyman. Mr. Hartshorne's commandery was represented by 50 members and there were 30 representatives of the Chicago trade present. The services were conducted under the old trees on the Higinbotham lawn and interment was in the family burying ground on the Higinbotham estate.

Mrs. Hartshorne and five children survive, the youngest being some 14 months old.

St. Louis.

MARKET SLOW.

The market the past week was very slow, hot weather making trade as dull as possible. Outdoor carnations are of very poor quality. Colored varieties are somewhat scarce and of especially poor quality, short stemmed and spotted. Roses are very small and of poor quality. American Beauty is in demand. Many blooms arrived too much opened and even tight buds these hot days open up quickly. Double and single tuberoses are coming in; the latter are of poor quality. Gladoili are still coming in, but not so plentifully. Asters have become a positive glut. The stores are selling them at five cents per dozen for fair quality blooms, and some two dozen for five cents.

Vincent Gorly was very seriously injured, as was also the lady he was with, while returning the other evening from the picnic, given by the St. Louis business men of the north end. The automobile in which the couple were riding was run into by a street car.

The Kohr Floral Co. had the first anniversary of their opening at their store, 1613 South Broadway, August 4. This firm has one of the handsomest stores in the southern end of town. Several thousand roses and asters were given away.

Rudolph Windt, our official photographer, may be seen these warm nights at Delmar garden. Rudolph is never alone. It is said that a quiet little wedding will soon be coming off.

The next meeting of the Florists' Club promises to be a very large one, election of officers and balloting on applications for new members taking place.

Fred Alves, manager for Geo. Angermueller, will leave August 14 for Niagara Falls and other eastern cities. All wish Fred a good time.

W. C. Smith is a hustler. These warm days do not seem to bother him. He cools off nights at Delmar garden.

Miss Theresa Badarracco was entertained by her friends August 3, the occasion being the lady's birthday.

Siegel & Burke had one of the largest funeral orders given to any local florist this summer.

A visitor at the picnic, not befoe mentioned, was S. S. Skidelsky, of Philadelphia.

Gus Miller reports trade as first class during the past week. W. F.

CINCINNATI, O.—Harry Jansen, a graduate of the landscape gardening department of Heidelberg university in Germany and later employed in the work of beautifying Lincoln park in Chicago, was arrested here recently on the charge of forgery. He pleaded that the forgery was a mistake and his case was continued.

Cincinnati.

TRADE FAIR.

For the good old summer time trade has been fully as good as can be expected. Until the latter part of the week stock has been sold out clean every day, but Thursday and Friday the receipts of asters and gladioli were very heavy, consequently the market was pretty well loaded up and prices took a downward course. Carnations have seen better days and the stock received seems to be growing smaller day by day. Some very good Bride and Bridesmaid are to be seen and these find a ready sale. McCullough's had in a fine lot of lily of the valley which cleared up nicely. There is very little demand for green goods which are in ample supply.

NOTES.

Willis Kennedy, who has charge of the florist supplies and urn work at McCullough's, has just returned from a trip through Ohio and Indiana. He states that every town he visited will have a representative or two at the Dayton convention and he predicts a record-breaking attendance. By the way, the local correspondent for an eastern contemporary booms W. J. Stewart for president of the S. A. F. If Mr. Stewart accepts the nomination and is elected the society will have to look around for another secretary. Cincinnati nominates P. J. Hanswirth, of Chicago, and if the genial Phil can be induced to accept the nomination he will be elected by acclamation. "Stick a pin here."

Chas. Critchell has taken his wife to Atlantic City and although married for over two years has never had the opportunity to take a wedding trip. Charley says he wants to make good now.

From all reports those who were fortunate enough to attend the outing at Norwood Inn park had a very pleasant time.

Fred Gear has gone to Yellowstone park for his vacation. He is accompanied by his better half.

Gus Meier is expected home from Europe August 15.

Geo. Twomey is all smiles. It is a boy and everything is lovely.

ALEX.

Kansas City.

BUSINESS DULL.

Trade the past week has been quiet, as usual. A few orders for funerals constitute about all the demand there is at present. Stock is yet much to be improved upon. The warm weather continues to make things unpleasant for the florist, especially the grower who is compelled to labor under glass. Large quantities of asters find their way to the market daily, but the majority, on account of unfavorable weather conditions, are small and short stemmed. The late ones promise to be much better. Roses are small and soft. Minnehaha is making a fine showing as a summer rose of the best keeping quality. Carnations are very scarce, and what few may be seen have a tendency to go to sleep. Among the summer flowers, Hydrangea paniculata is a recent arrival.

NOTES.

Much interest is being centered in the S. A. F. convention at Dayton, and, now that it is a matter of but a few days off, we can safely begin to estimate the attendance from this city. Among those who will attend are: Geo. M. Kellogg, W. L. Rock, Sam'l Murray, Edw. Ellsworth, A. F. Barbee, A. Eberfield, Arthur Newell and Miss Hayden, of Murray's. Quite a number have arranged side trips to northern resorts.

Robert Aull, park commissioner of St. Louis, made a recent visit inspecting the park and boulevard system of this city. "Your boulevard system and the Rock-Hill residence district excel anything I have seen anywhere else in America," Mr. Aull said in an interview during his stay here, "and when your park system is developed it should equal the boulevard. I envy your park board the advantage of a new city."

Hampered by sickness, due to the intense heat under glass, planting is being done with much difficulty in this locality. Geo. M. Kellogg says it will take all this month to plant his 15 houses of carnations. Chas. Heite has all his carnations planted which are in a healthy state. Nathan Brown expects to finish in about 10 days.

The Missouri Valley Horticultural Society wishes to announce that the next regular monthly meeting will take place August 18 at 10 a. m. at Parkville, Mo. Special discussions and papers of interest to fruit growers will be included in the programme. A good attendance is requested.

We are informed that the establishment at Twenty-sixth and Holmes streets, owned by Chas. M. Wise, has been leased by the People's Floral Co., where they expect to grow a general line of stock.

The old Baker conservatories at Denver and Harris avenues, recently operated by the Shaeffer Floral Co., were purchased by Andrew Arnot, who intends to use the material at his present location.

Miss Alma Beeler, whose face is always so familiar at Geo. M. Kellogg's, will soon embark upon a matrimonial venture. The trade is unanimous in wishing her much success and happiness.

Chas. E. Heite departed last week for the White river country. His trip includes a "float" down that river for about 200 miles.

Edw. Ellsworth leaves this week to spend his vacation in the northern lake region, returning by way of Dayton for the convention.

Will someone kindly explain what has become of our Florists' Club, as well as it's president? We might suggest "skiddoo, 23."

Miss Kellar, of the W. L. Rock Flower Co., is spending a short vacation at her home in St. Joseph, Mo.

John Schneider is back again telling of his experiences in Salt Lake City.

Wm. Bridgeland is visiting home folks in New York state.

Edw. Humfeld is expected back this week.

M. E. Chandler is in Canada.

K. C.

San Francisco.

This has been an off week for the rehabilitation of ante-disaster florists and there are no new cases of reestablishment in business to report, as has been the case each week of late. But those in the trade have not felt the need of any assistance to promptly respond to the limited demand prevailing this midsummer season.

The only floricultural feature of the week was a largely attended free begonia show given by the John H. Sievers Co. in one of their 150-foot conservatories at the nursery adjoining the flower store of Sievers & Boland. The exhibit, tens of thousands of blooms, the richest strains of tuberous rooted begonias evergrown in California, was displayed in six solid columns the full length of the conservatory. And just think of it! They were planted in normal times, to unfold in perfection under normal conditions, not for a city in confusion, with its inhabitants as a rule needing all the money they could get for actual wants. And so nine-tenths of these fairest of all begonias must pass away in the care of the men who grew them.

The Southern and Union Pacific railroads have just decided to try out the virtues of cut flowers. They propose to establish large greenhouses along their lines from which a supply of fresh blossoms may be continually drawn for the supply of their dining cars at every meal, and for bouquets to all women on their trains. Huge greenhouses are to be established at Grand Island, Neb.; Cheyenne, Wyo.; Denver Col., and Ogden, Utah. California fresh flowers can always be had, so no greenhouses will be established in this section of the country.

H. Plath, proprietor of The Ferneries, and California's vice-president of the Society of American Florists, is issuing an attractive six page price list. He is working up a large stock of young ferns for the fall trade, as he expects there will be a good demand. Ferns for fern dishes have been used more and more each year of late and he has never been able to grow sufficient to fill all orders received.

There are many men in the penitentiary not nearly so mean in spirit as are several San Francisco landlords, and the daily papers are roasting them all the time. The monthly rent of P. Anderson's little flower store at 508 Haight street has been raised from $75 to $200, so he is putting up a store on leased ground on Fillmore street, between Page and Haight streets.

Jas. McNab, an intimate friend of Superintendent John McLaren of Golden Gate park, was married July 26, and the next morning's paper had this note: "The vestry of the church where the ceremony took place was superbly decorated with a magnificent floral display, the work and gift of John McLaren.

Morris Goldenson, of Los Angeles, was here on a business trip this week.

JESSE WHITE.

San Diego, Cal.

Business in general has been exceptionally good, both in the flower and plant line.

The city park has seen a marked improvement in the last two years in the building of roadways and the planting of many thousands of trees and shrubs, most of them being in a very good and thrifty condition. There is quite a demand here for Cocos plumosa for planting along the streets, and a few years will add considerably to the general appearance of the city.

The Floral Park Nursery has been moving its gardens to a new location, as also has the Cottage Nursery.

Detroit.

CLUB MEETING.

The club meeting held on the evening of August 1, brought out a splendid attendance, the annual election of officers being the special incentive. The result of the election was as follows: William Dilger, president; E. A. Scribner, vice-president; Walter Taepke, treasurer; J. F. Sullivan, secretary; W. B. Browne, librarian.

The balloting was quite spirited between the supporters of William Dilger, the present incumbent, and E. A. Scribner, whose popularity a year ago for the same office was again shown this year. On the last ballot, however, the assistant park commissioner won out. The officers for vice-president, treasurer and secretary were unanimously elected. Another name was added to the membership roll and another applicant named to be voted upon at the next meeting.

Convention matters were discussed at considerable length and it was ascertained that a party of about 25 will attend from here. The route will be via Pere Marquette railroad leaving here at 12:35 p. m., August 20. J. F. Sullivan was appointed by the club to make all the necessary arrangements and to invite all delegates who can to join our party.

The great prevalence of the aster disease in this section was discussed and led to a resolution asking relief from the S. A. F., the secretary being instructed to prepare a petition to the society and asking for immediate action in the matter.

It was decided to get up a bowling team to enter the contest at Dayton. The Michigan Cut Flower Exchange offered part of their spacious rooms to the club in which to hold its meetings. The generous offer was gratefully accepted and after October 1 next the club's home will be at 40 Miami avenue.

Robt. Watson celebrated his sixtieth birthday last week. Many of his friends were present and failed in their attempt to ostlerize him. His wife presented him with an elegant gold watch which he now carries with the handsome chain given him by the Florists' Club on his retirement as president a year ago.

Gust. H. Taepke and wife are enjoying a trip to Atlantic City and will visit the large greenhouse establishments of Philadelphia and New York before their return.

John Breitmeyer's Sons' barn at Mt. Clemens with contents, including four horses, was entirely destroyed by fire early the morning of August 4.

J. F. S.

Pittsburg.

STOCK IN MARKET.

Business continues very dull, the only break in the quietness being occasional funeral work. Asters are to be seen everywhere and they bring almost nothing. The grade coming in now is far below that of last year at this time. Gladioli are also a bad glut, little good stock coming in. A few carnations arrive and find ready sale. Sweet peas are short stemmed and do not sell well. Lilies are very plentiful. Roses of cheaper grades are not moving, but good Kaiserins find eager buyers. American Beauty keeps up well. Lily of the valley is scarce. There is plenty of all green stock.

At A. W. Smith's they are taking advantage of the quiet spell by going on their vacations. S. Gibbs and Wm. Hall have left for Mr. Gibbs' summer residence, "Ligineer," Mr. West is in Atlantic City, while Fred Rigglemier, Joe King and Mr. Mason have gone to the mountains.

Wm. Potter and E. J. McCallum have returned from their fishing trip in Canada and state that the paddling of a canoe in the rapids furnishes more excitement than pulling in any amount of fish, of which they brought back some fine specimens.

J. P. Langhans left for the lakes in Canada for a month's outing. By the fishing tackle he is taking with him, it is "Good-by, Charlie," to the finny tribe thereabouts.

The Pittsburg Florists' Exchange has established a wire works in connection with their supply department. Richard Volkwien has taken charge.

Mrs. Schmucker met with an accident in her greenhouse last week, falling from a bench and tearing several ligaments in her left arm.

Ed. McGrath, of Britenstern & Flemm, spent a few days in Buffalo and Toronto.

Randolph & McClements have had a few nice decorations in spite of the hot weather.

J.

St. Paul.

TRADE DULL, STOCK PLENTIFUL.

A little dullness has been experienced the past week with stock rather overplentiful. Funeral work helps out very materially though, and there have been days when there has been lots of it to turn out. Roses are coming in by the wagon load and of pretty fair quality, though rather short stemmed, from young plants. Some are coming in from old plants and these are very good. Carnations, it may be said, are entirely out as just a few are seen and these of the very poorest quality. Asters and all outdoor stock is good and in large supply. Some Hohenzollern asters have been brought in by private parties, which are very fine and the dealers lucky enough to get them secure big prices for them.

O.

DENISON, TEX.—C. E. Majors and T. P. Gorman, foreman in the employ of Will. B. Munson, have leased the latter's greenhouses and floral business and will conduct them under the title of the Munson Greenhouses. Mr. Munson will give his entire attention to his nursery interests.

OUR PASTIMES.

At Springfield, O.

On Thursday, August 2, the first picnic of the Florists' Club was held at Eicholz park, a romantic spot on the Springfield, Troy and Piqua electric railway. Athletic sports began with quoits, Ward Welch and Charlie Schmidt proving a pair invincible against all opposing pitchers. Refreshments were abundant for a big noontime lunch and were partaken of at the pleasure of each member or guest throughout the day.

Ball was the leading attraction, a double header between the South Enders and the T'other Enders resulting in favor of the latter to the tune of 10 to 9 and 21 to 4. Jack Good, pitcher for the vanquished, claimed it would have been otherwise had he been supported by a catcher other than Ward Welch, who succumbed to "that tired feeling" and stretched at full length under a shade tree about the middle of the second game. Gus. Schneider and Charlie Schmidt worked together well as battery for the victors, and umpire Jimmy Maxwell announced amusing decisions in his rare old Scottish brogue.

The closing event was a boat race which culminated, through a deeply plotted conspiracy, in the capsizing of one boat and a thorough ducking for two muscular rowers.

G. D.

At Chicago.

The third installment of the try-out series, rolled August 7, brought out Ed. Winterson. The final and deciding games will be rolled at Bensinger's alleys, August 14. The latest scores follow:

Player.	1st.	2nd.	3rd.	4th.
Asmus	164	132	167	154
Hauswirth	120	148	139	159
Klunder	117	157	125	175
Winterson	139	145	140	138
Bergman	145	168	187	172
Scott	126	114	163	171
Wilson	142	175	146	142
Pasternick	112	134	170	181
Stollery	166	168		

The scores of the ladies were as follows:

Player.	1st.	2nd.	3rd.
Mrs. Scott	82	91	84
Miss Moore	126	84	133
Mrs. Hauswirth	133	80	125
Mrs. Asmus	90	85	64
Mrs. Kreitling	148	112	98
Mrs. Winterson	142	113	159
Mrs. Stollery	101	63	96
Mrs. Klunder		45	58

At Montreal.

GARDENERS' AND FLORISTS' CLUB PICNIC.

The Gardeners' and Florists' Club held their seventeenth annual picnic at Highgate Springs, July 25, and the event was most enjoyable.

Games were contested during the day, the winners in the various events being as follows:

As next issue will be our Special Convention Number, correspondents and advertisers are requested to send in their copy as early as possible.

A. RICHON, of the firm of Richon & Hermes, Brittany, France, was among our recent visitors. Mr. Richon has been investigating the methods of leading firms in this country and incidentally traveled from coast to coast on a sightseeing tour.

In Chicago.

Visitors: W. L. Rock, Kansas City, Mo.; J. Steinhauser, Pittsburg, Kans.; Wm. Graff, Columbus, O.; D. C. Noble, Michigan City, Ind.; Chas. McAniff, Vaughan's Greenhouses, DesMoines, Ia.; E. N. Zetlitz, Lima, O.; James Follett, Webster City, Ia.; the Markey brothers of Fort Wayne, Ind., and S. S. Skidelsky of Philadelphia.

"Mr. Graham's Choice."

On these all too rare occasions when Adam Graham gets into print regarding society matters it behooves us to take heed. His suggestion that the office of president of the S. A. F. be given to H. B. Beatty is made in a direct, dignified and manly way, and should, and I think will, meet with the approval of those who prefer the straightforward way of doing things.

An association of some six years with Mr. Beatty in the executive committee work of the society long ago satisfied me of his eminent fitness for the position.

W. N. RUDD.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

Lager & Hurrell, Summit, N. J., submit for registration orchid seedling Lælio-Cattleya Lady Bernice, Cattleya gigas atropurpurea and Lælia purpurata, Flowers large, seven inches across, sepals and petals lilac with numerous and delicate mottles and veins of rosy purple overlaid, these accentuating more toward the tips of the petals. Lip wavy, two inches across, dark purple with a minute margin of rose. Lower part of throat with numerous yellow and reddish-brown longitudinal veins, upper part or sides of tube-orange yellow.

NO WESTERN EXTENSIONS.

The Western Passenger Association, controlling territory west of Chicago, declines to give extension on return certificates from Dayton. Therefore certificates from that territory will be available only up to August 28.

WM. J. STEWART, Sec'y.

American Rose Society.

The executive committee held a meeting at the Fifth Avenue hotel, New York, and took up the matter of preparing the way for the next annual meeting and show at Washington, the Washington Florists' Club having joined hands to make a strong effort for a handsome showing. The committee went over the prize schedule of last year and spent some time in devising means to secure ample prizes for the exhibition.

The effort is being made to gather together, and put into permanent form, the history of the organization which was first started at Atlantic City in 1894, and the present organization which was put in force March 13, 1899, W. C. Barry, of Rochester, being the first president of the society. The motto which was proposed at the executive meeting, for the organization was "A rose for every home, a bush for every garden."

The sense of the committee is that the society should be broadened out to make it as comprehensive as its name, that "American" represents no section but takes in the entire bound of the zone where roses grow.

BENJ. HAMMOND, Sec'y.

Detroit to Dayton.

The Detroit Florists' Club has completed arrangements for the trip to Dayton and hereby extends a cordial invitation to everyone in this vicinity to join our party. Special cars will be provided on train leaving Detroit (Union depot) Pere Marquette R. R. (C. H. & D.) at 12:35 p. m., Monday, August 20. Toledo will be reached at 2 p. m., leaving there 10 minutes later with the Toledo delegation, arriving at Dayton 6 p. m. To those who are located at points in this section where railroad certificates are not obtainable, tickets should be purchased to Detroit where through tickets to Dayton with certificates can be obtained. Fare going and return $5.80.

DETROIT FLORISTS' CLUB.
J. F. SULLIVAN, Sec'y.

Chicago to Dayton Via Big Four.

The Chicago Florists' Club has concluded arrangements for the special train over the Cleveland, Cincinnati, Chicago & St. Louis Ry., leaving the Michigan Central passenger station, Twelfth street, Chicago, at 12:45 Monday noon, August 20, and due to arrive in Dayton, via Kankakee, Lafayette and Indianapolis about 8:40 p. m., practically a daylight ride all the way. The train will consist of three or more new day coaches, one combination car, and one dining car to serve luncheon and dinner a la carte.

The rate by the certificate plan for the round trip is only $9.70. These tickets are good on all trains August 17, 23 and for the return trip the validated certificates will be honored up to and including August 31.

The Chicago Florists' Club cordially invites the florists of the WEST, NORTHWEST and SOUTHWEST, delegates to the convention, to join this special train at Chicago Monday noon, as above stated, and see that when they buy their tickets and secure their certificates for the same that these tickets read "Via Big Four Route" from Chicago to Dayton.

Delegates who can join us at any point along our route are requested to do so. The committee will be glad to hear as early as possible from all who decide to join our party, so that the necessary arrangements can be made in time. Delegates buying tickets in Chicago will secure them at the city ticket office of the Big Four, 238 S. Clark street, with certificates.

Committee on transportation for the Chicago Florists' Club—J. C. Vaughan, Willis N. Rudd, George Asmus.

P. J. HAUSWIRTH, Pres.,
L. H. WINTERSON, Secy.

Dayton Delegates Invited to Chicago.

An informal meeting of the Chicago Florists' Club was held July 27 at 11 a. m. in the office of F. F. Benthey, for the purpose of inviting to Chicago, eastern members of the S. A. F. who might wish to extend their trip to this city. It was the intention of the meeting to plan some form of amusement for them but as it was impossible to obtain any estimate of the number who might come, it was finally decided to draw up the following invitation:

"Convention visitors who may decide to make a further western trip during the week following the Dayton meeting are cordially invited by the Chicago Florists' Club to advise its secretary when they will be in the city in order that an afternoon or evening meeting with the club can be arranged."

L. H. WINTERSON, Sec'y.,

STOCK HOLDERS MEETING.

CHICAGO, July 21, 1906.

Stockholders of the American Florist Company:

You are hereby notified that the annual meeting of the Stockholders of the American Florist Company will be held in the Beckel Hotel, Dayton, O., Wednesday, August 22, 1906, at 3 o'clock P. M., for the purpose of electing directors and officers for the ensuing term, and for the transaction of such other business as may come before the meeting.

J. C. VAUGHAN, Pres.
M. BARKER, Sec'y.

WATCH US GROW.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Think of Aschmann, the great Araucaria Importer of America, before buying elsewhere.

Fill your empty houses now, and make 100 per cent on your money while you are asleep.

Notice.—When you undertake anything, do it well or not at all. This is our motto, adopted eleven years ago, when we imported the first lot of this well known pot plant, the Araucaria Excelsa, from Belgium. These everlasting green foliage pot plants are growing more in favor by the tasteful plant buyers of the land from year to year. Please watch the growth of our importations during the last eleven years. First year 100; second year, 250; third 500; fourth, 1,000; fifth, 2,000. Now this year, 1906, is our **eleventh anniversary** since we began importing them, and they have grown up to 6,000, this spring's importation.

All these are grown for me under contract by an Araucaria specialist in Belgium. I must say, for the benefit of my customers, that they were never before so nice and large for the money as this year. Perfectly recovered from their sea voyage and well established, planted to 5½, 6 and 7 inch pots, ready ship to all points in America.

I herewith quote you special low prices on them for cash: **Araucaria Excelsa**

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old.$ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in. pots, 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots, $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size; their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25, $1.50, $1.75, $2.00 to $2.50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them; can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4 in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

Cycas Revoluta or **Sago Palm,** 6 to 7 in. pots, 7 to 20 leaves, 10c per leaf.

Cocos Weddelliana, 15c.

Areca Lutescens, made up plants, 4-inch pots, 25c.

Solanum or **Jerusalem Cherries,** 2½-in., per 100, $5.00; the same varieties as we sell at Xmas, for from 75c up to $1.00 each.

Ficus Elastica, Belgian importation, 4-in. pots, 25c.

Ferns. A fine assortment of Ferns for dishes, large, bushy, out of 2½-inch pots $5.00 per 100.

Barrowsii ferns, 4-in., 25c; 6-in., 75c. **Scottii,** 4-inch, 25c; 5 inch, 40c; 6 inch, 50c

HELLO! BROTHER FLORISTS, ARE YOU GOING TO DAYTON?

We want to meet you there and show you some of our new **CANNAS.** Our bank account was not large enough so that we could afford to pay the price asked for space by the S. A. F. in the fair grounds, so we had ours planted in the city parks. We have been told that no one would see them, so we thought we would tell "you all" about them so you would be interested in seeing them.

There is only 1445 of them, in 188 different varieties, all but 17 of which are of our own originating. We don't need to tell you what we think of them, but we do want to know what you will think of them, for if "you all" say they will be winners, then we will "whoop 'em up" and give "you all" a chance to buy some of them.

WEEK SHOWS SLIGHT IMPROVEMENT.

August, which is generally decried as the poorest of the poor months, opened fairly well, with an abundance of all kinds of stock and normal prices prevailing. The quality of roses as a whole improved considerably. Instead of the miserably poor rose stock of a week ago, the market now offers some very good Bridesmaid, Kaiserin, Killarney and American Beauty which find a ready sale. Carnations are very scarce, and move slowly. Some good, clean Boston Market was offered last week at a reasonable price with no buyers in evidence. Asters have proven a drug for sometime and it is hoped that the flood of these blooms will soon be over. They bring no staple figures, being sold for whatever it is possible to get. In addition to this the stock is mostly of an inferior grade. Most of the wholesale houses are displaying a few forlorn stalks of gladioli which it seems impossible to move. Sweet peas are being received in small quantities, and sell well. Outdoor flowers of all sorts are arriving in good quantities and meet a good demand.

NOTES.

P. J. Foley has just returned from a trip into the "woolly west" or at least that portion of it within the boundaries of Montana where he is interested in a timber deal. His firm is now erecting 10 greenhouses for the personal use of one R. M. Synder, a Kansas City gentleman, who has acquired 5200 acres of land in the heart of the Ozark mountains. This estate is said to be one of the finest in the world, situated 28 miles from the nearest railroad. Mr. Synder has secured the services of a Mr. Pierce, well known in English horticultural circles, who will devote his entire time to beautifying the grounds.

Ed. Winterson returned from his trip to Michigan, August 2. He reports conditions in the neighborhood of Detroit very satisfactory and was impressed by the appearance of the roses which he says give great promise. Among other incidents of the trip was a visit to John Breitmeyer's extensive establishment where he says he saw no less than 30,000 Shasta daises of exceptional size.

John Sinner has been experiencing some trouble with weeds in his carnation patch at Rogers Park. These pests were removed by hand several weeks ago but appeared again in even greater numbers than before. He then hoed the patch thoroughly and since has had no trouble.

James Harthorne's sudden death August 6, due to intestinal difficulties, shocked his many friends in the trade. He was in the city only a few days before, and while not quite well, there was no indication of the serious character of the trouble.

The Kroeschell Bros. Co. report a booming business. The firm seems to be experiencing a demand for large boilers, as it is claimed that the tendency is to establish center heating systems in preference to a number of scattered, smaller installations.

The Chicago Rose Co. finds its stock of grass growing heads a decided help in the present season of poor business. The firm is well situated for the sale of such novelties as the store lies along the thoroughfare most used by Michigan pleasure seekers.

It would seem that asters had reached the lowest depths of degradation when J. B. Deamud offered a lot of 2,500 for 8 cents per 100 last week. This record, however, was beaten by another commission house which sold 300 bunches for $3.50.

Bassett & Washburn are now cutting their second crop of Kaiserin roses which they say is inadequate to meet the demand. They are also bringing in some choice long stemmed Bridesmaids.

The windows of H. E. Klunder's retail store in the Masonic Temple building are showing a rare collection of nymphæa hybrids and nelumbiums. The display is attracting much attention.

Fred Sperry, of Vaughan & Sperry, left the city for a three week's vacation trip. He intends to spend a week or 10 days in Michigan and then go further east before returning home.

E. C. Amling, who is taking his vacation on the installment plan, spent three days among some small lakes in northern Illinois last week. The trip was made in his automobile.

The State street belles with escorts are now presented with flowers (one aster bloom at this time) by the newsboys and the gallant swains, of course, buy up all the papers.

W. E. Lynch, of E. H. Hunt's, will take a vacation trip to Massachusetts next week. Miss Sisler, of that firm, will spend the next two weeks in Grand Rapids, Mich.

Wietor Bros. report a very satisfactory business this season. They have sold large numbers of carnation plants, one order received last week, calling for 12,000 plants.

Otto Goerisch, of the A. L. Randall Co., will take a two week's vacation to Benton Harbor, Mich. E. Johnson, of the same firm, returned August 6 from his outing.

Percy Jones is daily receiving a shipment of 3,000 sweet peas of exceptional quality. He says he could dispose of several times that number if they were obtainable.

Peter Reinberg announces a good demand for all grades of stock and a lively shipping business. He disposed of several large orders for carnation plants last week.

The Benthey-Coutsworth Co. has finished planting and is daily cutting some choice Bride and Bridesmaid roses. This firm is also bringing in a few fine Killarney.

W. L. Rock, of Kansas City, is on his way home from a vacation trip in Northern Michigan. He stopped for a few days to renew some old acquaintances.

P. Schupp and family returned from a week's vacation in Michigan, August 1. He says that the peach crop in that section is suffering severely for want of rain.

Zech & Mann are handling a daily shipment of about 200 Lilium rubrum which finds a ready sale.

Nursery.

H. H. Frey and son of Lincoln, Neb., spent several days in the city last week, purchasing material to build five new houses.

Weiland & Risch are now cutting from 200 to 250 tuberoses daily. They are also bringing in some fine Killarney.

Poehlmann Bros. installed four 1,000-H. P. boilers, Racine make, in their new plant last week.

F. W. Timme left August 4 for a brief vacation in Scotland and Germany.

The J. D. Thompson Carnation Co. expects to finish planting this week.

C. W. McKellar went to Mt. Clemens, Mich., last week, on business.

THE MARKET.

The past week has been the dullest of the season, there being no activity save about the water coolers which are just now centers of interest. While good stock is scarce there appears plenty for the demand. Imported American Beauty roses are done for a while and some very nice local stock is coming in with stems as long as 36 inches and really choice flowers for the season. As high as $3 per dozen is asked for the best. Killarney is going to make itself felt in the market the coming season and some pretty flowers with medium stems are already seen. There is also some fine Bridesmaid from growers who have not let their kept over stock go altogether. Good Liberty roses also add color to the assortment and meet with a fair demand. Asters are improving, some choice flowers being seen. There is room for improvement, however, in much of the stock. Gladioli are in full supply and the wonder is where they all go to. Some of the strains are very fine, $2 to $3 being the price. Hydrangea paniculata is now in the show windows and will last until the early fall openings.

CLUB MEETING.

The August meeting of the club was as full of life and vim as one might look for in January. It was convention night from start to finish and that august body of Daytonites will be considerably relieved to know that it was decided that next years' meeting is to be held in the city of brotherly love so they will be relieved of any anxiety on this important point. Robert Craig, the Demosthenes of the society, is to make the address and the gentlemen who hypnotized the delegates so successfully and took them to Omaha and later to Asheville will simply not be in it with the silver tongued quaker. Other cities have done well but Philadelphia will start the society into new life and an era of prosperity that will double its usefulness. All the members present were very enthusiastic over the prospect and will work to make it the best meeting ever held by the society.

NOTES

There are a number of changes in the personnel of the employes of the commission houses. Robt. H. Gloss, for some years past with the Leo Niessen Co., has joined the S. S. Pennock brigade. Clarence Watson and Ralph Shrigley, late of the S. S. Pennock staff, are now with the Leo Niessen Co., while John Wilson of the Niessen force is now back to his old love the retail business, and resumes his position at Habermehl's, Twenty-second and Diamond streets. In the light of these numerous changes, which must be more or less annoying to all parties concerned, we would suggest that the several houses in town get together and transact all the business as a corporation under one roof. They could divide the work into sections, each of the proprietors taking charge of one or more. Their new credit scheme would also work out fine, as there would then be only one ledger account for each customer. Dream, you say. No. "Hot weather." Well, maybe it is. Still the scheme is not without some points of merit.

Another commission house is to be opened at 1510 Sansom street. Alfred Campbell, now with Edward Reid, is the new man. He has a good location and being well versed in the business should do well. K.

Boston.

TRADE INACTIVE.

Trade of the past week has been the most inactive of the season, an occasional funeral order being the only thing to break the monotony. Asters are now a drug on the market. As for carnations I cannot say a great deal for the quality of the goods but the prices they are bringing are fine for this season of the year. There was a slight improvement in the quality of roses the last few days, Kaiserin, Carnot and Wellesley comprising the best grades. Liberty and American Beauty are still scarce, yet there is no great demand for them. The weather still remains changeable and has done considerable damage to gladioli and sweet peas, some of the growers not cutting any of the latter for 10 days. Lilium lancifolium, L. longiflorum and L. auratum are quite plentiful and sell at fair prices. Tuberoses are now making their appearance. Branching asters are coming to market in good quantities and are selling as a good substitute for carnations.

NOTES.

There was a meeting of the stockholders of the Boston Co-operative Flower Market for the purpose of revising some of their by-laws. They have now secured a 10-year lease of the first two floors of Music Hall building, the owners making considerable alterations on the second floor. This floor will make an ideal market and it is the intention of the growers to occupy same about October 1, instead of the lower floor where the stalls are now located.

Bernard A. McGinty, manager for N. F. McCarthy & Co., severed his connection with the above firm August 1, to accept a position as salesman for different growers in the Music Hall market.

Among those on vacations at the retail stores are: Otis Ruggles, of J. Newman & Son, T. E. Garrity and Wm. Kenney at T. F. Galvins' and Joe White, of W. E. Doyle's.

Edw. Bingham, of Dedham, is building a new greenhouse, 20 x 100 feet, which he will devote entirely to the growing of double violets this fall.

Herbert E. Tyler, of the Montrose Conservatories, severed his connection with that firm August 4, to accept a similar position in Canada.

We regret to announce the death of a young son of Pat Boyle, of Malden, which occurred August 1.

E. A. Stickel has accepted the position as salesman for the Montrose Conservatories.

The Willow Hill Conservatories are cutting some fine Mexican star flowers.

Visitors: William Dykes, representing Edw. Jansen, of New York; Henry Small, of J. H. Small & Sons, Washington, D. C., on his way to Maine where he is to visit some relatives. B.

Hartford, Conn.

Members of the New Haven County, New London County and Newport Horticultural Societies to the number of about 35 visited this city July 19 and were met at the railroad station by a special committee of the local horticultural society, of which John F. Huss was chairman. The visitors first visited Bushnell park and afterwards went to the Goodwin estate to see the work of Superintendent Huss. Elizabeth park was the next place visited, and a lunch was served by the Florists' Club. During the rest of the day other parks in the city were visited.

POINSETTIAS.

2½-inch pots.....$4.00 per 100
3-inch pots..... 6.00 per 100

JULIUS WOLFE, 1617 North 19th St., PHILADELPIA, PA.

We Are Headquarters for **PRINCESS VIOLET STOCK**

The **Princess of Wales** is still the leader of all single violets. There is no other variety on the market that can compare with it as a commercial violet, because it blooms from Sept. 15th to May 1st; every bloom is marketable. It has size, it has color, it has length of stem. It has fragrance. It sells when any other variety, single or double, cannot be given away. The people want it.

So great is my confidence in this violet that the following Autumn I will devote 80,000 feet of glass to the growing of this variety. I have about 200,000 nice young divisions now ready to ship at the following prices:

$2.00 per 100. $15.00 per 1000. 500 at 1000 rates. Lots of 5000 at $14.00 per 1000. Lots of 10,000 at $13.00 per 1000.

BUSINESS DULL.

The market is practically dormant. Arrivals are light and the demand considerably lighter. While cleaning up is possible, it entails sacrifices which even at this time of year are remarkable. August is never an active month, but so far the volume of business for the present month is below the average of the past three years. Roses are still poor in quality as far as the majority of shipments are concerned, and in special grades are not even numerous. Such little lots of the new crop as arrive sell well and quickly, but at prices very little, if any, above average quotations. White roses are rather scarce, and occasionally bring a trifle more money than pink roses. American Beauty is not over plentiful, and in special grades is short in supply, but prices continue in the same ratio as during the past three weeks. Carnations do not figure very extensively in arrivals, most of the growers having thrown out the old benchings. Such stock as is coming in is generally poor in quality and moves slowly. Asters are a little shorter in supply; but that is not saying much, as there are still more than the market can absorb. The steady rains of last week and the tropical sun of this week relieved the market somewhat by a temporary curtailment of the cut. Lilies are not over plentiful, and continue to bring good prices. Lilium auratum and L. rubrum are in fair supply and are taken freely for window display. Lily of the valley moves slowly, and the quality is not as good as it has been. Gladioli are arriving in larger quantities and clean out at some price or other. While America and one or two other superior sorts bring top prices, there are many fine varieties closed out with lower grades. Cut hydrangea, Rudbeckia Golden Glow and tamarix are outside offerings, which seem to move fairly well. Dahlias, in the coarser varieties, are offered everywhere, but do not sell well, and many have to be thrown out. Tuberoses are arriving but do not attract much attention in the midst of the other offerings. Cattleyas are plentiful, and prices are perhaps a little better than for some weeks. Sweet peas are practically out of the market. Smilax and asparagus move rather slowly but the stock coming in is not hard to clean up.

NOTES.

John Weir, of J. Weir's Sons, Brooklyn, was gathering all the available supplies of ivy leaves in the market one day last week. He filled an order for a 10-foot cross made entirely of ivy leaves.

A. Moltz and Phil. F. Kessler have doubled the area of their quarters in the Coogan building and now have a store commensurate with the possibilities of their rapidly growing business.

Miss Chapman, bookkeeper for A. J. Langjahr, and Miss Anna Levitt, bookkeeper for Joseph S. Fenrich, are enjoying well earned vacations.

H. G. Kretschmar, of West Nyack, N. Y., is putting up a new greenhouse 42 x 200 feet. The Lord & Burnham Co. has the contract.

Alex. J. Guttman is receiving daily some very fine Killarney and Chatenay roses of the new crop from his Summit, N. J., greenhouses.

Some large shipments of the new Gladiolus America are coming in this week from J. Lewis Childs, of Floral Park.

Fred Lord, of the Lord & Burnham Co., will have charge of the company's exhibit at the Dayton convention.

J. K. Allen is leaving this week for a Sussex county resort for a two weeks' vacation with his family.

B. S. Slinn, Jr., is now carrying on the business of Slinn & Thompson on his own account.

Utica, N. Y.

BUSINESS DULL.

The scarcity of business brings to us the fact that summer is with us, but on the whole we cannot complain because trade has held out unusually late this season. Carnations are gone or are so small as to make them useless, but we are receiving fine shipments of roses, asters, sweet peas, gladioli and pond lilies.

NOTES.

Theo. Schesh, of Ilion, had a narrow escape from becoming blind while spending his vacation at the seashore. Mr. Schesh had trouble with his eyes, so came direct to Utica to consult a specialist, who performed an operation at once, and informed Mr. Schesh that he would have become totally blind before 12 hours had passed. Saturday he was discharged from the hospital with better sight than he has enjoyed for years.

Frank Baker reports an extra fine summer trade at his greenhouses. The men are kept busy potting ferns, of which Mr. Baker grows almost a half a million. Mr. Baker is growing his carnation plants in the house this year and they appear to be a perfect success.

Geo. Benedict, of Yorkville, is cutting some fine summer roses, noticeable among which is his Kaiserin. Mr. Benedict has added three new houses to his mammoth plant this year, in which he will grow roses.

J. C. Spencer returned last Sunday from an enjoyable outing at Otter lake. John Beck and wife were at the same resort. BUD.

Secaucus, N. J.

The Secaucus Exotic Nursery has just completed and filled a new house with crotons, dracænas and Boston ferns. One house of Scottii ferns looks very promising. The freshly imported phœnix and kentias of this firm are sturdy looking plants. The members of the concern are alert and up-to-date. Emil Savoy, who only recently settled down here and who was formerly with R. Dreyer, of Woodside, N. Y.; Robt. Craig, of Philadelphia, and J. C. Vaughan, of Chicago, has his head full of plans for future alterations and extensions.

Komitsch & Yunge, with their 50,000 square feet of glass, are making a specialty of sweet peas and chrysanthemums. Several houses are filled with Adiantum Croweana and Asparagus plumosus. The pride of their place is one house filled with Cattleya Trianæi. It contains 75 cases of last year's importation. It has been quite a strain on them to wait 18 months for that house to bring in something, but they cannot help smiling now at the outlook.

Carillo & Baldwin, the latest addition to the list of local growers, will soon have their houses filled with the various cattleyas. Quite a few C. Trianæi blooms have already been cut.

A. Schurmann and Herman Mende are both busy filling their houses with chrysanthemums.

Orange, N. J.

The monthly meeting and floral display of the New Jersey Floricultural Society was held August 3. A paper was read by Arthur W. Bodwell on "The Cultivation of the Orchid as Viewed by a Private Gardener." It was well illustrated by contributions from Lager & Hurrell, Joseph A. Manda and the neighboring orchid collections of Wm. Barr and Henry Graves. Mr. Bodwell is gardener for Wm. Barr and formerly of Pitcher & Manda and Chas. Pratt. The reading of the paper was followed by a lively discussion in which many took part. Robt. Berry, M. Mackorie, and A. F. Caparn were judges for the evening. It was decided by the society to hold a special fall flower show. J. B. D.

Baltimore.

John M. Rider, the carnation grower of Brooklyn, Md., lost by fire a few nights ago his barn and the entire crop of hay which it contained; loss partially covered by insurance.

NEW BRITAIN, CONN.—Arthur Volz has taken out an application to build a flower store, 12 x 24 feet, on Edson street.

SEA CLIFF, N. Y.—The will of Ferdinand D. Boulon has been admitted to probate. It disposes of an estate valued at $90,000.

CANANDAIGUA, N. Y.—A floral parade of automobiles was one of the features of a convention of firemen that met here August 1.

ELMIRA, N. Y.—Ralph Van Duzen, shipping clerk of the United States Cut Flower Co., narrowly escaped drowning, with Miss Elsie Pierce of Binghamton, when their canoe capsized July 29.

MADISON, N. J.—The prize list has been issued for the eleventh annual show of the Morris County Gardeners' and Florists' Society, to be held at the Assembly rooms, November 1-2. Cash prizes are offered to the amount of $450.

NEW YORK.—The board of trustees of the Bellevue and Allied Hospitals will receive until August 15 at 3 o'clock p. m., sealed bids or estimates for all labor and materials required for the excavation, sodding, seeding, concrete, plumbing, iron, and other work in the layout of the grounds, etc., at the New Harlem hospital. For full particulars address John W. Brannam, president of the board of trustees.

LONG BRANCH, N. J.—The Elberon Horticultural Society will give an exhibition in either July or August. All the prominent cottagers who have gardens—and a great majority of them have—are interested, and weekly exhibitions and prize awards are now made at the meetings. The society has been growing in membership and influence. The coming flower show is already being talked about, and handsome prizes will be awarded.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

VISITED NEW YORK: Maurice Fuld, now manager for W. W. Rawson & Co., Boston, Mass.

LEONARD H. VAUGHAN, of Vaughan's Seed Store, Chicago, left August 7 on a northern Wisconsin fishing trip.

THE Pulverized Manure Co. is a new corporation for handling dried and sacked manures at the Union Stockyards, Chicago.

IMMORTELLES are arriving in New York, evidently of old crop. Buyers will do well to keep this in mind. They are not so good.

ONE Chicago grower harvested 700 bushels of onion sets per acre and grew 1500 bushels from 300 pounds of seed. The pulling of the set crop is about finished.

THE bodies of Joseph C. Anthony and wife, son and daughter-in-law of Henry C. Anthony, the well-known seed grower, who were drowned July 22, were found August 4, floating in the Newport bay. The funeral took place August 7.

VISITED CHICAGO: Wm. Park, of Peter Henderson & Co., New York, who has been making a tour of the seed-growing districts; Chas. Johnson, Marietta, Pa.; G. Foucher, representing Denaiffe & Son, Carignan, France; A. L. Burri, representing the Chesmore-Eastlake Co., St. Joseph, Mo.; Max Wilhelmy, Lawrence, Kans.

C. C. MORSE & Co., San Francisco, Cal., write as follows concerning seed crops July 24: "On the whole the crop is an average one with the exception of onion. We expect, however, to fill our contracts practically in full, but will have little or no surplus. Radish, lettuce, carrot and parsnip are unusually good. We are now busily engaged in cleaning and shipping our spinach crop and are well into sweet pea and lettuce harvest.

Boston.

The first shipment of French bulbs including Paper White narcissus, Lilium candidum and White Roman hyacinths are now on the water and are expected to arrive in town about August 15.

The Scotch picnic held at Caledonian grove August 4 found about all the employes of the different seed houses enjoying themselves to the best advantage.

R. & J. Farquhar Co. had an exhibition of prize dahlias in their store the past week which attracted widespread attention.

Mr. Davey, of R. & J. Farquhar & Co., and wife are sojourning for two weeks at Spencer, Mass.

John Guerineau, of Schlegel & Fottler Co., is spending his vacation up in the White mountains.

Wm. Clark, salesman for Joseph Breck & Sons, is spending his vacation in New York. B.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.

Braslan Seed Growers Co.

WHOLESALE SEED GROWERS.

SAN JOSE, CALIFORNIA.

Seed Crops in Morocco.

Consul Hoffman Philip, of Tangier, reports that the general outlook for the various seed crops in Morocco for the coming season is excellent, and that the rainfall has been abundant in all districts. He says:

In respect to the probable yields of canary, coriander, and fenugreek seeds, inquiries incline me to believe that they will be considerable and equal to the demand of average years. The drought of last season will to a certain extent preclude this year's yield from being exceptionally large, owing to the resulting poverty among the agriculturists and the special attention devoted to crops of cereals, etc. There has also been considerable damage by locusts to the crops in the extreme southerly districts. However, I see no reason to suppose that this year's seed crop will not be a liberal one, and I should advise the particular attention of our business houses to Morocco as an exceptionally good source of supply in this direction and one capable of great development.

Farmers and Seedsmen Lose.

Providence, R. I., August 4.—Crop reports received from all over this state and from districts in southern Massachusetts which supply this city with market garden products indicate that the farmers have suffered severe losses by reason of the prolonged storm. The hay crop is lost, tons having been allowed to stand in the hope that good haying weather would come, until the grass has gone by and it will not pay to harvest it. Potato vines are smelling badly, which indicates that the tubers are rotting. Beans are black-spotted. Tomato vines have run to wood, the blossoms having failed to set, and that crop is a failure. Oats that were cut have rotted and sprouted on the ground before the harvesting could be completed. Melons of all kinds have gone to the bad. In fact, everything above ground with the exception of beets has grown soft and will not pay to work for the market.

Seedsmen report that farmers who were expecting to make profits on their crops and then pay bills for fertilizers and tools, as well as seeds, have not been able to make any payments, and it does not look as though they would be able to do so this fall. In addition to losses on seeds and fertilizers, the farmers are out for wages of their hands.—Boston Herald.

Schedule for Cantaloupe Seed Selection.

Extract from Bulletin 104, of the Agricultural Experiment Station of the Colorado Agricultural College.

While the cantaloupe field is growing, select and mark any individual plants that show exceptional merit along the lines of prolific yield, early maturity or resistant power. That such variation frequently occurs is plainly shown by the field observations of the past three years; many plants were observed which produced only three or four cantaloupes during the entire season, while in one instance, sixteen large cantaloupes were produced from one plant, which would be a very large yield for three or four ordinary plants. The variation in maturing was revealed in the comparative test of the five strains of seed before mentioned. Ten days elapsed between the first ripe melon on one strain, and the first of another, although the rows were given uniform conditions.

The variation in resistant power has already been indicated.

One very important feature of the work of seed selection is the marking of individual plants which show desirable qualities. The seed should be saved separately, labeled and grown by itself, thus fixing in the strain these desirable traits.

In the past the seed saving has been too much from a general selection of the melons without regard to the merits of the vines from which they grew; and also a common error has been in giving too much attention to the external points of the melon without considering its internal qualities.

When the marked hills reach maturity the vines which reveal the most uniform sized cantaloupes of ideal form and netting should be taken as the basis for selection. That the size as well as other qualities is effected by seed selection is brought out in a letter of J. P. Pollock, in which he states that he "reduced the size down until they averaged well to crate."

There are many conditions which may affect size and to some extent each grower should study his soil from the standpoint of the melons which it produces, and govern his selection accordingly.

The netting of a cantaloupe has long been considered an attractive fancy feature and without question it is the essence of its appearance on the market, and experience reveals that it has a value in protecting the keeping qualities of the melons on long shipments.

The words "Rocky Ford" scratched on the surface of a green melon appeared in the netting at maturity, thus showing that the netting of a cantaloupe is merely a tracery of callous formed by the natural cracking of the surface of the melon.

By observation and tests it is shown that a close netted melon does not lose weight by evaporation as rapidly as one less covered with netting, thus its keeping and shipping qualities are largely determined by the amount of netting on its surface.

The tendency of the stripes is to widen under careless selection, and in view of the superior keeping qualities of the "solid net," the old ideal is giving way to a type represented in the illustration, which is a result of a cross of the Pollock strain and the "Blinn" strain. The form is more nearly perfect to fit the standard crates than the round type characterizing the Pollock strain, and its internal qualities are in keeping with the external appearance.

The eating qualities of a cantaloupe are the ultimate test of its perfection. A cantaloupe produced from a strong, healthy vine and yet not having a sweet, spicy flavor, should never be saved for seed.

A PERFECT POLLOCK CANTALOUPE.
Selected for resistant tendency—a cantoloupe with a money basis.

The small cavity, solidly filled with seed, a thick flesh with smooth, firm texture, are obvious points in the value of a marketable cantaloupe. These with many minor points should be zealously guarded by the careful seed selector.

There is no absolute, fixed relation existing between the points of the above schedule. Thus, the selection of melons for resistant power only, will not insure netting or other qualities. On the other hand, an ideally perfect melon, if unable to resist rust, would be a failure; but careful attention to all these details in due proportion, will result in a melon like that shown in the accompanying illustration—a cantaloupe having a "money basis."

P-rolific yielding,
E-arly maturing,
R-esisting tendency,
F-orm, size and netting—ideal,
E-picurean qualities, sweet and spicy,
C-avity small, well filled,
T-exture smooth and firm.

European Seed Crops.

IN QUEDLINBURG GERMANY

The spring was accompanied by unfavorable, cold and wet weather, which rendered the planting of most of the root and bulb crops, as carrots, chicories, beets, turnips, swedes, mangels, winter radishes, onions, etc., and the early sowings of lettuces, spinach, spring and summer radishes, onion, leek, and the various open-ground sown annual flower seeds very difficult and later than usual. The first part of May, when most of the annual and perennial flowers raised under glass are planted out in the open ground, was unusually dry and windy, and caused many blanks in the plantations, and made the starting of the young plants very difficult. The planting during the latter part of that month was very difficult and in many instances could not be done in the usual proper way owing to the continued heavy rains that made the soil muddy and unfit to work on for days. The weather during the whole of June, alternative rain and sunshine, was favorable to the growing seed crops, and brought them a good deal forward, though they are at present about a week or two behind the usual time.

Harvested crops.—Corn salad, good; turnips and forget-me-not (Myosotis alpestris varieties), middling and pretty good.

Present state of growing crops.—Vegetable seeds.—Beans, dwarf or kidney and runner, partly good, partly middling, and the delicate varieties below middling. Beets, carrots, cress, chervil, chicory, leek, lettuces, onions, parsley, parsnips and radishes good. Peas, round-seeded varieties, good; wrinkled marrow varieties, middling. Cabbage, white, red and savoy, Kohlrabi and spinach, middling and pretty good. Cucumber, ridge varieties, these have seriously suffered from the unfavorable weather and they stand rather thin.

Farm seeds.—Mangels, sugar beets and swedes, partly good and partly middling.

Flower seeds.—Open-ground cultures.—Pansies, although they look very well, the yield of the crop appears to turn out below middling owing to frequent, heavy rains that caused part of the flowers to pass away without setting seed. Stocks, wallflowers, asters, larkspurs, balsams, carnations, mignonette, nasturtiums, sweet peas, snapdragon, scabious, Canterbury bells, sweet william, sweet sultan, Chinese pink (Dianthus Chinensis and varieties), lobelias, lupins, helichrysum, marigold, petunias, polyanthus, violets, zinnias and the miscellaneous flowers are partly good and partly middling while hollyhocks and Drummondi phlox stand rather thin.

Principal pot-grown flower seeds.—Stocks, annual, autumn and winter, double wallflowers, large-flowered petunias, begonias, calceolarias, cinerarias, cyclamen, gloxinias, Primula Chinensis and obconica, pelargoniums, etc., are partly good and partly middling.

On the whole, the present state of the growing seed crops may be considered as satisfactory.

IN ESSEX, ENGLAND

At one time the outlook for the present season's crops was very unsatisfactory owing to the cold spring, but during the first few weeks they have improved greatly. With a few exceptions there is promise of a fair average harvest.

Peas.—Early varieties, medium; second early, promise well; late varieties have blight which came over district; beginning of July, some varieties will be short, and as stock seed of some of the choice sorts was scarce last year and small acreage planted, prices will rule high for pease of Gladstone type.

Broad beans.—Not so large an acreage nor looking so well as last year.

Scarlet runners.—These are grown very extensively in Essex and are now in full bloom looking well; the showers have been very beneficial in helping to set the bloom.

Beet.—Small acreage, crop improved past three weeks.

Broccoli, brussels sprouts, cabbages, savoys.—Very small acreage owing to dry summer of 1905, unable to put any plants out till September, when very small proportion run to seed; crop will be very light.

Carrot and parsnip.—Looking fair.

Radishes.—The cold spring kept these back, but have now got together and looking fair.

Turnip and swede.—Very small acreage planted and what there is very light crop, large acreage had to be ploughed up early in spring, prices will be high.

Mangel is extensively grown in Essex, land being specially adapted; acreage not so large as last year; the plants for some time looked very bad but past three weeks improved very much, medium crop.

FLOWER SEEDS

Nasturtiums.—These are extensively grown in this district one firm turning over about 500 bushels yearly; at present they are looking well, the light leaf varieties promise good average crop, but it depends on weather we have for gathering, they have all to be picked up from the ground by women; dark leaf varieties such as Empress of India, etc., fair.

Sweet peas.—These are doing well this year, July not being so hot as past three years, they have remained on growth longer, promises of a good crop. Candytuft poppy, godetias, larkspur, and other annuals looking well.—Horticultural Trade Journal.

PLANT NOW. LILIUM HARRISII
FOR EARLY FORCING.

We offer some extra choice Lilium Harrisii which has been grown for us from the original, pure stock. This is the kind of stock that you want for the very earliest forcing, as it is the true, original Harrisii. The small sizes, 5-7s and 6-7s are particularly desirable for this purpose, as they will flower more quickly than the larger bulbs. If you want to get a little of the original, pure Harrisii, try a case or two of this. As our stock of this is limited, we can offer only a few cases to a single buyer. If you have been dissatisfied with the Harrisii that you have forced heretofore, try a case or two of this, and see if it is not more than worth the difference in price over the stock that you have been buying. In ordering, ask for the pure selected strain of original Harrisii, which we offer as follows:

5 to **7**-inch bulbs, 400 to the case, per case.	**$17.00**
6 to **7**-inch bulbs, 350 to the case, per case.	**17.50**
7 to **9**-inch bulbs, 200 to the case, per case.	**20.00**

EASTER COMES EARLY NEXT YEAR—MARCH 31—and a great many growers will want to use Harrisii instead of Longiflorum so as to be sure to have the plants in flower in time, as the season is going to be short for Japan Longiflorum. The crop of Harrisii this year is the shortest it has been in years, and in view of the extra demand, we advise those who have not already covered their requirements to lose no time in doing so.

For very earliest forcing—Christmas and later—we recommend the pure Harrisii offered above, but for later forcing, for Easter, our customers will find the regular stock offered below first-class stock—much better than the average stock usually offered. We can quote the regular stock as follows:

6 to **7**-inch bulbs, 335 to the case, per case. **$13.50**

FREESIA REFRACTA ALBA, the true white variety. Now ready. Finest Bermuda-grown stock, $1.00 per 100; $7.50 per 1000.

BERMUDA BUTTERCUP OXALIS, $1.00 per 100; $7.50 per 1000.

CONVENTION NUMBER
AUGUST 18. . . . .
Send ADVT. NOW.

This is the florists' time to travel and it pays to tell them what you have to offer now so that they may stop off and see for themselves. Tell them also what you will exhibit at the convention. Advertising in the best trade paper is the best way to reach the real buyers.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

THERE is no better plant for hiding or screening unsightly buildings than the wild grape.

ANN ARBOR, MICH.—A 50-acre tract for a botanical garden and an arboretum for this city and the University of Michigan has been secured.

PETERSON'S NURSERY, of Chicago, reports a lively business, as it is having a big run on peony plants which have proven especially good this year.

LOS ANGELES, CAL.—Eastlake park will have a handsome conservatory if the city council sees its way clear to increase the appropriation of the park commissioners $50,000.

THE American Apple Growers' Congress will be held at the Planters' Hotel, St. Louis, Mo., next week, August 14 and 15. An elaborate programme has been arranged.

AMPELOPSIS QUINQUEFOLIA, in its clinging form, is one of the best vines in cultivation for covering tall, bare tree trunks, etc., where the Boston ivy will not thrive.

CUSTOMERS who are averse to purchasing expensive garden trees and shrubs for the embellishment of their grounds should be induced to try the best of our cheaper native trees, shrubs and perennials.

DAVENPORT, IA.—H. G. Bryant and A. Arp have entered into partnership under the name of the Davenport Nursery Co., Commencing August 1. Mr. Bryant is one of the Princeton, Ill., Bryants and a relative of Wm. Cullen Bryant.

LOS ANGELES, CAL.—Mrs. Ross, mother of J. W. Ross, of Pasadena, and C. Ross, of the Ross Nursery, this city, died July 28 after an illness of several years. Mrs. Ross was well advanced in years and the cause of death was general decline.

THE annual convention of the Southern Nurserymen's Association will be held at Lookout mountain, Chattanooga, Tenn, August 15 and 16, with headquarters at the Lookout Mountain inn. The Southeastern Passenger Association has granted a rate of a fare and a third for the round trip. Fuller explanation of this reduced rate will be sent to each member on receipt of the annual dues of $2. Address Chas. T. Smith, secretary and treasurer, Concord, Ga.

SALT LAKE CITY, UTAH.—Surveyor General Hull has received from the department at Washington a proclamation of President Roosevelt, setting apart a portion of section 17, township 2 south, range 3 east, designated as a nursery site for the Department of Agriculture. Experiments will be made upon the said land for the propagation of the kinds of trees best suited for this region, and the trees will be transplanted to the desired localities.

Vaccinating Trees.

According to Consul-General Guenther, of Frankfort, German papers state that it happens frequently that the roots of fruit trees are more exhausted than the parts above the ground, and so the life of the tree is threatened.

In order to prolong its life in such cases it has been recommended to vaccinate the trunk of the tree with a solution of sulphate of iron, the same article which is used in the so-called anaemia or chlorosis (Bleichsucht) of the grapevine. A Russian scientist, Mr. Sigismund Monrejetzki, has now made minute scientific experiments with reference to the results of such vaccinations, and by employing colored solutions he has shown that the solution never enters into the old wood. It only follows the young growth, but it penetrates into the roots down to a depth of 1 meter (about 39 inches), while on the other hand it penetrates up to the top of the tree. It is therefore deemed best to vaccinate the tree through a single opening of the neck of the root, and it should serve not only for the introduction of nutritive substances, but also of such liquids which, by killing certain bacteria, tend to cure diseases of the plant.

The foregoing was submitted to Prof. A. F. Woods, of the Department of Agriculture, who writes as follows:

"The use of solutions of sulphate of iron in the treatment of all kinds of vegetation suffering from chlorosis is quite common. Trees and other vegetation often respond to a treatment with this salt, even though there may be no absence of available iron in the soil. The application may be made either to the soil, to the foliage in the case of plants which can absorb slight traces of iron through the leaves, or it is sometimes introduced into the young wood. The distribution of the solution through the tree by introducing it into the upper portion of a root, of course, would be comparatively slow and imperfect. It is much better, as a rule, to apply stimulating salts or food to the soil so that it can be obtained by feeding the roots. It has been known, however, for more than 100 years, that plants will take up nutrition and often toxic solution directly through the young wood cells, if an opening is made and the liquid introduced with the exclusion of air. The phenomenon is easily demonstrated by putting any cut stem into red ink, or any other colored solution that will pass up through the vessels of the wood without precipitation.

"No one has yet succeeded in introducing soluble substances in this way into trees or other plants so as to increase the resistance of the tree to insect or fungus attacks. Substances which are distasteful to the insects or poisonous to fungi are usually so injurious that the injury done by introducing them is greater than that which would be done by the fungi or insects. It is a well-known fact, however, that the resistance of trees or other plants to certain classes of insects may be increased by the kind of food given them. For example, the cotton plant is made more resistant to the red mite by furnishing the plant with a good supply of phosphoric acid and potash. The normal acidity of the tissues is increased in a well nourished plant and the acid happens to be distasteful to the mite. The same is true in the case of oranges and some other citrus fruits, but such feeding as this is simply taking advantage of the natural tendency in the plant, and is not introducing any substance, toxic or injurious to insects or fungi in itself.

"From a practical standpoint, therefore, there is nothing new in this question of tree vaccination, nor is there anything practical."

Columbus, O.

TRADE SLOW.

The market, for the past week, has been very slow. The hot weather seems to have driven the more fashionable residents from the city, thus cutting off one of the essential parts of the great machine represented by the retail trade of a large city. However, the lack of trade is undoubtedly a blessing in disguise, for there is also a great deficiency in stock just at present. Roses are fairly good but scarce. Carnations are scarce and also quite small. Asters and gladioli are quite plentiful, especially the latter, and both are of good quality. Some of the local florists have received their first shipments of Bermuda lilies. The bulbs seem to be of very good quality. It is to be hoped that there will be a good crop of Bermudas this year as the demand seems to increase yearly. A snowball bush in full bloom was seen here several days ago. Although not a miracle, yet it is not a common occurrence to see one in bloom in this part of the country at this time of year. Hydrangeas everywhere seem to be doing exceptionally well. There has been an unusual demand for green goods, such as bay, box, and evergreen, for porch and yard decoration this year. This is a fad which should be encouraged by every florist, as it is one of the most artistic and beautiful means of decorating. CARL.

Springfield, O.

Probably the most violent hailstorm on record visited this locality July 27, its duration having been about 45 minutes and the size ranging from hickory nuts to hulled walnuts according to various eyewitnesses. West of town, the ravines were said to have been piled full of hailstones. Nearly every florist here suffered slight loss of glass in hotbed sash, but all houses withstood the bombardment with the exception of several of the oldest houses of the Geo. H. Mellen Co., in which single strength glass was broken to the extent of approximately $100. We learn of only one concern here carrying hail insurance, but this recent experience will doubtless cause a more general demand for this sort of protection.

At Urbana, the Reeser Floral Co. sustained a loss variously reported at from 300 to 700 lights of glass.

G. D.

TREES AND SHRUBS.
We make especially low prices on **Nursery Stock** to Parks, Cemeteries, etc. Wholesale price-list on application. We carry immense quantities of the finest named varieties of
PEONIES.
PETERSON NURSERY 503 W. Peterson Ave. CHICAGO, ILL.

Newport, R. I.

CARNIVAL BOOMS BUSINESS.

The week August 6 to 11 has been devoted to the grand carnival on land and water. The city was beautifully decorated with flags, bunting and evergreens. In the harbor British and American warships are brilliant with color by day and illuminated by night. Of course Newport's "400" entertained the naval officers, and all florists were busy decorating for dinners both on the private yachts and in the residences. The season here is now at its height, and any kind of flower sells. The outdoor flowers were badly damaged by the continuous rain and fog had during the entire month of July. Gardenias are plentiful.

NOTES.

Most of the gardeners are getting ready for our annual flower exhibition to be held Aug. 13 and 14.

Oscar Schultz has a fine lot of Lilium auratum, L. rubrum and L. album in bloom under glass.

Visitors: A. H. Folger, representing Bonnie Brae, New Rochelle, N. Y.; T. J. Wade, representing Stumpp & Walter Co., New York.

PAEONIES.

" **Purple,** very large, rich deep purple	.10	.20	1.00
" **Violet Blue,** a very pleasing shade	.10	.20	1.00
" **Striped,** mahogany, striped and flaked white	.10	.20	1.20
" **Parisian Striped,** stripes are broader and louder than the preceding, a good seller	.10	.20	1.30
" **Purple King,** a good new sort	.10	.25	1.50

	Trade Pkt.	⅛ oz.	Oz.
Giant Diana, cream color	.10	.25	1.50
" **Atrosanguinea,** blood red	.10	.25	1.50
" **Emperor William,** dark navy blue	.10	.20	1.25
" **Yellow,** immense flowers with dark eye ..4 oz., $4.25	.10	.20	1.25
" **Cassier,** 3 spotted	.10	.20	1.20
" " 5 spotted, an A1 strain	.25	.45	3.00
" **Bugnot,** the flowers are of enormous size, perfectly round, of great substance	.25	.60	4.50

Giant Bridesmaid. Its ground color is a rosy white, rivaling in delicacy and beauty with the finest apple-blossom. Trade Pkt., 25c; ⅛ oz., 45c; Oz., $2.60.

Giant Psyche. Each flower is elegantly curled and undulated and in every respect a beauty in form and color. Trade Pkt., 25c; ⅛ oz., 70c; Oz., $5.00.

Giant Pretiosa. Each petal is marked with a very large blotch of deep violet color; these blotches are surrounded by a brilliant crimson rose background, and the ground color is margined with a pure white edge. Trade Pkt. (250 seeds) 25c; ⅛ oz., 35c; Oz., $2.50.

BOULOGNE GIANTS. This is a special selection of a French pansy grower; the flowers are of the largest size, of great substance and fine form, and are borne on particularly strong stems. They are mostly 3 and 5 blotched, delicately veined while the colors are rich and varied. Like all high bred pansies, they are shy seed bearers. Trade Pkt., 50c.

GIANT VOLCANO. Color, bright dark red, each petal being marked with a very large dark blotch. The flowers are of large size and good substance, and the edges of the petals are curled like those of "Masterpiece," from which it is a selection. Trade pkt., 25c.

MARECHAL NIEL. The flowers are very large, without any blotches or veins, and are of the same pleasing, delicate cream color as the rose whose name it bears. Pkt., 10c.

ROSY MORN. A bright purplish crimson margined with a clear white edge. In early spring the color is very deep and rich; as the weather grows warmer, the color gradually turns a pleasing rosy carmine and the silver edge becomes wide. Trade Pkt., 25c; ⅛ oz., 60c.

SIEGFRIED. Of giant size, the flowers are borne on strong stems. They are mostly 5 spotted with a clear white margin. The colors are of rich brown shades such as are found in the English wall flowers. Trade Pkt., 25c.

Special Pansy Mixtures:

VAUGHAN'S INTERNATIONAL PANSIES—The Worlds' Best. This is a combination of as many separate colors, types, blendings and unique kinds as can be found in the world. **It is the best general mixture in existence** and is most widely known and popular. Price per oz., $10.00; ½ oz., $5.00; ⅛ oz $1.50; trade pkt. 50c.

VAUGHAN'S CUT FLOWER MIXTURE OF PANSY SEED. Especially made from light colored Giant varieties for florists who raise for cut flowers in the house. Trade pkt., 25c; ¼ oz., 80c; Oz., $5.50.

VAUGHAN'S "ELITE" MIXTURE. This is not a complete mixture like our International; it does not contain any pure white, yellow or any self colors, nor any other of the well known kinds. It is comprised of the cream of four Pansy specialists' choicest and most expensive mixtures and such new and novel kinds as listed above. Trade pkt., 50c; ⅛ oz., $1.00

MASTERPIECE—NEW GIANT CURLED. This strain comes nearer to "Double pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking. Trade pkt., 50c; ⅛ oz., 75c; ¼ oz., $1.35; oz., $5.00

VAUGHAN'S "GIANT PANSY MIXTURE." This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain with its delicate veinings. We have spared no expense to secure the newest, richest and finest sorts. Price, ¼ lb., $14.00; oz., $4.00; ⅛ oz., 60c; trade pkt., 25c.

VAUGHAN'S PREMIUM PANSIES MIXED. Embraces all the varieties of the Fancy German Sorts. Per pkt., 25c; ⅛ oz., 80c; ½ oz., $3.00; oz., $5.50

CHICAGO PARKS BEDDING PANSIES. "Choice mixed," pkt., 10c; ¼ oz., 30c; oz., 75c; 4 oz., $2.50

NEW ORCHID-FLOWERED PANSIES. A most interesting type of Pansies of the Giant Flowered Class containing a mixture of the most surprising, novel, unique and beautiful color combinations. The upper petals are upright and sort of plaited, which gives the flowers their resemblance to orchids. The colors range in the terra cotta shadings as well as in the flesh orange, rose, pink and lilac. Trade pkt. 250 seeds, 25c.

IMPROVED GERMAN MIXTURE. This is a mixture of three strains from different German growers and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 10c; ⅛ oz., 20c; ¼ oz., 30c; oz., $1.00

BOOKS FOR FLORISTS.

The time is coming along when these are needed and opportunity at hand for reading them. Everyone of the following should be in your library.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

HOW TO GROW CUT FLOWERS (Hunt).—The only book on the subject. It is a thoroughly reliable work by an eminently successful, practical florist. Illustrated. $2.00.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. $6.00.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

THE PRINCIPLES OF FRUIT GROWING (Bailey).—The entire subject of fruit culture is treated very thoroughly in this illustrated volume of 516 pages. It is a book that no up-to-date fruit grower can afford to be without. $1.25.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

MUSHROOMS: HOW TO GROW THEM (Falconer).—The only American book on the subject, 29 illustrations. Written by a practical mushroom grower, who tells the whole story so tersely and plainly that a child can understand it. This book has increased mushroom growing in this country three fold in three years. $1.50.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. $1.50.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

GINSENG (Kains).—At the present time, when so much interest is taken in ginseng, it will be interesting to peruse this volume, which tells all about the plant in a way that all may understand. The 144 pages are freely illustrated. 50 cents.

SUCCESS IN MARKET GARDENING (Rawson).—Written by one of the most prominent and successful market gardeners in the country, and who has the large t glasshouses for forcing vegetables for market in America. Outdoor and indoor crops are treated. Illustrated, $1.00.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. $2.00.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

ASPARAGUS (Hexamer).—A practical treatise on the planting, cultivation, harvesting and preserving of asparagus, with notes on its history and botany. This book is mainly devoted to the culinary kind of asparagus, but there is also some reference to the ornamental species. 50 cents.

CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

LANDSCAPE GARDENING (Waugh).—This is a very useful little book on the art of landscape gardening. It will be found exceptionally valuable to amateurs, as it covers in detail the numerous problems that come to the owners of small gardens. It is freely illustrated and the pictures have been chosen with a view to informing the reader rather than decorating the book. 50 cents.

American Florist Company, 324 Dearborn St., CHICAGO.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLERS AND GRAIN DEALERS have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, postpaid, $1.00.

Field Growing of Narcissus.

Field Growing of Narcissus for Cut Flowers

About 280 miles south of Chicago, and 85 miles southeast of St. Louis, is the little town of Tamaroa, of Perry county, Illinois, which bears the distinction of having a citizen who has devoted over 12 years to the growing of outdoor flowers, i. e., those plants which may be cultivated in the open field for their cut flowers for commercial purposes. This citizen who has so enthusiastically grown field commercial flowers is W. H. Arendt.

Mr. Arendt has been very fortunate in having the able assistance in his work of two sons beside the efficient and inspiring help of his wife. Gladioli, peonies, dahlias, cosmos and Shasta daisies have all been grown successfully, but have not been paying flowers owing to the expense in caring for the most of them and, coupled with transportation charges, the profits have been consumed.

However, Mr. Arendt is never beaten, and upon trial found that the narcissus could be very successfully grown in the soil and climate of southern Illinois, and further that it requires very little expense. Many of his bulbs were secured from Holland, England, Italy and the United States, those from the United States being grown in Virginia, and which have proven to be equally as good for field culture as those secured from Europe, although he considers the Dutch bulbs to be a little cleaner in appearance.

Planting.

Mr. Arendt's first plantings of narcissi were made some seven years ago. These bulbs were planted in the fall in the ordinary clay loam of southern Illinois, and dropped about five inches apart in rows after a plow.

In all subsequent plantings, spades and lines were used, the ground having been prepared by sowing to cowpeas, then the ground turned under in August, so that by September, after a thorough harrowing, the ground was in fine condition to receive the bulbs. This method seems to be preferred to the plow planting, as it is claimed that more bulbs can be planted to the acre, and in a neater manner.

The bulbs are planted five inches deep, six inches apart in the rows, and the rows are one foot apart, and five rows together, then a three foot walk, then rows of bulbs again, etc. The bulbs make good root-growth during the fall that they are planted, and become sufficiently established to produce some flowers the next spring.

Culture.

During the winter, the ground is top-dressed with manure to furnish food for large flowers and long stems more than winter protection, for they are perfectly hardy.

After the flowering season, which begins about the last of March and lasts until the middle of May, according to the season, the bulbs are allowed to grow for several weeks until the foliage begins to turn brown, when the tops are mowed off with a machine, this being done two or three times a season to keep down the grass and weeds.

No cultivation whatever is given the bulbs further than the enriching of the ground by top-dressing with manure during the winter. When asked if he did not think that cultivation would improve the length of the stems and size of the flowers, Mr. Arendt replied that he did not think it would do more than the treatment of manure did for the bulbs, and that his method was very cheap.

Blooms.

Some flowers are produced the first season after planting, but it is the succeeding years that produce the largest and finest flowers, with the longest stems, which bring the best prices. Mr. Arendt said that he considered a plant of three or four years at its best productive age. The fifth or sixth year, the bulbs are up after the foliage has died, and separated, washed and dried, sorted according to sizes, and replanted.

When asked about how many narcissus flowers an acre produced, Mr.

Arendt said it was difficult to say, depending much upon the variety and the season. He said, however, that from the four or five acres under bulb cultivation, that they shipped from 20,000 to 35,000 flowers daily, according to the season.

The majority of these flowers go to Chicago, others to St. Louis, and smaller cities, but Chicago is the great wholesale distributing point for the middle west, and the great north. Many of Mr. Arendt's flowers are sent to Canada and other extreme points, showing that he has fine stock or the demand would not be so great.

Harvesting the Blooms.

The gathering of this great wealth of bloom is a most beautiful sight, yet a very simple process. Boys are employed to pull, not pick, the flowering stalks, which vary from 6 to 20 inches in length, although the latter figure is sometimes exceeded. The average length of stem for such vigorous growing varieties as Emperor and Sir Watkins is from 12 to 15 inches. Those of the N. Poeticus varieties are somewhat shorter.

The flowers after being pulled by the boys are placed in large hickory split baskets with a pillow of excelsior wrapped in paper, first placed in the bottom of the basket to rest the stems upon, so that the flowers may not be crushed. They are now carried to the packing shed, quickly sorted according to the length of stem, by means of a measuring board, tied in bunches of 25, then packed into light board boxes with excelsior pillows, and they are ready for shipment.

Varieties.

Mr. Arendt says there is no choice as to any particular variety of the narcissus by the wholesaler, all that is wanted, is large flowers with long stems. As a grower, he considers such varieties as Barrii conspicuus, Emperor, Golden Spur, Rugilobus, Sir Watkins, and Henry Irving of the large flowering kinds to be the most satisfactory. Henry Irving leads the season, followed closely by the others mentioned. Of the smaller flowered forms, all of the Poeticus varieties are desirable, and bring good prices, and are much the latest to be in bloom.

Mr. Arendt said that the average price for the season's cutting was 20 cents to 25 cents per 100, but that he had sold very choice bunches of long stems at Easter time, on the Chicago market, for 75 cents per 100 wholesale.

Tamaroa is going to lose a valuable citizen soon, for Mr. Arendt has sold his interest in the Arendt Bulb Co. of the Maple Lawn Gardens, and is retiring from active business on account of ill health, and intends to go to Texas.

H. R. Sims, an enterprising young business man of Tamaroa has purchased Mr. Arendt's place and will conduct the business in the future; although one of Mr. Arendt's sons is to remain in charge of the business for Mr. Sims, which I am sure will continue to increase and prosper under so able a management.

FIELD GROWING OF NARCISSUS FOR CUT FLOWERS.
Narcissus Emperor one year after planting, at Tamaroa, Ill.

FIELD GROWING OF NARCISSUS FOR CUT FLOWERS.
Narcissus Poeticus planted six years at Tamaroa, Ill.

Florists' Plant Notes.

FOR SEPTEMBER.

BOUVARDIAS.—It is now time to lift bouvardias from the field and have them safely housed. It requires somewhat more than ordinary care to do this work properly. They lift badly and must be handled with caution, so as not to lose any more of the fibrous roots and adhering soil than is unavoidable. But even if handled with the greatest of care it will take them several weeks to recover from the setback suffered through the operation. In potting them up or in planting them into benches a pretty rich but porous soil should be used with plenty of well-placed drainage material underneath.

For the first few weeks the glass should be heavily shaded, and a moist and rather close atmosphere should be maintained. A frequent wilting of the plants at this critical period invites decay and causes great loss of plants. When finally the fibers have found their way into the new soil and a sturdy stand and regularly progressing growth is secured, nothing farther that might dim the outlook for a fine crop of flowers, need be feared and the culture of bouvardias has narrowed down to an easy and simple affair. Then ventilators should be opened on fine days and the shading removed, for bouvardias want air, light and sunshine and a temperature of from 60° to 65° day and night.

ROMAN HYACINTHS.—Throughout the months of winter, but especially at the holidays, no trouble is experienced in finding a market for Roman hyacinths. If bulbs are planted now a crop is assured for Christmas. There is no need for an especially prepared soil. Roman hyacinths will do well in any kind of reasonably good soil, containing a goodly proportion of old, well decayed manure. The old soil out of greenhouse

FIELD GROWING OF NARCISSUS FOR CUT FLOWERS.
Narcissus Emperor at Tamaroa, Ill., third year after transplanting.

benches, if freshened up by exposure to outside air and sunshine, is all right and these bulbs will do finely in it. Boxes of convenient size, about four inches deep and accommodating 60 or 70 bulbs are mostly used in the growing and forcing of French bulbs. After the bulbs have been placed on and slightly pressed into the soil, a good watering is given and now the boxes are covered with three or four inches of coal ashes, sand or fresh earth, whichever comes handiest. In seven or at most eight weeks the boxes will be filled with white roots, while the tops merely show the beginning of a future growth. If in this condition, the hyacinths are ready for forcing. Being now removed to a warm bench in the house, plentifully watered and screened from direct light, the growth will be exceedingly rapid. After two weeks of hard forcing the screen or shading is taken away and in another 10 days the flower spikes will be ready for cutting and marketing.

PAPER WHITE NARCISSUS.—Narcissus of any kind, but especially Paper White, must be put into the ground early to give good results. The plants are never finer or capable of bringing better prices than when brought into bloom by slow going procedure and under conditions favorable to the growing of ordinary greenhouse stock. Early planting, therefore, becomes necessary if bloom is wanted during the fall and early winter. Any good soil, not overfertilized, suits narcissi. Closely planted in flats, the tops above ground, thoroughly watered and then covered with moist soil or coal ashes for about four or five weeks, the flats will be ready for removal to a cool, well ventilated greenhouse, where the plants will make a sturdy, clean growth and finish up with a fine crop of flowers in due season.

STEVIAS.—By this time the stevias, that were planted into the field in the spring, have attained great size and, if they have been pinched in from time to time until now, are densely branched bushes. They must now be potted up or planted, several together, in deep boxes, so that at the least sign of threatening early frost, which must not touch stevias, the plants may swiftly be transferred to safe quarters. Although the slightest frost will surely ruin them, a stand outdoors, as long as possible without running a risk, and a place in the coolest greenhouse suits stevias best. They come into bloom at a time when their flowers are most appreciated.

PANSIES.—There are two most important points in the raising of pansies for a closely discriminating trade, the nonobservance of which invariably sidetracks entire success. Selecting a good strain of seeds is one and planting the seeds at the right time is the other. It is not so difficult to obtain a blemishless strain of pansy seeds, if reputable and reliable seed firms are dealt with; and if the seeds for the first and main lot are sown in the first two weeks of September and for the later stock right after New Year's, and all are well taken care of, fine, heavily rooted, sturdily grown bushes, full of superb flowers and promising buds will be had from early spring until away into the summer. This is the kind of stock that, despite all competition, brings and holds trade, and there is nothing especially perplexing or difficult in the raising of it. An outdoor frame is the best place for the starting of the seeds at this time of the season, and a properly prepared rich compost, surfaced with a layer of sifted earth, the soil to use. If kept moist and covered with frame shadings, the little seedlings will soon be peeping out of the soil. Then no more shade, even on the brightest days, is needed and the bed should be freely exposed to the full light and invigorating air. A transplanting should take place as soon as the plants are large enough to be handled with dispatch, so that they will have sufficient time to become well established before winter sets in. The frames must then be covered, but air and light should be afforded now and then on nice days during the winter.

AMARYLLIS.—All the many varieties of amaryllis are noted for the showy brightness of their flowers, but most of them have their season of bloom in the summer and are therefore of comparatively small commercial value to florists. A few species of Hippeastrum vittatum, however, may easily be had in full bloom by Christmas, if rightly managed, and anything more appropriate or more attracive and longer lasting in Christmas floral offerings would be hard to find. The great merit of some of the newer forms, indeed of every one of the newly introduced hybrids of Amaryllis vittata, lies in the fact that they produce their flowers simultaneously with their foliage, which is not the case with varieties of the original type, which flower first and then develop their leaves. Another point of merit is that these newer hybrids ripen up early, which, after affording them a reasonable period of rest, enables the grower to start well ripened rhizomes into a new growth from early September until the middle of October. Started at that time they will be in their grandest glory just about at the winter holidays. This amaryllis is not particular as to soil, anything in potting soils, not containing green manures, suits them. When in

FIELD GROWING OF NARCISSUS FOR CUT FLOWERS.
Narcissus Stella at Tamaroa, Ill.—Bulbs planted one year.

bloom they want plenty of light and plenty of water. A temperature of 60° or 65° is right during their growing season. The rhizomes, once obtained, can be forced year after year and an abundance of offsets is produced every season.

GERANIUMS.—The first half of September is rightly considered the best time for the propagation of zonal geraniums, when the providing of a good and ample stock for spring trade is to be the issue. Top-cuttings, sturdy, short-jointed and somewhat hardened are to be preferred to any part, soft and immature or too hard and bony. It is better to take off a crop of good cutting now and another one later on, than to make a clean sweep all at one time by making use of anything and everything the old stock plants hold forth. The pieces will likely all root, it is true, but next year's stock will not be what it should be and what it could have been had a more circumspect beginning in the working up of the stock been made. Cuttings of geraniums will root as well in small pots, filled with a sandy soil, as in a regular propagating bed of sand, and the labor of potting up the sand rooted cuttings is thus saved. The young stock should be held at a fair speed of growing in a moderately warm house and care should be had in watering, for overwatering and drip from the roof involves the ruin of more geraniums every year than all other forms of mistreatment. Next to these, and not the least formidable in the long list of potent factors in the destruction of good stock, comes the withholding of sufficient light, air and room, practiced most extensively in the rearing of young geraniums, and always attended by the same results, an abundance of poor and a scarcity of good geraniums the following spring.

HYDRANGEAS.—It is time to lift and pot up field grown hydrangeas. By leaving the plants in the field after this they will lose much in compactness and shapeliness of form, which loss easily outweighs all that was gained by field culture up to this time. It is running a risk to postpone the lifting until a few light frosts have lent a helping hand in ripening the wood, as is the good old custom, always ready and willing to prove a bad one. Pots of ample size and a heavy, well enriched soil should be used for hydrangeas. The pots could remain outdoors for some time yet but should be so placed that their removal to the house or a covering with sashes or protecting shutters could take place at short notice. A complete rest of 10 or 12 weeks under some cool bench during the first part of winter, when water must be but sparingly given, will fit them for being forced.

PRIMULAS.—Most of the stock in primulas of varieties largely handled by florists will now be far enough advanced to be in readiness for the last shift. Primula obconica and P. Forbesi require larger pots than the old Chinese primrose, but it must be remembered that 4 and 5-inch plants are most favored by buyers, and pots should, therefore, not be any larger than absolutely necessary. Leaf mold and finely broken up and well weathered sandy sod in equal parts is a good soil for primroses. Frames that can be tightly closed when needful, are the best place for them for some time yet.

MIGNONETTE.—To be able to cut good spikes and sprays of mignonette in midwinter, when they are most wanted and bring best prices, it is necessary to sow the seeds now. Any one of the improved tall or giant strains will be satisfactory, when under the care of a good grower. The seeds may first be started in 4-inch pots and the plants transplanted into the bench later on, but when a bench or, what is still better, a solid bed is not otherwise occupied and can be had in readiness in time, the seeds should be sown directly where the plants are wanted. In the growing of mignonette good, very rich soil counts for much and there is little use in trying to raise good mignonette in poor and hungry ground. It is best to sow the seeds in hills a foot apart each way, half a dozen or more grains to a hill. When the seedlings are a few inches high, they are thinned out, leaving but one or two of the strongest.

Ficus Pandurata.

ARDISIAS.—Inexperienced growers should bear in mind that from now on ardisias want any amount of air and the full sunshine for the coloring of their fruit. The shading, if such is still in use, can now be dispensed with, but close fitting sashes should be in handy reach at the time when night frosts may be expected. The plants can remain in frames for fully another month, but should then be placed on a sunny bench in a moderately warm house.

E.

Money for Burbank's Work.

The Carnegie Institution, Washington, D. C., has subsidized for a term of years the operations of Luther Burbank, says the New York Sun. A committee consisting of the president and some of the directors of the institution has been organized for the purpose of carrying on a scientific analysis of the striking results in plant breeding secured by Mr. Burbank.

The committee consists of R. S. Woodward, president, and Doctors C. B. Davenport and D. T. MacDougal. This committee has just returned from a visit to Santa Rosa, where a conference was held with Mr. Burbank as to scope. The work will be conducted without any interruption to the series of plant breeding experiments, some of which Mr. Burbank has carried on for 20 or 30 years.

Various members of the scientific staff of the institution will take up their residence with Mr. Burbank and make a close study of his more noted plants. This work has been undertaken for the purpose of gaining information on heredity and evolution.

For several years Dr. MacDougal has been conducting a series of experiments on these lines at the New York Botanical Garden, with results largely confirmatory of the theory given to the world some three years ago by Dr. Hugo De Vries of Amsterdam, that new species frequently develop at once from parent plants instead of always being the product of years of time and a multiplicity of minor changes, as Darwin believed.

Dr. Davenport of the committee has been an equally enthusiastic student of the problems of evolution and is director of the Carnegie Evolution Laboratory at Cold Spring Harbor. Dr. MacDougal is director of botanical activities of the Carnegie Institution.

Among other problems the microscopic anatomy of hybrids will come in for a large share of the attention of the investigators at Santa Rosa.

Comparatively little systematic information as to the manner in which the elements of two unlike plants combine in hybrids exists, and the committee hopes to gain important results.

Incidentally the committe reports that "Mr. Burbank's splendid work has been grievously misrepresented to the public by various newspaper writers, authors of books and others, some scientists and pseudo scientists," while "some of the simplest operations by which Mr. Burbank has been able to bring about the improvement of fruits and vegetables have been enlarged upon in a sensational manner, much to the detriment of Mr. Burbank's reputation, and he has been accredited with performances to which he lays no claim."

As an instance the spineless cactus, to which most wonderful properties have been ascribed, is cited. It has been described as having been produced by Mr. Burbank, while the fact is, according to the committee, that Mr. Burbank is crossing a naturally spineless cactus with a spiny one in an effort to secure a form devoid of spines and spicules and to develop other traits which would make the hybrids valuable as forage and for their fruits.

Much progress has been made on these lines, but the hoped for results are far from accomplished facts.

Long practice, enduring and keen en-

NELUMBIUMS AT "TWIN OAKS," WASHINGTON, D. C.
Peter Bisset, gardener.

thusiasm for this kind of work have, on the other hand, resulted in accomplishments which rank Mr. Burbank as "the foremost plant breeder in America. He works with keen intuition and is able to foretell the probable value of his hybrids by inspection in the seedling stage."

The detail work of the study of the products of Mr. Burbank's plantation will be carried on by Dr. Geo. H. Shull of the experiment station at Cold Spring Harbor and Dr. W. A. Cannon of the Desert Botanical Laboratory, Tucson, Ariz.

All the workers interested and the committee have planned to meet in the near future to mature plans and provide for the continuance of the work.

Nelumbiums.

The nelumbiums, erroneously called Egyptian lotus, is one of our best hardy ornamental and flowering aquatic plants. The name Egyptian lotus conveys an idea of its being a tropical or semi-tropical plant, but it is in no way associated with Egypt or African aquatic plants, the Egyptian lotus being in truth a nymphæa, a blue water lily.

Nelumbium luteum is an American plant and grows luxuriantly in many states from Massachusetts to Florida and westward to the great lakes. N. speciosum and other varieties are indigenous to Japan and were introduced into the United States about 50 years ago, but they were lost. They were reintroduced by E. Sturtevant and N. speciosum was established in a pond near Bordentown, N. J., and since then has become famous as an aquatic plant throughout the United States and the continent of Europe. We are indebted to Japan for the many varieties including flowers of pure white, soft pink to deep rose, and flowers approaching crimson, both single and double, including plants of tall and dwarf growth, suitable for planting in ponds and lakes, or for cultivating in small pools, tubs, etc. They are perfectly hardy when established and will usually need no further care after planting than an ordinary hardy water lily. The roots will not stand freezing any more than the common water lily, and a weak plant is not likely to winter safely, hence the necessity of planting a vigorous rhizome or plant when it is desired to establish a nelumbium bed or plant.

Nelumbiums do not need deep water, but they do need a moderately rich soil, inclined to be heavy. Unlike the nymphæas, toward the close of the season the roots or stolons make a downward growth, sometimes three feet deep or more, terminating with a long fleshy cylindrical root or tuber in which condition it winters over. Tubers should be planted in May when growth commences and conditions are favorable for continued growth without a check. The seasons vary and conditions may prevail two or three weeks earlier southward, or later east or west. Study conditions not dates for planting. In New Jersey the first flowers are usually open by the Fourth of July and continue until the fall.

While nelumbiums are hardy and may be grown under the same conditions as hardy water lilies, they delight in a higher temperature and can be grown successfully where hardy water lilies are next to a failure, or the season is very short. They make a grand addition to the tropical or victoria pond where a section can be devoted to their culture. Indoor culture is not commended.

Nelumbiums may be grown in tubs or boxes submerged in an artificial pond. Only dwarf or moderate growers should be planted in tubs. The stronger growing varieties should have from 9 to 12 cubic feet of soil for each plant, or a box 3 or 4 feet square and 12 or 15 inches deep.

Nelumbiums should not be planted in a running stream or a pond, natural or artificial, that is fed with spring water, such being detrimental to all aquatic plants.

The flowers are very useful for cut purposes, but they are seen at their best when associated with other aquatic plants and foliage.

W. T.

BRIDGEPORT, O.—Misses Clara P. Forbes and Mary M. Donahey have opened up their flower store at 1214 Market street, under the McLure House.

The Economical Use of Slack Coal.

If there be one bill more than another which is likely to be always looked upon with suspicion by the average man, it is the coal bill. He may make a shrewd guess that for ice he is being overcharged; but for fuel, he positively knows that he is being robbed. Probably this feeling, seemingly so natural to him, is induced by the thought that, in the end, all the money which he pays for coal goes up in smoke and is squandered in thin air. Squandered his money is, if his furnace pollutes the atmosphere with inky clouds of unconsumed coal, for black smoke is waste, and waste is an insidious drain on the cash account.

The coal bill, however, may, in most instances, be cut down at least one-half, if slack coal is available at low prices, and the furnace is made to feed upon it. A few aspects of this vital saving will here be discussed briefly.

Before considering how slack coal may be burned in furnaces, it is advisable to have a clear conception of what a fire really is. Combustion, then, is a chemical phenomenon. Carbon (coal) unites with oxygen (air) to form carbon dioxide (smoke). This is accompanied with the evolution of heat and light, which is called "fire." The formula is $C+2O=CO_2$. If the supply of oxygen be limited, much carbon monoxide is formed, $C+O=CO$. This is a loss, as the carbon monoxide would otherwise not have been evolved, or would have been burned to carbon dioxide, $CO+O=CO_2$. Smoldering fires are constantly sending off CO fumes as gas. When breathed, CO_2 suffocates; CO poisons as well. Sometimes this latter gas ignites, or "explodes" with a puff and flash—the CO suddenly burning to CO_2.

But in furnace fires a number of other gases are thrown off, for coal is not chemically pure carbon, nor is air all oxygen. It is the impurities, and the unconsumed particles of coal, that color smoke until it becomes visible, as pure carbon dioxide (smoke) is colorless.

Now the commonest complaint against slack coal must be that it smolders rather than blazes. Of course, it is to be remarked that a fireman need not be a chemist to fire with slack coal, yet a very little chemistry ought not to disable him from successfully burning it. Slack coal is hungry for oxygen; it must have air to thrive. Luckily, most furnaces have a good draft; if not, an addition to the smoke stack will assure draft. On this account also, it is much easier to be burned in winter than in summer, owing to the greater speed with which the stack empties itself in winter, because of the greater difference in temperature then between the cold air outside and the hot smoke.

So, after all, the apparently mysterious trick of firing with slack coal resolves itself into the simple trick of supplying the fire with air. A forced draft may be used; a high stack built. Other ways readily suggest themselves. Of these, the most natural, and easiest applied, is to mix the coal with a quicker burning fuel. Sawdust has been tried with success; shavings are available around shops, and are excellent for the purpose; cobs are usually to be had near towns, since many grain elevators are displacing their obsolete steam engines with modern gas engines.

In some respects, cobs are best; but any mixture of vegetable or timber scraps serves admirably. Tree tops, old, rotten logs, or stumps, not good enough to be used as fuel alone, aid slack coal to burn. The reason for using a mixture is that the tendency of fine slack coal used alone, is to mass together and so exclude the air, while the shavings, or cobs, or wood, hold the mass apart,

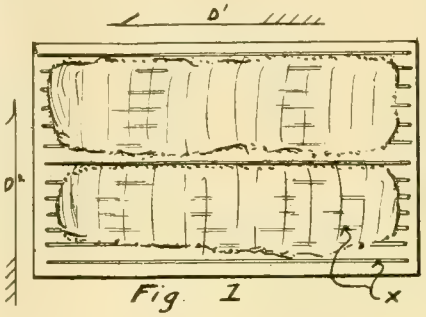

Fig. 1

The Use of Slack Coal.

and, when burned, leave spaces and tunnels through which the air can get to the coal, already afire from contact with the more combustible ingredient of the mixture. By this method slack coal may be burned in the most obdurate furnace. It is only a question of intelligent experiment.

To start a slack coal fire, about two shovels of shavings, or kindling, is required. Over this is spread a thin layer of coal. As this charge burns out, a mixture of coal and shavings is put on carefully, so as not to smother the fire. The charge is repeated, each one being larger and fuller of coal until the maximum per cent of coal which the furnace

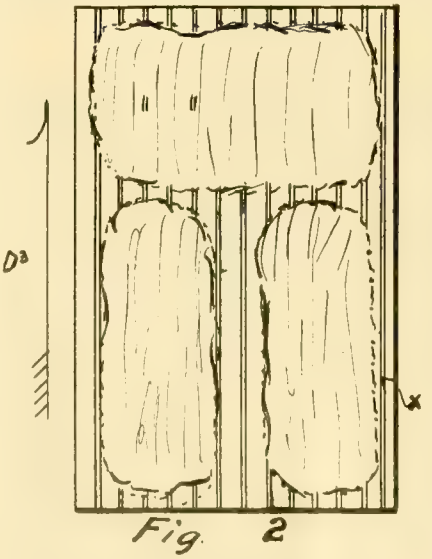

Fig. 2

The Use of Slack Coal.

will burn without coaxing, is reached. The fire must at all times be maintained as evenly as possible over the grate so as to force the air to become heated by coming through the incandescent coal. The thickness of the fire may be 4 to 6 or 7 inches.

Over the oblong grate the coal usually burns best spread out level. To hold the fire in this style grate the coal should lay as much as possible in flat loaf shape, either one large loaf in the center, or two smaller ones with thinner spaces in center and around sides (Figs. 1-2). In the circular type of furnace it burns best when located in the center, stacked and built up so as to allow plenty of air to come up all around and under it. As it burns, cracks and chambers form in these masses, which further assist combustion by providing new air passages (Fig. 3—a and b).

For experimental purposes, temporary air tubes may be let in over the grate, as in Fig. 6. A permanent means of supplying air is shown in Fig. 4, adapted to horizontal boilers. A chamber (C), over which the fire and smoke passes, warms the air as it goes through to the outlets, B1, B2, B3. No furnace which depends altogether on the grate for fresh air can completely burn all the gases formed, unless so much air is let in the fire doors as will materially reduce the effective heating of the boiler. Heated air does not debilitate a fire, as does cold air, by absorbing heat energy. In Fig. 4 it will be observed that provision is made to supply the fire with heated draft at (1), just about where the air let in at the fire door, and up under the fire bars, is rapidly becoming exhausted of oxygen. The supply which is provided for at (2), oxidizes the heavy gases, while that at (3) allows but little, if any, escape of valuable gases.

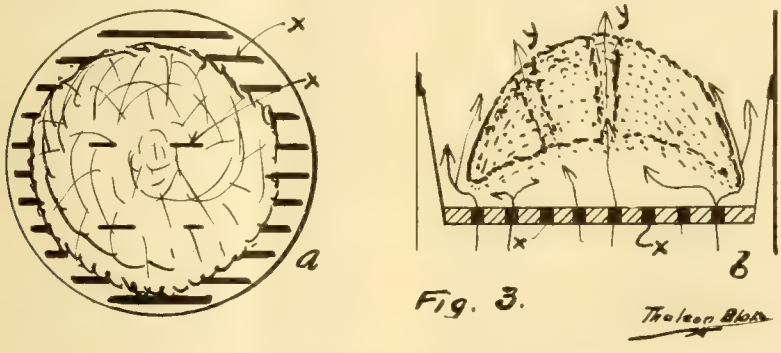
A system, such as is exemplified in Fig. 4, is a valuable addition to any furnace for any kind of coal, because, as explained above, since combustion is nothing but carbon plus oxygen, with the evolution of heat and light (vibrations), —why, the more oxygen, the merrier dances the fire. It is not the fineness of dust coal that alone hinders its free combustion; the impurities take up much of the vitality of the struggling fire, and, although their sulphurous gases will burn, it is only in the presence of much oxygen.

In the circular type of furnace, two methods of providing liberal quantities of fresh, heated air are shown in Fig. 5. These are especially valuable. The air, coming up at (F), is heated before it comes out above the fire to mingle with the flames and fumes. A row of these (F) tubes may be let into the furnace from a number of points around the grate; they may come up inside so as to heat the air, in which case they are short lived; while by coming up within the walls, only their spouts are in contact with the flames.

Air may be sent down through a tube at (P), in which it becomes hot before reaching the flames. In either system, Figs. 4 or 5, the idea is to give the fire a supply of heated air above the glowing coals, which assures a more economical fire, by getting the utmost amount of heat units out of the carbon itself, and to prevent the waste of burnable gases, if these escape final transformation by the air coming in the door, and through the grate.

It is to be recommended that a person who wishes to use slack coal in his furnace, begin conservatively to try it. The remodeling of a furnace should never be attempted except under competent advice, and then only after the owner is satisfied that it is impossible to procure shavings, cobs, wood scraps, and so forth; and that it will not burn fine coal without them. Not that there is any doubt concerning the economy of the im-

provement, but there may be several reasons why a person may not like to burn slack coal. If he have twenty other tasks to perform, slack coal may not hold fire long enough to enable him to do three men's work besides.



THE USE OF SLACK COAL.

It does not require much more attention to fire slack coal than lump, but it does some; especially if the boiler is too small for the demand put upon it. Slack coal burns all right—hotly, quickly; but it is true that it cannot hold fire as long as the large lump coal. Being charged with a little at a time, it must be charged oftener than large piece-coal has to be. This is practically all the difference between burning the coarse and the fine coals. The cost is what differentiates them. The man who can burn it, can have a balance in his pocket which else would be circulating among coal barons as dividends.

THALEON BLAKE.

CHRYSANTHEMUMS

Cultural Notes.

This is the month in which most of buds must be taken and this is a work that requires much care and consideration. To lay down a rule or a date for each variety is not an easy matter as it all depends on each individual plant, the length of time it has been planted, the length of the growth and the general condition and vitality of the plant. A crown bud taken at the right time will generally give the best and largest flowers, but in many cases if it is taken too early it will have a poor color and poor development. It is always a little safer to take a bud a little later than the dates given in the catalogues rather than earlier. With most of the mid-season varieties, and that means most of the exhibition varieties, it is safe to take the buds after August 15, and as a rule better flowers will be obtained if taken then than if taken either later or earlier. After September 1 one can take anything.

Of course the very early varieties including Monrovia should have been taken as early as the middle of July and these buds should now be well under way in development. These very early varieties should have a dose of manure-water at least once a week from the time the bud is as large as a pea until it shows the first signs of color. A good deal of care and experience is necessary to obtain the best results, to get just as large flowers as possible and still not to have the buds bursting or deformed or discolored, all of which can be caused by overfeeding.

What to use is another question which depends a good deal on the soil and what is most handy to obtain, but I have secured the best results from a rotation of cow, sheep and chicken manure and occasionally a little nitrate of soda or night soil. Care must be taken not to have these too strong, especially the last two mentioned. Horse manure may be used with fairly good results.

There is one thing about the feeding that I want to emphasize and that is the condition in which the plants should be when liquid manure is applied. It is a general belief that plants should be rather wet when the application is made. Now, I do not believe in giving a dose of manure-water when the plants are wet and not in need of either water or stimulant. A man does not drink when he is not thirsty, and be it ever so hot a day a cold drink of beer or wine does not taste half so good when one is not thirsty as when one is dry. I look at plants in the same way. If they have just been filled up with water they do not need nor enjoy the stimulant given them any more than does a human being or an animal.

I am aware that there are many differing opinions and I know that many good florists have said and will say to me when I apply the liquid: "That man is crazy, he will ruin his plants." Did I ever ruin them? Not much. But, of course, it must not be overdone nor given while too dry. If given in the morning before the sun is high and followed up with a little clear water and syringing they receive the nourishment just when they need it. It should be used rather strong, too, after they get used to it.

The plants should now be kept well tied up. All suckers and sideshoots should be picked off. Now is the time of year more than any other, just before and after taking the buds, when the plants need all the strength they can get.

A mulching of good old rotted manure, either cow or horse though the latter must be old and very well decayed, is very beneficial as it keeps the sun from drying out the plants and the soil from baking, and it stimulates the plants and gives them a little extra manure-water at every watering. If a few leaves at the bottom of the plants are decayed or turning yellow it will do no harm to pick them off, as such a course gives more air and a freer circulation for the plants and leaves that are left.

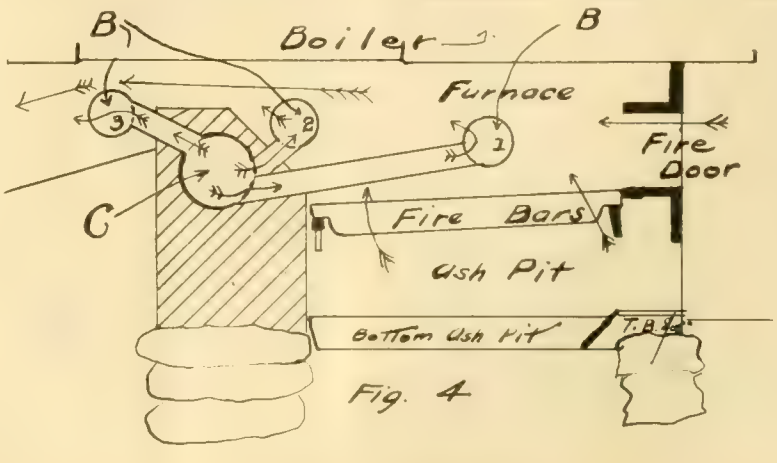
G. T.

Corythuca on Chrysanthemums.

Where the plants are kept under glass all summer, and the humidity encouraged, there need be no fear of this destructive pest and his co-worker, the red spider; but many of the southern retailers, still grow the chrysanthemums for their local trade, in the open and cover them at blooming time.

If the summer is dry the corythuca is liable to destroy the whole crop and never be detected. His work is on the under side of the leaf, and may be taken for the effects of hot and dry weather. They huddle together on a leaf and leave it for another as soon as their work is well done. Should the plant be jarred or shaken they make a dive for the ground and are seldom seen unless the grower has made their previous acquaintance, and is on the lookout. They work so close together that they may be taken for a mass of scale, but under a strong reading glass they resemble a feeding flock of dirty angoras with abnormally large horns. These horns are the wings.

If some of the middle foliage of the chrysanthemums has the appearance of being parched by the sun, it is a good plan to give the under side of the leaves two or three sprayings a week of dilute kerosene emulsion, using for the pur-



THE USE OF SLACK COAL.

pose a crooked neck syringe that will throw the spray at right angles to the barrel. By placing this beneath the plant the emulsion strikes the under side of the foliage. Should any mealy bug be lurking there he is a victim of bad company. D.

THE ROSE.

Seasonable Suggestions.

The young stock whether grown on the raised or solid beds, should have reached by this time a stage where considerable tying must be done in order to allow sufficient air and to ripen the growth, that at this season makes rapid headway. It will be found on close observation that where tying has been neglected, the softer growth somewhat shaded is the first to succumb to mildew, whereas the top growth receiving the benefit of more light and air ripens quickly and remains clean.

However, the muggy weather we have experienced this summer, and which seems to be universal, has kept the grower on the move with the sulphur blower, which if used regularly and often will keep the stock comparatively clean. Of course, cultivation of the beds must continue for some time longer or until the roots come near the surface of the soil. And when the young plants have attained sufficient size it is advisable to let a few flowers come on these plants; perhaps only one to a plant. This must be left more or less to the judgment of the grower but, to be plainer, very often a plant which has reached say a height of 18 inches may have from two to six buds showing, some with very short stems and others very strong. To allow them all to bloom would naturally retard the growth of the plant very much. The shorter stemmed could be removed, allowing one or perhaps two of the strong canes to mature. Very often these strong canes grow so rapidly that the buds will become deformed; but if allowed to bloom they can then be cut back to plump eyes, which invariably break strong, giving perfect flowers.

These requirements are only noticeable to the close observer, and if the flowers are allowed to have their own way, as is often the case, as soon as the plants reach a fair size, they become exhausted after the first crop has been cut. I claim, therefore, that there can not be too much care taken in disbudding and building up the young plants, so that when they are ready to produce flowers, they will also show different stages of growth promising continuous cutting.

It will only be a few weeks longer before the benched plants will require a light top-dressing of some kind, and this should be prepared beforehand. If one has some well rotted cow or horse manure, this should be kept turned until it is fine enough to pass through a sieve of half inch mesh. It is not necessary to sift it but it can not be broken up too fine. After it is pulverized it should be kept in a dry place for future use.

Pulverized sheep manure is always desirable for a light top-dressing, but where one has an abundance of either cow or horse manure, that will answer, half of each being preferable. Very often just when we think the plants need a little top-feeding we are not prepared to give it to them, so beginning in time often means dollars to the good. This not only in reference to the one thing but to many for to be successful with roses one must be prepared to give them just what they require at the right time. E.

Average Yield of Roses.

ED. AMERICAN FLORIST:—

Please let me know through the columns of your valuable paper what the average cut should be during a season on 6,000 roses; 2,000 Bride, 2,000 Bridesmaid, 500 Richmond, 500 Killarney, 500 Perle, 500 Golden Gate.

BEGINNER.

An average of 35 or 40 buds to the plant would be a fair yield cutting from October 1 to July 1, the cut sometimes exceeding this average under the most favorable conditions. As I have not grown Richmond and Killarney in sufficient numbers to state an accurate average, and as Perle is rather a slow bloomer in mid-winter I think it will be found that the above figures will be reached with careful handling of the stock. EL PASO, ILL.—Chas. L. W. Snyder of the C. E. Brady Co., of Eureka, Ill., has purchased all other interests and has organized a new company under the firm name of the El Paso Carnation Co. This firm is erecting 20,000 feet of glass in this city.

THE VIOLET.

Seasonable Notes on Violets.

Violets in the field in our section of the country (Michigan) have not done as well this year as others, on account of the hot, dry weather. This is the time the red spider does its work. If the plants in the field have red spider on them, make a solution of ivory soap water and go over them with a spray pump two or three times before planting them in the houses as they are much easier to handle outside than in the houses.

We arrange to have all of our violets planted by August 15. There should be a light shade on the houses before commencing to plant, and if the soil is very dry see that it is moist when ready to plant, so that it will not be necessary to soak them after they are planted, as it is best only to water around the plants until they are well established.

Syringe them two or three times a day for a few days after planting, and later syringe them every other day in bright weather. Give the plants all the air possible and in the fall let the temperature go down to freezing. One light frost does more good than anything you can do for violets.

ELI CROSS.

Coleus with Edible Tubers.

It appears that in the west and central portions of French Africa, according to recent French writers (Chevalier and Perrot), four species of coleus are cultivated for their tubers. The most prominent of these is Coleus rotundifolius or Madagascar potato. This species it appears is also cultivated under different names in Java, Ceylon and the East Indies. There are a number of varieties of this species. C. dazo is also cultivated on a large scale in Central Africa, producing a tuber which differs considerably from the Madagascar potato, and which it is believed is destined to take a prominent part in the future of tropical agriculture.

A third species, C. langouassiensis, cultivated locally in the vicinity, appears to be the heaviest yielding of the three varieties noted. It is believed that all of these species will prove of great importance to Europeans living in tropical countries. A minor species is C. Brazzavillensis. Yields of 30 to 40 tons of tubers per hectare are reported.

THE CARNATION.

Seasonable Notes.

Most growers have finished housing their carnations by this time. Now all energy should be bent to get them started as quickly as possible in the benches, as soon as they have taken good hold of the soil, which will be about a week or 10 days after benching. All shading should be removed from the glass and watering attended to most carefully.

It is necessary to look over the benches at least twice a day and watch for any dry places that may appear. All plants should be syringed once on every bright day, but always have that done not later than two p. m. so as to give the plants a chance to be thoroughly dry before night.

Opinions differ greatly as to whether to keep the plants rather dry after benching or to water them liberally. I am in favor of the latter provided the plants are in a healthy condition and have taken hold of the soil in the benches. By that I do not mean to keep the soil soaked with water all the time, but only to apply it freely when in need of any. There can not be any set rules as to how to water plants, as it all depends on their condition as well as that of the soil. By using water rather freely the life of some plants that are diseased in some way or other may be shortened, but it is much better to have them go now than later on, as they can be replaced easier, and catch up with the other plants; whereas if you are filling in plants late in the fall you will find that they never amount to much as far as producing fancy blooms is concerned.

If some diseased plants are discovered on the benches do not try to doctor them up, as it involves only waste of time and endangers the surrounding plants. Pull them up carefully and burn if possible. Dig up the soil in and around where they have been and let it get thoroughly dry; then apply air-slaked lime (about one handful to each plant) and thoroughly mix with the soil and then fill in your plants.

The surface soil of all benches should be kept loose at all times which of course will keep the weeds down as well as keep the soil in perfect condition. Never allow the weeds to get established. They take the strength of the soil as well as have a tendency to make the plants spindly and long jointed, which of course should be avoided at all times. Pinching should be continued for a few weeks until the desired size of plants has been obtained, but not later than August 25 if a good crop for early fall and winter is desired.

J.

To Heat Carnation Houses.

ED. AMERICAN FLORIST:—

Kindly advise us through your columns the size of pipe required for overhead feed, and the number of 1¼-inch pipes on each side of houses, also size of returns to boiler for hot water heat to be used in three houses each 16 x 30 feet, with 4-foot walls to be used for carnation plants. Also advise if pipe should be under benches, or if same may be placed on side walls. Boiler is rated at 825 square feet and is an Ideal No. 213 A.

F.

It will be well to use 3-inch pipe for the main floor and return, with a 2½-inch flow and return to each house. The latter size may be used for the overhead flow in each house, or two 2-inch pipes may be used instead. For the returns, ten 1¼-inch pipes may be used, although eight 1½-inch pipes would be better. If some of the pipes can be under the benches it will be found beneficial, but to have at least two on each of the walls will also be desirable. There should be no difficulty in heating the three houses with an Ideal boiler rated for 825 square feet.

Chief gardener at National Military Home, Ohio.

Copper wire rings to prevent bursting of carnations.

Carnation Bud Supporters.

In our issue of May 12, in a description of the carnation growing establishment of E. L. Enggren, Acqueduct, L. I., N. Y., mention was made of a ring support used to prevent bursting of carnation buds. The picture herewith shows buds bearing rings, and a fully developed flower from which a ring has been removed. As will be seen the flower shows practically no mark or disfigurement. The advantage gained by the use of these rings is considerable, as almost every flower showing a bursting tendency can be cut and graded.

The Jamestown Exposition.

TWO MILES OF FLORAL FENCE.

The Jamestown Ter-Centennial exposition, to be held on the shores of Hampton Roads, near Norfolk, in 1907 will have a most beautiful and novel fence to enclose its extensive grounds. The design is a new departure from the old style high board fence seen at former expositions. The Jamestown fence will be beautiful as well as useful, a quality that was sadly lacking at the other expositions.

Owing to the fact that the landscape feature of the Jamestown celebration is to be one of the great attractions at the exposition, the idea presented itself to Chas. H. Pratt, superintendent of the grounds, that it would be an excellent plan to include the surrounding fence as one of the features of the landscape design, thus giving the whole site the appearance of a beautiful private park, such as might be seen surrounding some of the royal palaces of foreign countries.

The total distance around the exposition grounds is about 17,000 feet, but the site is so situated on Sewell's Point that only about 11,000 feet of fence had to be erected, the waters of Hampton Roads making a natural boundary for the remainder.

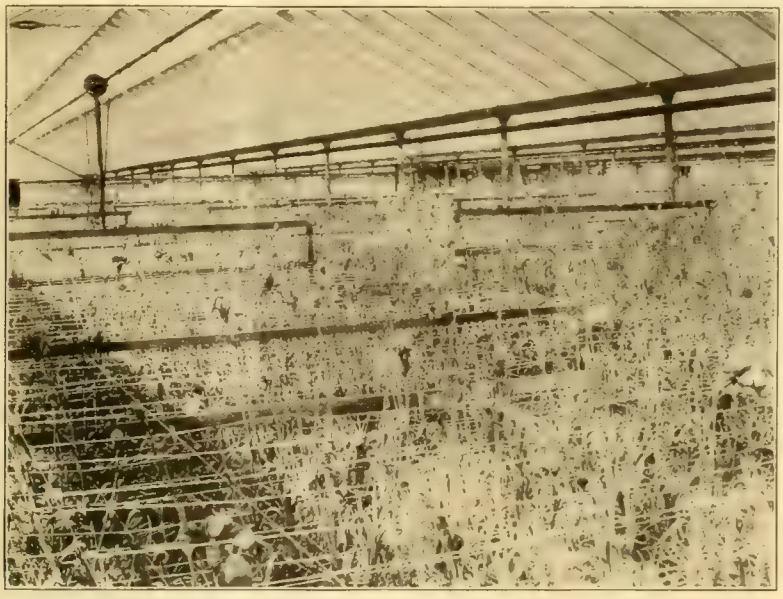
The fence, which is constructed of wire mesh and heavy barb, is covered with vines systematically planted so as to make an impenetrable barrier of beautiful foliage, giving the effect of an enormous hedge. The wire mesh, which is of the best quality, is about five feet wide, costing $130 a mile. Above this mesh are stretched three strands of heavy barb, bringing the total height up to seven feet. Surmounting the whole, and stretched on cross beams at the top of each post, are five more lines of barbed wire, making the fence a most formidable barrier.

The vines for the fence were planted in May of 1905, and as they are native to the southern climate they are already of a very dense growth. At each post has been planted a trumpet vine, with marvelous success, and between each post a crimson rambler rose bush has been planted. Between the trumpet vines and the rose bushes, honeysuckles have been trained, so that the entire fence will be covered with a fragrant mass of flowering beauty.

Mr. Lavalle, a distinguished architect from Boston who was the guest of Mr. Pratt at the exposition grounds recently, was most enthusiastic about the general landscape design, and especially in regard to the fence, about which he said: "It is one of the most beautiful and

novel things I have ever seen, and I would feel that my trip had been amply repaid if I had seen nothing else."

At the Lewis and Clarke exposition at Portland, Ore., last year, the authorities erected an immense water tank, in a prominent position on the grounds. The tank, being of a plain wooden construction, was looked upon as an eye-sore, which marred the general appearance of the exposition, until Oscar Huber, director of works, conceived the idea of growing vines over the entire tank. Within a few months, the vines, which grow with great rapidity in that section of the country, had grown over the entire structure adding a unique feature to the general display. Thus it is seen that with the aid of nature, some of the homeliest structures can be made most attractive.



INTERIOR OF E. L. ENGGREN'S DIETSCH PLAN GREENHOUSES, AQUEDUCT, N. Y.

WITH THE GROWERS

Schneider & Noe, Congers, N. Y.

Some of the best carnations received at the New York market are shipped from the establishment of Schneider & Noe, of Congers, N. Y., in the back hills of the Hudson river, and directly on the line of the West Shore railroad. Joseph Schneider and John Noe are cousins, and were born and educated in Strahlfeld, Bavaria, where also they got their primary knowledge of the art of floriculture. Nineteen years ago Mr. Noe came to this country, and Mr. Schneider joined him a year later. After spending three or four years working at different private and commercial establishments they located in Congers, built a 200-foot house, and started growing carnations for the New York market. Working early and late, and striving to produce quality rather than quantity they prospered until today they have 27,000 square feet of glass, embodying three houses 15 x 200 feet, one 25 x 200 feet and another, built last year 30 x 200 feet. The varieties of carnations grown are Pink Lawson, of which the firm thinks a great deal, Lady Bountiful, Enchantress, White Lawson, Red Lawson, and Variegated Lawson, the latter a type originating in the establishment. These carnations the firm has found from experience to be good profitable market varieties, and to do well in available soil. All hands are busy now benching plants. The largest house is benched with 8,000 plants of Enchantress and Pink Lawson. In benching the plants in the field are carefully gone over and picked out for size. Experience here teaches that where the plants in a house are absolutely uniform in size considerable time is saved when the crop is ready for cutting, owing to greater equality in blooming.

Water is supplied to the establishment through a 5,000 gallon Caldwell tank. This tank was formerly filled by a windmill, but this system being unreliable they have just installed a Gould electric pump and a Wagner 2-H. P. motor operating it from their lighting current. A drilled well provides the water. The well fittings and pumping outfit cost in the neighborhood of $800, but the firm considers it an excellent investment. The only regret is that a larger tank was not installed. The firm express great confidence in large houses, pointing to the fact that the carnation blooms coming from their largest house last year were much superior to those cut from the smaller houses.

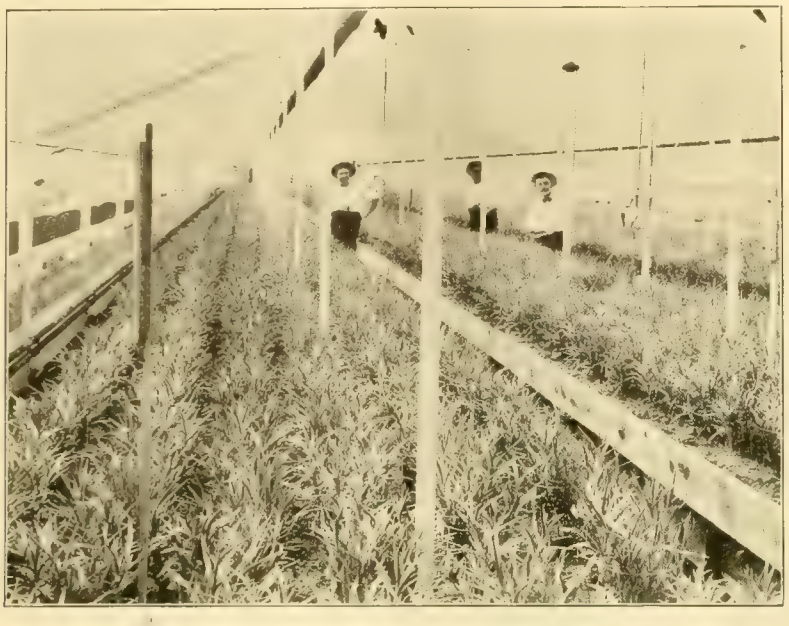
FIRM OF SCHNEIDER & NOE, CONGERS, N. Y.

Joseph Schneider. John Noe.

Geo. T. Schuneman, Baldwin, L. I., N. Y.

The establishment of Geo. T. Schuneman, Baldwin, L. I., 21 miles from the New York city hall, has long been known to the trade as devoted exclusively to the production of violets. While perhaps at times little smaller in size than the upper Hudson violets they have always been remarkably fragrant, a quality which more than atoned for any diminution in size. Mr. Schuneman, however, is now of the opinion that violet production has vastly exceeded the requirements of the New York market, and that shipments to long distance markets prove anything but satisfactory, consequently he has this year planted but three of his houses with violets, and has utilized the remaining six houses for carnations, which he grew last year with great success. The violet houses at this time are in fine shape, the plants all healthy and building crowns unusually strong, and promising a crop before the end of September.

The carnation output is practically confined to one variety, Goethe, which in this section is prolific, flowers and stems being of quality and size to insure good prices in the market. Part of one house is used for growing the Red Sport from Maceo, which Mr. Schuneman considers a good market variety. The carnation plants are



ESTABLISHMENT OF SCHNEIDER & NOE, CONGERS, N. Y.
House of Enchantress and Pink Lawson carnations.

benched in rows with the plants alternating so that instead of having rows of plants laterally across the benches, the stringing runs at an angle of about 80°. Mr. Schuneman claims that when planted this way the plants have more room, as they are free all around. In the extensive grounds surrounding the greenhouses is a large patch of cosmos, and cosmos is grown as a front hedge or screen to the range of houses. There is also a very fine lot of young privet plants coming along, about 45,000 in all. The soil hereabouts seems to be ideal for privet. A thick hedge of it surrounds the 6-acre plat, and in beauty and condition could hardly be equalled anywhere.

Like many Long Island growers Mr. Schuneman has had to rely on a windmill for water supply, and at times has been seriously inconvenienced through lack of wind to run the mill. To obviate this contingency he has installed in his boiler room, which, by the way, is in the basement of his dwelling, an electric triple cylinder electric pump and one H. P. motor, which is operated by power from his lighting station, and necessitates an expense only of about six cents per hour. Scallay boilers are used in the heating plant, and seven of the houses are controlled from the dwelling house, so that in inclement weather, or at any time, it is not necessary to go outside to control the greenhouse temperature. The two other houses are heated by a separate boiler, and form an independent plant. Mr. Schuneman has been in his present location many years, and the neat, tidy and ornamental appearance of his establishment and grounds would give the impression of a private gentleman's establishment rather than that of one in commerce.

INDIANAPOLIS, IND.—Anthony Wiegand and wife will leave on a Honolulu pleasure trip after attending the Dayton convention, sailing from San Francisco September 4.

Horticultural Botany.

Paper by L. C. Corbett, Washington, D. C., read at the fourth annual meeting of the Society for Horticultural Science, New Orleans, La.,

As the title of this paper would indicate, we are to concern ourselves, in the present discussion, with plants which have been brought under the influence of cultivation, and have, therefore, departed from their original or specific types. Darwin was sufficiently interested in this subject to write a book upon it, but in the short space of time allotted to this discussion, and the limited opportunities of the writer, it will not be possible for us to discuss the subject in a manner fitting its importance. We must, therefore, content ourselves by merely referring to some of the problems in horticultural botany which are now before the students of cultivated plants. It is natural for the horticulturists, in attempting to determine the position occupied by any plant with which he is working to refer to works upon botany. Let us first ask the question to what extent the botanists have been and are assisting the horticulturist in his work. The systematic botanist can be relied upon, so far as generic relations are concerned, but when it comes to the more minute and detailed study of cultivated forms we find little help or solace in studying the work of these systematists. They drop their investigations just where we begin. They content themselves with studying what they consider to be fixed forms, at least sufficiently fixed to be worthy of distinction as species. The species of the botanist is the starting point of the horticulturist.

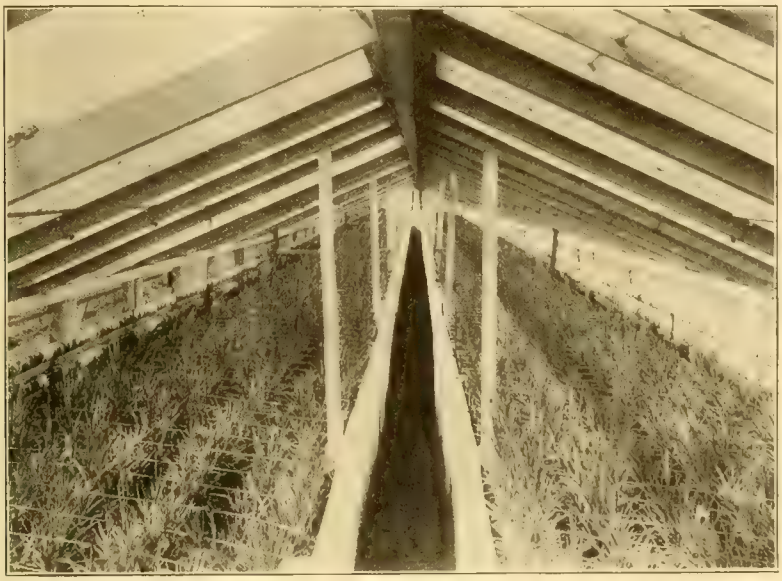
We are concerned with the economic aspect of the problem, and are not so much concerned with the natural relations of the plants in feral nature. The innumerable forms which naturally arise when plants are released from the struggle for existence, which binds them down and holds them to specific types under natural conditions, are only too familiar to the horticulturist. This maze of difficultly classified material has, it would seem, been an impenetrable wall against which the efforts of the botanists have been unavailing. Botanists have found defence in the argument that the forms which originate under cultivation, and which, for convenience sake, are called by horticulturists, varieties, are not sufficiently marked and sufficiently fixed to justify the title of species. Therefore, they are beneath the dignity of systematic consideration. What are we to do? Are we to abandon the struggle and to consider the products of our efforts unworthy of distinguishing names and specific classification similar to that accorded to forms which have through generations been built up under natural conditions? The market gardener and the fruit grower are not concerned with a sufficient number and variety of these plants to give the matter any con-

ESTABLISHMENT OF SCHNEIDER & NOE, CONGERS, N. Y.

sideration. For the man, however, who is interested in improving any strain, variety or race of economic plants, the problem at once assumes great importance. It is impossible to intelligently undertake the systematic improvement of any horticultural variety of plants without knowing something of the history, relations and tendencies of the plants with which one is to deal. Without, then, some system of classification which will assign these products of our efforts to definite places it is impossible for us to in any way predetermine what the results of our efforts may be.

The subject of plant breeding has of late assumed wonderful economic importance. The disclosures of the Mendelian theory have placed plant breeding upon a comparatively safe basis. Instead of working entirely in the dark and securing indifferent results, the plant breeder now knows that by pursuing certain methods for a definite period results of no uncertain character are bound to follow. This, then, places a new importance upon the subject of horticultural botany, which, previous to this time, it has not carried. The course followed by systematic botanists in determining the position of genera and species is not sufficient for the work which is before the student of horticultural botany. External characters, which are in themselves sufficient to determine the varieties, fall short of giving the distinction necessary for the future work of the plant breeder. The type of horticultural botany, therefore, in which we should at the present time interest ourselves is a type which will carry not only a description of the variety sufficient to distinguish that variety from all others, but shall also include a brief hisory of the plant, to show its relations to others which have been developed or which may be developed later. It is also of great importance to the plant breeder to know whether or not the particular variety with which he is concerned carries as its important commercial factor a dominant or recessive character. Such work as this must ever fall to the student of plants under cultivation. During the last few years important movements along this line have been made. The horticulturists, or the students of plants under cultivation have, for insance, concerned themselves with the study of the cultural forms which have arisen from the eight species of lettuce recorded by botanists. When this work was begun the record of plant forms was confined to a discussion of these eight or more species. When Mr. Tracy completed his study of the culture forms of lettuce he found it necessary to describe distinct sorts. When Professor Bailey undertook to study the native plums of America, which had been included in three or four species, he found it necessary to erect several new species and to classify many of the varieties under these new divisions. As a further instance of work of like character, Isish's study of beans is worthy of mention; also Waugh's study of the lilies, and Beach's study of the apples of New York. These I cite as important steps in the right direction.

In undertaking a work of this character, one of the problems with which the student is at once brought face to face is that of nomenclature. Horticultural nomenclature has become endlessly mixed because many of the horticulturists are not systematic botanists and because some horticulturists, for commercial or other reasons, wishing to provide high-sounding and catching names for plants in order to sell them, have taken the botanical names and tacked on such prefixes and endings as "Florabunda," "Floraplena," etc., for the purpose of distinguishing some form of superior merit, with the result that it is difficult to determine, in many instances, just what particular plant was under consideration when the names were given. Then, too, the unsettled condition of botanic nomenclature itself has placed the horticulturist, with his limited knowledge of botany, in a very awkward position. It not unfrequently happens that we find the same plant described by different authors under two or three different names. This is very confusing and leads to distrust on the part of the purchaser. For instance, I may be an admirer of shrubs, and I purchase a shrub from A under one name, from B under another, and from C under still another, supposing that I am paying for three different plants. When these come into bloom and I find they are all identical, I am at once impressed with the dishonesty of the dealers in sending out the same thing under three distinct names. Each one of these introducers or disseminators may be absolutely honest and sincere in his work, and yet because the authority which he has used in naming his plants is different from the authority used by another, the catalogues give the appearance of dishonesty. Here is then a point



ESTABLISHMENT OF GEO. T. SCHUNEMAN, BALDWIN, L. I., N. Y.
House of Goethe carnations.

ESTABLISHMENT OF GEO. T. SCHUNEMAN, BALDWIN, L. I., N. Y.

upon which there is an opportunity for doing some work of actual value. If all horticultural writers will decide to follow some standard work upon horticultural subjects, such a multiplicity of names for a single object will be avoided. While I have no authority to bring before this meeting any work which should be taken as a model, it is my belief that in general we would be safe in following the nomenclature adopted in Bailey's Cyclopedia of American Horticulture. This work has the advantage of being new and up-to-date, and purely American. True, it does not go into details in all cases to the extent that it is frequently desirable for students of cultivated plants to carry their studies, but when it comes to the consideration of varieties, if one will take the trouble to search out the introducer and determine the name under which any variety was introduced, this will form a safe basis for the study of all cultural varieties. For the avoidance of future complications from duplication of names, the renaming of old sorts, and various unnecessary and undesirable complications of this character, I wish at this time to call attention to a paper which I prepared in 1897, and which was presented at the Minneapolis meeting of the Association of American Agricultural Colleges and Experiment Stations. This was a report of a committee appointed to consider the feasibility of establishing a bureau of plant registration, the object of which should be:

First.—To discourage the duplication of names and the renaming of old sorts for commercial purposes.

Second.—To form a national herbarium of economic plants, which shall be made up largely of type specimens.

Third.—To simplify the matter of nomenclature.

Fourth.—To aid the student of varieties as well as of variation of plants under culture.

Fifth.—To secure the originator of a truly valuable variety some reward for his labor, the same as is now accorded the inventor.

The idea set forth in this paper was that in the case of the use of like names by different originators, before they were published and became common property they would first be submitted to the bureau where the plants would be registered and preserved, and where any such duplication would be detected. The originator's attention would thus be called to the necessity for modifying the name because of the fact that it had already been employed for the purpose of distinguishing or designating a variety belonging to the same family or group. I have not yet abandoned the hope that at some time there may be connected with the horticultural work of the U. S. Department of Agriculture an office which shall carry out in more or less detail the ideas proposed for this bureau of plant registration. There are at the present time a number of factors in the work of the department, which, if properly co-ordinated, would make it a comparatively easy matter to accomplish this work, provided we could secure the active co-operation of those engaged in plant production and dissemination.

The importance of uniformity in plant names is greater at the present time than ever before, because of the great demand for plants to use in the decoration of home surroundings. There is an ever increasing demand for the simple, old-fashioned plants of our grandmothers' gardens, and an increasing demand for plants indigenous to the region. Many of our nurserymen are alive to this movement and are providing themselves with large stocks of our native trees and shrubs, and they should pay special attention to the naming of these sorts as they are put upon the market in order that confusion in the future may not arise. Another important and gratifying sign of the times is that common names are being largely replaced by scientific or botanic names of a binomial nature. In cases where botanists are in dispute over the correct authority, it would, in my judgment, be wise to follow the precedent established by Bailey in his cyclopedia, and use both names, so that no matter what the final decision of the botanists may be the book or writing will stand the test of the decision. It is unfortunate that this is necessary, but so long as two schools of botany exist with opposing view points it will be necessary for the botanic artisan to recognize both names in order to prevent confusion and deception.

The more detailed work of the student of cultivated plant forms, to which I have already alluded, that is, the study of cultural varieties, is admittedly more difficult than the study of natural species, but in the case of plants from which great numbers of horticultural varieties have been developed, the need for systematic study and arrangement is very great. It is absolutely impossible for the student of pomology, not familiar with a great number of varieties of apples to take Downing's monumental work and determine the name of a variety with which he is not familiar from any specimen brought to his attention. Given a specimen and the supposed name, Downing's description merely answers the purpose of verification. It is simply a court of last resort. There is no systematic arrangement, and there is no classification by which any specimen can be identified. To the beginner in the study of varieties the field presents a chaotic jumble, with no beginning, no end, and, in fact, no vulnerable point. It is necessary for him to familiarize himself with specimens and associate with them the arbitrary names which have been given them. There is no system in naming, and no system in description which will enable one to distinguish between two very similar varieties. While I realize and fully appreciate that an attempt to systematically describe and classify 2,000 varieties of apples is a stupendous undertaking, yet such description and classification is, it seems to me, the only logical solution to the ever increasing complexity of this great nomenclature problem which confronts the horticulturist. This means in the first place that some arbitrary system of description must be settled upon, which shall be adhered to by all students of varieties so that the descriptions of any particular writer can be compared with those of any other writer, these descriptions to be minute and sufficiently detailed to enable the student to determine the distinguishing marks between varieties. In a feeble way this has been attempted by the writer in placing before the student of plant forms fixed descriptive blanks for studying varieties of various cultural plants. Those who have been in the habit of describing varieties of tomatoes, beans, peas, or radishes, and basing their conclusions entirely upon their own judgment by recording the earliness or lateness of maturity, and remark upon the size and grade of the edible part, together with a criticism of its quality, are amazed to find when they attempt to compare the description of any two varieties that the description will apply almost as well to one as to the other, and that points which really constitute the difference between the varieties have been omitted or overlooked. In the one case an important character is described, while in the other case this same character is entirely omitted or ignored. It thus becomes impossible for one to know which variety was before the observer at the time of making his notes. It becomes necessary, therefore, in order to bring out the features which actually serve as the distinguishing marks between varieties to subject each variety to a rigid examination which will be exactly alike for every variety interrogated. It will at once be seen that this set of questions must be detailed and that with many varieties there will be questions to which there can be no reply. Horticultural descriptions, based upon a fixed set of questions of this character, would enable students of plant forms to work out a systematic arrangement and classification of varieties so that given a variety its relation could be determined, and the class to which it belongs sought out, and perhaps could be carried so far as to enable one to accurately locate it in a descriptive list of cultural varieties. It does not seem to me that this is too much to hope from a careful study of horticultural botany. In fact, it is my idea that any study of horticultural botany which comes short of attaining this end has not fulfilled its highest possibilities.

To briefly summarize the phases of horticultural botany which appeal to me, the questions would present themselves in somewhat the following order:

First.—Uniform, detailed descriptions of cultural varieties.

Second.—A systematic classification and arrangement of such varieties.

Third.—To include in the description of all horticultural varieties which are made, that is, which are the result of selection and hybridization, a brief historical note, giving the parentage and the line of descent of the particular plant under investigation.

Fourth.—A carefully determined and uniform system of nomenclature based upon some modern work.

POUGHKEEPSIE, N. Y.—Contractor Wesley Lee is rebuilding the green houses of I. T. N. Harcourt, on Remsen avenue.

MILWAUKEE, WIS.—E. C. Ludwig and wife of Allegheny, Pa., are attending the Eagles' convention here this week and will take in the Dayton convention on their return journey.

Dayton Convention Notes.

Upon arrival in Dayton, Ohio, delegates should make free use of the information bureau at the Union station. You cannot miss it. Some members of the Dayton Florists' Club will be at the depot at all times to help along as much as possible. Baggage should be left with the baggage master at the information bureau and he will have it delivered to any designated hotel or boarding house at once.

GREENHOUSES AT THE NATIONAL MILITARY HOME, DAYTON, O.

In the office of the exhibition building there will be a branch postoffice established, so that letters may be addressed to the exhibition hall, reading: "Convention, Society of American Florists, Fair Grounds, Dayton, Ohio." Furthermore, for the convenience of delegates there will be a telegraph office at the secretary's office, besides the free use of telephones.

A large bulletin board will be provided, which may be made use of by those who wish to meet someone. Keep your eye on the bulletin board. A book of complaints will also be found at the secretary's office, and furthermore a box where may be deposited suggestions for the running of future conventions. Make free use of these suggestions and do a little thinking yourself, for a handful of men can't do it all. You may know something that will be of advantage in the future.

Patronize the exhibitors and advertisers well. Have cheerful words for everybody and at least make these fellow feel good. A few pleasant words do not cost anything. Let this convention be run a little more on the patrarchial style and as one great family. Let all try to stay together and get acquainted with each other.

The Dayton Florists' Club wishes all to have as good a time as possible and will do all in its power to promote such a time. Let all take free part in the discussions and let none put his light under a bushel. Boost the national flower show. If there is anything you want make it known to the chairman of the Dayton Florists' Club, who will do his best to see that you get what you are lacking if at all possible.

We would like to direct attention to a novel feature of this convention, that is the exhibition of plants for parks and suburban and city homes, of some of the largest concerns in the United States, also of some heretofore undiscovered talent. It will be a surprise to learn what talent is slumbering in the art of landscape gardening and garden architecture. As the national association has made no provision for prizes for such an exhibit, the Dayton Florists' Club will do so in the shape of gold, silver, and bronze medals. Any young man who has not exhibited yet should not fail to make his entry but come forward.

We regret to say that, through some misunderstanding, a large southern concern has placed its exhibits of cannas in the public parks. However, the same concern will exhibit its cut flowers in the exhibition hall and all desiring to see these plants in the beds will be taken into the respective parks in a private conveyance by our genial park superintendent, Mr. Killworth.

Here is another point we would like to call attention to. That is the street car service. Take the yellow car that is called the Xenia Traction Line only and don't crowd in the cars. You will only have to wait a minute or two for another one.

The chairman of the Dayton Florists' Club has paid a great deal of attention to the musical programme and has selected every piece personally and is quite satisfied that you will get, either in orchestra or band music, the best that can be produced. We have avoided the tedious and classical and chosen only such pieces as will tend to enliven and make for good fellowship. For the ladies and their partners dancing platforms have been provided.

J. B. HEISS.

Chicago to Dayton Via Big Four.

The Chicago Florists' Club has concluded arrangements for the special train over the Cleveland, Cincinnati, Chicago & St. Louis Ry., leaving the Michigan Central passenger station, Twelfth street, Chicago, at 12:45 Monday noon, August 20, and due to arrive in Dayton, via Kankakee, Lafayette and Indianapolis about 8:40 p. m., practically a daylight ride all the way. The train will consist of three or more new day coaches, one combination car, and one dining car to serve luncheon and dinner a la carte.

The rate by the certificate plan for the round trip is only $9.70. These tickets are good on all trains August 17, 23 and for the return trip the validated certificates will be honored up to and including August 31.

The Chicago Florists' Club cordially invites the florists of the WEST, NORTHWEST and SOUTHWEST, delegates to the convention, to join this special train at Chicago Monday noon, as above stated, and see that when they buy their tickets and secure their certificates for the same that these tickets read "Via Big Four Route" from Chicago to Dayton.

Delegates who can join us at any point along our route are requested to do so. The committee will be glad to hear as early as possible from all who decide to join our party, so that the necessary arrangements can be made in

RESIDENCES IN DAYTON, O., THE CONVENTION CITY.

time. Delegates buying tickets in Chicago will secure them at the city ticket office of the Big Four, 238 S. Clark street, with certificates.

Committee on transportation for the Chicago Florists' Club—J. C. Vaughan, Willis N. Rudd, George Asmus.

P. J. HAUSWIRTH, Pres.,
L. H. WINTERSON, Secy.

Dayton Delegates Invited to Chicago.

An informal meeting of the Chicago Florists' Club was held July 27 at 11 a. m. in the office of F. F. Benthey, for the purpose of inviting to Chicago, eastern members of the S. A. F. who might wish to extend their trip to this city. It was the intention of the meeting to plan some form of amusement for them but as it was impossible to obtain any estimate of the number who might come, it was finally decided to draw up the following invitation:

"Convention visitors who may decide to make a further western trip during the week following the Dayton meeting are cordially invited by the Chicago Florists' Club to advise its secretary when they will be in the city in order that an afternoon or evening meeting with the club can be arranged."

L. H. WINTERSON, Sec'y.,
49 Wabash avenue.
P. J. HAUSWIRTH, Pres.,
277 Michigan avenue.

Detroit to Dayton.

The Detroit Florists' Club has completed arrangements for the trip to Dayton and hereby extends a cordial invitation to everyone in this vicinity to join our party. Special cars will be provided on train leaving Detroit (Union depot) Pere Marquette R. R. (C. H. & D.) at 12:35 p. m., Monday, August 20. Toledo will be reached at 2 p. m., leaving there 10 minutes later with the Toledo delegation, arriving at Dayton 6 p. m. To those who are located at points in this section where railroad certificates are not obtainable, tickets should be purchased to Detroit where through tickets to Dayton with certificates can be obtained. Fare going and return $5.80.

DETROIT FLORISTS' CLUB,
J. F. SULLIVAN, Sec'y.

For Western Convention Delegates.

Delegates to the Dayton convention should buy their tickets from lines represented by the Western Passenger Association, but keep in mind that traveling on their tickets they must leave Dayton no later than August 28. This is three days earlier than the limit allowed by the Central Passenger Association. This association covers most lines running west from Chicago. Always take certificates in purchasing railroad tickets.

New York to Dayton.

The transportation committee of the Florists' Club has arranged for transportation to the Dayton convention via the New York Central, 2 p. m., August 20, on the train known as the Southwestern Limited. The fare for the round trip will be $22.67, and the route via Buffalo and Cleveland with stop-over privileges.

MARKET GARDENS.

Seasonable Notes.

TOMATOES.—July is the time to sow seed for the winter crop of tomatoes. We always plan to have the sowing done before the end of the month in flats in nice light soil. When large enough to handle they should be transplanted to flats or potted off into 3-inch pots. When they begin to grow the pots should be spaced so the plants do not become spindly and weak. In 6 weeks or 2 months vigorous plants 6 or 8 inches high with the pots well filled with roots will make nice material for the benches.

If one is a beginner the selection of a variety will be foremost at this time. While there are new varieties constantly being added to the lists of those suitable for forcing, it will be best to depend on the old and tried varieties for the main planting; but do some experimenting on one or two additional kinds, thus determining their merit. I always recommend Lorrillard for the winter crop as it presents nearly all the desirable points in a tomato: medium size, smooth, no angles or corrugations, color and evenness of ripening, and in fact all the desirable features.

Tomato plant ready for planting.

The soil should have equal consideration. A good rose soil is usually suggested; that means a good turfy loam previously stacked and well chopped over and the best quality of short manure incorporated. Sheep manure and ground bone can also be added in reasonable proportions.

The beds for winter forcing should have bottom heat and it is advisable to have benches or boxes in which to grow them, and under or along side of which the heating pipes can be run. Deep benches are not advisable. While 6 or 8 inches is a good depth tomatoes can be grown in 4 inches of soil. There must also be sufficient head room for training the vines and some means of supporting them with a string, stake or wire. We present in the illustration methods of constructing beds for tomatoes or cucumbers for winter forcing. It will be seen that they are constructed of 2-inch plank and about a foot deep with the pipes running along side and the beds slightly elevated from the ground. The depth of the bed allows for rough material for drainage and also for top-dressing. Tomatoes may also be grown in boxes or pots. Boxes of the size illustrated, 18 x 18 x18 inches could accommodate two plants trained to a single stem and are easily controlled in many respects. Note in the illustration the zinc pans under alternate boxes, an experiment to determine the value of subwatering under such conditions.

SUMMER CUCUMBERS.—This is proving a good season for cucumbers and they are comparatively free from the fungous disease (anthracnose) affecting the leaves in downy blotches, although we have seen one bad case of it. Whenever it appears the leaves affected should be picked off or if the attack is considerable the whole plant or plants should be removed. In bad cases we have the Bordeaux mixture to help but one can often ward off bad cases by watchfulness. Another aid to avoid its reappearance the following year is when the cucumbers are over to burn sulphur in the house on two or three successive evenings. Let all the vines remain and every particle of plant and insect life will be destroyed so thoroughly that little fear of perpetuating the trouble need be entertained. So it is with greenfly; constant fumigation and absolute cleanliness throughout the winter will keep the house free in the summer. Good sanitary conditions in a house affects the healthfulness of the crop. No rubbish or stagnant water should be allowed to accumulate. Have the watering done in good time so the beds and plants may dry off and the whole house sweeten before evening.

As with tomatoes the growing of additional varieties of cucumbers experimentally is interesting and often makes one better satisfied with their own strain, often the result of years' of selection of individual plants showing improvement. A number of highly recommended kinds do not always prove all that has been claimed for them by their introducers. Some have good bearing qualities but may be undersized; others are good when perfect fruit is produced but so little of it appears. Others are deficient in producing a vigorous vine, while others bear ill-colored fruit. For like tomatoes, they have desirable points as evenness of size, color, thrifty vines, etc.

The varieties enumerated and observed by us have been: Vaughan's Boston Forcing, is all claimed for it in productiveness but the fruit is undersized; Davis' Forcing Hybrid has too many imperfect points but may be well worth further trial as the fruit is excellent; Vick's Perfection is a good flavored cucumber but of bad color; Howard (Vick's), good shape and color but inferior vine, hence lacking in productiveness; Fordhook Famous has bad color as an indoor variety and a critical market is against it: Vickery was pitiably weak in vine and appeared to be no use whatever.

Some of these varieties might do well in some sections, but to a beginner the White Spine type is best until through selection or hybridization a definite type is secured. These problems are always interesting to the market gardener and it is often he who is improving the market by choicer fruits and vegetables and thus benefiting the consumers.

FRANCIS CANNING.

TOMATOES FOR WINTER FORCING.
Growing in boxes is one method employed.

RECENT BOOKS.

Plant Breeding.

This is the fourth edition of a book issued by Prof. L. H. Bailey, of the Cornell University, Ithaca, N .Y., under the same title in 1895. In the preface of the third edition, issued in 1903, Prof. Bailey says: "In the eight years since this book was sent to the printer, there have been great changes in our attitude toward most of the fundamental questions that are discussed in its pages. In fact, these years may be said to have marked a transition between two habits of thought in respect to the means of the evolution of plants,—from the points of view held by Darwin and the older writers to those arising from definite experimental studies in species and varieties. We have not given up the old nor wholly accepted the new, but it is certain that our outlook is shifting. So far as practical plant breeding is involved, the changing attitude is concerned chiefly with discussions of the nature of varieties and the nature of hybridization. The chief practical result of the discussion of the nature of varieties is a re-defining of what a variety is, whereby we have come to recognize the fact, more clearly than heretofore, that not all differences in plants are of equal importance or significance."

The present volume contains an excellent bibliography and the leading change in the book, as compared with the first edition, is the substituting of new matter for old lecture 4, the new one being a resumé of the investigations of De Vries, Mendel and others and a statement of the current tendencies of American plant breeding practice. The book contains 480 pages. Price $1.25.

The Orchard and Fruit Garden.

This is one of the most useful and complete works we have seen on the subject of its title for a considerable period. It is divided into three parts, the first of which is devoted to the orchard, covering the apple, pear, plum, cherry, quince, peach, apricot, grape, citrus fruits, fig, date, olive, pineapple, banana and other tropical fruits, undeveloped fruits, nuts and nut trees. The second part deals with the fruit garden and such small fruits as the currant, strawberry, raspberry, blackberry, gooseberry, cranberry and neglected berries. The third part is reserved for cultural directions, covering windbreaks, drainage, etc. The author, E. P. Powell, is a practical man and has given us here a practical book, written with vigor and freshness in unmistakable language. Pages 322, illustrations 23. Price $1.50.

The Horticultural Note Book.

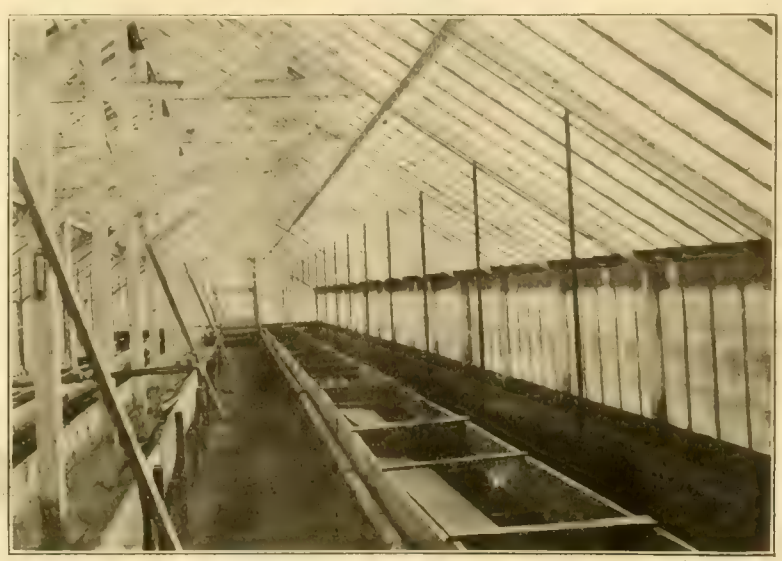
Although an English book written for British readers, there is such a large amount of information in this little volume as to render it one of great assistance to all horticulturists. The author is J. C. Newsham, head master and manager of the Hampshire county council agricultural and horticultural school in England. The book contains 113 illustrations and its scope is indicated by the following general titles: "Weights and Measures," "Land Measuring and Mensuration," "Garden Formation," "Horticultural Buildings," "Hedges, Fences and Gates," "Geological Formations and Soils," "Chemistry of the Garden and Manures," "Propagation and Seed Memoranda," "Fruit Culture," "Flower Culture," "Vegetable Culture," "Trees and Shrubs," "Insecticides and Fungicides," "Garden Meteorology," and "Garden Recipes." Price, $2.

The Implement Blue Book.

We are in receipt of a copy of the third annual edition of the Implement Blue Book, which was recently issued. This volume contains a complete directory of agricultural implements and machines, showing in detail the goods of every manufacturer in the United States and Canada, supplemented by a full list of jobbing and branch houses at all the principal distributing points. The book contains some 448 pages and is substantially bound. It is published for the exclusive use and benefit of dealers in agricultural implements, with whom it is a standard. Midland Publishing Co., St. Louis, Mo., publishers.

Water Lilies and Aquatic Plants.

We have just received a copy of the new edition of Henderson's handsome publication entitled "The Culture of Water Lilies and Aquatic Plants," which contains some 44 pages, 7x9¾ inches, and many excellent illustrations of water gardens and aquatics. The text covers the whole field of water gardening with special chapters on the more prominent plants which come under this head, such as nymphæas, nelumbiums, victorias,



HOUSE FOR WINTER CUCUMBERS AND TOMATOES.
Style of benches and arrangement for training.

* We can supply any of the books mentioned under this head where the prices are given, if the requisite amount is forwarded with order.

etc. There are important chapters on the making of water lily ponds and pools, planting, propagation, wintering, enemies, etc. The price is 50 cents.

THE RETAIL TRADE

Florists' Work at New York Hotels.

One of the most notable contracts of the year was that given out for the decoration of the new $5,000,000 Hotel Belgardener in charge of the plants, and David Smith is in charge of the cut flower department.

Another piece of hotel work of a different character is seen in the roof garden of the Hotel Astor at Times square. The decorations and effects here are lavish and on a scale never before attempted in New York. The full area of the building plan is utilized for the garden and some fine effects have been made possible. Everything of course, is either potted, tubbed or boxed, but the work is

VISTA OF ROOF GARDEN, HOTEL ASTOR, NEW YORK CITY.

mont, opposite the Grand Central station. Joseph Leikens had the contract, and it included the furnishing of over 600 plants, 500 of which were palms, varying in size from four feet to the largest sizes obtainable. More than half of the quantity were above medium size. The palm room of the hotel is worth a journey from a distance to see. In the center a tall palm occupies a stand, with smaller palms around it, forming a pleasing group. The base tubs are almost hidden with moss and ivy. The music gallery is almost hidden by a group of phœnix and aspidistras. Elsewhere around the room ranged high and low are specimen palms and small groups disposed wherever space is available. At the entrance to the corridor of the first landing leading to the mezzanine floor are two made up rubber plants 14 feet high; and on the mezzanine floor are a number of large rubber plants and palms. In the restaurants, cafes and lobbies palms, bays and rubber plants are literally disposed.

Mr. Leikens has a refrigerator show case and flower stand near the cafe entrance and in addition to meeting the demand from the patrons of the hotel, which contains over 1,000 rooms, he keeps about 300 vases continually filled with fresh flowers. The refrigerator show case is cooled by cold air pipes at the top of the case, the pipes being supplied from the ice plant in the lower regions of the hotel, and so well that they are continually coated with a thick layer of ice. Otto Burkhardt is the carefully done. A privet hedge borders the whole roof. Three pergolas are vine entwined, and hanging baskets are used wherever possible. Some of the groupings are very massive and form excellent windbreaks on windy nights.

An attractive setting is the decoration of the dome, part of which is shown in the accompanying illustration. On the right of the picture is a bank of scarlet geraniums about 18 feet high, all in boxes, and the boxes arranged in pyramid form. Each box is secured to the one in front by an iron cleat. The effect is very fine. To the left, or on the side of the dome running to the wall is a rockery, with a cascade running over concealed electric lights. The other sides of the dome is a repetition of the arrangement. Palms of all kinds are used, as well as laurel, rubber, and smaller plants. Hydrangeas in tubs, and well flowered, are also a feature. The scope of the garden entailed a tremendous expenditure, but the crowds visiting the place every night would seem to warrant it. The garden scheme was carried out by H. L. Bantelman, the Amsterdam avenue florist.

Some Wreaths.

When orchids or dollars are plentiful such a wreath as is shown in the illustration is not infrequently seen. There is nothing particularly noteworthy about it, it being the most popular form for the arrangement of these lovely flowers. The subject of the illustration was on a standing frame about four feet high backed with asparagus, Adiantum Croweanum and Adiantum Farleyense. The base contained longiflorum and auratum lilies. Fifty flowers were used, the bow being of orchid ribbon.

The flat crescent wreath was composed of gardenias for one side while the other contained cattleyas, lily of the valley and white Japan lilies. A bow of wide white satin taffeta ribbon appeared to add to this effective arrangement which measured 36 inches over all.

The white rose wreath had a pleasing effect for although the flowers were all wired to sticks and stuck into a mossed frame the appearance of an old time, tied wreath, which, while very beautiful when made right, was so often a failure, that it almost became obsolete when the wire frames came into vogue. There is no excuse, however, for the very poor, bowlegged bow that disfigures an otherwise satisfactory design.

BANK OF GERANIUMS, ROOF GARDEN, HOTEL ASTOR, NEW YORK CITY.

A WREATH OF ROSES.

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

How to Make Concrete.

In determining the proportions of the aggregates and cement for a certain piece of work, it is necessary usually to take samples of the broken stone (or gravel) and sand which are most available to the site, and make measurements of the percentage of voids in the stone which must be filled by the sand, and the percentage of voids in the sand must be filled by the cement. This is done by taking a cubic-foot box and filling it with broken stone in a thoroughly wet state. The box is then filled with as much water as is required to completely fill it in addition to the stone, which upon being poured off gives the relation between the volume of the voids and the volume of the stone. The required amount of local sand thus determined is then measured out and placed in the box with the stone in a damp state. Water is then used to determine the percentage of voids left in the sand, which gives the approximate amount of cement required, although an excess of cement is almost invariably used. Engineers everywhere differ regarding the best proportion to be used, but in general the above test, roughly made, will determine it well enough. The proportions which are most universally used are as follows: 1 cement, 2 sand, 4 broken stone; where extremely strong work is desired. Tests show that a 6-inch thickness of 1—2—4 concrete properly made is waterproof up to about 50 pounds to the square inch. This concrete is frequently used for facing dams. 1—3—6 is the proportion generally used for the interior of dams and large structures. It is entirely suitable for large foundations. 1—4—8 is frequently used for foundation work, and when properly mixed makes good concrete, although it is about the limit of what is considered good work, and would not be suitable for very important structures. 1—5—10 is equal to any concrete made with natural cement. It is a well-known fact that the volume of concrete when mixed with water is somewhat less than the volume of the aggregates and cement before mixing. The contractors' rule is that the volume of mixed concrete is equal to the volume of the stone plus one-half to one-third the volume of the sand.

There has been much discussion among engineers and others as to the amount of water that should be added to the aggregates and cement for making the best concrete; and while it is not the purpose of this paper to enter into this controversy, it might be said that the modern tendency is toward wet concrete. The old way was to add just enough water, so that when all the concrete was in the form and tamped, it would show moisture on the surface. The tamping is a very important part of the operation, and the quality of the work is dependent upon how well this is superintended, as unless it is well and thoroughly done the concrete is liable to be honeycombed and imperfect, especially near the forms. With the growth of the use of concrete the old method of putting it in the forms nearly dry and depending on tamping to consolidate it has been more or less abandoned, and the more modern way is to put the con-

WREATH OF ORCHIDS, GARDENIAS AND LILY OF THE VALLEY.

crete in quite wet, as less tamping is required and much labor and expense saved. One of the great objections to this scheme is that if care is not taken, the water will tend to wash the cement from the stone and sand; in other words, unmix it. However, it may be said that it is now generally understood that rather wet concrete properly handled makes better work. The amount of water to be added to the aggregates and cement varies from 1 water to 3 cement by measurement to 12 per cent of water by weight. In 1887 Mr. Carey, of Newhaven, England, made the statement that 23 gallons water per cubic yard of cement was the best mixture. Quite frequently salt water is used in mixing concrete in cold weather to prevent freezing, and it seems to have no ill effects on the resulting mixture.—Cement Age.

Hammond's Works Enlarged.

Benjamin Hammond's insecticide and paint business has increased so largely that he has had to make improvements and enlargements in various directions to his factory, says the Fishkill Standard of July 28. James A. Murray has just completed a storage warehouse for him, on the famous "northeast corner of the Long Wharf." This had been needed for a long time, and this summer it was impossible to get along well without it. Mr. Hammond is a hard worker, giving personal attention to every department of his large business. He is a pusher, year in and year out, and his business steadily increases in consequence. He started business here in a very modest way, some 20 years ago, and has built up an industry that is counted an important part of the town's business. While he does a large local trade, the bulk of his business is done with outside parties. His insecticides not only are used locally, but find their way to every part of the country, and are also shipped to some of the foreign countries. His line of business is very extensive, and calls for a large amount of advertising, which is done through many newspapers and magazines and by the use of a great variety of printed matter, which is sent to thousands of postoffices throughout the country. His output of mail is the largest sent by any one concern in the town of Fishkill.

Mr. Hammond is also an extensive manufacturer of paints, which find their way to many states. His list of paints includes many kinds and for all purposes where paint is used. His color cards show the great variety of shades and colors. Among the best of his paints we may especially mention his Greenhouse White, Cottage Colors, Chinese Gloss White, and Mount Beacon Green, all of superior quality. In the same line we may mention Twemlow's Old English glazing putty, a semi-liquid article which has received the commendation of prominent florists all over the country, for greenhouse use.

Mr. Hammond keeps quite a force employed in the various departments of his factory, which finds no idle time on its hands. The shipping department is one of the busiest places in the factory.

Besides the building of the storage warehouse, Mr. Hammond has had other improvements made, so that the interior of the factory is materially changed for the better. We hope the business may keep on increasing, and that the coming years may see it in a still more flourishing condition.

AN ORCHID WREATH.

Laying Lapped Glass.

Extract from Bulletin of the West Virginia Experiment Station:

The old and reliable lapped glass roof for greenhouses will probably never go out of fashion, but the cost of laying it and the tedious method usually employed have induced many to seek a substitute in other styles, such as the "butted" and zinc strip scheme for laying roofs. The method of laying lapped glass here described is so simple and so easily learned, by even an unskilled laborer, that it cannot fail to meet a much felt want. The method is as follows: If the work is to be done during cool weather, which is not desirable, choose a warm room and upon a table about two feet high arrange a board very like the kneading board used by the pastry cook. This board should be wide, smooth and perfectly flat. Warm a quantity of putty, say five or eight pounds, sufficiently to make it soft and pliable, but not sticky. With the hand spread the putty over the board in a layer of uniform width and of a length as great as that of the glass to be used, and with a section of three or four inches vitrified sewer pipe, as a rolling pin, roll the putty out into a thin layer about 3-16 of an inch thick. Then with the glass held as shown in illustration herewith, with the ends firmly grasped in the hands, the convex side of the glass away from the operator, and the edge of the glass about ¼-inch back from and parallel with the edge of the putty. Press the glass through the putty so as to cut off a narrow strip. Tip the pane toward the operator then backward, and draw it forward. This operation will loosen a strip of putty which will adhere to the edge of the glass as seen in the upper side of glass in illustration. Change sides with the glass and repeat the operation, then with a putty knife cut off the ends of the two lines of putty sufficiently to allow for the desired width of lap. Pass the glass to a man on the roof, holding it meanwhile with the putty on top. The man on the roof turns the pane over and presses it firmly in place, thus squeezing out any superfluous putty which will pass in both directions out of the rabbit of the sash-bar. As soon as the glass is fastened in place the operation is complete, save for cleaning off superfluous putty. One man can putty glass for two men on the roof to lay. By that I mean he can spread putty, open boxes and putty and hand up sufficient glass to keep two men on the roof busy adjusting and fastening it in place. In building a new house a

THE FLOWER GARDEN AT LINCOLN PARK, CHICAGO.

record was kept of the time required to cover one side of a house 20x30 feet; the sash-bars were 12 feet long and 16 inches apart. Three men, using 16x24 inches D. S. glass put the roof on one side of this house in 2½ hours, which is quicker than the same area of butted glass could have been laid and the caps screwed down. The roof has now stood two winters and one summer, and does not leak a drop. Laying a lapped glass greenhouse roof was a great undertaking until this method was hit upon, but now is one of the simplest and quickest parts of greenhouse construction.

Huntington & Page, Indianapolis, Ind.—Conditions of trade in this locality this spring have been discouraging in some respects on account of the weather. March trade having been ruined with the heavy snows and now about seven weeks of drought since early in April, we believe has affected trade to a great extent, regarding our own business we find on comparison that with the exception of March our business is far in excess of previous years. We believe that our season is practically one month backward and that June will be a good month this year.

The Abuse of Valves.

In a comprehensive article on this subject, the Valve World, in a recent issue, after exonerating the manufacturer from oft-repeated complaints regarding defective valves, gives the following reasons for their leaking, after they are placed in a pipe line:

1. The improper use of cement and the failure to remove particles of cement, scale, chips, dirt, etc., that naturally get into the pipe.
2. That the threads on pipes are often cut longer or smaller than standard.
3. The application of a pipe wrench, especially in the case of light valves, on that end of the valve opposite the one which is being screwed on the pipe.
4. The failure to clamp lengthwise a light valve which is put into the vise for the purpose of removing the centerpiece.
5. The endeavoring of a steam fitter to stop the leak of a stuffing box by straining it with a large wrench when the difficulty is due to the packing having become worn out and needing to be renewed.
6. When a valve is to be used on a header, the steam fitter sometimes starts out with a long piece of pipe which is unsupported, and, through carelessness, allows the strain of the pipe to come on the valve, thereby springing it.
7. The failure to make proper allowance for expansion and contraction, allowing the strain to be thrown on the valves.
8. The undertaking to tighten a leaking valve by using some kind of a lever on the wheel, a course which seldom fails to materially injure the valve.

Laying Lapped Glass.

West Virginia Experiment Station Bulletin.

JERSEY CITY, N. J.—The Burnham-Hitchings-Pierson Co., designers and builders of horticultural structures, recently took over the large factory at the southern end of West Side avenue.

MARION, IND.—The work on the new floral hall at the fair grounds is progressing nicely, and already the entire frame has been put up, and the carpenters are now working on the sides.

PRINCETON, N. J.—The Pierson U-Bar Co., of New York, will construct the glass work of four greenhouses for M. Taylor Pyne and will also install the heating apparatus. The cost will be $8,100. The mason work for the greenhouses will be done by Wm. R. Matthews, of Princeton, at a cost of $10,100.

Paul de Longpre.

A great many people in America have heard of the quickening preacher Gunsaulus of Chicago. Out here Rev. William Rader is the Gunsaulus. He is on a vacation trip and writes letters for the newspapers. In his letter this week he speaks of a call he made on Paul de Longpre, the world's greatest flower painter. The preacher's letter says: "Longpre stood in his beautiful rooms at Hollywood, Southern California, surrounded with a wealth of beauty. All the flowers in California seemed to be out calling that day, and stopped under the trees and along the well-kept paths. I have not seen such a beautiful home in California. In the rose garden are no less than 4,500 bushes of the finest variety—roses, shrubs, poppies, geraniums and vines. The air is heavy with their breath, and the bees which may be found in all his flower pictures hummed lazily in this garden of Allah, this paradise of nectar. A circular summer house of attractive design is set under sheltering acacias. In looking at his work one is made to feel that this flower painter is at once an artist and a botanist. It is his scholarly attention to details that has made the name of Paul de Longpre famous in the world of art. The old story of the monkey that turned over the pages of a natural history and tore out the insects and ate them, and of the birds that pecked the painted cherries, is suggested when one looks at de Longpre's painted roses wet with painted dew. There is a difference between the lovely bower of roses in Hollywood and the twisted steel and broken walls of San Francisco, and the artist's beautiful eyes suffused with tears when he spoke of the destruction in the city. He had $800 in bank last month, now he has to show for it a receipt from a relief committee that was working in the interest of San Francisco's needy people. That's the sort of man this artist is, and while his field of flowers, the exotic orchid sprays of blossom, the daisy and heliotrope, the black-eyed susan and the chrysanthemum and lilac, the clover sifted by bees, won my attention by their charm and sap and freshness, the man who painted them charmed me most."

JESSE WHITE.

Lilium Philippensis.

The catalogue descriptions of the Benguet lily (Lilium Philippensis) are in many cases misleading, and in view of the part it is likely to play in the cut flower trade, some notes upon its habits and appearance, taken on the spot in its native wilds, as well as its behavior under cultivation during two years, will doubtless prove of general interest.

The plant occurs on the Benguet plateau of northern Luzon in a light yellow and rather impoverished clay, at an elevation of 4000 to 5000 feet and where during the growing season—June to November—a cool greenhouse temperature accompanied by much rain and humidity prevails.

The bulbs begin to grow shortly after the rain monsoon sets in, and in August-September the hills become spectacular with the glory of countless white, fragrant flowers. These flowers are described in some catalogues as 10 inches long, but the longest I have grown was but 8½ inches and the average of the wild and cultivated blooms does not exceed 7½ inches. The plant is also described as about one foot high, but as a rule is two feet and upward.

The slender stem in the wild state is well supported by the surrounding grasses, but in cultivation requires staking. If staking and training is carefully upright, so strong is the stem that, unless exposed to high winds, the stake may be withdrawn when the plants are in bloom, and, notwithstanding the weight of three or four immense flowers, will not greak down. One of the features that even the most glowing catalogue descriptions have failed to extol sufficiently is the charming grassy foliage that adorns the flowering stem quite to the peduncle. This, a feature in which L. Harrisii is weak, is one of the traits that will prove a formidable auxiliary in wresting from the Bermuda lily the supremacy it has so long enjoyed.

Two years ago the experiment was undertaken of forcing these lilies in the open by irrigation. Very successful results followed; the bulbs were flowered in April and May and perfectly ripe, sound and well matured bulbs were had about October 1, and quite two months earlier than any dormant wild bulbs could be dug.

During the life of this experiment, which was begun in November, proximate carnation house temperature prevailed, that is, average night temperatures of about 50° to 52°, rising at noon to 72° to 74°. During the same period, bulbs were brought down to Manila (sea level) where, to say the least, high pressure forcing conditions are the rule. Bulbs potted 2 to 5 in 6-inch pots October 10 last year flowered January 19, and others bedded out on the same day not until February 2. The previous year, bulbs planted under the same conditions January 2 bloomed in precisely 90 days. The conditions during this time were mean night temperatures of 72° to 74°, rising to 90° to 92° by day.

A variety of soils was used and equally good success was had with all. The only failure scored was with a few plants where the pot drainage was imperfect. Some of the largest and finest flowers were produced on bulbs of less than one inch in diameter, by giving them liquid cow manure as soon as the buds were fairly developed.

Quantities of water were used as soon as the shoots were an inch high. As a rule, bulbs under one inch seldom bore more than one flower, but from 1¼ inches up the rule has been two flowers, while all of the largest bulbs have produced three and four flowers.

The forcing as carried on by the only grower of cultivated bulbs in the Philippines consists in nothing more than anticipating the rainy season by irrigation and in consequence accelerating their maturity. Until this method is generally followed there can be no serious competition with the Bermuda lily. as the wild bulbs will never be available for growers till New Year's day, too late as a rule to successfully force them even for a late Easter.

Properly matured and carefully packed in sawdust, these bulbs hold well without shrinkage or decay for several months.

WM. S. LYON.

LILIUM PHILIPPENSIS.

Phoenix Roebelenii.

One of the handsomest decorative plants offered to the trade in recent years is Phœnix Roebelenii. This palm was discovered by Mr. Roebel in Indo-China, who brought it to England in 1899, and the first plant, sold at auction, brought $800. It was a fine specimen, six feet high. Since that time the plant has been commercialized, and is now within the reach of everybody. The leaves of the plant are perfect in form and look something like Phœnix Leonensis, but very much more graceful. It has been thoroughly tried under all conditions, and has been found to be one of the best house plants in existence. In the three-year-old plants the seed leaves are still to be seen. It makes a good strong pot of roots, and, unlike the common phœnix it does not grow very much above the soil with the base roots. It is extremely hardy, and does not require a very high temperature to grow to specimen plants. Many plants out in frames last year stood a temperature of 38° without harm. The cooler plants are kept, the better they seem to grow.

Almost the entire stock in America is in the hands of J. Lewis Childs, of Floral Park, N. Y., who has disposed of a large number of specimen plants and is offering a grand lot of seedlings in various sizes to the trade.

NORTH BRIDGTON, ME.—Chas L. Chadbourne will add a carnation house, 20 x 50 feet, this fall.

Boston.

DULLNESS CONTINUES.

The summer dullness still holds full sway over the trade. The buyers have had everything their own way this week, the growers realizing little in return for their goods. The early asters shortened up somewhat, but the later ones are taking their place and are coming in great quantities, there being plenty to supply all buyers. There are some outdoor carnations, but the weather has affected them greatly so that they do not sell to advantage. Some of the growers are still bringing indoor carnations to market. Roses are still improving in quality, the Kaiserin, Carnot, Wellesley and Richmond comprising the better grades. American Beauty is coming in from outside sources and there are plenty to meet the demand. Liberty still remains poor in quality. Sweet peas are not plentiful, yet there is no great demand for them, the flowers being poor. Gladioli are very abundant.

NOTES.

The annual picnic of the Park Street and Music Hall markets, August 5, were a great disappointment to both growers and retailers. When the party arrived at Child's Farm, Waltham, they were informed by the owner of the grove that the police had interfered with the plans and would allow no games to be played on Sunday. Not wishing to make the affair an entire failure they journeyed to a private lot in Lexington, where the participants enjoyed themselves as best they could under the circumstances. There were no games with the exception of a game of "scrub" between the growers and retailers. Refreshments were served throughout the day.

Edw. MacMulkin and Thos. F. Galvin supplied most of the floral tributes for the funeral of the late Mrs. Thos. W. Lawson at Scituate August 7. They consisted chiefly of lily of the valley, orchids and choice roses, and made one of the most artistic and finest displays of flowers that has left this city for many weeks.

Arthur Cowee, of Berlin, N. Y., is shipping to the retail stores of this city some fine varieties of gladioli at very reasonable prices and they are being used to great advantage in funeral work.

Johnson Knight, manager of the Music Hall Market, is spending his vacation at Nahant. E. E. Fletcher is acting manager of the market during his absence.

Norris F. Comley, of Lexington, is cutting a fine crop of gladioli, which he disposes of readily in the market at very fair prices.

Pat. Donahue, head salesman for the Waban Rose Conservatories, is spending his vacation in Framingham.

Mr. Chase, purchasing agent for Julius Zinn, is sojourning for three weeks in Nova Scotia.

W. M. Campbell has acepted the position as manager for N. F. McCarthy & Co.

E. Wood, of Lexington, is building a new greenhouse, 34 x 195 feet.

Visitors: M. Bayersdorfer, representing H. Bayersdorfer, of Philadelphia; T. D. Taylor, superintendent for Arthur Cowee, of Berlin, N. Y., and Miss Marnell, connected with the firm of Hall & Robinson, of Montreal, Can., who is here on a pleasure trip, also to visit relatives; also Thos. J. Wade, of Stumpp & Walter Co., of New York.

B.

AT J. LEWIS CHILDS' ESTABLISHMENT, FLORAL PARK, L. I., N. Y.
Phoenix Roebelenii.

Washington.

ALL EYES ON THE CONVENTION.

The retail business is very dull and interest is now divided between the doings of the local growers and the Dayton convention. The Washington delegation to Dayton will leave here on August 19, at 11:10 p. m., going over the Chesapeake and Ohio R. R., and arriving in Dayton at 8 a. m., the following day. The following will comprise the delegation, so far as known: Peter Bisset, Geo. H. Cooke, Theo. Dietrich, Christian Schellhorn, daughter and Miss Esther Gude, John Barry, Sam'l Simmonds, F. H. Kramer, Robt. McLennan, W. H. Ernest, Mr. Burdette, Chas. McCauley, Geo. Shaffer, and Adolphus and W. F. Gude. The bowling team will be made up as follows: Ernest, Cooke, Shaffer, Simmonds, McLennan and Barry.

THE FLORISTS' CLUB.

At the last meeting of the Florists' Club, Y. D. Blackstone was elected vice-president to fill the unexpired term of Louis Freeman, who declined to serve. It seems to be settled that Geo. H. Cooke will superintend the rose show to be held here in March, 1907, and that the armory of the Washington light infantry will be the exhibition hall. It is located in the building occupied by Chase's theatre, the entrance being from Fifteenth street, opposite the Sherman statue. The hall is of easy access from the Willard, Ebbitt, Raleigh, Riggs, Regent and other leading hotels.

NOTES.

F. H. Kramer has a house, 30 x 280 feet, planted with the Queen Beatrice rose. The stock is in prime condition and will be a good basis for the dissemination, which will be carried out next year. In addition to the foregoing and his three new houses, which are planted to Bride and Bridesmaid, Mr. Kramer has this year planted a considerable area to the Richmond and all his stock is looking fine. It is needless to add that back of all this there is a good rose grower in the person of Philip Buckingham, who very thoroughly understands the business. Few growers of mixed stock can boast a better showing in ferns than are now seen on this place. Three 100-foot houses are devoted to Boston, Scottii, Piersoni, Whitmani and Barrowsii ferns. There are many specimens, ranging from 6-inch to 24-inch plants, that should make glad the heart of a fern fancier. This branch of growing is well attended to by J. E. Watson.

Young rose stock as a rule is looking well. Although the weather has been very wet of late, carnations in the field do not seem to have suffered. The weather has retarded the lifting and house planting, very few as yet having been taken from the fields. Those which were planted from pots direct to the benches are looking well and have required much less work, thus far, than the field plants. There has been no great rush among the growers for new varieties, although Robt. Craig and

John E. Haines in red and My Maryland in white are pushing their way.

Martin Burch, for a number of years American Beauty rose grower with the Gude Bros.' Co., has severed his connection with that firm and accepted the position of rose grower at Alex. B. Garden's range.

Adolphus and W. F. Gude have gone to Colorado to be absent about two weeks. On their return they will include Dayton and its attractions in their tour.

The news of the death of James Hartshorne was received here with many expressions of regret. Truly, "in the midst of life we are in death."

J. R. Freeman is building three new carnation houses. In the construction of the benches, tile will be used.

S. E.

Pittsburg.

BUSINESS SATISFACTORY.

On the whole the past week was satisfactory all around. Stock is getting better and the demand seems to keep pace with the supply. Asters especially are improving. Gladioli, although as abundant as ever, are much improved in quality. Some nice roses are coming in and the same can be said of carnations. Sweet peas are nearly out of the race.

NOTES.

The last Florists' Club meeting was of a business nature. The picnic committee handed in their report and plans for the Dayton convention trip were discussed.

Clyde Morrison, of A. W. Smith's, has been playing water polo lately with the champion Homestead team.

G. and J. W. Ludwig had to work overtime several nights last week.

P. J. Demas and wife are spending their time on Lake Chautauqua.

Miss Ida Elicker, of Homestead, is on a two weeks' outing.

Visitors: Wm. Comack, Irwin; Edw. Lizeman, Latrobe, and Paul Berkowitz, Philadelphia.

M.

Washington, Pa.

Joseph H. Seaman has been spending his vacation at the Braddock farm, but can't stay away from town long enough to kill a groundhog. Foreman Geo. N. Garland and his assistants have been working from 12 to 15 hours per day planting the entire place.

The Warrick Bros. are adding one more house to their range to be used as a propagating house. This addition has a cement foundation. The balance of the range is planted to carnations grown in pots.

The Washington Floral Co. is cutting an excellent crop of blooms from its old plants.

The Finleyville Floral Co. has completed their new house and has begun planting.

J. F. Poague has added a new sign in the shape of a monogram.

Field carnations are the best seen for many years.

G.

PHILADELPHIA, PA.—Samuel Harting has a permit to make several additions to a greenhouse, 16 x 17.4 feet, 10 x 17.4 feet and 17 x 35.6 feet, at 405 Gowen avenue, for Philip S. Smith; cost, $3,000.

St. Louis.

THE MARKET.

Showers followed by warm weather has been the style of weather all week. Trade if possible is still duller than last week, funeral work being about the only outlet for flowers. The convention and our own monthly club meeting has claimed the attention of the florists in general. A large delegation is expected to leave from this city next Monday. Asters, which were last week a positive glut, are now a great deal scarcer but the demand for them is very small anyway and no high prices can be obtained. Somehow the public does not take to asters. In many instances they term them a coarse, weedy flower. Gladioli are still in the market and bringing 2 cents. Carnations are scarce and very poor in quality. Roses are very small and of poor quality, but a few cool nights will remedy this. American Beauty is improving and good blooms are in demand but hot weather does not help their keeping qualities and those left over one day are wide open and almost unsaleable. Asparagus plumosus, A. Sprengeri and smilax are selling well.

Prof. H. C. Irish.
President-elect St. Louis Florists' Club

NOTES.

The monthly meeting of the Florists' Club took place August 9 with quite a large attendance. The principal business was the election of officers for the ensuing year. The following were elected: Professor H. C. Irish, Missouri Botanic Garden, president; John Connon, Webster Grove, vice-president; Otto Bentzen, treasurer; J. J. Beneke, secretary; W. C. Smith, trustee. Among those present were Geo. M. Kellogg, Pleasant Hill; Dr. Halsted, Belleville, Ill.; Joseph Stern, of J. Stern & Co., Philadelphia, Pa.

E. H. R. Green, Dallas, Tex., is in the city looking over the ground with a view to building a range of houses to grow carnations and roses for this market. This is very much needed here as this city and vicinity is short of roses.

Alex. Waldbart, Jr., met with a very serious accident August 10. He fell out of his bedroom window and was removed to the Deaconess hospital, where his injuries were pronounced very serious.

Mrs. Theresa Badaracco has just stocked up her greenhouses adjoining the store with a fine lot of palms and Boston ferns.

Fred Alves, manager at Geo. H. Angermueller's, left this week for Niagara Falls. He will visit Buffalo and other cities.

Oscar Huettemann, of the Tower concern, reports trade good. The store is being repainted.

Will Young, of Young & Sons, leaves Saturday for the east. He will take in the convention.

Fred Foster was very busy last week with floral designs for some prominent funerals.

About 20 will leave this city for Dayton, August 20, in the evening.

Adolph Brix had some extensive funeral work for the past week.

Visitors: Chas. Koeppen, Sedalia; A. C. Canfield, Springfield, Ill.

W. F.

Baltimore.

TRADE FLUCTUATES.

There has been some considerable volume of trade, but it has see-sawed a good deal. The irregularity of the summer market being an expected condition, there is a great influx of asters and outside roses, but the bulk is of poor qualities and thousands of the lower grades naturally find their way to the dump. There are some fine gladioli sent in, but this showy flower is hard to get rid of, and the uses to which it is adapted seem limited.

MARYLAND HORTICULTURAL SOCIETY.

The event of last week was the meeting, the mass meeting it might be styled, of the Maryland Horticultural Society at Berlin and Ocean City. This numerous gathering, including about 300 persons, amongst them about 50 members of the Gardeners' Club, were the guests of Orlando Harrison, the well known nurseryman, who most generously provided for the entertainment of all comers, furnishing them a sumptuous dinner at his place and even providing for the accommodation in the hotels and boarding houses at Ocean City. The members of the club have raised a purse with which to procure a piece of plate to be suitably engraved and presented to their host as a token of their appreciation of his hospitality and kindness.

Mr. Harrison is president of the society and made an address welcoming the visitors. Later all were taken in conveyances over the nurseries, which are nearly 1000 acres in extent, and employing about 250 hands.

At the several sessions of the society addresses were made by Prof. Beattie of the United States Department of Agriculture, Prof. Waugh, of the Wapachusetts Agricultural College, and others.

All those native to the soil vaunted the pomological and horticultural advantages of Maryland and especially the productiveness of that portion of it known the land over as the "Eastern Shore."

S. B.

New Orleans.

BUSINESS DULL.

We are here as elsewhere in the midst of the dull season. Thousands of pleasure or recreation seekers have left the city and more thousands will follow by the middle of this month. The past fall and winter season was an exceptionally good one in all branches of business and all those who profited thereby take the opportunity to spend from several weeks to several months either abroad, in the mountains or at the gulf coast or seashore. Neither weddings nor funerals of note have taken place during the past two weeks, thus making it hard for the storekeepers to dispose of their regular incoming stock. In utter contrast to the months of May and June, remarkable for their dryness, the rainfall during July was the heaviest we have had for years during that month. Although beneficial to some plants, it was destructive to plants and vegetables grown in the lower section of the city and not provided with proper drainage. Our growers deserve great credit for the size as well as the exceptionally good condition of their general stock on hand. Palms, ferns, roses and chrysanthemums deserve to be especially mentioned.

NOTES.

The German Gardeners' Club, at a regular meeting held August 1, decided to give a grand outing and fishing party at Milneburg, a very popular summer resort near this city. The arrangement committee has full power to act. It is hoped that all members will take part in it and by doing so make this year's outing a complete success.

J. A. Newsham is one of the busiest growers in town. He has made extensive preparations for the coming season and the quantity and quality of his nephrolepis, pot roses and chrysanthemums are hard to beat.

The New Orleans Horticultural Society has dispensed with its meetings on account of the hot season until October.

C. W. Eichling makes a specialty of adiantums, and has the finest Adiantum hybridum ever grown here.

CRESCENT.

Nashville.

W. J. Joselyn, the superintendent and florist at Centennial park, takes the greatest interest in acquiring all kinds of rare and fancy plants with which he will stock the new greenhouses soon to be built there. His canna beds are masses of brilliant color. He has over 6,000 plants of all the new and rare varieties. He has been most successful in his landscape gardening and the beds at the park are the admiration of thousands of visitors.

A PARLIAMENT OF FLOWERS.

In the early fall in this city there will be given a state fair for which preparations have been under way for some time. There was organized some months ago a State Fair Association and this association has announced that there will be a department of flowers. T. S. Joy has been placed at the head of the management, and it promises to be one of the most attractive features. Liberal premiums have been offered for the best collection of decorative and foliage plants, for geraniums, cannas, coleus, begonias and roses in pots, not less than six in an exhibit; the best collection of assorted blooming plants; best specimens of ferns and palms; best two rustic stands and hanging baskets; best display of cut roses, carnations, asters and any other variety of flowers; for the largest and best collection and display of cut flowers, and also for the best original and novel design. All of the above are for amateurs only. Larger and better premiums along about the same lines are offered for the florists' collections. A great deal of interest is being manifested in the exhibition and it promises to be one of the most attractive of the fair.

M. C. D.

Louisville.

Business the first part of the previous week was good enough for any winter month, some very prominent people having passed away, and good stock was pretty well used up. Roses of some varieties are very good in quality, and find a satisfactory demand. The supply is plentiful. Carnations are hardly worth mentioning, although some of fair quality are seen occasionally, and have a fair demand. Asters are very good in quality, and have a very satisfactory demand, the supply also being very adequate. Lilium album and L. rubrum are coming in in small quantities, and are very desirable for funeral work. Shasta daisies are becoming scarce, and the demand has also ceased to an extend. Hardy phloxes are still obtainable in satisfactory quantities. Rudbeckias can be had by the thousand, and hardy hydrangeas are also plentiful. Green goods are in satisfactory supply.

NOTES.

The regular monthly meeting of the Kentucky Society of Florists was held at Jacob Schulz's store August 7, and the attendance was very much improved. A picnic will be given sometime in September, the date to be decided later. The Dayton convention was discussed, and there will be about eight or ten from Louisville attending.

Number eight has arrived at 1117 Goss avenue. It's a boy and Geo. Schulz is the hustling father. He will, no doubt, take to the tall timber when he reaches "23." The sympathy of the craft is with him.

Chas. W. Reimers, for many years in the growing business, has sold his greenhouses to Mrs. C. W. Reimers, and has left for Cal.

F. L. S.

A CALLA FREAK.

The leaf was as white as the flower below

LEBANON, PA.—Daniel Whiskeyman is making extensive improvements. The main building, 20x210 feet, is divided into six sections, one of which is all ready for planting to roses; the other sections will be rushed to completion. A modern steam heating plant is to be installed.

LOS ANGELES, CAL.—J. d'Ortignoc and Elmo Meserve have formed a partnership and opened a counter in the Broadway department store, their stand occupying a very prominent location. The firm has had a good start, Mr. D'Ortignoc taking full charge and Mr. Meserve furnishing the stock from his wholesale store, which is now located at 349 South Los Angeles street, where a retail department is also maintained. The floral department of the Broadway department store is located at 405 South Broadway.

OBITUARY.

Adam Kimbel.

Adam Kimbel, who made a fortune at landscape gardening, died at his home at St. Matthews, Ky., the morning of July 30, at the age of 85 years. His death was due to old age. Mr. Kimbel was born in Saxony, Germany, but came to Louisville in 1844. Mr. Kimbel was the father of five children, Mrs. Henry Weber, Mrs. Edward Wiegleb, Miss Lizzie Kimbel, G. H. Kimbel and G. A. Kimbel, and his grandchildren number 20. His wife died five years ago. Interment in Eastern cemetery followed funeral services at his late residence.

THE date of Easter next year is March 31.

OUR cover design shows a view on the grounds of the National Military Home, Dayton, Ohio.

IF the employer can not attend the convention, let him send some of his help to gather latest ideas and methods.

W. N. RUDD, of Mount Greenwood cemetery, Chicago, says the Baby Rambler rose is one of the best introductions of recent years.

A SUCCESSFUL grower says that violets should be planted indoors during August, before they get any of the disease. One dewy night brings on spot.

PECKY CYPRESS before used for benches should be thoroughly painted with crude oil thinned with kerosene. The benches should be thoroughly whitewashed before the soil is put in.

PHORMIUM TENAX in its green or variegated forms are fine tub plants for corridors, halls, balconies, etc. These plants have a character all their own and stand a great deal of abuse.

THE international conference on hybridization and cross-breeding, held under the auspices of the Royal Horticultural Society, of England, opened at London July 31. Many important papers were read, to some of which extended reference will be made in later issues.

Personal.

Dr. Augustine Henry, the well known English traveler who discovered so many new and meritorious plants in China and Formosa, arrived in New York, August 2, the object of his visit being to study the growth of certain timber trees.

In Chicago.

Visitors: Frank Stuppy, of the Stuppy Floral Co., St. Joseph, Mo.; J. L. Graver, of Shotwell & Graver, Fargo, N. D., returning from the east; A. Elberfield, of the Alpha Floral Co., and E. D. Ellsworth, with Geo. M. Kellogg, Kansas City, Mo.; Edw. Amerpohl, Janesville, Wis.; H. Ramm, representing Chas. A. Dards, New York City; John Christiany, Sheldon, Ia., and J. R. Falkenstein, Naperville, Ill.; W. G Matthews, Dayton, O.

Wm R. Smith's Victim.

Former Senator Call, of Florida, who immortalized himself by taking off a tight shoe in the senate chamber one day and hoisting a huge foot, clad in a blue yarn sock, on to his desk, heard from other senators, early in his term, that Superintendent Smith, of the Botanic Gardens, gave palms and potted plants to statesmen he liked.

Call wanted some palms and he cast about for a way to get on the right side of Smith. Somebody told him Smith was a great admirer of Burns and had a fine collection of Burns manuscripts and editions.

That was Call's cue. He walked over to the garden, found Smith and talked about many things. At the proper time, delicately and unobstrusively, he introduced the subject of Burns.

"There was the poet," he said. "For fine sentiment he has them all beaten. I read my Burns every day."

"Ken ye Burns?" asked Smith, much interested.

"I should think I did," proclaimed the enthusiastic Call. "Why, I know most of his poems by heart. They can have their other poets, but as for me, give me Jimmie Burns——"

"Jimmie Burns!" snorted the enraged Smith. "Jimmie Burns! Augh! Billie Washington! Charlie Napoleon! Sammie Jefferson! Get out of me sight, ye ignoramus!"

And Call never did get his palms.—Saturday Evening Post.

WORCESTER, MASS., November 8, 1906.—Chrysanthemum exhibition Worcester County Horticultural Society. Address Adin A. Hixon, Horticultural hall, 18 Front street, Worcester, Mass.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1906 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Situation Wanted—By first-class orchid grower and gardener, fully up-to-date; best of references. Address Key 755, care American Florist.

Situation Wanted—By good grower of roses, carnations and general greenhouse stock; good designer. Key 760, care American Florist.

Situation Wanted—By a rose grower of 17 years' experience; 7 years with the best growers near Chicago. Address Key 763, care American Florist.

Situation Wanted—By two young men, 18 and 17 years of age, with some experience in greenhouses. Address HENRY or CHAS. DUMEKE, R. F. D. Route 1, Blandon, Pa.

Situation Wanted—As private gardener, by a young man, single, 26 years old. Long experience in greenhouse and outside work. Good reference. Key 757, care Ameaican Florist.

Situation Wanted—Experienced man in general indoor and outdoor work is open to engagement in public or private garden; best of references. Address JOHN FABIAN, 2234 W. Kinzie St., Chicago.

Situation Wanted—As foreman by a practical grower of cut flowers, capable of managing a large plant; has had entire charge of leading places; first-class references as to ability, etc.; state wages. Key 762, care American Florist.

Situation Wanted—By an all-around florist and gardener, age 29; Swede. life experience in Europe and this country; to take charge of private or commercial place; first-class references. Please give full particulars in first letter. Address Key 751, care American Florist.

Situation Wanted—By manager of large private or commercial place. 23 years' experience, Europe and this country in greenhouses, nurseries and landscape gardening. Good wages expected. Excellent references. Address Key 759, care American Florist.

Situation Wanted—As working foreman, strictly sober, reliable, good education, German, single 20 years' thoroughly practical experience and good judgment in the line of horticulture, especially roses, carnations, 'mums, ferns, violets, fancy flowering pot plants and bulbs; good designer; first-class reference. Please state full particulars with wages, in first letter. Address Key 761, care American Florist.

Situation Wanted—As florist and gardener on commercial or private place; 26 years' practical experience in propagating, growing and forcing; good grower in roses, carnations, 'mums, violets, etc.; landscape gardening, vegetables in or outdoors; German, married, 40 years of age; No. 1 references. Please state particulars and salary in first letter. Address E. B., post-office, Bloomfield, N. J.

Help Wanted—Two good single men, as growers, one for carnations and one for roses. Key 756, care American Florist.

Help Wanted—A young man for store work (western state); give age and full particulars in first letter. Key 758, care American Florist.

Help Wanted—A first-class carnation grower. Wages $45.00 to $50.00 per month; send references. HASKELL AV. FLORAL CO., Dallas, Texas.

Help Wanted—At once; capable man to take charge of 20,000 feet of glass in carnations; $50.00 per month to start. J. W. DUNFORD, Clayton, Mo.

Help Wanted—One good nurseryman and good propagator wanted at our nurseries good wages to right man. VAUGHAN'S SEED STORE, Chicago.

Help Wanted—About October 1, all-'round gardener; private place, small greenhouse, but mostly outdoor work; must be sober, reliable and well recommended; $45 per month, room and fuel. J. S. BAKER, St. Croix Falls, Wis.

Help Wanted—2 good greenhouse men who can grow roses, carnations, 'mums and general stock; state experience and wages wanted. Permanent position. Aderess C. L. SHANKS, Newton, Kans.

Help Wanted—Strong boy, experienced in greenhouse, market garden, and horses; send age, nationality and experience in first letter. Good wages and a chance to improve rapidly for one who comes well recommended. Address A. B. LEWIS, Pontiac, Mich.

Help Wanted—At once; a good man for greenhouse and one landscape man to take full charge of all outside work and help in greenhouse when there is no work in his own line; permanent position and good salary to the right men; no others wanted. W. W. SEEKINS, Duluth, Minn.

Help Wanted—Gardener, married German preferred; if family, state how many Location Western Pennsylvania, near large city; comfortable home on place. Must understand care of cows and greenhouse, same heated by gas. Wages $40.00 per month and house. Last man with me 10 years. Address D., care American Florist, 1133 Broadway, New York.

Wanted—Catalogues and price lists of bulbs and supplies. PARK FLORAL, 1437 Haight St., San Francisco, Cal.

For Sale—1800 feet 4-inch cast pipe, in good condition at 10c. per foot. F. O. B. Paducah, Ky. C. L. BRUNSON & Co., Paducah, Ky.

For Sale—Nine greenhouses, dwelling house and barn, 3½ acres of ground. For particulars address P. O. Box 109, Newtown, Bucks Co., Pa.

For Rent—Four greenhouses, 11,000 ft. glass, at Cedar Rapids, Iowa, stocked and in good repair. W. M. KEELEY, Washington, Iowa.

For Sale or Rent—Store and five small greenhouses, with or without dwelling, on street car line; only florist in town; cause sickness. 548 119th St., West Pullman, Chicago.

For Sale—Worthington duplex steam pump, capacity 30-40 gal. per minute in good condition, $45.00; No. 1 receiver and fittings for pump, good as new $50.00. Dean pump for hand or steam, almost new, $20.00; 6-inch pressure regulator, used two seasons, $50.00; 2½-inch pressure regulator, $18.00. Carnation supports, $15.00 per 1000; $125.00 for 10,000. JAMES W. DUNFORD, Clayton, Mo.

HELP WANTED.

Grower of miscellaneous stock, principally tea roses and carnations, for a public institution with about 15,000 feet of glass and plenty of outside ground; position pays $40.00 per month with room and board. Send full particulars to

Key 752, care American Florist.

GLASS—Big Bargain.

Ten (10) years old. Copy of latest inspection report can be forwarded. Boilers must be removed during this summer. Price $400.00. Arrangements for delivery can be made according to conditions.

ISAAC COFFIN COMPANY,
52 Sudbury Street, : : BOSTON, MASS.

NOTICE

—OF—

STOCK HOLDERS MEETING.

CHICAGO, July 21, 1906.

Stockholders of the American Florist Company:

You are hereby notified that the annual meeting of the Stockholders of the American Florist Company will be held in the Beckel Hotel, Dayton, O., Wednesday, August 22, 1906, at 3 o'clock P. M., for the purpose of electing directors and officers for the ensuing term, and for the transaction of such other business as may come before the meeting.

J. C. VAUGHAN, Pres.
M. BARKER., Sec'y.

San Francisco.

With the exception of a solitary wedding of interest to the trade the past week, and few funerals, the realization has come to the trade that the regular summer routine is here. Stock is fairly good, and plentiful, barring roses, especially American Beauty, although some select blooms of the new crop are making their appearance. For the slow demand the market places our showing in abundance, asters, carnations, gladioli, lilies, lily of the valley, dahlias, sweet peas, candytuft and cattelyas in all their fantastic beauty, and greens, such as adiantum, asparagus and smilax. But times are coming better, I am told by Jack Sievers, of Sievers & Boland's Floral Depot, than whom I know of no better authority on the social status of San Francisco. He said: "You may quote as saying that before another October arrives you will see local society in a state of activity never before surpassed in this city, the croaker, and the dyspeptic notwithstanding. I tell you this city's time of mourning and indifference for flowers is going to end, and there will be something doing socially in town when the brown hills send the sojourners back from the taverns and farms and country houses. The florists will have a big inning the coming fall and winter,—you mark my words."

NOTES.

The one wedding of the week, referred to above, was that of Miss Florence Cole and Charles R. McCormick. Charley, as he is called by most of the florists who know him very well, had told all the principal dealers that he wanted their assistance at his wedding, and didn't want anything stingy looking, and there wasn't. The florists made the home of the wedding scene very attractive in a dress of pink blossoms and greens. In the ceremony room the windows and broad window seat were banked with boughs of glossy huckleberry, with huge clusters of deep pink hydrangeas on either side. Pink Japanese lilies were used in this and the dining room and hall. They even found the bride's long tulle veil and caught it with orange blossoms and left with it a bouquet of lily of the valley, and bouquets of pink roses for the two bridesmaids.

The prominent Oceanside grower, H. Plath, remarked this week: "I do not think there will be any lack of flowers next winter, as most of the growers on the San Francisco side of the bay are getting their houses into shape again. At present the growers experience a great deal of trouble in getting help. It seems as if most of the gardeners had been scared away by our late unpleasantness."

Both Ferrari Bros. and Schwerin Bros. are hard at work planting their houses with carnations and roses.

JESSE WHITE.

Kansas City.

TRADE CONTINUES DULL.

The summer dullness still maintains its grip on the market, scarcely anything being done in the way of business. A visit to stores and greenhouses invariably finds two or three missing from the usual force. Almost every establishment of importance will be represented at the convention. Judging from the large number who will attend convinces one of the remarkable interest manifested in the coming meeting in comparison with previous meetings. The generous rains of the past week have brought about a new color in plant life, and served to relieve the suffering on account of the heat, which until the first of the week had caused much distress among growers in particular. The market remains about the same as last noted, with the possible exception of a slight improvement in the condition of rose stock. Asters are about the only thing to be seen that are really plentiful. Some very good ones have found ready sale the past week. Prices range all the way from 50 cents to $2.50 per 100. Lily of the valley, water lilies, tuberoses and all kinds of summer flowers are to be seen, but in limited quantities.

NOTES.

The news of the death of James Hartshorne comes a great shock to all the trade. To those who were familiar with the remarkable personality of this man, falls a great loss indeed. In this city Mr. Hartshorne was well known. Progressive, and straightforward in all principles, are qualities which made him one of the foremost members of the trade. To him we owe much tribute for the great American carnation of today. All the trade unites in expressing deepest sympathy in the loss of this valuable member of our trade.

Wm. Bastin reports a fair trade for the first half of the month. The best gladioli, asters and dahlias are to be seen at his place.

Al. Broman, of Independence, sends in a quantity of fine asters. Miss M. Daley uses Mr. Broman's entire output.

Carl E. Taulis, of Muskogee Carnation Co., Muskogee, I. T., paid us a visit last week on his return from Colorado.

Milton Steineker, a gardener near Muncie, Kans., was killed by a Union Pacific train near this city August 10.

Miss Inez Logan, secretary for the Rock Flower Co., is spending her vacation near Leavenworth, Kans.

Miller E. Carter and wife will leave August 20 for a three weeks' trip to Colorado and Utah points.

E. A. Humfeld has returned from an enjoyable vacation in the northern states.

Joseph Stern, of Philadelphia, Pa., was a recent visitor.

Alex. Kerr will spend his vacation in the Ozarks.

K. C.

Toronto.

FLOWER MARKET GLUTTED.

The usual summer inactivity exists at present. With the exception of roses there is a glut of all classes of flowers on the market. Gladioli are arriving in very large quantities, asters by the wagon load, and sweet peas and lilies almost too plentifully to be disposed of. A few new roses are coming in, but they are as yet short in the stem. American Beauty is about over.

Interest at present centers in the coming convention at Guelph. We learn that the greenhouses of the Ontario Agricultural College are to be enlarged, the King Construction Co., of this city have been awarded the contract for the superstructure and the substructure has been let to another company. The cost of the work complete will be about $5,000.

The Manton Bros., of Eglinton, have dissolved partnership. Thos. Manton getting the old place, and Geo. Manton conducting the new place recently purchased, where he is at present cutting some very nice American Beauty blooms from new stock.

The Bedford Park Floral Co. has completed building and its stock looks very promising. Next week two 40 H. P. boilers will be put in.

Wm. MacKay has received the glass for his new house which will soon be ready.

J. H. Dunlop and wife are visiting in Montreal with the Knights Templar.

James Milne has been off on a two weeks' holiday.

Visitors: E. L. McGrath, Pittsburg; D. McRorie, representing W. A. Manda & Co., South Orange, N. J.

H. G. D.

Montreal.

MARKED IMPROVEMENT.

Business last week showed marked improvement over the week previous. Funeral orders continue to come in; the mortality among the children is very high owing to the hot weather. Rain has fallen very little this summer so far and plants that cannot be watered regularly are suffering badly. Very few young roses have been planted in this locality this year, most growers carrying the old ones for another year, some of them for the fifth time, and they are as profitable, if not more so, than the young ones; another advantage is that they yield flowers all the year around. The drying-off process is practiced here very little now.

NOTES.

At the last meeting of the Gardeners' and Florists' Club, the secretary announced a balance of $41 from the late picnic. The members present unanimously agreed that it was the best outing they had ever enjoyed. Geo. Trussell brought drown an armful of cut blooms of his great collection of perennials, which proved of great interest. G. Vreugde exhibited three specimen gloxinias, two of them grown from leaf cuttings.

Harris & Hopton are busy erecting their new plant. One house of 20 x 100 feet and one 18x98 feet are nearly completed. Three smaller houses will go up before fall.

D. J. Sinclair, of Toronto, was a visitor. He is going to open a commission house in St. James street, near White & Co.'s place.

James Kean and wife are mourning the loss of their baby son, aged five months.

LUCK.

BUCYRUS, O.—Pittsburg men have raised $2,000,000 to transform a 5,000-acre tract of land known as the Cranberry marsh into an immense garden. They are building a big boarding house and a railroad siding to the farm. They expect to get their returns from a 1,000-acre potato patch, 150 acres of celery, 75 acres of horseradish, 250 acres of onions and 1,000 acres of corn. To handle these growing crops a force of 500 people will be employed.

OUR WAREHOUSE

Is crowded from the basement to the roof with the best and most varied stock of **Florists's Supplies** we have ever offered.

The Factory is constantly turning out staple goods and ideas of our own in new things for up-to-date stores. We offer all the novelties of merit in the European markets, personally selected by our Mr. M. Rice, who has just returned from an extended trip abroad. Our exhibit at the Dayton meeting of the S. A. F. will include many novelties and all the best that is used in the every-day business, which Mr. Eschner will be glad to show you.

WM. J. MOORE, Wholesale Florist, 1237 Filbert St., Philadelphia.

This is the florists' time to travel and it pays to tell them what you have to offer now so that they may stop off and see for themselves. Tell them also what you will exhibit at the convention. Advertising in the best trade paper is the best way to reach the real buyers.

Salt Lake City.

"Nothing doing" is the slogan of the florists in this locality, when you mention business to them. There is a little funeral work occasionally but as yet it hasn't amounted to very much.

Special mention was given Thos. Hobday, Mgr. of Morris Floral Co., in the local papers recently, on account of his ability as a ball player in a game between the fats and leans. Tom being in the box for the fats and winning his game. As the day was an extremely hot one, Tom does not seem to have much energy left in him since the game.

The main topic of the day among the florists is a bowling match between the growers and the retailers. D. E. Law of the growers says "We'll eat 'em up," and Walter King of the retailers says "Easy Money" and so it promises to be a game well worth watching.

S. R. Lundy has resigned his position with the Morris Floral Co., and has left for Los Angles, where he has a position with J. W. Wolfskill. Sam's many friends regretted to see him leave.

The Child Floral Co., at 178 Main street, closed its doors on the first of the month. It is not known whether or not they will resume business in the fall.

Mart Erickson stayed over a day or two, while on his way east. Mart has been spending his vacation on the coast.

E. S. Kennedy of the Park Floral Co. at Denver, was here looking over the city, for a few days. UTAH.

WEEK SHOWS DECIDED IMPROVEMENT.

Much to the relief of overstocked wholesalers, business showed a decided improvement early in the week. Local buying increased considerably and the shipping trade assumed very satisfactory proportions for this time of year. With the influx of orders, stock of all kinds became scarce and prices stiffened under its influence. In addition to this, what little material is now arriving is, for the greater part, first class, and commands good summer figures. American Beauty, however, is exceptionally plentiful, as several large establishments are at present cutting heavily of old plants. Kaiserin is arriving in good quantities and in most cases looking very fine; Liberty and Richmond are scarce, while Bride and Bridesmaid are hard to be found in any quantity. Carnations have shortened up considerably, and as the stock is good, sell readily. Outdoor flowers are rapidly becoming a thing of the past. This is due to the drought which came early in the year. Gladioli are still quite plentiful and move more freely than heretofore.

CLUB MEETING.

The regular meeting of the Florists' Club was held August 9 with a hot weather attendance, President Hauswirth in the chair. The transportation committee reported on the arrangements made for the Dayton convention trip, details of which have already appeared in our columns. John J. Wolniewiz, 1826 Claremont avenue and James Hamlin, Geneva, were elected members. President Hauswirth gave an outline of the trade conditions in San Francisco and reported as to his disposition of part of the fund raised for the relief of the trade of that city. Geo. Asmus, L. H. Winterson and W. K. Wood were appointed a committee to draw up suitable resolutions on the death of James Hartshorne. After some discussion of convention matters the meeting adjourned.

NOTES.

Geo. B. Moulder, gardener in chief of the Illinois Central railroad, called last week and in an interesting talk concerning his work said that his employers were greatly pleased with and interested in the horticultural improvements along their road and there is every reason to expect this feature will be greatly extended and improved in the immediate future. Mr. Moulder has established a 10-acre nursery for the company at Flossmoor, a suburb of this city, and expects ultimately to have the greenhouses, now at Champaign, located on the nursery grounds. There is one gardener in charge of the horticultural work on each of the 18 divisions of the railroad and Mr. Moulder has invited all of them to make an eight or 10 day inspection tour of the horticultural features of the system. The gardeners of other railroad systems have been invited to participate and Mr. Moulder looks forward to this trip as being of much value to his men as well from a recreative as an educational standpoint.

Inquiry among representatives of the trade and allied trades would indicate a record-breaking attendance from this city at the Dayton convention. In some cases, two and three members of the same firm will be present. Very nearly every wholesale florist will be there in person or represented. The following is a list of prospective conventionites: E. F. and L. H. Winterson, the three Poehlmann brothers, J. B. Deamud, J. P. Kyle, Nic. Wietor, Leonard Kill, J. Zech, Chas. W. McKellar, A. L. Vaughan, C. L. Washburn, C. M. Dickinson, A. L. Randall, F. F. Benthey, P. Schupp, E. C. Amling and E. E. Pieser. Several of the above intend to take their families with them. Among the allied trades, greenhouse builders, boilermakers and glass dealers will be added to this list, with a goodly crowd of retailers and small growers.

The annual outing of the employes of the Geo. Wittbold Co. was held August 11 at Edgebrook. There was an attendance of about 175 people. Six double team wagons left the Buckingham place establishment early in the morning, carrying the crowd to a large wood near the firm's greenhouses. Games of all sorts were played and thoroughly enjoyed, although the real feature of the day was the catching of a greased pig by Wm. Schuett. It is on record that this enthusiast carried the pig in his arms to his home in Niles Center. Four colored comedians were hired to sing and dance, refreshments were provided, and everything possible was done to make the day a pleasant one for all concerned. A baseball game played between the Lake View team and the Edgebrook sports resulted in victory for the former.

All hands at the J. B. Deamud Co. for the past two weeks have been busy renovating the establishment. An entire new floor has taken the place of the old one; a handsome new refrigerator, measuring 6 x 8 x 13 feet now occupies the spot where its predecessor stood; walls and ceiling have been calcimined; several new benches installed and the firm name inscribed upon the street windows.

Edw. McMorran & Co. are receiving quite a number of orders for their powder blower. This inexpensive time-saving device is in use in some of the largest establishments and has in every case proven eminently satisfactory.

The A. Dietsch Co. is well satisfied with its present season's business. The firm claims that it has never before handled the volume of business it is now doing and all indications point to an even better trade next year.

The John C. Moninger Co. is enjoying a season of phenomenal prosperity. This firm intends to double the size of its persent quarters in the near future as it is badly in need of additional space.

The members of the Lake Geneva Gardeners' and Foremen's Association visited Vaughan's Nurseries and greenhouses to the number of 35, Aug. 15.

L. H. Winterson will take his wife with him to Dayton. After the convention they will extend their trip to New York.

Bassett & Washburn are receiving a daily cut of 3000 American Beauty. The stock is from old plants and exceptionally fine.

W. N. Rudd has been elected president of the Mount Greenwood cemetery, where he has been superintendent nearly 20 years.

Chas. Balluff, of the Eaton Floral Co., has returned from a vacation trip to Oshkosh, Wis., happy and very much tanned.

Joseph Strauss, bookkeeper for the A. L. Randall Co., took a vacation trip to Manitou Beach, Mich., last week.

Geo. Asmus had an attack of appendicitis which confined him to the house last week.

C. W. McKellar has returned from his trip to Mt. Clements, Mich.

Vaughan's Seed Store took a car load of French bulbs August 10.

30,000 Fine Field-Grown **CARNATION PLANTS**

Philadelphia.

MARKET DEVOID OF INTEREST.

Instead of one we have now had two very dull summer weeks. With the exception of the demand for funeral flowers, there has been scarcely any movement worth noting. Asters are now the flowers most in evidence, all the wholesale men having about all their available jars full of them. They move off at all sorts of prices while much of the vile smells of the ash carts is attributed to the departed shipments of previous days, which failed of appreciation. In spite of reports to the contary there are quantities of white carnations in the cooling boxes using up the ice at 30 cents per 100 pounds. Home grown American Beauty roses are now fairly plentiful and of good quality for the season. Other roses are also in full supply which would indicate that quite a number of growers are keeping their houses of teas over to run another season.

A CONSOLIDATION.

The event of the week is the announcement of consolidation of two important wholesale houses, namely; Samuel S. Pennock and the Philadelphia Wholesale Flower Market. The former is well known as the leading commission house of this city and the latter is also well known as the great combination of growers which a few years ago formed a company whereby to market its products independent of the commission man and without having to incur the expense of daily carriers. In other words, the idea was to bring the buyers to a given center and thus save all expenses of distribution. The idea was a good one which has worked well in other cities but for various reasons it ran up against a hard snag here and after a few years the venture developed into a big commission house although still bearing the name of "Market." Through all its vicissitudes the manager of the market, Chas. E. Meehan, kept a steady eye on the wheel and at last worked the craft into a safe and profitable harbor after which with great shrewdness he set about becoming owner. This he achieved and as a further step combined with Mr. Pennock, the biggest of the local wholesalers, with a view to consolidation. The outcome is the formation of the S. S. Pennock Meehan Co., chartered under the corporation laws of the state of Pennsylvania, with a capital of $60,000 to do a general commission and supply business.

The headquarters of the company will be in the S. S. Pennock building, 1608-1618 Ludlow street, which is the largest and best equipped establishment in the world, for doing a purely wholesale flower and supply business. The flower market, good will, personnel, customers and chattels will be transferred to the Pennock building, thus marking an epoch making event in the flower history of the city.

The move has been kept exceedingly quiet and the present announcement will be news to every one in the trade outside of the two principals. That it is a good move no one will deny. Each element in the consolidation has peculiar attributes in facilities and strength and the outcome cannot fail to be good for all concerned, buyers as well as sellers. It looks like a winning combination which ever way one looks at it and one of the strongest features is the unexampled facilities of the Pennock building with all its recent developments and improvements.

The officers of the new company are as follows: Samuel S. Pennock, president; Chas. E. Meehan, vice-president; Edwin J. Fancourt, Secretary; Ralph E. Faust, treasurer.

NOTES.

S. S. Pennock, who is so often noted as adding improvements to his place, has now about finished for this season at least. A large stairway to the second story has been removed and there is now no obstruction of any kind on the 5,000 square feet of floor space occupied by his rapidly growing business. In addition to this there is the same space in the basement, all cemented. This contains the refrigerating apparatus, the summer ice box and the boiler. The remainder is used for storing boxes and a hundred other purposes incidental to the business. The office department has been enlarged and fitted with all the up-to-date appliances for the systematic conduct of the business. Taken all in all, it is a model plant. Other houses are also spreading out by economizing space and adding additional room where they can.

The Leo Niessen Co. is much pushed for room but does not seem able to get it. When they moved to their present location it looked like a barn in its bigness. Now, even in the dull season, it seems as if every department was trying to borrow room from its neighbor. Even in these days of scarcity quite a stock of orchids is seen on the shelves and Mr. Niessen says that the demand for these high priced flowers is largely on the increase with them.

The Philadelphia Cut Flower Co. has taken in a portion of the yard adjoining and erected an ice box which is a cold storage room of itself. As soon as Jack Frost makes his appearance an opening will admit fresh air that will make the company independent of the ice barons until the robins come again. The office is now on the same floor as the salesrooms and is much more convenient.

J. D. Eisele has been enjoying the sea breezes of Asbury Park with his family the past week. "Taking a grand loaf," is the way he expresses it. About the size of it was that after his strenuous going over the place in the annual summer clean-up he worked himself out of a job and not caring to have the men see him standing about he hied himself and family off to the seashore.

The wholesale men held a meeting last Thursday of their protective association. They got together, as one of them expressed it, "to screw their courage up," for it will take considerable sand when the time comes to report Mr. Soandso as delinquent, particularly if he happens to be quite a buyer.

Wm. E. McKissick has changed his large box around so that it is on the side of the room, which gives a clear view to the office in the rear, allowing more light in the whole store. This is one of the neatest and best kept houses in the city.

Godfrey Aschmann sailed August 15 on S. S. New Amsterdam for Europe. He will visit Belgium, Holland, Germany, France and Switzerland and personally inspect the stock he purchases for his trade the coming season.

Chas. Poryzees, late of 29 S. Fifteenth street, has taken a lease on the basement at the corner a few doors below his old store. He will open up at his new location about September 1.

Edward Reid is off on his annual southern tour which extends as far as Jacksonville, Fla., and includes all the principle cities of the south Atlantic seaboard.

The Dreer place never looked better than at present. It is certainly a model establishment. K.

Newport, R. I.

The Horticultural Society's float, drawn by six horses, was the most beautiful in line at the carnival parade August 9. On this float was built a throne and canopy, under which Miss Gilles, the queen of the carnival, sat with her maids of honor at her feet. Six columns which supported the canopy were covered with oak and hemlock branches and decorated with pink hollyhocks, white and pink hydrangeas and the crown decorated with the same flowers. The most striking effect was produced with white and purple wistaria flowers, hanging from the roof of the canopy and columns, in shower effect. The float was beautifully studded with small electric bulbs in different colors. Dracænas, crotons and palms were used in the corners and sides. In the trades procession on the same day in the afternoon only one floral wagon was in line, representing a wedding decoration. In the center of the wagon was a large arch, and in the middle of the same a large bell, made of white dahlias, asters, Easter lilies and Asparagus plumosus, was suspended. Below this a mass of palms was arranged. The arch and sides of the wagon were decorated with laurel robing and single dahlias on a white background. On the rear of the wagon a large shield of immortelles and cape flowers showed well on a background of palms and flags. The wheels were decorated with bunting and laurel robing. A large sign on each side of the wagon reading "Ziegler's" was made of red immortelles on a white background.

Choice American Beauty, Killarney, Liberty and other popular roses. All the other staple flowers in quantities. **Unsurpassed shipping facilities.**

INACTIVITY CONTINUES.

Summer dullness was never more apparent than now. Outside of what might be expected at this season the weather has been a factor in the condition of the market, and outside products have been somewhat curtailed. Roses are still on the short side of the market. Cutting from the new crop does not show very much in the daily arrivals. Bride and Bridesmaid are to be seen at their worst, and with these varieties dominating the market in white and pink sorts buyers have to get around pretty early to get the best offerings. Bride roses continue rather short in supply and the general run of stock is considerably off in quality. Kaiserin Augusta Victoria is a good thing just now, and brings a little more money than its prototype. American Beauty is neither one thing nor the other. Special grades are short in supply, and still shorter in demand, but maximum prices are not common by any means, and toppers, unselected, close out pretty freely at 20 cents. Asters are a little stronger this week, the stormy weather having shortened the cut; but that is not saying much, some fair stock going off at minimum prices. Lilies are a fairly good thing, and while they move slowly at times they are good stock, and values run to top. Carnations are not much in evidence, except from outside plantings, and these blooms hardly bring more than a cent apiece. Nothing much in carnation stock is expected now until the second week in September. Hydrangea, tamarix, hollyhocks, tuberoses, cosmos, and phlox are among the outside offerings just now.

NOTES.

Robt. G. Wilson has disposed of his interest in his New York store at 48 West Thirtieth street to Arthur C. Dacre, who has managed the business since its opening last March. Mr. Dacre is well known in the trade as a clever floral artist and decorator of many years' experience and should be able to build up a large and prosperous business. Mr. Wilson will concentrate all his energies on his Brooklyn store, the business of which demands his entire attention.

F. R. Pierson, of Tarrytown, is so engrossed with the supervision of the construction of his two mammoth greenhouses at Scarboro that he does not expect to be able to attend the Dayton convention. The workmen are behind in the glazing, which entails the use of over 1,200 boxes of glass, and there are 40,000 carnations yet to bench.

The local contribution to the Dayton convention is likely to be smaller than last year. So far those booking Pullman car berths are: Alex. J. Langjahr, F. H. Traendly, E. V. Hallock, J. Reimels, A. Zeller, E. L. Enggren, Patrick O'Mara, O. Boehler, J. G. Esler, John Scott and Julius Roehrs, Jr., with a party of ladies.

G. J. Nordell, of Long Branch, N. J., is going out of business. His property is to be absorbed for building purposes, and his 10 greenhouses, sash, equipment and plant stock, will be sold at auction about the end of the present month. John P. Cleary will be the auctioneer.

E. L. Enggren and Phil Kessler had one or two days' fishing on Jamaica bay last week, and report a big catch. It is generally supposed that Kessler was getting his sea legs in season for his trip to Europe. He sailed on August 14 on the Grosser Kurfuerst.

Walter Reimels, of Woodhaven, L. I., is the happy possessor of a fine gasoline launch, and takes out parties of friends two or three times a week, upon the waters of Jamaica bay. He calls this his vacation.

The employes of the commission men will play a game of baseball on Thursday at Winfield, L. I., the sides taking the titles, Richmond and Liberty.

A. H. Langjahr is showing daily arrivals of a new deep pink gladiolus, named Demetrius spectabilis.

H. Anderson, of Bayside, L. I., is shipping in some grand branching asters, white and shell pink.

Alex. J. Guttman, with Mrs. Guttman and his boys, is spending a week or two at Atlantic City.

Herman Dreyer, of Woodside, L. I., is enjoying a vacation with his family in Sullivan county.

Seligman & Co. have been busy for several days repainting the interior of their store.

Ed. Roehrs, of Rutherford, N. J., has been spending several days at Newport, R. I.

A. Moltz is back from an extended vacation in the Catskills.

Chas. B. Weathered spent a few days in Boston last week.

Buffalo.

STOCK IN LIMITED SUPPLY.

Continued fine weather and a limited supply of stock is what we have at present. The lack of good rain has made asters of a much poorer quality than we want. Roses are scarce and poor. American Beauty roses are only fair, but selling well. Gladioli are arriving in fine quality now and if it were not for them and the lilies, the stores would look like a bowling alley out of business, as they are about the only flowers that fill up the stores at present.

NOTES.

A well attended meeting of the Florists' Club was held August 8, with President Neubeck presiding. All routine business was attended to and four elected to membership, which was encouraging on a warm day. The subject of our annual picnic was taken up and a committee appointed to look up a proper place and make all arrangements. The route to the Dayton convention and the number going was left to President Kasting and Messrs. Scott and Guenther. Every endeavor is being made to have a good crowd go. It looks as if Secretary Peake will go provided he can get away from the store. His trade at present is good, in fact, he and the czar of the Chippewa market are doing about all the business here this summer. Ed. Slattery, of W. J. Palmer & Son, is soaring toward Milwaukee with the Eagles. Ed. is getting a well earned rest.

Miss Ruby Mark, of Palmer's, has returned from a pleasant trip to the Thousand Isles.

The sage of Corfu honored this city with his presence last week, and still no rain.

W. J. Palmer and wife are still away and enjoying themselves.

Wm. F. Kasting was in Erie, Pa., last week on business.

Chas. Sandiford and wife are east on their annual vacation.

Nearly every store has some one away at present.

Recent visitors: R. C. Ludwig, of A. N. Pierson, Cromwell, Conn.

BISON.

Syracuse, N. Y.

The month of August so far has shown a decided improvement over July. There has been considerable funeral work and general trade has been excellent. Asters are coming in freely, and are of good quality and bring 50 cents a dozen. Carnations and roses are scarce.

W. S. & E. J. Wheaton recently made a novel floral piece, the gift of the local branch of the Daughters of the American Revolution for the funeral of Mrs. Louise Van Loon Lynch. It was a spinning wheel with 13 stars and a distaff with flax through the center. The height was four to five feet and around the wheel was the inscription "Daughters of the American Revolution" in American Beauty and white roses. The stars were made of white carnations and the flax was represented by strands of the fence roping combed out.

Superintendent A. Smith of the state fair grounds has laid out several elaborate beds for this year's fair. One of them contains the name of Gov. Higgins in various colored plants and flowers.

P. R. Quinlan & Co. report an excellent trade in their two retail stores. The work of building additions to their range is well along.

Bard & Davis have been building a new greenhouse this summer.

Henry Morris has an elaborate display of gladiolii. A. J. B.

Glens Falls, N. Y.

Dr. G. W. Little has been renovating his carnation houses. Wm. Pellet, the doctor's carnation grower, is certainly having fine success with these plants.

H. L. Crandell's carnations in the field are exceptionally fine this year. Mr. Crandell his just returned from Chicago and other western cities.

A. J. Binley is at present moving his office nearer to the street, so as to be able to put in another house. L. P.

NEW BEDFORD, MASS.—Robt. Woodhouse has secured a permit to build an addition to his greenhouse plant.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

PHILADELPHIA, PA.—W. Atlee Burpee has returned from his Pacific coast trip.

GREAT BRITAIN imported $4,000 worth of Bermuda lily bulbs in 1905, according to a recent consular report.

BLUE GRASS seed is reported to have advanced sharply something like 30 cents per bushel, $1.65 per bushel being now asked.

ILLUSTRATING the shortage of the Bermuda lily crop, a grower writes us August 8, "I do not believe 100 bulbs above seven inches in diameter could be found in Bermuda to-day.

CALIFORNIA reports of August 5 indicate that the hot week of July 15 has reduced the probable crop 15 per cent. The yield per acre will run from 150 to 250 pounds. Very little is likely to go over that.

CONSUL MAXWELL BLAKE writes from Funchal that during the first half of this year the heavy rains and unusual cold weather destroyed certain Madeira Island crops and seriously threatened the maturity of others.

THE potato crop in the Red River valley, Minnesota, is reported a fair one, as there is but little blight so far. The vines, August 7, were beginning to die indicating that the crop will ripen all right. No rot has appeared so far.

CARPENTERIA, CAL.—The lima bean crop is looking exceptionally well, but the wax beans and green pod varieties were considerably damaged by late rains in May as they were coming up and these will not be over a one-half or two-thirds crop.

BECAUSE there were some 300,000 pounds of 1904 onion seed carried over to help out on 1906 trade and since there is no surplus this year, buyers in 1907 are very likely to have to pay advanced prices. At present Yellow Globe seems especially short.

LOUISVILLE, KY.—The real estate bureau of Wood, Stubbs & Co., has been incorporated with a capital of $500, divided into 50 shares as follows: C. F. Wood 25 shares, W. P. Stubbs 15 shares, J. C. Wilson five shares and C. G. Strunk five shares.—F. L. S.

LAWRENCE, KAN.—The old firm of F. Barteldes & Co. has incorporated under the name of the Barteldes Seed Co. with a fully paid up capital of $300,000. F. W. Barteldes is president, Max Wilhelmi, vice-president and J. Uhrlaub, secretary and treasurer. The management of the Denver house will remain as before, C. R. Root, H. Warnecke and J. Wiesel. The manager of the Oklahoma City house will also remain as before, C. F. Eltzholtz.

Boston.

J. M. Gleason, of the Schlegel & Fottler Co., returned this week after his annual vacation at Mansfield, Mass.

Vacations being about over the different houses are now settling down for the fall business.

Preparations for the Seed Trade Bowling League are now under way and it will be comprised of last year's teams. B.

NEW CROP OF MY

Christmas Flowering

SWEET PEA SEED

Christmas Pink and Florence Denzer, pure white, now ready.

Those two well-known varieties are raised by over 2,000 florists all over the world.—Here is one, out of many letters received:

Dear Sir:—My Sweet Peas, which I raised from your seed, received the highest award at the Carnation Exhibit in Boston, being over 18 inches long.

JOHN T. GALE, Tewksbury, Mass.

Price ¼ lb., 75c.; per lb., $2.00

MAILED FREE.

New **Christmas Flowering Hybrids,** 20 to 30 colors, mostly blue, salmon, purple, lavender, in mixtures; also Mrs. Edie Wild, carmine, separate color, 1 Trade pkt., **$1.00;** 5 Trade Pkts., **$4.00,** not more than 5 pkts., taken in order to each customer just now. Those new Hybrids are just as free bloomers as Christmas Pink and Florence Denzer, some much larger and received first-class Certificate of Merit by the Mass. Horticultural Society, Boston, March 24.

All seed originated with me is sold in my original sealed pkts., with cultural direction, to the growers, but none for seedsmen for propagating.

Orders filled strictly in rotation.

General Circular to Melon Growers.

We find the following in the Submarine, a weekly paper published at Coachella, Riverside county, Cal., 76 feet below the sea level:

As the cantaloupe season approaches we wish to urge upon you the necessity of careful picking and packing of the melons. It is quite certain that the association will have stronger competition this year than ever before and it will be necessary for us to use great care in selecting the melons for shipment so that the high standard on which the Mermaid brand has been placed will not be lowered. The aphis have done a great deal of damage all over the valley and we will not, in all probability, have the large crop expected earlier in the season, but we will make a large number of shipments and the quality of our melons should be held up at all costs so that another year, when we have a large crop to harvest, we will still have our reputation for shipping first-class cantaloupes.

Care should be taken in the packing of the melons, after they are sorted, to make the pack neat and attractive, as an attractive crate sells better than an unattractive one. The melons should be firmly packed so they will not become loose in the crate and get bruised from handling.

Please do not let melons picked and packed in the forenoon stand all day on the ranch, but haul them to the packing house just as soon as possible, as a melon deteriorates very fast after it is picked. If possible, haul to the packing house before noon all crates packed in the forenoon and be sure to clear up each day's pack before quitting at night.

We think every member of the association realizes the necessity of keeping the quality of our melons on a high standard and we feel sure that, under the ruling conditions, high prices will be obtained for the melons this season.

Prevention of Commercial Corruption.

The house of commons lately passed through its final stages a bill, the necessity for which is generally acknowledged. The facts brought to light startled the public at the time, but many of them are only too familiar. The late Lord Chief Justice Russell, of Killowen, gave instances of goods being wilfully destroyed by corrupt employes in order that they might get a fresh commission on a fresh order. He showed that throughout British commercial and industrial life the practice of secret commissions was creating, and still is creating, gross dishonesty, and he demonstrated that without an amendment of the law the evil would grow worse, for the dishonest would drag down the honest. The present government, to its credit, declined to allow the opposition of a few members to stop so important a measure. Whether the bill will do all that is hoped from it remains to be seen, but at any rate, says the London Daily Graphic, stamps as a crime a form of corruption which is a disgrace to the character of our commercial life. We do not see how foreign dealers are to be prevented from offering illicit commissions and discounts, or how the consciences of the recipients are to be awakened.

Arguments for Free Seeds!

Congressman Trimble of Kentucky said April 30 in the senate: "Some of the greatest who are robbing the farmers in this land are among the wholesale seed dealers of this country.

"Suppose it is graft, it is the only graft in the government in which each of our 80,000,000 people have a chance to get a piece of the rake off, and that is the reason some of you are kicking."

BURPEE'S EARLIEST WHITE.—In contrast with "Mont Blanc" to the left.

New Sweet Pea.

BURPEE'S EARLIEST WHITE.

Comes into full bloom in forty-five days after the seed is planted in the open ground. The dwarf plants, sixteen to twenty inches high, are clad in rich dark green foliage and carry a profusion of the pure white flowers, borne upon strong stems six to eight inches long. Each stem has two or three of the fully expanded well-formed flowers, of good size and placed close together.

From seed planted on May 18 last **Burpee's Earliest White** was in full bloom July 1, while Mont Blanc, planted the same day, was showing only a few buds. It is also wondrously profuse blooming.

Burpee's Earliest White is not only as extremely early but also just as hardy as the famous pink-and-white Burpee's Earliest of All. It has black seed,—and is really the only clear white Sweet Pea that has! This insures a better stand, stronger and more thrifty plants.

Burpee's Earliest White will be welcomed by amateurs everywhere, both on account of its hardiness and because pure white Sweet Peas can now be had so quickly from seed sown in the open ground.

Burpee's Earliest White will be welcomed by florists for forcing, because there is no other variety so quick-growing or sure-cropping, excepting only The Reselected Burpee's Earliest of All,—described below. Like the latter, the plants under glass begin to bloom freely when only twelve inches high and continue to grow and flower profusely until, when six or eight feet tall, they reach the top of the greenhouse: the plants can then be cut back, if desired, and will make an equally vigorous second growth. ☞ All florists know, of course, that the regular varieties of Tall Sweet Peas are of no value whatever for forcing,—if early flowers are desired. ☜

Burpee's Earliest White is sold only in our original sealed packets,—and only direct to planters,—none to other seedsmen. The seed is all hand-picked and every seed should grow. **Per pkt.** (of 40 seeds) **25c,** less one-third: **5 pkts. for 75c** net. Half-size Packets: **Per pkt.** (20 seeds) **15c; 2 pkts. for 25c; 10 pkts. for 75c** net.

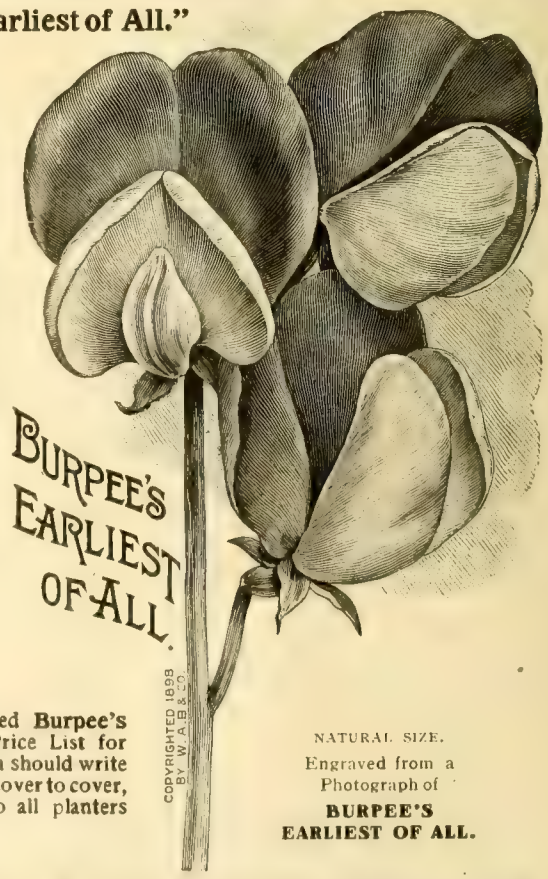
Sweet Pea—"Burpee's Earliest of All."

"Re-selected,—Extreme-Early."

Mr. Gould, the originator of **Burpee's Earliest of All,** has continued to develop the earliness and dwarf habit, until in this **Re-selected "Extreme-Early"** we have a strain as much earlier than Earliest of All as that variety is ahead of Extra Early Blanche Ferry, which again is earlier than the original Blanche Ferry. The plants of this new strain come into full flower when only 12 inches high and three to four weeks in advance of the first parent variety.

In our Trial Grounds, when the standard varieties of Sweet Peas all came into flower quite early (from spring-sown seed), this **"Extreme Early"** was in bloom on June 3 the regular strain of Earliest of All on June 9, and Extra Early Blanche Ferry on June 17. Under less favorable conditions the difference in the flowering period is even more marked. **For winter flowering in the greenhouse it is the VERY BEST of the popular pink-and-white type of flowers. Mr. Thos. Gould** has grown this strain exclusively for us, and the originator's seed of this **Re-selected** can be had only under our registered trade-mark seal. The selection is made each season and hence this strain is being constantly improved.

Per oz., 10c; 1-4 lb., 30c; per lb., $1.00.



NATURAL SIZE.
Engraved from a Photograph of
BURPEE'S EARLIEST OF ALL.

☞ If you have not received **Burpee's Blue List for 1906** (Wholesale Price List for Market Gardeners and Florists) you should write for a copy This catalogue, from cover to cover, is full of information of interest to all planters of seed.

Cyclamen Fimbriatum. Fimbriated flowers and foliage, 100 seeds, $2.50.

Vaughan's Pansies ARE BEST BY TEST...

VAUGHAN'S INTERNATIONAL PANSIES—The Worlds' Best. This is a combination of as many separate colors types, blendings and unique kinds as can be found in the world. **It is the best general mixture in existence** and is most widely known and popular. Price per oz., $10.00; ½ oz., $5.00; ⅛ oz., $1.50; trade pkt. 50c.

VAUGHAN'S CUT FLOWER MIXTURE OF PANSY SEED. Especially made from light colored Giant varieties for florists who raise for cut flowers in the house. Trade pkt., 25c; ⅛ oz., 80c; ¼ oz., $1.50; Oz., $5.50.

VAUGHAN'S "ELITE" MIXTURE. This is not a complete mixture like our International; it does not contain any pure white, yellow or any self colors, nor any other of the well known kinds. It is comprised of the cream of four Pansy specialists' choicest and most expensive mixtures and such new and novel kinds as listed above. Trade pkt., 50c; ⅛ oz., $1.00

MASTERPIECE—NEW GIANT CURLED. This strain comes nearer to "Double pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across and the color variations and combinations are odd and striking. Trade pkt., 50c; ⅛ oz., 75c; ¼ oz., $1.35; oz., $5.00

VAUGHAN'S "GIANT PANSY MIXTURE." This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain with its delicate veinings. We have spared no expense to secure the newest, richest and finest sorts. Price, ¼ lb., $14.00; oz., $4.00; ⅛ oz., 60c; trade pkt., 25c.

VAUGHAN'S PREMIUM PANSIES MIXED. Embraces all the varieties of the Fancy German Sorts. Per pkt., 25c; ⅛ oz., 80c; ½ oz., $3.00; oz., $5.50

CHICAGO PARKS BEDDING PANSIES. "Choice mixed," pkt., 10c; ¼ oz., 25c; oz., 75c; 4 oz., $2.50

NEW ORCHID-FLOWERED PANSIES. A most interesting type of Pansies of the Giant Flowered Class, containing a mixture of the most surprising, novel, unique and beautiful color combinations. The colors range in the terra cotta shadings as well as in the flesh orange, rose, pink and lilac. Trade pkt., 25c; ⅛ oz., 70c.

IMPROVED GERMAN MIXTURE. This is a mixture of three strains from different German growers and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 10c; ⅛ oz., 20c; ¼ oz., 30c; oz., $1.00

VAUGHAN'S SEED STORE,

84 and 86 Randolph Street, CHICAGO. **14 Barclay Street, NEW YORK.**

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

CHATENAY, FRANCE.—Arthur Brochet has acquired the well known nursery of L. Paillet Fils.

MORRILL, TEX.—The Morrill Orchard Co. is building six miles of railroad to connect their Ferris place with the main line at Morrill.

HUNTSVILLE, ALA.—One of the largest single orders ever received by a nursery company has been booked by H. B. Chase, of this city. The order comes from western Colorado, and is for 75,000 Elberta peach trees. The order will be filled jointly by the Chase concern and the Alabama Nursery Co.

NORTH ABINGTON, MASS.—The Bay State Nursery Co. is making many improvements to its plant on Adams street and now is arranging for the erection of a large cold storage cellar 45x127 feet. The business of this concern is growing rapidly and goods are being shipped to all parts of the United States.

BRYN MAWR, PA.—Leaping from a swiftly moving passenger train and escaping unhurt, Wm. H. Schallioll, a well-to-do nurseryman, fled to the woods nearby and after threatening several persons and causing terror in this town finally gave desperate battle with four big policemen before he was captured. For several days he had been mentally unsound.

BOSTON, MASS.—The Munson Whitaker Co. was incorporated July 25, capital $25,000, to do a landscape gardening business at 48 Winter street; $17,600 of the capital was paid in by $2,600 cash and $15,000 good will. Chester L. Whitaker, of 8 Fair View terrace, is president, and takes 63 shares at $100 each. James E. Whitaker is treasurer and clerk, and takes 50 shares, and Willard A. Munson is a director, and takes 63 shares.

A New Scheme.

At a meeting held in the court house Petersburg, W. Va., July 21, to consider the question of establishing a nursery plant in or near that town, all present were in favor of at once organizing a joint stock company by electing a president, secretary and treasurer, and of appointing a board of directors from among the shareholders at a meeting of the subscribers to be held in the future for the purpose of completing the organization. This enterprise will be of more importance to the people of Grant and adjoining counties than we might at first imagine, as it will keep thousands of dollars at home that is being taken out of the community by foreign nurseries for fruit trees, beside saving to the planter of from 25 to 40 per cent agent's commission securing the orders, with an additional cost of transportation and deliveryman's bills.

American Everblooming Hydrangea.

Botanically Hydrangea arborescens sterilis; H. arborescens grandiflora alba, of some. This strikingly beautiful hardy flowering shrub was found in the rocky woods of Pennsylvania some years ago

Hydrangea arborescens sterilis.

and transferred to a Pittsburg garden. About 15 years ago Mrs. Mary Kelley, moving with her family from Pittsburg to central Ohio, brought a slip of this hydrangea to her new home. From this small beginning dozens of fine plants have been obtained that now beautify neighboring grounds.

Hibiscus Syriacus Meehani.

On the same lawns are found abundantly fine specimens of H. paniculata grandiflora, the well known "hardy hydrangea," thus affording opportunity to compare this new candidate with the old favorite, and the comparison shows many points in favor of the new form. It is a more handsome, symmetrical plant, and of neater form and habit, attaining four to six feet in height, with about the same breadth. The plants begin to bloom about the first week in June and continue to furnish fresh flowers until well along in August.

The large size of its pure white, rather flat panicles, as shown in the illustration, render it most desirable to the florist for cut flowers at a time when white flowers are scarcest in our gardens and in most demand. The flowers possess remarkable keeping qualities. This hydrangea was named "Everblooming" by amateurs having it in cultivation many years ago, on account of its habit of blooming for such a long period, and the name seems specially appropriate

We have found young plants, grown from cuttings in winter and potted into 2½-inch pots, to bloom freely in June, and believe any plant large enough to live, planted out in May, will almost certainly bloom the same season. Our illustration is from a photo of a plant 10 years old and about 3½ feet high. The photo was taken June 18, 1906.

E. Y. T.

The New Hibiscus Syriacus Meehani.

This most remarkable althæa is unquestionably the best of the variegated leaved class. The habit is robust, compact and somewhat dwarf. Leaves beautifully variegated with creamy white, with irregular margins and irregular green centers. The light colored parts never sunscald or revert to the original green. Flowers single, 3½ to four inches in diameter, of a satiny-lavender sheen, and purple blotched at the base of each of the five petals; produced in the greatest profusion from June 1 until autumn.

It is a remarkably striking plant. Nothing finer can be found in its blooming period, or even previous to the time the flowers make their appearance, as it is most excellent for massing or as single specimens. It has proven hardy as far north as the other varieties of althæa thrive. Plants now 25 years old in our grounds have reached a height of eight feet and have always been free from insects or diseases. As compared with the old variegated leaved variety, known as Althæa Buisti (Hibiscus Syriacus Buisti) or H. variegata, whose double, dark wine colored flowers never open and remain unsightly, Meehani is immensely superior.

This variety was received by the P. J. Berckmans Co., Augusta, Ga., about 25 years ago with an invoice of other deciduous shrubs and merely labeled H. variegata. But it proved to be entirely distinct from what was known under that name, and its merits soon became so transcendant that after submitting leaves and flowers for identification to the late Thomas Meehan, who was unable to trace its origin, it was dedicated to him.

Late Flowering Hardy Roses.

ED. AMERICAN FLORIST:—

Please publish a list of hardy roses that will flower from July 1 to October 1 after the hybrids are through.

SUBSCRIBER.

Your correspondent does not state for what purpose the roses are wanted, but I take it for granted that flowers

are wanted for design work, etc. The following varieties of roses are hardy in western New York and flower continuously from spring until fall: Kaiserin Augusta Victoria, Souvenir de President Carnot, Caroline Marniesse, Coquette des Alpes, Coquette des Blanches, Clotilde, Soupert, Gruss an Teplitz, La France and Princess Bonnie.

To this list might be added the two grand bedding roses, pink and white Maman Cochet. With us these two roses are half hardy, but with protection can be carried through our severe winters safely. A good plan is to bend the plants over and peg them down, covering the plant with three or four inches of soil and again cover with a little coarse manure. F. W. V.

Des Moines, Iowa.

MARKET QUIET.

With the exception of a few funerals business has been very quiet the past week. The market is showing some very fine asters, gladioli and pond lilies which the retailers are disposing of instead of roses and carnations.

NOTES.

This vicinity was visited by a hail storm July 27, doing considerable damage to the crops. The Iowa Seed Co. reports the loss of about 900 square feet of glass.

Wm. Trillow, of the Iowa Seed Co., is passing the cigars around, the occasion being a new boy which arrived a short time ago.

The Alpha Floral Co. had a miniature lake in its window filled with pond lilies and gold fish which was quite an attraction.

C. Cropp of Vaughan's Seed Store, Chicago, was in the city Wednesday, looking after that firm's business interests here.

Miss Emma Miller of the Alpha Floral Co. is taking a well deserved vacation.

Peter Diederich has been laid up the past week, with an abscess in the throat.

A. G. Lozier had several funeral orders lately. M.

TOPEKA, KANS.—B. E. Rodman will erect an addition to his greenhouses at 1130 and 1134 Madison street to cost $400.

NOTICE.

Address communications for the **CALIFORNIA ROSE COMPANY** to **POMONA, CAL.** This is 30 miles from Los Angeles We have three railroads, Western Union and Postal telegraph, and telephone to nursery.

ROSES, CLEMATIS, AMPELOPSIS and HYDRANGEAS.
Use printed stationery. We sell at wholesale only.

JACKSON & PERKINS CO., Newark, Wayne County, New York.

HELLO! BROTHER FLORISTS, ARE YOU GOING TO DAYTON?

We want to meet you there and show you some of our new **CANNAS.** Our bank account was not large enough so that we could afford to pay the price asked for space by the S. A. F. in the fair grounds, so we had ours planted in the city parks. We have been told that no one would see them, so we thought we would tell "you all" about them so you would be interested in seeing them.

There is only 1445 of them, in 188 different varieties, all but 17 of which are of our own originating. We don't need to tell you what we think of them, but we do want to know what you will think of them, for if "you all" say they will be winners, then we will "whoop 'em up" and give "you all" a chance to buy some of them.

Southern Floral Nursery Co., BUCKATUNNA, MISS. and FRUITDALE, ALA.

NEWS NOTES.

WILKESBARRE, PA.—Robt. Ellis is rebuilding his greenhouses.

SNOHOMISH, WASH.—Fred Gall is making a substantial addition to his greenhouse.

LENOX, MASS.—Mrs. Geo. Westinghouse is having built one orchid house 16 x 90 feet.

ZANESVILLE, O.—The Town Improvement Association held its annual flower show August 8.

CHAMBERSBURG, PA.—Byer Bros. have just added three new carnation houses, each 25 x 100 feet.

FINDLAY, O.—S. J. McMichael has taken out a permit to erect a greenhouse that will cost $1,500.

TEMPLETON, MASS.—Geo. W. Sutherland is erecting a small new greenhouse to be used for raising violets.

ROCKLAND, MASS.—Sidney Littlefield is building a greenhouse, 33 x 200 feet, on his premises on Adams street.

MILWAUKEE, WIS.—C. B. Whitnall's summer plans have been disarranged owing to the illness of his son Gordon.

OCONOMOWOC, WIS.—Otto Sylvester has built new carnation houses and will grow this stock principally in the future.

LOUISVILLE, KY.—Chas. W. Reimers has sold his business and plant to M. D. Reimers, and the latter takes possession at once.

LAKE FOREST, ILL.—The meetings of the Horticultural Society of Lake Forest will be held the first Tuesday of each month hereafter.

WOBURN, MASS.—Lewis R. Jackson, of 57 Bow streeet, has commenced another greenhouse just south of the one he now operates.

MILWAUKEE, WIS.—F. P. Dilger is adding two houses, aggregating 5000 feet, with new office and other handsome improvements.

GRAND RAPIDS, MICH.—Eli Cross has completed arrangements for opening a retail flower store at 25 Monroe street September 1.

SAUGUS, MASS.—J. C. Holmes has recently added a large greenhouse to his establishment on Main street and has planted it to chrysanthemums.

OAKLAND, CAL.—J. W. Young has sold out his floral business in this city and will probably engage in another line, as he already has some mining interests.

LIVONIA, N. Y.—The eighth annual exhibition of the Floral Society was held at the Prettejohn opera house August 2 and 3 on a larger scale than ever before attempted.

FITCHBURG, MASS.—Mrs. C. E. Mansfield recently became very popular with the lady clerks of the Chamberlain-Huntress store, having presented each with some very fine sweet peas.

DANVERS, MASS.—Walter P. Barker has sold eight and one-half acres of land to Beverly people, who expect to erect several large greenhouses in the near future.

WORCESTER, MASS.—Norcross & Stratton have rented their greenhouses on South street to Thomas Heskey, of Hopedale, formerly head gardener for the Draper estate.

PONTIAC, MICH.—A. B. Lewis has moved his store from 28 South to 81 North Saginaw street. He will hold a chrysanthemum opening in his new place in the fall.

LOS ANGELES, CAL.—F. B. Raymond has purchased a half interest in Miss Ethelind Lord's business, the new title of the firm being the Ethelind Lord Floral Co.

BUFFALO, N. Y.—The Central Park Floral Co. has been incorporated with a capital stock of $2,000 by Julius A. Goehle, Henry Hart and Clara C. Hamocher.

WARREN, O.—A. T. Hoyt has been compelled to lease his place and locate at Chautauqua, N. Y., on account of hay fever. Thos. H. Phelan, a former employe, is the lessee.

PORTLAND, ORE.—The school girls of this county gave a sweet pea exhibition in the city hall July 27 and 28. The judges were F. V. Holman, A. J. Clarke and Mrs. F. R. Holmes.

MELROSE, MASS.—The Melrose Horticultural and Improvement Society has arranged for its fall flower show to be held in city hall on the afternoon and evening of September 3.

CARROLLTON, MO.—H. L. Kennedy, of Kennedy & Farnham, rode to Chicago on a bicycle recently. Mr. Kennedy made the trip in eight days, riding an average of 60 miles a day.

CLINTON, MASS.—Chas. A. Needham has completed plans for the cellar which will be built near the greenhouses. The building will be used for raising and storing special kinds of plants.

COLORADO SPRINGS, COL.—Gov. McDonald will be requested to open the annual flower show to be held in North park Aug. 22 to 24, inclusive, by the El Paso County Horticultural Society.

NEWTON, MASS.—Prof. F. W. Rane, of New Hampshire, with an associate has purchased a considerable amount of land on Moffat road with the intention of building several large greenhouses.

SMITH'S GROVE, KY.—Mrs. Geo. B. Moulder is conducting the business in aquatic plants formerly carried on by her husband, who is now the Illinois Central railroad's gardener in chief.

IPSWICH, MASS.—Benjamin Fewkes, who is now 82 years of age, was recently thrown from his buggy, breaking an arm and a leg. His wife and a young lady were with him, but escaped unhurt.

RICHMOND, IND.—A half dozen new greenhouses are now in course of construction west of the city by E. G. Hill & Co., on the tract of ground recently purchased. They will be completed in August.

MILWAUKEE, WIS.—Emil Welke is completing a new house 21x82 feet adjoining his store on Third street. His residence, store and greenhouse will be heated by hot water and Reimer has the contract.

OMAHA, NEB.—Warrants for the arrest of four prominent citizens, among whom was A. Donahue, were issued recently charging them with misdemeanor in failing to cut the weeds about their premises.

BARABOO, WIS.—This town will entertain the State Horticultural Society August 29. The programme promises to be one of unusual interest. A particular effort is being made to secure a good display of fruits.

BALTIMORE, MD.—Architect Geo. Clothier, Jr., is preparing plans for a conservatory to be erected by Napoleon B. Lobe to adjoin his residence, at the corner of Callaway avenue and Liberty road, Forest park.

WOBURN, MASS.—J. W. Howard has filed a claim for $500 for damage caused, as he alleges, by the poor condition of Russell street which he is forced to use in conveying roses from his greenhouses to his Somerville store.

NORTH ABINGTON, MASS.—Work has begun on the building of a new greenhouse, 50 x 300 feet, on Adams street for Sidney Littlefield. It will be connected with another large greenhouse, which was erected some time ago.

MONTPELIER, VT.—The sole ownership of the Montpelier Greenhouse has passed into the hands of Alex. Broadfoot. For the last two years Mr. Broadfoot has been a partner in the business with the late Alex. Emslie, of Barre.

WATERVILLE, ME.—H. R. Mitchell & Son are having erected a thoroughly modern greenhouse, 40 x 200 feet. The frame and support are to be entirely of iron with glass in the sides and ends as well as overhead, and the benches are to be of cement. The Lord and Burham Co. has the contract.

PITTSBURG, PA.—The Pittsburg Plate Glass Co. alleges its miners were intimidated and is sueing the union for coercion. In a suit filed August 6 it alleges that its business has been interfered with although the men are paid the union scale of wages, but the union has not been recognized by signing the scale.

CELINA, O.—From further details of the new greenhouse establishment in course of erection at this place for Ernsberger Bros., Decatur, Ind., we find that the amount of glass is 25,000 square feet. The houses are to be built on the short roof plan with pipe posts, the gutters to be eight feet from the floor. These houses are intended mostly for lettuce and cucumbers. The Indiana plant contains about 35,000 square feet of glass and is mostly used for the same crop.

DAYTON, O.—The Advance Floral Co. has recently bought the establishment of H. M. Altick, consisting of eight greenhouses, which will be moved to Baker avenue and West Third street. The plant will be heated by hot water, the boiler being placed on the ground level, the circulation to be effected by means of an electric motor. This season pot plants only will be grown, but it is the intention to add carnations and roses next year. Mrs. C. M. Shaefer, with a stand in the Arcade market, takes care of the retail end of the business.

HIBISCUS SYRIACUS MEEHANII

WE now offer to the trade our new hardy variegated leaf Hibiscus Syriacus Meehanii. This plant attracted much attention when exhibited at the American Nurserymen's Convention at Wes Baden, Ind., and American Florists' Exhibition at Asheville, N. C. Foliage beautifully variegated; never sun-scalds or reverts to the green; flowers single, very large, satiny lavender; bloom during four months; prices on application. Orders booked now.

P. J. BERCKMANS CO., Inc., Fruitland Nurseries AUGUSTA, GA.

CUT FLOWER BUYERS

We can offer you 25 years of experience in the handling and shipping of cut stock; the product of some of the most successful growers that ship to the Chicago market; the absolute guarantee that your interests will be looked after and advanced and, best of all, we can offer you "RELIABILITY." Can we not mail you our PRICE LIST EACH WEEK? It will be of interest to you and bring us your REGULAR ORDERS. A postal is sufficient to secure it.

Samuel S. Pennock,

THE WHOLESALE FLORIST OF

1610-12-14-16-18 Ludlow St., PHILADELPHIA.

MABELLE, NEW PINK CARNATION FOR 1907.

COLOR . . . . . A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color.

SIZE . . . . . 3 to 4 inches in diameter when established.

ODOR . . . . . Pleasing, but not strong.

STEMS . . . . . Invariably strong, but always graceful, ranging from 12 to 30 inches during the season.

HABIT, ETC. . . . . A very quick, active grower, making specimen plants in a short time, even from late cuttings On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start.

PRODUCTIVENESS Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown.

Stock limited. Delivery January 5 to 10 and later.

Price **$12.00** per 100: **$100.00** per 1000.

QUERIES.

Ventilating a Greenhouse.

ED. AMERICAN FLORIST:—

Kindly let me know if it will be necessary to have ventilators on the north and south sides of a greenhouse 22 x 75 feet, the length of which runs east and west.

B. B.

As a rule it will answer if there is a row of ventilators in the south wall, but if to be used in the summer it will often be helpful if there is a row in the north wall. If there is a row of ventilators in each of the side walls a single row at the ridge will suffice. L. R. T.

To Heat Two Greenhouses.

ED. AMERICAN FLORIST:—

I am about to build two greenhouses, each 14 x 60 feet, and would like some information as to the amount of steam or size of boiler that will be required.

M. R.

The size of boiler and the amount of radiation will depend largely upon the temperature desired, as well as upon the minimum temperature of the outside air. If 60° will suffice, a steam boiler rated for 500 square feet of radiation will answer in zero weather. For radiating surface it will be advisable to use one 2-inch flow and six 1¼-inch returns. The latter can be carried on the walls or under the benches as will be most convenient. L. R. T.

Care of Pipes During Alterations.

ED. AMERICAN FLORIST:—

We heat our houses with hot water water system and wish to make some alterations this summer. We must drain the water from our boiler and pipes. The pipe joints are made with Portland cement. Do you think they would be damaged by draining off the water and exposing part of them to hot sun?

H. & M.

The great difficulty of handling the pipes as proposed comes more from the breaking of the joints by rough treatment than from excessive heat. However, if to be exposed for a long time, it might be well to place the pipes in piles and, if no lumber is available for the purpose, throw a little soil or waste material of any kind over the joints.

L. R. T.

Steam Trap Versus Pump.

ED. AMERICAN FLORIST:—

I have a range of glass containing almost 18,000 linear feet of 1-inch pipe with the necessary supply and return pipes for a steam heating plant. We at present use a steam pump to return water to boilers, which are a little too high for good circulation by gravity. Would a steam trap be better than pump or more economical? What size of trap or how many would be needed?

D.

If the steam trap is properly put in there will be little difference between the results secured from the trap and from a steam pump so far as economy is concerned. As a rule, however, the trap would not require nearly the attention that would be necessary for a steam pump and ordinarily under the conditions mentioned would be most satisfactory.

One trap would answer for the entire system if it can be placed on a common return. It will be safe to use one that is rated a little higher than the total amount of radiating surface.

L. R. T.

LANCASTER, PA.—I. N. Glick reports that trade this season has been far better than in any previous years, having sold out of everything in vegetable plants. In the most varieties he found the demand much greater than the supply.

OUR PASTIMES.

Minneapolis Versus St. Paul.

The annual team bowling match between teams representing Minneapolis and St. Paul took place Tuesday, Aug. 7, at the Pfister alleys, St. Paul, and was won by the St. Paul team for the third consecutive time. Three years ago funds were subscribed for the purchase of a handsome gold medal, which was to be played for until one team had won it three times. The medal is now the property of the St. Paul club.

Each member of the winning team also receives a gold button, emblematic of bowling, with the date and year engraved thereon. The score:

The score:

ST. PAUL.	1st.	2nd.	3rd.
O. J. Olson	162	167	133
C. Haugen	108	118	122
H. Purvogel	127	125	155
F. Schulze	136	144	121
H. Schieman	123	151	171
MINNEAPOLIS.			
O. Carlson	121	135	130
W. Desmond	118	115	147
G. Malmquest	120	93	118
H. C. Will	109	132	187
O. Thoreson	121	128	155

Totals—St. Paul 2,063
Minneapolis 1,929

O.

At Salt Lake City.

The growers and retailers rolled the first games of their series August 7, and the way the growers went after the retailers was something fierce, taking all three games by a good margin. After the regular games King and Butchart of the retailers got revenge by defeating Law and Sowadzki two out of three games. Following are the scores:

Growers.	1st.	2nd.	3rd.
Law	132	149	171
Sowadzki	165	131	155
Adams	108	93	100
Rieben	103	144	108
	508	517	534
Retailers.			
King	116	105	100
Chas. Alt	123	78	104
Al. Alt	109	120	76
Butchart	134	172	156
	482	475	436
Growers.	1st.	2nd.	3rd.
Law	98	159	95
Sowadzki	140	114	151
	238	273	246
Retailers.			
King	95	106	117
Butchart	164	127	133
	259	233	250

UTAH.

At Philadelphia.

Well, it is all over at last, the fifth contest taking place on the home alleys on August 9. The averages of the men trying for places are as follows. The first five compose the team, the sixth being a substitute. The averages for all games bowled in five matches of three games each, two on the home alleys and three on public alleys and always at new pins: Robertson, 170; Connor, 168; Falck, 166; Graham, 161, Adelberger, 160; Dunlap, 156; team average, 165. These men are all Simonpure florists and every one of them have been members of the Florists' Club of this city for 10 years and over. Wm. Robertson is a private gardener and has already been on several victorious S. A. F. teams. Dennis Connor is an old-time florist and now represents the Lord & Burnham Co. in this city. He has also greatly aided his club in winning bowling honors at the convention contests. Wm. Falck has been with Pennock Bros. the past six years and is one of the leading bowlers of the club. Wm. Graham was almost born in a greenhouse, having followed the business all his life. This is his first convention contest. Frank Adelberger, a grower and retailer, is the pride of Milwaukee, at least he was the boy who turned the tide and snatched the prizes Chicago had almost cinched on that memorable occasion. Substitute Dunlap is a florist from his boyhood days, having learned the trade with Pennock Bros., where he now has charge of the decorative branch of the business. These are the men who are to represent this city, with their records. Now let us see if all of the other clubs can give as clean a bill of health.

K.

At Chicago.

The last of the series of bowling games, arranged to ascertain the best players for the national tournament, was played August 14, when the appended scores were made. A number of the members have not had the opportunity to play the required number of games and may do so August 19 at Bensinger's alleys, at 8 p. m.

Player.	1st.	2nd.	3rd.	4th.
Winterson	118	157	184	135
Stevens	173	158	181	212
Wilson	145	144	157	189
Balluff	164	181	177	137
Scott	175	152	137	...
Hauswirth	139	191	144	...
Stollery	179	147	174	...
Klunder	162	144	128	...
Pasternick	114	103	127	...

EXTRA QUALIFYING GAMES.

Player.	1st.	2d.	3d.	4th.	5th.
Winterson	162	128	130	174	153
Stevens	160	219	165	226	...
Balluff	143	130	...	...	...
Wilson	111	...	...	...	...

The scores of the ladies were as follows:

Player.	1st.	2nd.	3rd.
Mrs. Asmus	107	121	89
Mrs. Scott	90	99	94
Mrs. Kreitling	110	78	89
Mrs. Winterson	113	72	113
Mrs. Hauswirth	123	99	78
Mrs. Stollery	62	71	77
Miss Moore	114	85	93

At St. Paul.

The bowling contest for individual bowlers which took place at the Pfister alleys August 3 was quite an event. It was part of the programme of the Twin City florists' outing and was participated in by about 60, including ladies. It turned out to be a very warm evening and the scores suffered some for this reason. The winners were the following:

Oscar Carlson	171
Peter Hansen	160
Henry Schieman	151
O. J. Olson	140
C. Hansen, Jr.	136
F. Schulze	135

Most strikes, Oscar Carlson.
Most spares, O. J. Olson.
The ladies:
Mrs. Buelow, first.
Miss K. Hansen, second.
Miss Will, third.
Mrs. N. C. Hansen, fourth.
Miss F. Johnson, fifth.
Miss Seeger, sixth.

E. P. Holm won the men's booby prize and Miss Schulze the ladies'. After the various prizes had been distributed everybody adjourned to the Aquarium cafe where a supper had been arranged for, which was enjoyed very much, after which an informal programme of speches, funny stories and solos by Henry Puvogel and Chris Bussjaeger was enjoyed.

B. Eschner of M. Rice & Co., Philadelphia, was a guest and besides contributing some very witty stories donated a very generous prize to the bowling contest. Besides Mr. Echner we had as visitors: E. O. Lovell and son, Grand Forks, N. D.; A. N. Kinsman, Austin, Minn.; and M. D. Ausburger, Peoria, Ill.

WATCH US GROW.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever he select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907 I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa.

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old, $ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size: their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2 50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them: can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls,
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

Nephrolepis Barrowsii, 6-in., large, ready for 7-8 in. 50c; 4-in., large, 25c.

MR. EDITUR:

i spect u hev noticed how hot the Wether hes bin fur a spl a long back an wondered wat in —— is the matter with the weather man, so i thot ide gist rite and explain the kaws of this hot time. You see the Boss Chap in the loer regins hear'n tel uv mi Vintilatin fixins an sint tew me fur a hul lot uv em and puttin them in his place hes turned awl his extra heat on tew We uns on the out side and Kooled his place of so that hese rit tew me to send down some uv mi Bilers as Hades was now so Kule the little Imps at times was shiverin. He awl so Wanted a few bushel uv mi new Sash Hinges as the sulfer hed rusted out all the old sort and there want a gate left for the little Divels to swing on.

Now the best think for folks on earth to do is to use mi heatin and Kulein fixings if they want to be comfortable. they don't hev to wate till tha go to Hel to git to use them. tha work just as well on earth. Send tew me for a Katalogue.

Mi name is **J. D. CARMODY,** an I live in
EVANSVILLE, IND., Near Posey Kounty.

CUT FLOWER BOXES
EDWARDS FOLDING BOX CO
MANUFACTURERS
PHILADELPHIA, PA.

TAKE THIS 3-4 SPAN HOUSE.

You can get a good idea of how the curved eave line and airiness of construction makes the heretofore ugly, almost impossible ¾ span house, one of attractiveness—one that will fit in almost any place on your grounds.

U-Bar Greenhouses are the Best Greenhouses Built

because no other greenhouse has the curved eaves—the lightness of construction, giving a house not only unequalled in attractiveness, but excelling in growing qualities.

We are the sole makers of U-Bar Greenhouses.

Pierson U-Bar Company
DESIGNERS AND BUILDERS,
U-BAR GREENHOUSES,
Metropolitan Building,
4th Avenue & 23rd Street,
NEW YORK.

The Standard

VENTILATING MACHINERY

The original machine with self-oiling cups. The most powerful, least complicated, very compact, with ease of operation.

The New Duplex Gutter

Over six miles in use and highly recommended by all. The only Drip Proof gutter on the market.

The Standard Return Steam Trap

It has no equals for simplicity or its working. Catalogue free.

E. HIPPARD, Youngstown, Ohio.

International Flower Show and Convention at Chicago, November, 1908.

Convention Proceedings.

The twenty-second annual convention of the Society of American Florists, which opened August 21, is now a thing of the past. Notwithstanding a number of drawbacks, not the least of which was the exceedingly hot weather, for excellence and volume of work this convention must be recorded as well in advance of any held heretofore. The attendance was very large, much larger indeed than any record will show, because the arrivals continued to the last day and many of those from nearby towns were not members of the society before this meeting. The membership therefore has been materially benefited. It is pleasing to note the growing popularity of this annual event with the ladies, as the number who attend grows very perceptibly each year. The trade exhibitors report excellent business, and the local members worked hard to make the visitors comfortable during their stay.

Vice-President Altick, of Dayton, in opening the convention, expressed his regret that the weather man had temporarily marred the plans of the Dayton brethren, but that every arrangement had been made, to the smallest details, to insure the comfort and pleasure of the visitors.

Judge Chas. W. Dale, of Dayton, officially represented the mayor of the city, who was absent from home, in extending a hearty welcome on behalf of the local brethren and the citizens generally. He said:

"I do not know of a body of men who bring more of sunshine and happiness to a community than your organization. Your work is a noble one and is being better appreciated every day. At this moment many an invalid is caressing a rose whose perfume and beauty are contributing to his or her recovery. Your zeal in your chosen vocation gives many indications of your progress. Especially is this true in the city of Dayton, essentially a city of homes. Around almost every cottage you may see flowers and plants, indicating a wealth of refinement and culture within. Only the other day the National Cash Register Co. began a stupendous work in floral ornamentation, and I want to improve this opportunity to thank that company for their great and glorious work, the results of which we are reaping in generous measure. The day will come when our citizens will show, by substantial recognition, their appreciation of that work. When a toiler comes home at night, after a hard day's labor, whether a business man or a working woman, and amid green surroundings inhales the perfume of beautiful flowers, the pleasure is like that of a traveler in the far east who finds an oasis in the desert. We think we have a beautiful city here; we know we have a splendid citizenship; and we want you to see us in our everyday life and to enjoy your visit here. We will assist you in that. The keys to our gates we leave with you. Go where you will, it will be a pleasure to us to meet you within our portals at all times."

Prof. J. F. Cowell, of Buffalo, N. Y., made the response on behalf of the S. A. F. He claimed to voice the sentiment of every member of the society in expressing thanks for the very kindly welcome extended on behalf of the citizens of Dayton. He said he had attended many conventions and receptions, but he thought the one of today, in one respect at least (the weather), was the warmest he had ever experienced. He continued:

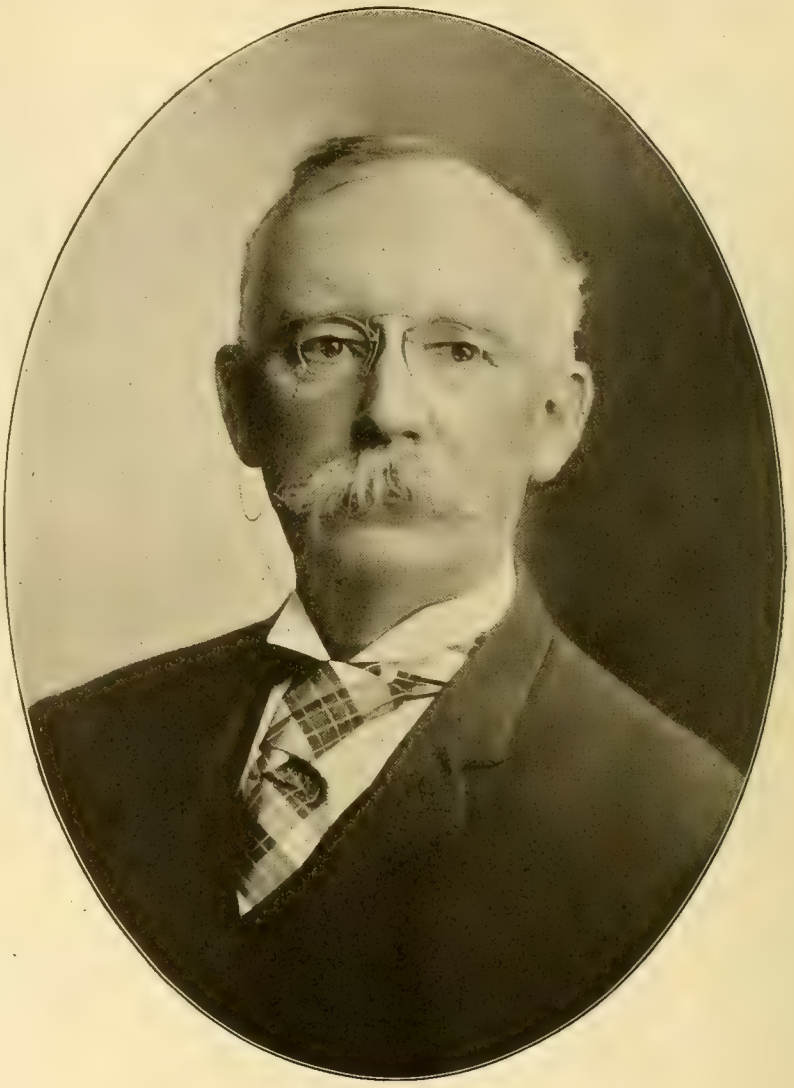
"We have heard a great deal about Dayton. We have heard that it is a beautiful city, a well governed city, a well "registered" city in fact, and a clean city. And if cleanliness is next to godliness it must be a godly city. We come here to see and to learn. We expect to drink deeply at your fountains and to go away full of new ideas and incentives. What we may do to in some measure recompense you for your kindness we will do gladly. It has been said that it is more blessed to give than to receive, and your best recompense will be in the fact that you have given freely to the strangers within your gates. Like the cruse of oil and the handful of meal in the parable, knowledge expands as we impart it and leaves our capital untouched if not increased. We come here from all parts of this broad land, and we shall go away filled, as I have said, with new ideas. We shall go to the north, to the south, to the east and to the west and spread broadcast through the land the seed which we have gathered from your fertile fields. Our business here which brings us together is primarily for the discussion of certain questions which we deem of importance to the interests which we represent. We come to renew old acquaintances and to make new ones. We come to fresh fields to learn what our brethren are doing in this part of the world. Our real business is to beautify the earth and such contiguous planets as we may lay hands on."

The regular convention proceedings were then opened with the president's address, when President W. F. Kasting spoke as follows:

The President's Address.

Twenty-two years ago, I am told, while this society, then new-born, was holding its first meeting in the city of Cincinnati, there came an invitation to visit this city and view the horticultural wonders as set forth at the Soldiers' Home and other places. Today we come again, increased a hundred fold, to see not only the Soldiers' Home but to see and admire the thousands of plantations in the streets, squares, and about the homes of the people; plantations that have made the name of Dayton known the world over and have been an incentive for other municipalities and an object lesson in civic cleanliness and good taste. Amid such surroundings, I trust our deliberations as a society may be immeasurably pleasant and profitable, and that as individuals we may carry away impressions and ideas that will enable us to improve our own environment, and add to the beauty and general attractiveness of the localities which we severally represent.

Twenty-two years is not a long time in the history of a nation or even of a society, but it is time enough, I think, to prove the solidity of our organization, and time enough for us to have profited by our experiences. If there was a need for an organization of this character 22 years ago, how much greater is the need today, with the enormous expansion of our business that has come in two decades. The wisdom of the fathers has been amply demonstrated. We cannot afford, however, to stand still and rest upon the records of the past,—we must put forth new efforts and keep pace with the great procession



WM. J. STEWART.
President-elect Society of American Florists.

The question comes home to us, Are we making the most of our opportunities as a society with such broad aims and splendid possibilities? Would it not be well to pause in our congratulations and our commendations and indulge in a season of introspection, and see if we cannot profit by example and still further augment our usefulness? Let us take a leaf from the history of our host city and clean up our back yard and put our front in such condition that it may be an example to all men, to the end that we may become a greater power for good in the years that are to come. Let us take an example too by the work that the National Cash Register Co. has done, and in our wider dwelling place be leaders in improvements and education.

There are certain questions that seem to crop up annually for our consideration. Occasionally one is settled; but its place is immediately taken, and it is only by constantly hammering at them that they are brought into shape and disposed of. I propose briefly to refer to the more important of these problems, not with the idea of giving you any fresh argument, but rather that they may not be allowed to rest until they are solved. Among the questions discussed by my predecessors, perhaps none are of more general importance than those pertaining to education.

We as professors of garden art and craft will continue to be looked up to as those having authority to speak, and it devolves upon us to be prepared, so far as we may, to lead in all matters relating to horticultural pursuits. How we can best reach the people who are interested in garden matters, and increase their love for vernal surroundings, as well as to implant desire where no desire exists, are questions of vital importance and worthy of our most earnest consideration. Exhibitions as a factor in education are of the greatest value. It is by the eye more than by the ear that people are instructed. The value of local displays of plants and flowers, happily on the increase, has done much to stimulate a more general love for flowers and incidentally has increased the demands for the product of our art. Probably still more far reaching on account of its greater publicity and more elaborate and comprehensive

JOHN WESTCOTT.

Vice-president-elect of the Society of American Florists.

display would be an exhibition of national character, where the entire country would be represented.

NATIONAL FLOWER SHOW.

This question of a national flower show was again before the executive committee of the society at its recent meeting in this city and was discussed at some length, and I believe no one dissented from the statement that such a show would be of the greatest benefit to our interests. The result of this discussion will appear in the committee's report.

I trust that the details of plans for such an exhibition may be perfected in the near future and that such an exhibition may be held in one of the great centers of the country. Perhaps it is unfortunate in some respects that our interests have been drawn away or divided by the organization of special societies devoted to the culture of individual flowers.

I mean that in many cases the interest in the special has overcome the interest in the general and to an extent has weakened the Society of American Florists when it comes to a question of combination of all interests in one grand exhibition. Everyone with the welfare of our society at heart must labor for the closer union between the vigorous offspring and the mother society.

TRADE EXHIBITIONS.

Trade exhibitions, as they are now conducted at our annual meetings are undoubtedly of great benefit to our members. They should be fostered, and the exhibitors should be encouraged in every way consistent with the proper disposal of the business of the convention. I deem this subject of so much importance that I would recommend that special time should be given to the examination of the exhibits. The exhibitors come to our meetings under a great expense, they contribute largely to the success of our meetings in interest and financially and I believe they should have more consideration at the hands of the makers of the programme. We can well afford to call one day exhibitor's day.

We have made an experiment with outdoor exhibits and while the result to date is not satisfactory, yet I believe the idea is good, and that this outdoor exhibition can be made an important adjunct. In order to make an exhibit of this kind a success time must be taken for proper preparation. A manager, preferably a local man, must be appointed and the ground be available a year before the date of the meeting, or better still a year and a half. It would then be possible for fall planting or even spring planting to be done and plants could be properly established and prepared. This would enable our nursery men to make an exhibit of trees, shrubs and such other hardy material as they might desire to show. A good exhibition of this character would add greatly to the interest of our meetings.

THE EXPERIMENT STATIONS.

The experiment stations are doing much valuable educational work and their publications are far reaching. Every member of this society should avail himself of his opportunity to obtain the bulletins of his state stations, and use his best endeavor to see that these stations are provided with sufficient funds to carry on their work. Any one who has been familiar with the work of these institutions for the last 20 years, cannot have failed to notice the improvement in the quality of work done.

The complaint made by many that not enough work is done for the benefit of the florist and gardener is not so just as it was years ago, and in many instances more work along these lines would be done if it were called for. If you don't ask for it, you don't get it.

HORTICULTURAL EDUCATION.

Horticultural education as provided in the public schools, is perhaps rather disappointing to many. But it must be remembered that in the common schools only the merest rudiments are possible and just how much horticultural instruction is given will depend largely upon the people of the locality.

Nature study is in many cases really a primary course in horticulture. Some of the states are showing considerable activity along this line and probably the great need at the present time is a more efficient plan of work and better prepared instructors. The way to stimulate the work is by arousing public sentiment in behalf of the value of such study.

Mr. Hallock, who has given this subject much thought, will discuss the question at the meeting.

FREE SEED DISTRIBUTION.

Free seed distribution by the federal government still continues, but the efforts being made will if continued, I doubt not, effect a discontinuance of the practice and the "hoary fraud" will be done away with.

Members of this society should give their representatives in congress no rest until this practice is abolished.

PARCEL POST.

A parcel post would be to the great advantage of most people in the trade and a great boon to the general public. The elements opposed to such public convenience are well known, and so far they have had influence enough to prevent the passage of a law establishing it. The agitation should be vigorously continued, and every means taken to impress our law makers with the necessity for such a method of transportation. We are behind most civilized countries in this respect.

THE TARIFF.

The tariff on many articles which are of necessity imported or which might be imported to our great advantage still continues to vex us. Some of the duties

imposed are indefensible as a whole and others should be greatly modified. This subject has been before us often and some action has been taken in regard to it. I would recommend the appointment of a committee whose duty it should be to lay before the proper authorities our views on the subject, and urge a revision of the duties whenever possible.

SECRETARY'S OFFICE.

To return to our more immediate concerns it seems to me that we might profitably make some improvements in the conduct of our business affairs. The secretary's office is one of the most important, as well as one of the most permanent within the society, and some changes in the manner of business might be well undertaken. In the first place the secretary should give bonds, as is now required of the treasurer. His books and vouchers should be presented at the meeting of the executive committee for audit in connection with the accounts of the treasurer, and not be passed upon in bulk in the hurry of the annual convention. His accounts as published should be itemized, for every member has a right to know just how his money is being spent and to whom it is paid. He is now the purchasing agent of the society and no check is kept upon his expenditures. I would suggest that all bills be approved by the president before going to the treasurer for payment.

The secretary should be paid an adequate salary sufficient to renumerate him for his time and incidental expenses, and this should cover them all, so that bills for extra help, etc., would not be presented to the society.

AMENDMENT TO THE BY-LAWS.

The amendment to the by-laws, in regard to manner of conducting elections will come before you at this meeting and should not fail of action as recommended by the executive committee.

MEMBERSHIP.

Membership in the society should stand high. I cannot approve of the suggestion that the dues of certain members should be made less than that of others. While it is desirable to include in our membership everyone engaged in ornamental gardening, whether he be on a private estate, in a public position or a wholesale warehouse, and an effort should be made to induce all to join; yet it should be understood that all come in on an equal footing and with equal responsibilities before the law.

The so-called private gardener of today may be a public gardener to-morrow: the employe of to-day may be, and indeed he probably will be an employer to-morrow. Nor should it be forgotten that many an employe is better able to pay dues than are some employers.

It seems to me that this society should keep in closer touch with the local organizations. It should have its accredited agent at the local flower shows and other gatherings of the craft. This would, I believe, tend to add new material to our membership list and add to the prestige of our society.

In order to do this it would be necessary to have some one detailed for the purpose, and probably the secretary of our society would be most available for the purpose.

P. J. HAUSWIRTH.

Secretary-elect Society of American Florists.

STATE VICE-PRESIDENTS.

More care should be taken in the selection of the state vice-presidents. At the present time one or two men from a locality get together and place in nomination the person who might suit them best, which as a rule is equivalent to the appointment for this office made by the president. This should be left entirely to the selection of the president when he takes office. If he should not be acquainted sufficiently with a person from that territory or locality, it would be then the duty of the president to ascertain from the local society, if there be one, or a few other members in the craft, which is the best man for him to appoint.

The office should stand for something and men should be appointed who will give some time to the interests of the society.

BUSINESS METHODS.

Business methods need more study on the part of many men engaged in trade, and this is just as true of the flower trade as of any other. No man can hope to succeed who does his business in a loose and slipshod manner. No matter how small the business, a set of books should be kept so that the standing of the business can be found at a moment's notice.

Fair dealing both in buying and selling should be the rule, and a man's word should be a little better than his bond. Do not abuse your credit and you will find business very much easier. It is true in business as well as in other things that "A good name is better than riches."

I have alluded elsewhere to the trade exhibitions, and now I wish to add a few words in regard to their management. I believe that the society should take entire charge of these exhibits. It should appoint a manager, pay all expenses and receive any profits that may arise from such exhibitions. I am well aware that the custom has been otherwise for the reason that the money realized was needed for the local people to help on the entertainment. Now this is all wrong. Is it not time that this society adopted an attitude of independence and dignity? Is it not time that this society selected its own place of meeting without putting it up to be auctioned off?

Would it not be possible for us to go in peace and quiet in some central point and hold our convention and entertain ourselves? There are many places that we could visit with profit to ourselves, where to be entertained by the local members of our trade would mean ruin to them. This entertainment has in my opinion grown to be a great evil, and an unjust tax upon the communities visited.

H. B. BEATTY.

Treasurer of the Society of American Florists.

It has reached a point in the emulation of hosts where it behooves us to stop and consider the cost. Today there are only a few of the larger cities that dare invite a convention, because they cannot make the lavish preparations that have become customary. A reform in this direction is needed.

SPORTS.

Perhaps another reform is needed in the matter of sports. Do we not give rather too much valuable time to our games? It is true that they are enjoyable to many but it hardly seems necessary to travel a thousand miles to play a game of baseball or shoot a few clay pigeons. I think we have gone a little too far, and have suffered in the attendance at our meetings because of the time taken for these contests. I do not mean to decry the social value of our meetings but is there not a better way of enjoying each other's society and one less embarrassing to the business of the convention?

I believe that these contests should be curtailed and so arranged as not to interfere with the working of the society as they do at present. Take a day for them if necessary, but let that day be after the business of the meeting is completed.

HORTICULTURAL PRESS.

One factor in the general success of our business that has received but scant notice from us, is the horticultural press. While it may be said that these publications are purely commercial enterprises, and outside of our societies, yet they contribute a great deal to our success as a society, and contain from time to time the condensed essence of the brains of our more prominent members. They are certainly worthy of our support in every way, and no man in our business can hope to be posted in the doings of our craft without the weekly perusal of these papers, advertisements and all.

IN CONCLUSION.

A word more and I am finished. It has occurred to me that many good ideas are broached after the work of our committee is done. How easy it would be for every member of this society having opinions in regard to the management of the business of the society to put his ideas in writing and send the same to the secretary at any time previous to the meeting of the executive committee.

In surrendering the office of president to my successor, I want to thank you for your loyalty and consideration, which has made the work a joy and will leave with me a most pleasant memory.

The presentation and reading of the annual reports of Secretary Stewart and Treasurer Beatty occupied considerable time. The acceptance of Secretary Stewart's report was, on motion of Mr. Hammond, accompanied with a complimentary recognition of his efficiency and fidelity throughout so many years in the service not only of the society but of all its ramifications.

A telegram was received from Theo. Wirth, of Minneapolis, a member of the executive committee, conveying his sincere wishes for a successful, progressive and joyful meeting.

The reports of state vice presidents, so far as received, were ordered printed without being read. The reports were from the following states: North Carolina, Michigan (south), Massachusetts (east), New Jersey, Louisiana, Florida, Alabama, Georgia, Massachusetts (west), Texas, Connecticut, West Virginia, Nebraska, Kansas, Illinois (north), Wisconsin and Colorado.

Reports from comimttees were called for. The peony committee (through Mr. Lonsdale) reported that no report had been prepared. The committee to co-operate with committees of the seed and nursery trade in conferring with the National Council of Horticulture, reported, through Chairman Alex. Wallace, of New York.

A brief discussion of the report followed. J. C. Vaughan, a member of the committee, spoke of the immense advantage to horticural interests from the dissemination of reliable information through the medium of the press bureau, under Mr. Burdette. He said he fully appreciated this means of encouraging the popular taste for floriculture and explained that most of the newspaper editors to whom the articles were sent had published them and had asked for more. Individual subscriptions of $10 had been made to carry on this work, and the Council of Horticulture had given $200. He suggested a contribution by the S. A. F. of a similar amount.

A motion by Geo. Watson, of Philadelphia, as amended by Mr. Vaughan, was then adopted, accepting the report, recommending an appropriation by the executive committee of the S. A. F. of $200, and providing for the appointment in the National Council of Horticulture of two members of this society.

The following appointments of judges on exhibits in the trade display were announced: Wm. Scott, of Buffalo; Harry Papworth, of New Orleans; and Chas. Vick, of Rochester, N. Y.

Chas. T. Guenther, of Hamburg, N. Y.; F. C. Weber, of St. Louis, and Ed. Wintersen, of Chicago, were appointed judges on the essays to be presented for the competitive prize. The last named was a substitute for John B. Nugent, of New York.

As judges on the gold and silver medal prizes offered by the Dayton Florist Club for a paper on the best landscape gardening the following were appointed: Prof. J. F. Cowell, of Buffalo; Edwin Lonsdale, of Philadelphia; and H. D. Steeley, of Indiana.

Secretary Stewart's Report.

I find it hard to realize that this is my nineteenth annual report as secretary. Twenty years seems a long period to look forward to but very short in retrospect. Some of us who are awakening to the fact that the years count up very rapidly, and that conventions

come around with alarming frequency of late, can, however, take some comfort from Emerson, who wrote, "We do not count a man's years until he has nothing else to count." It is to be hoped that each and every one of us may be immune from year-counting for many

ON THE DAYTON CONVENTION GROUNDS.

a year to come. To quote again from the same writer "Nothing great was ever achieved without enthusiasm." Dayton has been long on enthusiasm for many months, hence this truly great convention-opening and, as nothing is more infectious than healthy enthusiasm, it is not difficulty to forecast what kind of a convention this, which we are now entering upon, is to be.

You all know that the executive board met here last spring, that we had a good time as executive boards always do and that we worked long and hard as executive boards also always do. The programme as printed discloses but scantily the quantity and quality of oratory which is promised as various important subject are brought forward and he who thinks to stay away from any of the sessions little realizes what he will miss.

Among the recommendations of the executive board is, first, the proposition that at all future trade exhibitions the net profits therefrom be equally divided between the national society and the local organization. As this is a matter to be adjusted by the executive board each year, the main reason for referring to it here is that organizations planning to invite the society to visit their city may know before extending any invitation and govern themselves accordingly. The outdoor exhibition, wisely planned, earnestly urged and generously carried out so far as the society and its Dayton friends are concerned, has not received the support that should have been given it by the plant growers and nursery trade generally. The project is on right lines, however, and should have another opportunity next year.

Recognizing the need of some better method of instruction in horticulture for young men, a sub-committee was appointed to confer with agricultural college officials and it was voted to recommend to the society the appropriation of a sum not to exceed $150 toward the carrying out of some practical plan of cooperation between the society and the college.

According to instructions by the society the scheme of numbered badges and a key book for members has been put in operation, and the name of every member registered up to July 15, 1906, appears therein. Other important transactions by the executive board are fully disclosed in the various items of the official programme which you have before you.

Acting on the complaint of members living in New Jersey an effort was made by your secretary and also by the chairman of the legislative committee to get from the manager of the U. S. Express Co. a statement as to the reasons for the increased transportation charges made since last May upon flower shipments from New Jersey points to New York City, but we were met with a very decided refusal to give any explanation. A second request did not even received the courtesy of an answer. Your secretary, in the meantime, had been making some investigations as to our privileges under the new interstate commerce act, and on August 7, 1906, wrote the following letter:

Boston, August 7, 1906.

Mr. T. M. Jones, Mgr.,
U. S. Express Co., New York.

Dear Sir:—

Referring to my letter of May 11, 1906, which thus far remains unanswered, I beg to state that in view of the universal sentiment of protest on the part of flower growers who are members of our society and whose interests are affected by the advanced rates on flowers shipped from producers in your territory to the New York wholesale market, I deem it to be my duty to submit this matter to the interstate commerce commission for investigation and adjustment, as is my privilege under the provisions of section 13 of the amended interstate commerce act, unless I receive some assurance from you that the increased charges complained of will be given prompt reconsideration by your company.

It would give me much pleasure to be able to report to our society at its convention in Dayton, Ohio, August 21-24, that the United States Express Co. had taken this question under advisement and hoped to be able to announce a rate which would be generally accepted as just and reasonable.

Yours respectfully,
(Signed) WM. J. STEWART,
Secretary.

This letter shared the same fate as its predecessor, no acknowledgment having thus far been received. I believe we have a good case. I know that the interstate commerce commission will give us a prompt and courteous hearing, and hope we shall be able to arrange for the appearance of our legislative committee with necessary witnesses before that body at an early date.

Regarding the domestic-grown narcissus bulbs exhibited by a Virginia grower last year which were submitted to J. F. Sullivan for testing, that gentleman reports that he gave them identically the same treatment that was given the foreign-grown bulbs of the same varieties and found the flowering qualities to be of substantially the same good value.

OUTDOOR EXHIBITS AT THE DAYTON CONVENTION.

Medals have been delivered during the past year as follows:

Robert Craig & Son, Philadelphia, a bronze medal for Ficus pandurata exhibited at the Washington convention.

Louis Wittbold, Chicago, a bronze medal for mechanical watering system exhibited at the Washington convention.

Dennison School, Washington, D. C., through Miss Susan B. Sipe, bronze medal for superior work in gardening, October 16, 1906.

Through the American Carnation Society, January 24, 1906, a silver medal to Cottage Gardens Co. for carnation Mrs. C. W. Ward and a bronze medal to Cottage Gardens Co. for carnation Robert Craig.

Through the Cincinnati Florists' Society, March 10, 1906, a silver medal to R. Witterstaetter for carnation Afterglow, and a bronze medal to Minneapolis Floral Co. for rose Miss Kate Moulton.

New plant names have been registered since my last report as follows:

August 26, 1905.—Canna, Uncle Sam, by Conard & Jones Co., West Grove, Pa.

October 14, 1905.—Rose, Triumph, by Peter Henderson & Co., New York.

October 28, 1905.—Canna, Vesuvius, by Peter Henderson & Co., New York.

November 11, 1905.—Cannas, Prince of India, Jupiter, Venus, by Conard & Jones Co., West Grove, Pa.

December 23, 1905.—Carnations, Winsor, Helen M. Gould, White Enchantress, by F. R. Pierson Co., Tarrytown-on-Hudson, N. Y.

January 27, 1906.—Rose, Helen Good, by United States Nursery Co., Mich, Miss.

February 17, 1906.—Sweet peas, Mrs. Alex. Wallace, J. K. Allen, Christmas Enchantress, Jack Hunter, Mrs. C. Wild, Christmas Meteor, by A. C. Zvolanek, Bound Brook, N. J.

February 24, 1906.—Roses, Christine Wright, Columbia, by Hoopes Bro. & Thomas, West Grove, Pa.

March 10, 1906.—Canna, Superior, by Wm. Schray & Sons, St. Louis, Mo.

March 10, 1906.—Alternanthera aurea robusta, by Wm. Schray & Sons, St. Louis, Mo.

March 10, 1906.—Sweet peas, Secretary Wm. J. Stewart, Mrs. W. W. Smalley, by A. C. Zvolanek.

March 24, 1906.—Cannas, Dr. Wm. Saunders, Ottawa, by Conard & Jones Co., West Grove, Pa.

April 7, 1906.—Sweet peas, Mrs. Wm. Sim, Mrs. F. J. Dolansky, Samuel J. Trepess, Maxwelton, Caroline Whitney, by A. C. Zvolanek, Bound Brook, N. J.

April 21, 1906.—Sweet peas, Mrs. J. F. Hannay, Marion Staniford, Miss Jossie Riedley, by A. C. Zvolanek, Bound Brook, N. J.

April 22, 1906.—Cannas, Mount Washington, Mount Zion, Henry George, Telegraph, Inman's Choice, Britta, Golden Cluster, Sensation, Uwanta, Thelma, Pansy Read, Crown of Gold, Admiral Togo, Gold Mine, Queen or Orange, The American Duchess, Golden Dawn, Royal Neighbor, Golden Express, Amalgamated, Ohio, Buckeye, Dayton, Nymphea, Leader, Royal Bronze, Fairhope, by the Southern Floral Nursery Co., Fruitdale, Ala.

May 5, 1906.—H. P. Rose, Charles Wagner, by Conard & Jones Co., West Grove, Pa.

May 12, 1906.—Dendrobium nobile Mrs. Lars Anderson, by Duncan Finlayson, Jamaica Plain, Mass.

June 9, 1906.—Cannas, Queen of Beauty, Flashlight, Majestic, Bronze King, Giraffe, Moonlight, Blushing Belle, Southern Pride, Alabama, Mississippi, Bucatunna, Gen. Kuroki, Tom L. Johnson, Emerald, Perfection, Daybreak, Sunbeam, Jumbo, Gov. Patterson, Chautauqua Jr., by the Southern Floral Nursery Co., Fruitdale, Ala.

June 23, 1906.—Nepholepis Fruckii and Beryii, by Henry C. Fruck, Grosse Point Farms, Mich.

June 14, 1906.—Rose, Aurora, by Paul Niehoff, Lehighton, Pa.

July 21, 1906.—Hydrangea arborescens alba grandiflora, by the E. G. Hill Co., Richmond, Ind.

August 11, 1906.—Laelio-Cattleya, Lady Bernice, by Lager & Hurrell, Summit, N. J.

BEFORE THE PRESIDENT'S RECEPTION AT WELFARE HALL.

We have lost nine members by death since my last report:

C. G. Nanz, Louisville, Ky., August 17, 1905.

J. C. Rennison, Sioux City, Ia., February 24, 1906.

Aug. Rhotert, New York, April 9, 1906.

C. H. Kunzman, Louisville, Ky., May 22, 1906.

Geo. H. Rowden, Wallingford, Conn., May 17, 1906.

Hans Bartels, Milwaukee, Wis., April 30, 1906.

Abraham Hostetter, Manheim, Pa., April 18, 1906.

William Schray, St. Louis, Mo., May 15, 1906.

James Hartshorne, Joliet, Ill., August 6, 1906.

Other membership statistics are as follows: Whole number of members as per printed report for 1905, was 889, of whom 114 were life members. This included four life members and 173 annual members who had been added or reinstated during the year. The acquisitions are credited as follows: Alabama, Colorado, Iowa, Louisiana, New Hampshire, Rhode Island, one each; California, Missouri, North Carolina, Virginia, Ontario, Manitoba, two each; Indiana, Wisconsin, three each; Connecticut, Georgia, Kentucky, four each; New Jersey, eight; Illinois, 10; Maryland, Michigan, 12 each; District of Columbia, Ohio, 13 each; Massachusetts, 18; New York, 26; Pennsylvania, 29.

The number of lapses during the year of members who had paid dues for the previous year but either resigned or failed to respond in 1905, was 111. These delinquencies are chargeable to the various states as follows: California, Kentucky, Maryland, Maine, Rhode Island, Texas, Ontario, one each; Colorado, Georgia, Kansas, Oklahoma, South Carolina, Tennessee, two each; Connecticut, Iowa, Minnesota, New Jersey, three each; Indiana, four; Michigan, five; Wisconsin, seven; Ohio, eight; Pennsylvania, nine; New York, 12; Missouri, 13; Illinois, 22. The list of names of delinquents in each state was sent from the secretary's office to its respective vice-president. A few of the vice-presidents reported; from the majority no response was received.

It is, I think, generally known among the members that I have decided not to be a candidate for re-election to this office which with rare and generous confidence you have placed in my keeping for so many years. Since that day, 19 years ago, in Chicago, when I had the privilege of thanking you for the honor you had conferred in unanimously selecting me as the successor in office of such men as E. G. Hill and Edwin Lonsdale, many changes have come about. Very many loyal workers for the society whose friendships were so dear to us have been called away never to return. In meditating on the changed conditions and tremendous horticultural growth of this epoch in the society's

CHILDREN'S GARDENS, DEPARTMENT OF AGRICULTURE, WASHINGTON, D. C.

Class ready for home with the products of their plots.

history I feel that, while the ambitions and aims of the pioneers have in some respects fallen short of realization, yet, as societies go, this society has done well. The balance in the treasury as reported at the Chicago convention 19 years ago, was $32.35. With this, our treasurer's report which you are about to listen to, will compare favorably.

Our membership, however, is not what it should be. Everyone identified with any department of horticulture is a sharer in the general benefits which the existence and the direct work of the society has made possible, and it is much to be regretted that thus far no effective means has been found of bringing the great mass of those engaged in those pursuits to do their share toward the support of the institution which has done so much for them and might do so much more if it could only have the necessary backing.

In seeking to be relieved from the responsibilities of the secretaryship I can assure you that my interest in the society's welfare will continue unabated, and I shall be ready at all times in the ranks to do whatever lies in my power for the grand old society whose burdens and whose joys have been so peculiarly my own for so many years.

Treasurer Beatty's Report.

The report of Treasurer H. B. Beatty, Pittsburg, Pa., was read as follows:

GENERAL FUND.

The balance on hand January 1, 1905, was $2,923.07. The receipts of the year were $2,403.44. The year's disbursements amounted to $1,843.55, leaving a cash balance on hand December 31, 1905, of $3,482.96.

LIFE MEMBERSHIP FUND.

In the life membership fund the balance on January 1, 1905, was $2,819.96. The receipts of the year were $911.56, increasing the life membership fund to $3,731.52.

This left a total cash balance on hand December 31, 1905, of $7,214.48, deposited as follows: Home Trust Co., Pittsburg, $1,184.89; Citizens Banking Co., Oil City, $2,298.07; and Germania Savings Bank, Pittsburg, $3,731.52.

The President's Reception.

On Tuesday evening the members of the convention and their ladies were the guests of the National Cash Register Co. Far Hills, the country home of the president of the company, John H. Patterson, had been appointed as the place of entertainment, but a heavy rain necessitated a change to Welfare hall at the company's works. Here the visitors were cordially received by Manager A. W. Sinclair. Members of the Dayton Florists' Club and their families and members of the company's board of directors were present. Supper was served in the mammoth employes' dining hall, where covers were laid for 1,200. There were the usual accompaniments of floral decorations and vocal and instrumental music. General Manager Wm. Pflum greeted the guests.

He said the presence of the convention was an honor to the city, and the company felt specially honored by their visit on the present occasion. He assured them that Mr. Patterson, who was now abroad, would have been pleased to meet each and every one of them and gain some points of interest to him in landscape gardening, as this was a feature of welfare work in which he and his company had taken a deep interest. By means of it they had changed the character of the locality about their works and increased the value of property there. They believed that a great manufacturing establishment should stand for civic improvement, and they regarded landscape gardening as an essential feature of civic improvement. He said the florists could do much to promote the improvement and beautification of cities, and they deserved to be encouraged in their work.

In beautifying the neighborhood of its factory the National Cash Register Co. had found that it pays them to give their people beautiful and healthful surroundings because men and women are thereby better fitted and better able to carry on their work. Viewing it from a money standpoint, he said, it was well known that, in the selection of a residence, people always gave the preference to a beautiful suburb planted in grass and shrubbery, and in such localities real estate did not deteriorate in value. He expressed the belief that no organization was in a position to do more good to humanity than the one he now addressed and he invited criticisms and suggestions from its members to aid his company in their work of outside ornamentation.

George Asmus.

Chairman convention sports committee.

The president's reception, which followed Manager Pflum's address, was participated in by all present. President Kasting was assisted in receiving by the officers of the society and their wives, and everybody was afforded an opportunity for a hearty handshake and a few moments of social converse with the official head of the society and his associates. An exhibition of stereopticon views of Japanese, Chinese and American landscape gardening, scenes in the great train robbery, and a series of lantern effects showing what had been accomplished in beautifying the neighborhood closed the entertainment, which was a most enjoyable one throughout.

Wednesday's Proceedings.

The session opened with the reading of a letter from F. R. Pierson, of Tarrytown, N. Y., of the committee to confer with committees of the nursery and seed trade associations on legislative matters. He stated that Mr. Page, of the latter, had been active in an effort to obtain the pound rate on seed catalogues, but that, because of the pressure of legislation at Washington it had been deemed advisable not to press for action at present. On motion of Alex. Wallace, the report was accepted and the committee continued.

Jas. L. Cowles, secretary of the Postal Progress League, was invited to address the convention. He advocated the pending postal bill (H. R. 4549) consolidating third and fourth class mail matter at the third class rate. He said that the United States Express Co., under an existing contract with the English postoffice, is carrying English postal packages from New York city all over this country, weighing from 3 to 11 pounds, at a common rate of 24 cents. He thought therefore it was reasonable for florists to demand an 8-cent-a-pound parcel post here. In 1874 all kinds of merchandise were handled by the United States postal service at the rate of one cent for two ounces or eight cents per pound, yet today the rate on general merchandise is 100 per cent higher than it was then. He charged that the backwardness of our postal service was because for many years its management had been in the hands of its foes and the appeals of commercial organizations for relief had been disregarded by the postal committee of the house of representatives. He urged his hearers to secure a reform by making the matter an issue in the coming congressional elections.

After remarks by Messrs. Hammond, Vaughan and Scott, a resolution, offered by the latter, endorsing the pending postal bill, was unanimously adopted. Reports of state vice-presidents were received from Mr. Dorner of Indiana and Mr. Ludwig of western Pennsylvania.

The convention then proceeded to select a meeting place for 1907, and after the claims of the applicants for the honor had been presented at much length, a ballot was taken and resulted in the choice of Philadelphia by the following vote: Norfolk, 1; Chicago, 1; Jamestown, Va., 1; Niagara Falls, 101; Philadelphia, 131.

Nominations of officers for the ensuing year resulted as follows: For president, Wm. J. Stewart, of Boston (one nomination); for vice president, John Westcott, S. S. Pennock and Leo Neissen, of Philadelphia; for secretary, H. M. Altick, of Dayton, Ohio, and P. J. Hauswirth, of Chicago; for treasurer, H. B. Beatty, of Oil City, Pa.

The amendment to the by-laws reported by the executive board, providing for additional ballots when there has been a failure to elect, was adopted.

On motion of Mr. Scott, of Buffalo, a telegram of sympathy was sent to Patrick O'Mara, of New York, ex-presi-

dent of the S. A. F., who had been detained at home by the recent death of his brother.

An address on "Teaching Horticulture in the Public Schools," was read by E. V. Hallock, of New York. A brief discussion emphasizing the salient points of the address was participated in by Benj. Hammond, of Fishkill, N. Y.; Alex Scott, of Buffalo; E. G. Hill, of Richmond, Ind.; Wm. F. Gude, of Washington, D. C.; and on motion of Mr. Hallock, two additional members, Prof. John F. Cowell, of Buffalo, N. Y., and F. E. Palmer, of Brookline, Mass., were added to the committee on the subject.

During the day a communication was read from the Detroit Florists' Club, referring to the ravages of a disease which has attacked the aster plants in the field, and usually termed stem-rot. It first appears just beneath the surface of the soil, where the stem suddenly becomes black, and gradually eats into the heart of the stem. The club suggested that an appropriation be made for a scientific investigation of the disease. E. A. Scribner, of Detroit, moved to defer action in view of the vast importance of the subject, which motion was passed.

At the evening session the prizes offered by the Dayton Florists' Club for the best landscape designs were awarded as follows: A gold and a silver medal to Mr. Shibe, of the National Cash Register Co.; a gold medal to G. H. Talyor, New York; a silver medal and a bronze medal to Mr. Fridenberger, of the N. C. R. Co.; and a bronze medal to Olmsted Bros., Brookline, Mass. Fred E. Palmer, Brookline, Mass., read an interesting paper on "The Ideal Private Gardener and his Work," which was accorded a vote of thanks.

The session was mainly occupied in the discussion of recommendations in the president's address. The one for a committee on tariffs was discussed at length. J. C. Vaughan moved its reference to the present committee on relations with the nurserymen's and seedmen's associations for action.

E. V. Hallock and Benj. Hammond asked that it be definitely determined whether the committee was to ask for a tariff reduction on a staple article like glass, or merely to try to remedy arbitrary rulings and penalties.

The discussion took a wide range. E. G. Hill denounced the Dingley tariff rates on glass and other florists' materials as iniquitous, that on glass having been doubled without reason. He urged that congress be memorialized for relief.

Col. W. W. Castle, of Boston, suggested that the effective way of applying a remedy for onerous tariff conditions was not by petitions to congress that are generally pigeon-holed, but by personal solicitations of congressmen by their florist constituency. He believed the time had come when the whole country realized that the tariff was no longer for the protection of American labor, but only for the advantage of monopolists and trusts. Manufacturers, not artisans, were its beneficiaries. He denied that American labor needed protection in the manufacture of any article whatever, whereas the only man who paid the tariff tax was the consumer or user of the article. He recommended that the committee of the society go to the committee on ways and means at Washington and demand relief from the glass tariff in the name of the florists and horticulturists of the country and of the millions of capital invested in their industry.

ANNUAL EXHIBITION OF THE NEWPORT HORTICULTURAL SOCIETY.

Best specimen palm, awarded first prize.—See page 219.

E. G. Hill endorsed the statement that remedial legislation was only to be had by plain talk to congressmen about tariff robbery. He spoke of his own efforts in this direction at Washington and asserted that popular sentiment favored tariff revision.

W. H. Elliott, of Brighton, Mass., argued that before informing congress of its views on the tariff the society should determine what its views were so that it could demand a specific rate. He said that when the last change in the tariff on glass was made the manufacturers wanted an increase from one cent and a quarter to one cent and a half a pound, but made the figure a quarter of a cent higher in the expectation of a shave of a quarter of a cent. The full rate was given them, the effect of which practically was to double the market price. The society should now agree to ask for a reduction to either one cent or one cent and a quarter.

Wm. Scott, of Buffalo, commented good naturedly upon the political turn the discussion had taken and that the sentiment was the same which he had entertained in voting for Grover Cleveland.

Col. Castle disclaimed being actuated by any political bias, but solely by the interests of the trade. He declared that a certain presidential candidate was correct when he called the tariff a local issue; and the truth of this was shown in the conflicting interests of different sections, protection of iron being demanded in Pennsylvania, free hides in Massachusetts, and other localities having their pet hobbies. The fear that these might be touched prevented congressmen from reducing the exorbitant tax on greenhouse glass. A. Wintzer, of Pennsylvania, called attention to the tariff on lumber for greenhouse use as equally unjustifiable and indefensible.

Robt. Craig, of Philadelphia, explained that the florists' clauses in the McKinley and Wilson tariffs had been written by himself and that their reasonableness commended them to the senate committee, which adopted them promptly. He thought the difficulty at present was because of the opposition to tariff revision generally, Uncle Joe Cannon, representing the party in power, having declared against it. He suggested that a definite tariff rate for

glass be agreed upon and that the society await a more favorable time for presenting it. Mr. Elliott remarked that the agitation of tariff reform would hasten revision. Messrs. Scott, Hammond and Lenker participated in the discussion.

ciently made by the Department of Agriculture at Washington than by the S. A. F.

Upon the suggestion of J. C. Vaughan it was ordered that a copy of the communication of the Detroit Florists' Club on this subject be sent to Dr. B.

F. L. ZIEGLER'S FLOAT AT THE NEWPORT, R. I., CARNIVAL.

Mr. Vaughan's motion was finally adopted and the subject referred to the committee with instructions to ask congress for a reduction on glass used for greenhouse purposes. Members were requested to give the committee their views.

The president's recommendation relating to the secretary was taken up, and on motion of Mr. Vaughan, an allowance was made for his traveling expenses in attending meetings and exhibitions of kindred societies; $200 was fixed as the amount.

Thursday's Proceedings.

J. G. Esler was the inspector and E. G. Gillett, J. F. Sullivan and Fred. Meinhardt the tellers in the election of officers. The balloting resulted as follows: For president, Wm. J. Stewart, 245; J. A. Valentine, 1. For vice president, John Westcott, 129; S. S. Pennock, 70; Leo Neissen, 42. For secretary, P. J. Hauswirth, 181; H. M. Altick, 62. For treasurer, H. B. Beatty, 246.

A letter was read from E. Albertson, of the Nurserymen's Association, detailing the advantages of the universal tag as a substitute for special tags in the handling of nursery stock.

Two ably written papers by representatives of the east and the middle west, upon "Recent Improvements in Retailers' Methods of Offering Flowers," were read by Wm. F. Gude, of Washington, D. C., and Irvin C. Bertermann, of Indianapolis. The papers were much applauded and votes of thanks were tendered to their authors.

The question box monopolized the time of the session. The first subject was as to an investigation of and a remedy for the aster disease which is troubling the growers in Detroit and elsewhere. The consensus of opinion, as developed by the discussion, was that the investigation could be more efficiently made by the Department of Agriculture at Washington than by the S. A. F.

Upon the suggestion of J. C. Vaughan it was ordered that a copy of the communication of the Detroit Florists' Club on this subject be sent to Dr. B. M. Duggar, of Columbia, Mo., the pathologist of the society, for a report thereon; also that application be made to the Agricultural Department and that the information secured from these sources be given to the Detroit Florists' Club.

Geo. C. Watson, of Philadelphia, objected to this as undue favoritism to a single locality by giving it advance information and ignoring all other localities in which the disease existed. This objection was obviated by an instruction to the secretary to publish the reports that may be received in the trade journals.

The next question, "Is a stove plant a greenhouse plant?" elicited a diversity of views, but the general sentiment was that the latter term included the former and that the matter was not of sufficient importance to require precise interpretation. It was laid on the table without action.

The next question was, "Is it to the benefit of the trade for originators of new cannas to name and disseminate a long list of varieties having no desirable merit over existing varieties?" A discussion followed in which Mr. Vaughan pointed out the necessity for a standing committee on the canna, such as the society formerly had, whose approval would be necessary to secure the registration of new varieties. Peter Bisset said he thought it had been made too easy for any one who raised seedlings to have them registered and made a standard by the society. He preferred to have a committee that would pass upon every plant offered for registration.

Secretary Stewart explained that, according to his own understanding, his registration of a variety had no bearing upon its quality and was not an endorsement of it as a thing of value, but was simply the registering of its name, so that the grower of the product might have exclusive use of that name.

Alex. Wallace made the point that, under the by-laws, registration did not go further than merely to give a description of a new plant. Mr. Coles regarded the proposition for a general committee to supervise all plants as too broad and impracticable. After further discussion by Messrs. Watson, Read, Hagenburger, Dillon and Wintzer, a motion by Mr. Vaughan, creating a canna committee, was adopted.

On motion of Mr. Traendly, President Kasting was selected as one of the two delegates to the National Council of Horticulture. Robt. Craig, of Philadelphia, was appointed as the other delegate.

On motion of Mr. Scott, one of the judges in the trade exhibition, the executive committee was recommended to make a rule requiring every exhibitor to make an entry of his exhibit as soon as permission for staging it was given.

IN THE DAYTON EXHIBITION HALL.

L. H. Read announced that a conference would be held at the hall in the afternoon upon the advisability of forming a national canna association.

W. S. Powell, of the bureau of credit of the Wholesale Seedmen's League, read a paper explaining the operations of the bureau.

At the evening session presentations of testimonials were made by the society to President Kasting and Secretary Stewart—to the former a silver tea set and to the latter a bag of gold.

The proposed national flower show was discussed by Robt. Craig, E. G. Hill, J. C. Vaughan, Wm. F. Gude, E. V. Hallock and Geo. Watson, and the following was adopted:

Resolved, That if the exhibition be held it shall be in the month of November, 1908, in the city of Chicago; that the date of the annual meeting shall be changed from August to November, so that the exhibition and annual meeting shall be held at the same time and place, and that the executive committee be empowered to prepare for and hold the proposed exhibition.

After adjournment the members visited Far Hills and witnessed the illumination of the grounds.

A session of the convention will be held on Friday morning to dispose of unfinished business.

ANNUAL EXHIBITION OF THE NEWPORT HORTICULTURAL SOCIETY.—See page 219.

The Trade Exhibition.

The trade exhibition was located in the central pavilion at the fair grounds. Among those exhibiting were the following:

Robert Craig & Son, Philadelphia, Ficus pandurata, crotons and other decorative plants.

John Scott, Brooklyn, N. Y., decorative plants and Scottii ferns.

E. Amerpohl, Janesville, Wis., Nephrolepis Amerpohlii.

Vaughan's Seed Store, Chicago and New York, palms, ferns, Baby Rambler roses and bulbs.

Carl Hagenburger, Mentor, O., cyclamens and other plants.

Henry A. Dreer, Philadelphia, Bougainvillea Wm. K. Harris, palms and decorative plants.

A. T. Boddington, New York, bulbs.

J. A. Peterson, Cincinnati, Boston and Piersoni ferns, Pandanus Veitchii, Begonia Gloire de Lorraine and Adiatum Farleyeuse.

C. Winterich, Defiance, O., cyclamens.

Joseph Heacock, Wyncote, Pa., palms.

H. R. Carlton, Willoughby, O., Governor Herrick violet.

John Lewis Childs, Floral Park, N. Y., Gladiolus America.

Cushman Gladiolus Co., Sylvania, O., gladioli.

Hinode Florist Co., Whitestone, N. Y., Japanese plants.

Henry H. Barrows & Son, Whitman, Mass., Nephropelis ferns, Whitmani and Barrowsii.

Julius Roehrs Co., Rutherford, N. J., crotons, ferns, palms and other plants.

Storrs & Harrison Co., Painesville, O., nephrolepis.

Geo. A. Kuhl, Pekin, Ill., nephrolepis.

Henry F. Mitchell Co., Philadelphia, plant tubs.

Frank Hintsman, Cincinnati, aspidistras.

Lemuel Ball, Philadelphia, palms and decorative plants.

Livingston Seed Co., Columbus, O., Begonia Semperflorens.

Charles D. Ball, Philadelphia, palms and decorative plants.

Lewis Ullrich, Tiffin, O., Tiffin geranium.

H. Bayersdorfer & Co., Philadelphia, florists' supplies.

Wm. Sim, Cliftondale, Mass., Comet tomato.

Lager & Hurrell, Summit, N. Y., orchids.

H. J. Smith, Hinsdale, Mass., hardy ferns and Christmas trees.

Samuel S. Pennock, Philadelphia, ribbons and other supplies.

Wertheimer Bros., New York, ribbons.

J. Stern & Co., Philadelphia, florists' supplies.

The Herendeen Manufacturing Co, New York, Furman boilers.

Lord & Burnham Co., Irvington-on-Hudson, N. Y., boilers and building material.

Advance Co., Richmond, Ind., ventilator machines.

W. H. Elverson, New Brighton, Pa., flower pots.

The Heim Support Co., Connersville, Ind., carnation supports.

ANNUAL EXHIBITION OF THE NEWPORT HORTICULTURAL SOCIETY.
First prize group of palms, ferns and foliage plants.—See page 219.

Arthur Cowee, Meadowvale Farm, Berlin, N. Y., Groff's hybrid gladioli.

Davis Bros., Morrison, Ill., nephrolepis.

F. R. Pierson Co., Tarrytown, N. Y., the Tarrytown fern and bulbs.

Metairie Ridge Nursery Co., New Orleans, Pandanus Veitchii and other decorative plants.

C. S. Ford, Philadelphia, palms and ferns.

S. H. Shoup, Dayton, O., florists' designs.

The Dayton Paper Novelty Co., Dayton, O., flower boxes.

Dayton Supply Co., Dayton, O., sprayers.

A. Dietsch Co., Chicago, greenhouse material.

L. Baumann & Co., Chicago, florists' supplies.

M. Rice & Co., Philadelphia, ribbons and supplies.

Reed & Keller, New York, florists' supplies.
Holly-Castle Co., Boston, electric circulator.
Lockland Lumber Co., Lockland, O., greenhouse materials.
Quaker City Machine Works, Richmond, Ind., ventilator machines.
E. Hippard, Youngstown, O., standard return steam trap.
King Construction Co., North Tonowanda, N. Y., greenhouse building materials.
A. H. Hews & Co., North Cambridge, Mass., fancy earthenware and flower pots.
Ionia Pottery Co., Ionia, Mich., flower pots.
The Roseville Pottery Co., Zanesville, O., pottery.
The Kramer Bros. Foundry Co., Dayton, O., vases and garden furniture.
Wm. F. Kasting, Buffalo, N. Y., cement bench and soil pulverizers.
Hummel & Downing, Milwaukee, folding boxes.
Morehead Mfg. Co., Detroit, Mich., steam traps.
Daniel B. Long, Buffalo, N. Y., florists' photographs.
Kroeschell Brothers Co., Chicago, boilers.
Louis Wittbold, Chicago, watering system.
Schloss Bros., New York, ribbons.
A. Q. Wolf & Bro., Dayton, O., improved cable ventilating apparatus and dump sieve soil machines.
J. H. Broxey, Dayton, O., carnation supports.
C. S. Ford, Philadelphia, palms, ferns and supplies.
Oakwood Pottery, Dayton, O., flower pots.
Dayton Fruit Tree Label Co., Dayton, O., labels.
Lowe Bros. Co., Dayton, O., paints.
Benj. Hammond, Fishkill-on-Hudson, N. Y., paint, putty and insecticides.
E. A. Beaven, Evergreen, Ala., fadeless sheet moss.

OUTDOOR EXHIBITS.

Vaughan's Seed Store, Chicago, cannas, Baby Rambler roses, salvias, etc.
Nathan Smith & Sons, Adrian, Mich., cannas, geraniums, etc.

The Judges' Report.

Awards were made by the judges as follows:

PLANTS.

Edw. Amerpohl, Janesville, Wis., for Nephrolepis Amerpohlii; certificate of merit. No large specimens on exhibition, but of all the nephrolepis very distinct and worthy of the highest award. One of the best novelties on exhibition.

Carl Hagenburger, West Mentor, O., new fern not yet named; not distinct from older varieties.

Lewis Ullrich, Tiffin, O., for new seedling single red geranium; honorable mention. Good single scarlet, evidently a free bloomer.

H. R. Carlton, Willoughby, O., new single violet Governor Herrick. A lot of young plants showing health and vigor, but too early in season to judge of the merits of flowers.

Fred Windmiller, of the Livingston Seed Co., Columbus, O., for begonia, new semperflorens hybrids; honorable mention. A free flowering semperflorens type.

Frank Huntsman, Cincinnati, O., aspidistras; a fast growing form of A. lurida.

Wm. Sim, Cliftondale, Mass., for Comet tomato, honorable mention.

Robt. Craig & Co., Philadelphia, Pa., for Ficus pandurata, certificate of merit. A grand decorative plant.

H. A. Dreer, Philadelphia, Pa., for Bougainvillea, W. K. Harris, certificate of merit.

Storrs & Harrison Co., Painesville, O., for Nephrolepis Leedii, honorable mention. Sport from Piersoni.

John Lewis Childs, Floral Park, N. Y., Phœnix Rœbelenii; judges believe it to have been exhibited before.

CUT BLOOMS.

Vaughan's Seed Store, Chicago, for Gladiolus Mrs. Francis W. King, certificate of merit.

Arthur Cowee, Berlin, N. Y., 16 new varieties of Groff's hybrid gladioli, five varieties; certificates of merit.

James Vick's Sons, Rochester, N. Y., for Vick's Violet and King asters, honorable mention.

MISCELLANEOUS.

The Herendeen Manufacturing Co., Geneva, N. Y., for new three-piece sectional boilers, certificate of merit. Will burn soft coal, so the manufacturers assert.

Lord & Burnham Co., New York, for dust-proof gear; certificate of merit; for new truss house gutter; highly commended and worthy of certificate. This firm exhibited a new form of Burnham boiler said to be adapted for hard and soft coal.

King Construction Co., North Tonawanda, N. Y., for new gutter and ventilator, certificate of merit.

Morehead Mfg. Co., Detroit, Mich., for Morehead trap, certificate of merit.

Kroeschell Bros., Chicago, for scale bearing shaking grates for all kinds of boilers, certificate of merit; Ideal chain wrench on Kroeschell scale bearing grate, certificate of merit.

G. C. Myers, Dayton, O., for the Yankee clamp, highly commended. The latest hose and pipe clamp.

W. F. Kasting, Buffalo, N. Y., for patent cement indestructible bench, certificate of merit.

Heim Support Co., Connersville, Ind., carnation support; special mention.

J. H. Broxey, Dayton, O., for carnation support, certificate of merit.

M. Rice & Co., Philadelphia, Pa., for adjustable baskets for plants for table decorations, highly commended; novelty effect in birch bark square pots, pot covers and sleighs for table and favor use, highly commended.

Dayton, Supply Co., Dayton, O., spraying apparatus and Simplicity spray pump; judges considered the Simplicity pump a most useful implement.

S. S. Pennock, Philadelphia, Pa., for pearl pins for corsage bouquets, ribbon for autumn foliage and a novel violet ribbon, highly commended.

H. Bayersdorfer & Co., Philadelphia, Pa., fancy imported stone ware and other novelties; highly commended.

Reed & Keller, New York, cycas holders, new casket and standing designs, tub and pan baskets, decorative wire for table, etc.; highly commended. Very beautiful and novel designs.

Schloss Bros., New York, a novel effect for violets; combination violet and green novelty for violets, moire novelty for violets; highly commended.

J. Stern & Co., Philadelphia, Pa., prepared Christmas trees, prepared variegated magnolia and wreaths; highly commended. Natural prepared maidenhair ferns and prepared cycas leaves with chrysanthemums; highly commended.

Dayton Paper Novelty Co., Dayton, O., new design violet box, embossed; highly commended.

Wertheimer Bros., New York, new violet ties, lace effect chiffons, foliage American Beauty ribbons, new and original design in ribbon for American Beauty roses; highly commended.

E. A. Beaven, Evergreen, Ala., fadeless sheet moss, highly commended.

Those Present.

The attendance was quite heavy and with arrivals daily up to the last day, many names were missed:

Frank Adelberger, Wayne, Pa.
Gustav Adrian, Cincinnati, O.
Edw. Amerpohl, Janesville, Wis.
E. C. Amling, Chicago.
J. F. Ammann, Edwardsville, Ill.
Geo. H. Angermueller, St. Louis, Mo.
Geo. Asmus, Chicago.
Julius Baer, Cincinnati, O.
Max Baer, Pittsburg, Pa.
O. L. Baird, Dixon, Ill.
Chas. D. Ball, Holmesburg, Pa.
Lemuel Ball, Philadelphia, Pa.
A. Barbe, Kansas City, Mo.
M. Barker, Chicago.
Henry H. Barrows, Jr., Whitman, Mass.
J. J. Barry, Washington, D. C.
F. C. Bartels, Cleveland, O.
F. P. Baum, Buffalo, N. Y.
August R. Baumer, Louisville, Ky.
Geo. Bayer, Toledo, O.
Sidney Bayersdorfer, Philadelphia, Pa.
W. H. Beattie, Washington, D. C.
H. B. Beatty, Pittsburg, Pa.
E. A. Beaven, Evergreen, Ala.
J. Beck, Cincinnati, O.
J. J. Beneke, St. Louis, Mo.
Andrew Benson, Chicago.
Frank Benson, Cincinnati, O.
F. F. Benthey, Chicago.
Paul Berkowitz, Philadelphia, Pa.
Edward Berno, Mansfield, O.
Irwin C. Bertermann, Indianapolis, Ind.
John Bertermann, Indianapolis, Ind.
Peter Beuerlein, Elmhurst, N. Y.
John Birnie, West Hoboken, N. J.
Peter Bisset, Washington, D. C.
Geo. Blackman, Evansville, Ind.
M. Bloy and son, Cleveland, O.
Oscar Boehler, West Hoboken, N. J.

The Misses Zeller.

Bowling Tournament.

The bowling tournament again proved a very attractive feature of the convention. The team contest took place at the Fairview Park alleys August 22, starting at 1:30 p. m. Philadelphia again proved victorious, winning the Beatty trophy for good, also the Kasting cup, which is up for annual contest. Each member of the team received a silver match box donated by H. B. Beatty. Washington was second and Cleveland third. Detroit finished last, securing the consolation prize.

In the individual contest open to members of the S. A. F., two games, the following scores were made: Beneke, 370; Mansfield, 334; Holton, 317; Pollworth, 314; Rasmussen, 310.

Winterson, of Chicago, secured the prize for the greatest number of strikes, 10 being the number.

Bergman, Chicago, made the greatest number of spares, 17, and secured the prize for that feat.

Connor, Philadelphia, secured the prize for high average on winning team, his average being 170.

Ernst, Washington, won the prize for single high game, 212.

Seybold, Baltimore, made the high average of all teams with 178.

The scores are given herewith in detail.

Team Scores.

PHILADELPHIA.

	1st.	2d.	3d.	Total.
Robertson	160	177	146	483
Falck	131	154	167	452
Graham	181	164	128	473
Adelberger	166	115	151	432
Connor	183	181	146	510
	821	791	738	2350

WASHINGTON.

	1st.	2d.	3d.	Total.
Cooke	162	165	139	466
Simmonds	165	144	183	492
Barry	144	123	122	389
McLennan	147	134	119	400
Ernst	159	212	156	527
	777	778	719	2274

CLEVELAND.

	1st.	2d.	3d.	Total.
Hart	169	158	139	466
Bates	90	114	159	363
Nobbel	145	142	137	424
Bloy	109	162	122	393
Graham	156	140	200	496
	669	716	757	2142

CHICAGO.

	1st.	2d.	3d.	Total.
Bergman	150	119	152	421
Scott	112	93	105	310
Wilson	106	167	106	379
Winterson	158	166	143	467
Asmus	186	156	146	488
	712	701	652	2065

BALTIMORE.

	1st.	2d.	3d.	Total.
Richmond	138	142	146	426
Moss	151	134	107	392
Seidwitz	54	86	93	233
Weber	137	108	133	378
Seybold	182	183	160	534
	662	653	639	1973

NEW YORK.

	1st.	2d.	3d.	Total.
Guttman	123	135	127	385
Donaldson	153	170	159	482
Scott	95	161	81	337

Dunn	117	133	118	368
	566	687	696	1949

INDIVIDUAL BOWLING CHAMPIONSHIP.

Ernst	363
Seybold	347
Asmus	344
Connor	328
Graham	320
Mansfield	317
Beneke	298
Pollworth	298
Rasmussen	271
Donaldson	262

The Ladies' Bowling Contest.

The bowling in the ladies' contest was very spirited. Some good scores were made, 28 ladies participating. Mrs. Weber, of St. Louis, who was fifth in last year's contest, finished first this year with a score of 316 in the two games. Mrs. Hauswirth, of Chicago, secured second prize with 272, and Mrs. Scott, also of Chicago, won third prize with 270. The Chicago ladies indeed made a very fine showing, securing no less than five of the 12 prizes. The scores follow herewith:

LADIES' CONTEST, TWO GAMES.

Mrs. Williams	146
Mrs. Krueger	134
Mrs. L. H. Winterson	131
Mrs. Pollworth	121
Mrs. Weber, first prize	316
Mrs. Hauswirth, second prize	272
Mrs. Scott, third prize	270
Mrs. Miller, fourth prize	264
Mrs. McKellar, fifth prize	256
Mrs. Kill, sixth prize	243
Mrs. F. H. Meinhardt, seventh prize	242
Mrs. Asmus, eighth prize	233
Mrs. Whitman, ninth prize	220
Mrs. Reimels, tenth prize	220
Mrs. Critchell, eleventh prize	219
Mrs. T. H. Meinhardt, twelfth prize	209
Mrs. Herr	198
Mrs. Kreitling	196
Mrs. Winterson	195
Mrs. Enggren	190
Mrs. Breitmeyer	179
Mrs. Donaldson	173
Mrs. Kasting	159
Mrs. Rasmussen	158
Mrs. F. Vaughan	157
Mrs. Beatty	154
Mrs. O'Brien	151
Mrs. M. Meinhardt	149

Shooting Tournament.

The shooting tournament was held at the Rohrer's Island gun club on Thursday. The attendance was rather small and many of the S. A. F. members who usually take part in shooting events were conspicuous by their absence. The location of the quarters of the club was ideal and in the midst of a scene of great natural beauty. While there were practically only two events, it was late in the evening before the shoot was completed. The following was the result:

INDIVIDUAL COMPETITION.

Twenty-five targets per man. Ten prizes:

H. Brown	17
C. L. Seybold	14
J. W. Rogers	13
E. Hippard	12
H. M. Altick	12
Wm. Scott	11
Hy. Young	10
I. Reimels	9
F. W. Herendeen	7
A. Rasmussen	6
E. L. Enggren	6
W. H. Mansfield	2

CHALLENGE MATCH.

Fifty targets per man; five men on each team:

Dayton local team	190
S. A. F. team, composed of the competitors in the individual competition making the five highest scores	173

At the conclusion of the tournament a vote of thanks was passed to H. M. Altick for the very enjoyable afternoon he had provided. Several non-shooters went out to see the events.

Convention Notes.

J. A. Peterson, of Cincinnati, was among the few who did not enjoy the many delights of the convention. He left a son at home seriously ill and was summoned home after one day's stay.

The Brooklyn commission men had a representative in Wm. H. Kuebler, who also experienced his initial convention of the S. A. F.

The new bougainvillea, Wm. K. Harris, which H. A. Dreer is to disseminate, attracted much attention. It was not hard to judge of its two-fold usefulness seen among such a contrasting surrounding. A variegated bougainvillea should appeal to everybody.

Miss E. Mills, of the Yokohama Nursery Co., New York, was a visitor to the convention and was frequently seen in the plant section of the exhibition.

Fred Lautenschlager, of the Kroeschell Co., of Chicago, was like the play of Hamlet with Hamlet left out. A Kroeschell boiler which was to have formed his main exhibit did not arrive until late, and Fred had to deliver his lectures without a visible subject.

E. Leuly, of West Hoboken, N. J., rode into Dayton on Tuesday, having made the entire distance, something approaching 800 miles, on a bicycle. This little performance is nothing to Leuly; he eats up miles as an alligator eats flies.

Much regret was felt at the absence of Patrick O'Mara, of New York, from the convention. The death of his brother Roderick last week of course rendered his attendance out of the question.

The Toledo, O., delegation arrived on Wednesday morning in time for the real business of the meeting.

Alex. J. Guttman, the New York wholesaler, was confined to his bed at his hotel on Tuesday through a severe attack of malaria.

J. H. Dunlop, of Toronto, was prominent among the visitors and did not fail to put in a good word for the convention of the American Carnation Society to be held next year in Toronto.

Misstatements, even when accidental, can hardly escape challenge when made before a body of florists, at least when on subjects horticultural. The lecturer on a trip through Japan at Welfare hall on Tuesday evening showed on his screen a big field of Lilium longiflorum and referred to them as "callas." The howl which was set up must have disconcerted him a little. When he really did show a field of callas he made no verbal reference to the subject.

H. Glenn Fleming, of Fairmont, W. Va., excited considerable interest among his brethren at the convention. He is located in the soft coal region in his state and is the happy owner of a coal mine, the opening to which is in his boiler house. He mines the coal for his own use only, getting it out as he requires it. The vein is 4½ feet thick and he is not likely to be bothered with coal questions during his lifetime. He also uses his mine for cold storage purposes.

As typical of the interest taken by the Dayton people in floral matters it may be mentioned that E. E. Ganster, a citizen, exhibited in a buggy at the Wednesday night session of the convention a night-blooming cereus bearing seven beautiful blooms.

Mrs. Elliott, wife of W. H. Elliott, of Brighton, Mass., was quite ill throughout the convention week, being for the most part confined to her room in her hotel.

F. W. Herendeen, of the Herendeen Manufacturing Co., Geneva, N. Y., journeyed to Dayton in his handsome automobile, making several stops by the way and completing his journey by Monday.

John Donaldson, of Elmhurst, L. I., and John Birnie, of West Hoboken, N. J., discovered the produce market in Dayton and spent some time in it

making comparison with conditions as they are in New York. They found some apple and pear balsams and got posted on the good qualities of these things when steeped in liquor.

C. L. Seybold, a Baltimore, Md., member of the S. A. F., was charmed with the natural surroundings of the Rohrers Island gun club and made up a handsome bouquet of wild flowers to be found thereabouts, and on which he lectured on the return trip.

"It's the water," was the cry, heard annually, and stronger than ever this year and covering a multitude of ailments common at convention times.

A. Kahouda, of the Hinode Florist Co., Secaucus, N. J., in charge of the exhibit of that concern, was called upon to answer a number of "fool" questions put to him concerning the origin and cultural growth of the dwarf Japanese plants forming the exhibit.

John Laver, of Erie, Pa., was quite sick at the Beckel hotel during the convention.

Theodore Wirth was the only absentee of the board of directors.

W. N. Rudd found at the last moment that he could not attend. Meanwhile the telegraph wires were kept hot.

Two bicycle enthusiasts rode to the convention on their wheels, one from Hoboken, N. J., and one from Carrollton, Mo.

The three Poehlmann brothers, of Chicago, and their wives narrowly escaped serious injury in an automobile which became unmanageable.

THE striking new plants at the Dayton convention were Nephrolepis Amerpohli, Ficus pandurata, Bougainvillea Wm. K. Harris and Phœnix Rœbelini. The first named is very distinct and, as Robt. Craig says, very dainty.

If you elect H. M. Altick, said Wm. Scott, you will never forget it.

Who is Col. Castle? Possibly a cultivator of the flowers of rhetoric.

The noteworthy absentees included John N. May, John Burton and F. R. Pierson.

The complete Rice display was sold to Louis H. Kyrk, Cincinnati, on the opening day.

The number of members who had registered up to 10 a. m. Wednesday was estimated at 325.

Detroit mustered 28 for its train party.

The Chicago Big Four special carried 65 persons.

The late James Hartshorne was the subject of frequent comment.

The St. Louis party arriving Tuesday morning on the Panhandle was 28 strong.

The Milwaukee boys could not be persuaded to leave the lake breezes for Dayton weather, only four delegates being present.

Twenty-three for Wm. H. Elliott.

The Dayton hotel capacity was fully taken up.

The hot weather reduced the delegations and caused many to give up the trip.

Carnationists say that July 15 would be a much better date for the annual meeting than the present one.

J. B. O'Neil of Chicago was unanimously elected "ornery" member of the Dayton Florists' Club.

Improvements in Retailers' Methods.

BY WM. F. GUDE, WASHINGTON, D. C.

Being requested to read a paper and lead a discussion on "Recent Improvements in Retailers' Methods of Offering Flowers for Sale," I do so reluctantly. Personally I should much prefer the discussion to reading a paper. However, I know no better way to open this subject than to give you my own personal experience of the past 20 years in the retail florists' business at the national capital where we think we have some up-to-date flower stores. There is, probably, no business or profession that has seen a greater change, in the last decade, than the retail florists', or has made greater strides. I am sure that no class of men has worked harder or longer hours than they.

Right here, I want to say we too often hear the cry, "things are not as they used to be." This expression is too commonly used by a great many people engaged in the retail florists' business. "Things are not as they used to be" is not true in the sense it is given, while I do not doubt it is absolutely a fact in a great many cases, among the men who make that remark; because they have the same old fogy methods and manner of doing business used years ago, whereas the wide-awake florist, with the proper push, has gone ahead and adopted new and modern methods, with the inevitable result that he makes more money with less work, and whereas the old-timer has been left with his old-fashioned ideas little or no progress, long hours and small pay, the former has reason to thank the powers that be that "things are not as they used to be."

SOME OLD FASHIONED METHODS.

Sending flowers in old shoe and hat boxes; delivering funeral designs in a farm wagon; taking a man in his greenhouse togs to a fashionable home to carry plants and decorate; tying bunches with narrow, cheap ribbon, cut swallow-tailed; sending bridal bouquets wrapped in paper; telling a patron the flowers he wants are out of date because they are not in stock.

I have been in flower shops when a customer would leave an order for a wedding, birthday, or funeral and explicitly state the time he wanted the flowers delivered, and in many cases, to my personal knowledge, the flowers were sent after the occasion was over so that the sentimental effect was entirely lost, the occasion to use the flowers forever gone. The result invariably is the next time the customer in question wants to buy flowers he tries some place where he has reason to expect that his purchase will be delivered when and where he wants it in up-to-date condition.

Again the old-fashioned way of delivering flowers, wrapped in any old piece of paper and delivered by some ragged, dirty messenger, is not conducive to bringing the retail florists' business up to the plane of the modern up-to-date requirements which it so justly deserves.

Also the old-fashioned method of tying flowers on toothpicks with wires without any foliage, which was so popular years ago, has been almost entirely eliminated and a more natural system is now demanded by the average buying community. So much for the old methods.

The present up-to-date method followed by us is to have the flowers received fresh every morning, then properly assorted and arranged in large storage rooms where mirrors on all sides show them off to the best advantage.

One of the most important items is booking orders. In a great many establishments the old way of taking orders for any kind of flowers for commencements and debutantes' receptions, etc., knowing it is a question whether they can be secured, then substituting another kind at the last minute is an expensive one. What a great disappointment to a mother thinking she has a pleasant surprise for her daughter at the graduating exercises or some other function, to order a bunch of pink roses, and to receive red carnations instead. Her patronage is then lost, she has no more confidence in that establishment.

EMPLOYES.

We have an up-to-date corps of clerks and employes who are able, capable and willing to wait on customers intelligently, and do not try to sell them a pink rose for a white one, or calla lilies for lily of the valley. They do not work any more like they used to. They used to get up at 5 o'clock in the morning and work until 10 or 11 o'clock at night for a very small compensation. It is fortunate that "things are not as they used to be" in this case. Employes in a retail florist's store should come in for full consideration and just treatment because it is impossible for any one man to wait on every customer that comes to inquire about flowers. There are naturally, in the retail florists' trade, as in all other kinds of business, people with all sorts of ideas and in many cases hard to please. All of these should be studied and their peculiar fancies catered to, as much as possible, if they are willing to pay the price, because a satisfied customer is the best possible advertisement that anyone can have. Right here the employe who goes to extra trouble to cater to the whims of this particular class of customer and does not run or hide when he or she comes in, is entitled to a great deal of consideration which alas he often does not receive. I have found invariablly by studying the clerks' interests they are in much better position to study the employer's interests, for it is only too true that florists work longer hours for less money than almost any other class of working men, requiring an equal amount of intelligence. The clerks and employes in a retail florist's store can do very much towards increasing or decreasing the sales and profits by strict attention or inattention to details in the business. It has always been our aim to keep the employes satisfied and where we succeed in doing that, they invariably succeed in satisfying us.

PUTTING UP ORDERS.

This in our estimation is one of the most important items connected with the retail florists' business. As time cuts quite a figure in this part of the business, if the flowers are put up too early they will be apt to wither, and if too

late they cannot be delivered in time, hence, this branch of the business requires constant care and exercise of judgment, in order that the flowers may reach the parties interested in the best possible condition. Another very important item, is to send the customers exactly the quality and quantity promised for a given amount of money and not try to slight them with the thought or idea that they will never know the difference. This might do once in a while, but one is bound to be caught in the act sometime, and with a very ugly reflection on the integrity of the house. Here it may be well to state that the politeness and intelligence of the driver or messenger who may happen to deliver the flowers will either reflect credit or discredit upon the establishment.

WINDOW DISPLAY.

The old methods of trying to show the public how many plants a florist can put in a window was buried with the paper collar for bouquets. The window bottom of sand, gravel and zinc has given place to tile and mirror effects. A florist's window is the same now as that of the other up-to-date merchant who displays his finest goods to tempt the public to buy. A customer can form a pretty good idea of the florist's ability to create and execute artistic effects by his window display. For instance when we have a surplus of any particular kind of flower a window tastefully arranged with vases, baskets, etc., of the same flower has time and again been the means of cleaning up the entire surplus at a good profit.

A window display on January 29, President McKinley's birthday, with a portrait of him, a few American flags and a nice assortment of carnations tastefully arranged will demonstrate what a window decoration can do. I would advise you to try it January 29, next.

USE OF RIBBONS.

The use of ribbons in the retail florists' business, has grown faster than the business itself, because in the present methods ribbons can be used to great advantage on nearly all arrangements of flowers and when properly used are a great acquisition to any up-to-date floral arangement.

FLOWERS IN VASES AND JARDINIERES.

In our city in particular is a large demand for bunches of flowers at all seasons of the year, to be sent to the various offices or departments of the local municipal and United States government. In these cases it is often necessary to have a suitable vase or jardiniere, to offer, to go with the bunch of flowers, that they may be delivered in good presentable condition, and their lasting qualities preserved by the stems being kept in water while in the office of the recipient.

In conclusion, to manage and run an up-to-date flower store: First, it is necessary to be conservative in buying. When I say buying, I mean not only cut flower stock, but plants, ribbons, jardinieres, florists' supplies of all kinds, and especially boxes and paper to suit all sizes of bunches and qualities of flowers. This is very important. Second, having the necessary receptacle and supplies to go with the flowers, to be sure to have good fresh stock at all times to show your customers and give them what you claim to sell. Third, after the former two be sure to deliver the flowers as promised, on time, when promised, and in good condition.

Teaching Horticulture in Public Schools.

BY E. V. HALLOCK, QUEENS, N. Y.

After careful research and study of reports and methods now in vogue, we wish particularly to call your attention to two matters: First, the absence of textbooks in all the present methods of teaching horticulture, and second, the lack of concerted action among the different associations conducting that work, be they civic, philanthropic, or educational.

This state of affairs we consider fortunate. The first because it does not require any great preparation, and makes possible the starting of an S. A. F. method sooner than it could otherwise be started, since no elaborate system of textbooks is essential. The second, inasmuch as individual persons and organizations have accomplished so much and demonstrated so thoroughly that the interest of the people is already all that could be desired that we feel confident if this work can be placed upon a methodical, systematic, concerted plan—in other words, if the entire school system of horticulture can be standardized suitably for each grade of school, suggested by the S. A. F. and adopted by the different boards of education—we see no reason why this teaching of horticulture should not cover the entire land in a few years.

TEXTBOOKS.

In all the methods of teaching by the different organizations at present, we find no textbooks are given to the pupils. Leaflets are compiled and issued to the teachers and also to pupils, in some cases by the boards of education, for the guidance and help of each.

Leaflets.—These leaflets of instruction for the use of teachers should emanate from a committee of the S. A. F. They should be placed in the hands of the state boards of education who will attend to distributing the different grades of leaflets to the different grades of schools, namely the rural common schools, the union and high schools, and the primary and grammar grades, compiled with special reference to the conditions prevailing in each grade.

We also suggest, for schools that have become somewhat advanced in garden work, and for pupils that have shown interest, that leaflets and small, simple pamphlets be prepared, containing plain illustrations of flowers, giving the botanical parts, also botanical names of the common trees, plants and flowers, and others giving simple explanation of what is meant by "annuals," "biennial," "hardy," "perennial," and other matters that are met with in every-day life. Even these simple leaflets and pamphlets are not to be given out to the pupils until they show sufficient interest in their work. This plan can be elaborated as conditions seem to require.

NEED OF STANDARDIZING.

On careful perusal of all documents that we could obtain we find no two schools or organizations conducting their garden work on the same lines but each pursuing its work according to its own ideas, and as seems best to it. Great good has undoubtedly come from these disunited efforts, but greater good will undoubtedly come from concerted action, emanating from some central authority, thoroughly standardizing their work.

We have suggested dividing the schools into three classes, so that we can better meet the conditions and environment known to exist in schools of each class. In this case, we should issue three series of leaflets of instructions, diagrams and routine work. The latter could be taken largely from the methods now in force in the various school gardens.

INSTRUCTIONS TO TEACHERS.

Besides placing the leaflets and pamphlets in the hands of the different teachers, we suggest that one of the trustees should familiarize himself with the proposed methods, using some of the fuller reports of some of the specially conducted schools of this nature, to get a general idea of how the plots are laid out and cared for near the schools, or plots loaned by people at a little distance from the school and the home garden.

If no trustee feels equal to this simple task, he could easily call to his assistance a florist, a market gardener, or even a good farmer in the community to help start the work. If the teachers lack in knowledge of any particular subject, they should be given to understand that they could call upon the trustee who would find a person competent to explain.

A committee of the Massachusetts Horticultural Society comments very favorably on the system of children's home gardens, stating that the society first offered three prizes, then 10, and were much surprised when they received over 200 entries for the 10 awards. The committee visited the home gardens as far as possible, and found it was very encouraging to the children to do so. They state: "We still feel the children's home garden movement is a very important one." This committee also gives prizes in connection with the home garden system for best reports of work for the year.

Your committee, in view of the reports on these methods, suggests as an intermediate plan, where conditions seem to favor the method, a demonstration plot in the school ground, where the teacher can fully demonstrate with each pupil the preparation of the soil, the application of fertilizers, and the planting of each kind of seed, both of vegetable and flowers. By this means, the depth and distance of planting seed of the standard kinds can be easily learned by the pupils.

The demonstration plot could be used throughout the season for simple talks, during the growth of the plants, even to the method of killing potato bugs. The object of this demonstration plot is that it may be used in connection with the children's home garden system. All instruction and knowledge, as it were, which the children carry home to use in their gardens, will come from this plot.

STATE TEACHERS.

The state might employ a few experienced garden directors or teachers to

visit as many schools during the year as practicable. Schools should be able to call for this special aid where the subject is not sufficiently understood. The committee on school gardens of the Massachusetts Horticultural Society, after investigation, says: "The great lesson learned was that children's gardens are successfully carried on when under the leadership of an experienced director or teacher. No matter how enthusiastically the work is undertaken, without a proper understanding of gardening it is usually a failure." The same committee says: "There is a crying need for an institution in this state similar to that at Hartford, Conn., where school garden work can be taught."

In the course of time this study could be added to the curriculum of all normal schools, as it already belongs to that of several, these schools to furnish teachers with sufficient knowledge of the subject to follow the methods laid down.

LECTURES.

In educational matter of the present day, be it ever so low or so high, much instruction is imparted to the pupils by lectures and talks. In the rural schools it is not absolutely necessary that the talks or lectures should be given at specified periods. They could be worked in at times best suited to the convenience of the teacher.

At most of these lectures, the teacher should have one or two potted plants or some flowers, and some varieties of the common seeds; and it would not take any great length of time, not more than a year or two, perhaps, to make most of the pupils familiar with the treatment of the common and most useful plants.

APPROPRIATIONS FOR CARRYING ON WORK.

In the matter of appropriations, all the different kinds of school garden work derive their financial aid from different sources, which is of necessity a varying and somewhat uncertain amount. For carrying on this work, we want a certain appropriation for each grade of school. By way of illustration, but not a suggestion, we would say $5 each for the rural schools, $10 for the primary and grammar schools, and $20 for the union and high schools. We confidently believe that even an amount as small as this would be felt in a community, but we feel that by correlating garden work with other studies, the different boards of education would appropriate a larger sum.

But what must be made plain is that the appropriation should be a fixed factor in the expense of conducting the school.

CHILDREN'S GARDEN CONFERENCES.

At least once a year there should be a public meeting in the form of a conference, where all persons interested should be invited to come and make suggestions, and lend their aid to this movement. The children should have a chance to talk a little on their ideas and work.

At a children's garden conference, December 2, 1905, under auspices of the Massachusetts Horticulture Society, seven 10-minute addresses were called for to give opportunity for discussion. A unique feature of this meeting was a model garden bed, illustrated by a practical exercise by a boy gardener and teacher. This conference brought together many people interested, and proved a great success in more ways than one.

At meetings of this kind, questions of civic improvement and general betterment of surroundings could be discussed.

EXPERIMENT STATIONS.

To some it may appear that the experiment stations and agricultural colleges conflict or compete with our movement. This is not the case. We should be content to call ourselves the common soldiers of this common cause, and we should also be content to be officered by experts from those institutions. They commence at the top and work down. We are commencing at the bottom and will work up. We wish to call on those institutions for lecturers, demonstrators, and instructors. We can work hand in hand with them, and we probably could not succeed without them.

SUMMARY AND RECOMMENDATIONS.

Your committee now believes the work can be taken up with the end plainly in view. Whether it is on the exact lines laid down in this report, or better ideas, from the succeeding committee, is of little consequence.

We have, available, so many detailed reports of the workings of the various associations taking up the matter of school gardens, so much data and so many working plans, a committee should be able to proceed with their duties understandingly.

But we must be doubly sure of the ground we take. We cannot afford to make many mistakes at the outset or on fundamental lines. Our work must be humanitarian, logical, and in a manner to interest. Our progress must be slow and sure.

Our motives are altruistic and must remain so, or our efforts will fail. Neither this association nor any other association has any selfish motive concealed. No person or persons will have any advantages over any other person or persons. We shall work in an open field. In the advancement of horticulture we are sure to prosper and added wealth and comfort will accrue to the individual, the community, the state, and the nation.

When the time comes, and we ask of the state a recognition in the matter of school appropriations, let us do so with the consciousness of a righteous cause, and a knowledge that not one penny will be diverted from its proper use. We believe it possible that some of the money now appropriated by the Agricultural Department for distributing the commonest of all common seeds can be diverted to the boards of education of the different states, for the purpose of school gardens.

RECOMMENDATIONS.

Finally, your committee recommends that a new committee of five be appointed by the executive committee, the president and the vice-president of this society to carry on the work as laid down in the report of your first committee, or on any other lines they deem best. And that they be authorized to spend a sum not to exceed $100 for preparing leaflets, diagrams, routine instructions, etc., during the coming year.

Respectfully submitted, at the convention of the Society of American Florists at Dayton, Ohio, August 21, 1906.

Committee { ALEXANDER WALLACE, BENJAMIN HAMMOND, EDWARD V. HALLOCK.

For help in preparation of this pamphlet, acknowledgment and many thanks are due to all those who have kindly aided us in furnishing reports of their work and other material, or by their personal letters of information. If they are not seperately mentioned in this place, or their work is not referred to elsewhere, it is through lack of space and not through intentional oversight.

PLAN SUGGESTED—OUTLINE.

I. Ground.
   1. Utilize school grounds.
   2. Obtain more, if possible, from school authorities or private sources.
   3. Give each child a plot of his own. Teach children to care for their own; to respect rights of others.

II. Instruction.
   1. Distribute leaflets among teachers. Printed rules or advice in simple form.
   2. Employ teachers trained in garden work by normal school methods.
   3. Appoint qualified persons in charge of a district or township, to receive instruction from and report to experiment station.

III. Distribution of Seeds.
   1. Follow some generally approved plan, modified, where necessary. That of Cleveland Home Gardening Association, for example.

IV. Time Allotted for Garden Work.
   1. Out of doors, use period devoted to nature study.
   2. In class room, combine lessons in gardening with other studies.
   3. Interest children to work out of school—afternoons, Saturdays, at home.

V. Exhibitions.
   1. Of best material available.
   2. Impromptu displays; special horticultural shows; annual fairs, etc.

VI. Prizes.
   1. Must vary in amount and methods.
   2. Offered by members of civic, agricultural and horticultural associations, etc.

NOTE 1.—We favor exhibitions of the best material each community has available, from a few vases of flowers in the school-room, impromptu displays at local picnics, and special exhibitions gotten up by school children in their own neighborhoods, to the usual agricultural fairs, with the new interest and enthusiasm the young people can put in this direction. Who can tell but it will create a revival of interest in our county fairs which seem to have failed in attracting the people as formerly.

NOTE 2.—No exact rule can be suggested in regard to the number of prizes or the particular subjects to award prizes for. This matter must be in the hands of the governing board of each district. The amount of prizes should bear a well balanced relation to the amount of appropriation. We favor the offering of prizes and honorable mention, and we feel sure that many interested persons in each neighborhood would give something in the form of prizes to their favorite schools,

The Wittbold Watering Device.

As the Wittbold watering device gains in popularity, so does it continue to take on improvements, which always go to make up the finished product. The system is now being used to great advantage among all classes of greenhousemen and gardeners and has given universal satisfaction. Of course its chief advantage lies in the fact that the system is a time saver. When it is possible to water an entire house in five minutes, it can easily be seen where much labor and expense is eliminated. The latest improvement is a small nozzle which directs a solid stream of water to plants suspended from the piping as shown in the accompanying illustration. There are no less than 50 Boston ferns watered in this way at the Wittbold establishment. A wire is run through the bottom of the pot and the plant hung from the pipe above. When the water is turned on it will drop only on the plant without wetting the bench or ground. In this way much additional space can be obtained without at all interfering with the regular watering of the house.

Bulbs.

Paper read by H. A. Kettel before the Monmouth County Horticultural Society, at Red Bank, N. J., March 16, 1906.

There are many varieties of bulbs that are fine for forcing, providing good stock is used, for if the stock is poor there will not be good flowers. But it is hard to know this until the bulbs show their flowers, although there are lots of other things that will spoil a good showing of flowers. My idea of growing them is to procure as good bulbs as it is possible to get. Box or pot them as soon as possible after getting them, because if they lay too long they are apt to get too dry or they will get heated. In planting them I always put them in boxes. In the bottom of the boxes I place the screenings from the soil, then about half an inch of white sand, placing the bulbs on the sand which keeps the bulb clean and prevents rotting. Then I cover them with good screened soil, place them outside in some shady place, keep them watered, and as soon as there is any danger of frost I place them in a cool cellar, leaving them there until they are about three inches above the boxes. Then I bring them into the greenhouse. Great care should be taken when bringing them in not to place them near the hot pipes as the flowers will be spoiled in this way. The foliage will be fine but no flowers appear. Then we are apt to say the bulbs are no good. And I would say if the bulbs are not well rooted before bringing them in to force there will be poor success with them. I might say that one can easily tell whether the flower is in the bulbs by cutting one or two of each kind in halves. One will find the flower if good and if it is not there it is no use potting them.

Now in reference to varieties, there are many. First of the bulbs to be planted are Lilium Harrisii. I give them the same treatment as the other only put them in pots, but it is very hard to get good ones any more on account of the disease, which is a bad one. I think longiflorum about the best to grow as it is almost sure to come true. Of course it is not so early as the former. Freezias are about the next thing to start; they are fine for the flowers. I treat them about the same as other bulbs only put them in batches, so that they do not all come in together. Then comes narcissus and Roman hyacinths. Paper White and double Roman narcissus are the earliest, but a good many people will not use them on account of the strong odor they have. Then there is the French Trumpet Major which is a grand thing to grow as this can easily be cut by December 15. Then there is Von Sion, Empress, and lots of other varieties that are very fine.

Then comes the tulip, a grand thing to cut from in winter. Proserpine is as early as any. We cut this one December 20. Duc Van Thol is a good early scarlet. For yellow Mon Tresor, and Canary Bird are about the best. In white I can find none to beat White Hawk. Then for the late ones the peony flowering tulips are very fine. The yellow and pink are the best. Then there is the spirea, a very fine thing to force for Easter decoration. Of course there are lots of bulbs that can be forced but these are what I think the best for general purposes.

Growing Pansies.

There are several ways of growing pansies, but the way I have found best is to sow the seed in shallow boxes not later than the first or second week in August, keeping the seed boxes in a frame. When the little plants are fit to handle prick them off into frames, which ought first to be thoroughly prepared for them by filling up to within 12 inches of the glass with good soil, composed of well rotted sod and a little manure adding also a little sand and leaf mold. Prick the plants off into this about three inches apart and at least four inches between the rows.

Leave them in the frames all winter. They will require only sufficient protection to keep the frost out and even if they get frozen they will come around all right if kept shaded and water withheld until the ground gets thawed out. In the spring when they are in flower and ready for sale they can either be lifted as orders come in or they can be put into flats for shipment or to be placed on view.

M.

Society of Southern Florists.

NEW ORLEANS CONVENTION NOV. 15-17.

The New Orleans members of the Society of Southern Florists held a well-attended meeting August 16 to discuss plans for the first convention of the new society to take place in that city. First Vice-President C. W. Eichling presided and C. L. Sieber acted as secretary. Mr. Eichling, who was chiefly instrumental in organizing the society and securing the convention for New Orleans, called attention to the necessity of selecting the dates for the convention so the Dayton delegation could take the matter up in a definite form and invite exhibitors to come south and show their stock. He pointed out the immense trade which annually goes north and the benefits to exhibitors resulting from a show at the convention. The society is in a flourishing condition. Everybody is heart and soul in their work for building it up, and applications for membership are coming in very satisfactorily. Admission fee is $1.00, which pays also for one year's dues.

H. Papworth advocated November as the best month for a southern convention and on his motion Nov. 15, 16 and 17 were selected. The chairman appointed a committee to confer with the railroads relative to special rates. H. Papworth, J. Steckler and J. H. Menard volunteered to attend to this matter. In the selection of a chairman of the committee of arrangements Mr. Eichling showed sound judgment in appointing R. Lockerbie, grower for the Metairie Ridge Nursery Co. E. Baker, superintendent of Audubon park requested the chairman to instruct the Dayton delegation to use their influence at the convention to secure as many trade exhibits as possible and to impress our northern

THE WITTBOLD WATERING DEVICE.

Showing system in operation; Louis Wittbold inventor, in the foreground.

brothers with the fact that the southern society is anxious to cooperate in every respect with the S. A. F.

In cases where the great distance does not permit a southern florist to attend the conventions at the north the new society will be the means of bringing the florists together at least once a year and it is hoped that our brothers of the north will accept our invitation with the same hearty fraternal spirit in which it is extended.

Newport Horticultural Society.

ANNUAL EXHIBITION.

The annual exhibition of the Newport Horticultural Society was held August 13 to 15, and was a great success from every standpoint. In fact it was much better than at first anticipated when several of the private gardeners claimed they were too busy to make an exhibit. However, almost all of the notable estates were represented. There was a lack of entries in gateways, the sub-tropical groups and fancy baskets. The dahlias were fair but scarce. This feature would have shown up to much better advantage two weeks later.

F. L. Ziegler secured first prize for the best gateway decoration of hardy plants showing one side of the gateway in space of 140 square feet. Mr. Ziegler also secured a gratuity for the best Phœnix Rœbelenii.

James Robertson, gardener to Mrs. T. O. Richardson, was awarded first prize for the best bed of sub-tropical plants not exceeding 100 square feet of space.

Colin Robertson, gardener to Mrs. Robt. Goelet, secured first prize for the best group of palms, ferns and foliage plants tastefully arranged within a space of 100 square feet, also for the specimen palm, any species without restrictions as to size of pot or tub.

John Marshall, gardener to Perry Belmont, secured first prize for the best table of decorative foliage plants, each plant to be serviceable for a table 3x9 feet.

Lager & Hurrell, of Summit, N. J., were awarded a silver medal for the best display of orchid plants in bloom. This exhibit included Oncidium elegans, O. varicosum Rogersi, Dendrobium Thrysiflorum, Phalænopsis Reimstadiana, Cattleya Dowiana, C. Gaskelliana, and C. gigas.

David McIntosh, gardener to Mrs. C. M. Bell, was awarded first prize for the best six dracænas, not less than 3 varieties in 8-inch pots.

Gibson Bros. secured first prize for best pan of ferns not to exceed 15 inches in diameter. This firm also was awarded first prize for the best center piece of dahlias, for the best table decoration of dahlias, using Liebling, and for the best 25 yellow dahlias.

H. A. Jahn secured first prize for the best 12 pompon dahlias.

Julius Roehrs Co., Rutherford, N. J., secured a silver medal and gratuity of $10 for collection of rare plants and orchids.

W. S. Sisson had a fine collection of cactus for which he secured a certificate of merit and a gratuity.

J. L. Childs was awarded a certificate of merit for a collection of gladioli.

James Crawshaw, Providence, R. I., secured a certificate of merit for Asparagus plumosus Crawshawi.

Vaughan's Seed Store was awarded a certificate of merit for Gladiolus Mrs. Francis King.

H. A. Dreer, Inc., secured a certificate of merit for water lilies and a gratuity for group of new plants, exhibiting Pteris Childsi, P. Wimsetti grandi, P. Wilsoni, Alpinia vittata Sanderiana, Maranta insignis, M. Hieroglyphica, M. Mosella, Asparagus Ducheni, myrtle leaved smilax, nelumbiums in great variety and nymphæas.

F. E. Conine, Stratford,. Conn., was awarded a certificate of merit and gratuity for a group of plants.

The visitors included J. S. Hay, representing Henry A. Dreer, Inc., Philadelphia; J. Knight, representing Julius Roehrs Co., Rutherford, N. J.; J. Struck, representing Lager & Hurrell, Summitt, N. J.; H. A. Jahn and wife, New Bedford, Mass.; A. B. Wordell, North Westport, Mass.; A. J. Fish, New Bedford, Mass.; F. E. Conine, Stratford, Conn.; W. Neil Campbell, representing Vaughan's Seed Store, of Chicago.

The judges were Stewart Ritchie, Bruce Butterton and Alex. Fraser.

Lenox Horticultural Society.

The annual and perennial exhibtion of the Lenox Horticultural Society took place in the town hall at Lenox, Mass., August 15. This was the best summer exhibition in the history of this society. The hall was filled to the doors. Particularly fine were the collection Phlox decusstata, there being upwards of 60 varieties shown and all excellent varieties. The classes for annuals and perennials were well filled. M. T. Reynolds, gardener to Mrs. Edith Wharton, won in the class for 20 varieties of annuals. Mr. Reynolds has won this class for three years successively. R. Spears, gardener to Mrs. John E. Parsons, won in the class for 20 varieties of perennials among which were Stenanthium robustum, Spirea Davidiana Rudbeckia maxima, R. pupurea and Funkia subcordata grandiflora. In sweet peas Thos. Proctor, gardener to R. W. Paterson, was the principal exhibitor who had some remarkably fine sweet peas. In vegetables F. Heeremans, gardener to W. D. Sloane, and A. H. Wingate, gardener to Chas. Lanier, were first in their respective classes. Mr. Wingate was also the most successful exhibitor in the fruit classes. Mrs. W. B. O. Field won the table decoration (ladies only) class with dark blue larkspur. The following is the list of special awards:

First class certificate to A. H. Wingate for new dahlia, Chas. Lanier. This is a fine dahlia; its color is apricot yellow and a very large flower.

First class certificate to M. T. Reynolds or seedling phlox, it is a white phlox, of extra size, with a blush pink eye.

First class certificate to S. W. Carlquist for Rubus rosæfolius (strawberry-raspberry).

The following were awarded diplomas: E. J. Norman for exhibit of berries; D. Durm, Jr., for exhibit of potted plants; E. A. Jenkins for collection of perennials; W. D. Curtis for collection of phlox; Geo. W. Folsom for Lilium auratum. Geo. Thompson and A. J. Loveless were the judges.

GEO. FOULSHAM, Secy.

THE WITTBOLD WATERING DEVICE.

Showing Boston ferns suspended and watered from overhead pipes.

OBITUARY.

Henry Charles Johnson.

Henry Chas. Johnson, son of Chas. Johnson, died August 17 at the home of his parents at Marietta, Pa. He had been in his usual good health, when in January last, he caught a severe cold, which culminated in heart trouble and a complication of diseases.

Mr. Johnson was born December 23, 1872, in the same house in which he died. He was trained in the seed business, being one of the best posted young seedsmen of the day. From 1893 to 1896, he was of the firm of E. & H. Johnson, Riverside, Cal. In 1896, with his father, and his brother Ethelbert, who died in 1903, he founded the Johnson & Musser Seed Co., Los Angeles, Cal. He left this firm in 1900 to become a member of the T. H. Thompson Seed Co., Houston, Tex. Subsequently he organized and was secretary and treasurer of the Southern Rice Milling Co., Houston, Tex. For the past two years, and up to his death, he was on the staff of Wm. Henry Maule, the Philadelphia seedsman.

The funeral took place in Marietta August 20. Mr. Johnson possessed a genial, kindly, thoughtful nature, which endeared him to all who knew him. He is survived by a widow and one child, five years of age. Both his parents are still living.

DENVER, COL.—Will C. Ferrill, curator of the historical department at the state capital, is trying to make room for the finest herbarium in the state. Seven hundred samples of Colorado flowers have been procured by the purchase of the Ollsworth-Bethell collection.

THE annual convention of the Canadian Horticultural Association will be held at Guelph next week, August 29 and 30.

THE MAYFLOWER, heretofore published at Floral Park, N. Y., will be consolidated with Floral Life.

TAILBY'S new yellow calla, Mrs. Roosevelt, was given the award of merit of the Royal Horticultural Society of England.

DROUGHT has caused considerable damage to the florists' crops in many sections this season. Carnations are weakly and in many cases show the effects of severe attacks of red spider. Dahlias are stunted and will bloom but little, if any, this season. Violets have made poor growth.

ROBERT ARMSTRONG, landscape gardener of Santa Barbara, Cal., was in Paris August 20 and reports that he finds little new in the business there and that horticulture in America will compare favorably with that in France. The heat, he says, is very intense. He will return via Scotland in September.

Fischer's Freesia Purity.

Rudolph Fischer, Great Neck, L. I., N. Y., advises us that it has come to his knowledge that certain irresponsible parties have sold ordinary freesia bulbs for Fischer's Freesia Purity and for the benefit of those who have bought Purity not direct from him he gives the names of the following dealers as selling agents for his strain this season: Arthur T. Boddington, New York; Peter Henderson & Co., New York; Stumpp & Walter Co., New York; Vaughan Seed Store, New York and Chicago; W. W. Rawson & Co., Boston; Henry F. Michell Co. and Hosea Waterer, Philadelphia.

The Florists' Hail Association.

At a preliminary meeting of the Florists' Hail Association August 21 the reports of the secretary and treasurer were received and at the regular annual meeting held the following day they were adopted. The proposed amendments to the by-laws, article 5, sections 7 and 8, received attention, the first being adopted and the latter not adopted. The investment of the reserve fund was left in the hands of the president, secretary and treasurer, who are to constitute a finance committee. The following officers were elected: E. G. Hill, president; H. H. Ritter, vice president; John G. Esler, secretary; Albert M. Herr, treasurer; Elmer D. Smith, Joseph Heacock and F. E. Dorner, directors.

National Congress of Horticulture.

The National Council of Horticulture, embracing, as it does, the broad interests of horticulture, has had under consideration the matter of a National Congress of Horticulture to convene at Jamestown, Va., some time during the exposition period.

In view, therefore, of the interest manifested by a large number of persons, representing various branches of horticultural activity, it has been deemed expedient to arrange for a National Congress of Horticulture to convene at the Jamestown Exposition, during the week of August 19-24, 1907. The purpose of such a gathering is to consider topics of horticultural interest in its broadest meaning and to bring the more or less scattered branches into closer union and with a view that such a gathering would add inspiration and profit to all participants and others who are in attendance and should be the means of dignifying and advancing horticulture in all of its departments. In addition to the representatives of the broader interests, it is proposed to include in the assemblage leading specialists of the various divisions of horticultural work, who will consider topics of interest to the specialist, either before regular or special meetings of the several national societies, in case they arrange to hold a meeting at this time. Otherwise, such topics will be presented before departmental or sectional meetings of the congress representing the particular subject.

The exposition, situated, as it is, in the midst of a field, rich in horticultural products and easily accessible to a very large number who are interested in one or more branches of this great industry, should insure an attendance commensurate with the interest involved. The exposition company, together with the Norfolk Horticultural and Pomological Society, guarantees every possible courtesy, and facilities which will make the meeting place ample and convenient. Any society arranging to meet in affiliation with this congress may hold their regular sessions independently and without conflicting with any of the sessions of the congress.

All persons interested in any phase of horticulture are therefore asked to cooperate in this movement and all local, state and national societies are invited and urged to be represented either by holding their regular sessions, or by duly authorized delegates. It is hoped that this congress will bring together a multitude of horticulturists that could hardly be expected to come together in any other manner, and that a goodly number of the national societies will decide to hold a regular session during the week in which the congress is in session.

H. C. IRISH, Secretary,
National Council of Horticulture.

House Flies.

The department of agriculture states that in France a prize of $2,000 was offered for the best method of killing house flies. It was won for a suggestion to use oil stirred in water in vaults and cesspools. For manure the oil is mixed with sand or phosphate scattered over the piles. This prevents egg laying or hatching, as most of this is done in manure piles.

Bulletins Recently Issued.

By the United States Department of Agriculture, Washington, D. C.:

"Some Insects Injurious to Forests," by J. L. Webb, bureau of entomology.

"Meadow Mice in Relation to Agriculture and Horticulture," by D. E. Lantz, reprint from Yearbook of Agriculture for 1905.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admit'ed under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1906 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Situation Wanted—By first-class orchid grower and gardener, fully up-to-date; best of references. Address Key 755, care American Florist.

Situation Wanted—By a rose grower of 17 years' experience; 7 years with the best growers near Chicago. Address Key 763, care American Florist.

Situation Wanted—As working foreman, strictly sober, reliable, good education, German, single 20 years' thoroughly practical experience and good judgment in the line of horticulture, especially roses, carnations, 'mums, ferns, violets, fancy flowering pot plants and bulbs; good designer; first-class reference. Please state full particulars with wages, in first letter. Address Key 761, care American Florist.

Help Wanted—Two good single men, as growers, one for carnations and one for roses. Key 756, care American Florist.

Help Wanted—Good grower of carnations and pot plants. A. SUNDERBRUCH'S SONS, Cincinnati, O.

Help Wanted—Two good rose growers at once; wages, $14.00 per week. WILLIAM DITTMANN, New Castle, Ind.

Help Wanted—A good greenhouse man, single, for private place; no drinking man need apply. C. UFFLER, Govanstown, Baltimore, Md.

Help Wanted—A first-class carnation grower. Wages $45.00 to $50.00 per month; send references. HASKELL AV. FLORAL CO., Dallas, Texas.

Help Wanted—One good nurseryman and good propagator wanted at our nurseries good wages to right man. VAUGHAN'S SEED STORE, Chicago.

Help Wanted—At once; capable man to take charge of 20,000 feet of glass in carnations; $50.00 per month to start. J. W. DUNFORD, Clayton, Mo.

Help Wanted—At once, a good grower of carnations, 'mums and general pot plants; steady place for good man; state wages expected. W. H. HUMFELD FLORAL CO., Kansas City, Mo.

Help Wanted—2 good greenhouse men who can grow roses, carnations, 'mums and general stock; state experience and wages wanted. Permanent position. Aderess C. L. SHANKS, Newton, Kans.

Help Wanted—About October 1, all-'round gardener; private place, small greenhouse, but mostly outdoor work; must be sober, reliable and well recommended; $45 per month, room and fuel. J. S. BAKER, St. Croix Falls, Wis.

For Sale—1800 feet 4-inch cast pipe, in good condition at 10c, per foot, F. O. B, Paducah, Ky. C. L. BRUNSON & Co., Paducah, Ky.

For Sale—Nine greenhouses, dwelling house and barn, 3½ acres of ground. For particulars address P. O. Box 109, Newtown, Bucks Co., Pa.

For Rent—Four greenhouses, 11,000 ft. glass, at Cedar Rapids, Iowa, stocked and in good repair. W. M. KEELEY, Washington, Iowa.

For Sale—Some extra good second-hand 3-inch pipe, guaranteed sound, 6c per foot; also 4-inch. Several good boilers cheap Address W. H. SALTER, Rochester, N. Y.

For Sale—Dwelling and three greenhouses, seven miles from Philadelphia; established 14 years. Everything in good shape to go right ahead. Other business cause of selling. F. R. MATSINGER, Palmyra, N. J.

For Sale or Rent—Store and five small greenhouses, with or without dwelling, on street car line; only florist in town; cause sickness. 548 119th St., West Pullman, Chicago.

For Sale—Worthington duplex steam pump, capacity 30-40 gal. per minute, in good condition, $45.00; No. 1 receiver and fittings for pump, good as new $50.00. Dean pump for hand or steam, almost new, $20.00; 6-inch pressure regulator, used two seasons, $50.00; 2½-inch pressure regulator, $18.00. Carnation supports, $15.00 per 1000; $125.00 for 10,000. JAMES W. DUNFORD, Clayton, Mo.

FOR SALE.

At a sacrifice, greenhouse well stocked and long established business of the late J. P. Coen, Lexington, Mo., one of the best paying little businesses in the country, and in perfect condition; no competition within 30 miles. The place consists of 3 greenhouses 85x20, 1 lean-to and cold frames, 1½ acres of ground, an excellent 7-room house, with all modern conveniences, steam heat, electric light, etc., out-houses, good barn, laundry, chicken houses, etc. The entire place is lighted with electric light, heated with self-regulator steam boiler, and city water throughout the grounds and houses. Good wholesale trade as well as retail. Lexington is noted for its colleges and schools; one boys' military academy, two girls' colleges and a number of minor schools, all of which keeps the cut flower business very brisk during the school season. The place can be bought for $6,500, which amount wouldn't pay for the improvements; $2,000 cash, balance to suit. For further information address ARTHUR NEWELL, 12th & Baltimore Aves., Kansas City, Mo.

HELP WANTED.

Grower of miscellaneous stock, principally tea roses and carnations, for a public institution with about 15,000 feet of glass and plenty of outside ground; position pays $40.00 per month with room and board. Send full particulars to

Key 752, care American Florist.

Ten (10) years old. Copy of latest inspection report can be forwarded. Boilers must be removed during this summer. Price $400.00. Arrangements for delivery can be made according to conditions.

ISAAC COFFIN COMPANY,

52 Sudbury Street, : : BOSTON, MASS

It is good business policy to mention

The....

AMERICAN FLORIST

When you write to an advertiser

San Francisco.

The florists have all been very busy with funeral orders the past week, mostly smaller pieces being asked for. This busy splurge has kept flowers at pretty fair prices and most all the growers are doing better than they expected would be the case so soon after the April week of horor. It was noticeable this week at the flower stands that the abundance of asters were being drawn on preferably to carnations for the structural work of the various floral artisans.

NOTES.

In THE AMERICAN FLORIST issued immediately before the earthquake, I had a notice in this correspondence of the formation of the Forrest Floral Co. as successor to the long established Shanahan Floral Depot. With good taste Mr. Forrest sent in his subscription for the paper at the same time. This old floral depot was demolished by the trembling earth and licked out of sight the next day by the fire. All this is past history, but this week Mr. Forrest started afresh in the flower business in a building he had erected to order at Twenty-second and Mission streets.

The Pacific Coast Horticultural Society is to be congratulated. Since the city's disaster it has been holding its meetings all around at the several homes of the various members in this city and Oakland. But now it will be better. At the last monthly meeting the society accepted an offer of the picturesque park lodge in Golden Gate park for meeting purposes, made by the park commissioners. From what I have overheard I think I am safe in assuming that John McLaren, superintendent of Golden Gate park and member of the organization is the man who turned this card of good fortune for the society. There was another interesting communication read at the meeting, one I particularly like to mention because it is to the glory of a brotherly fellowship feeling existant in Chicago. This other communication was from P. J. Hauswirth, president of the Chicago Florists' Club, and contained the club's check for $150 for florist and grower victims of the earthquake-fire.

JESSE WHITE.

St. Paul.

EXCEPTIONALLY GOOD SUMMER TRADE.

Trade has been the best so far this summer that has ever been experienced and stock has been better and more plentiful. There has been a good deal of funeral work and mostly of the better class, which has aided materially. But still there has been a good call for cut flowers for other purposes. While this may not be true of all the stores, it is with the majority.

NOTES.

The G. A. R. encampment last week did nothing to speak of except to bring in an occasional out-of-town customer and a good many sightseers. The excursion rates for the encampment brought a number of the trade here to enjoy the cool breezes of Minnesota, but they were disappointed, as it turned out to be the warmest week of the whole summer. Among those visiting were Mrs. A. L. Glaser and Miss Glaser of Dubuque, Ia., and T. H. U. Smith, of Denver, Col.

The St. Paul Floral Co. has pretty well completed their rebuilding.

Holm & Olson's new houses are all finished and filled. O.

Kansas City.

THE MARKET.

Trade conditions are anything but encouraging. This season has shown a slight decrease in funeral work which usually helps to fill out the day's sales. It is well, however, that the scarcity of orders exists, as good stock is almost out of the question. The increase in the supply of asters is about the only feature over last week. Several store-windows are banked with Hydrangea paniculata, which appears to be especially good. A shortage of carnations is still apparent. The same condition applies to rose stock. American Beauty is improving slightly in color and size. Gladioli are more abundant and the quality better than heretofore. Water lilies and lily of the valley are to be seen in limited quantities. All anticipate a busy season this fall and winter. Crops are good, fruit is more abundant than for several years past, in fact, prosperity seems in evidence at every turn. Many from this city attended the convention. There were several good rains recently and all nature smiles.

NOTES.

At Kellogg's one may see the new rose Minnehaha, which Mr. Kellogg brought forth this summer. A fine cut of this rose has been made every day and indications are favorable for its making a fine rose, which will fill a long felt need for something really choice for summer cutting.

In his recent western trip John Schneider took quite a liking to Portland and Seattle. He is so well pleased with those cities that in the future he expects to make one of those places his home.

The Kansas City Floral Co., under the management of J. Papadakos, keeps constantly on hand a nice assortment of seasonable stock.

Chas. E. Heite is again busy looking after affairs at his place. He reports a very enjoyable vacation in Arkansas.

Fire recently caused the loss of almost all of Mrs. Mosley's stock of palms while she was on her vacation.

A wind storm visited this city August 16 and was quite destructive to awnings and plate glass windows.

Mrs. John Tobler says things are progressing nicely during Mr. Tobler's vacation in Chicago.

V. Bergman of the Ernst Weinhoeber Co., Chicago, was in the city recently visiting relatives.

Robt. Tindall has not yet fully recovered from his illness contracted a few weeks ago.

Max Aller is having a fine electric sign made for the front of his store.

Arthur Newell has been busy as usual this week with funeral work.

W. H. Humfeld had a nice wedding decoration last week.

Visitor: John P. Degnan, Chicago.

EVANSVILLE, IND.—Wm. Blackman, Sr., who has been in poor health, is now improved.

Davenport, Ia.

TRI-CITY FLORISTS' CLUB MEETING.

The Tri-City Florists' Club met August 11 at Fejervary park for its regular monthly meeting. The members went out early in the evening to inspect the new conservatory (40 x 75 feet, 30 feet to the ridge) being built by Lord & Burnham Co., of New York. The meeting was a very interesting one and was largely attended. One new member, Frank Woely, was admitted. Mr. Woely is head florist of the Davenport parks, taking Emil Boehm's place, Mr. Boehm having been appointed superintendent of parks. Mr. Boehm took charge August 1. The subject for discussion was "Chrysanthemums and Flowering Plants for Christmas," which brought out many fine and interesting points concerning culture of Begonia Le Reine, poinsettes, etc. The national convention was talked of but so many florists are building this season that everyone is too busy to take the time to go. President John Temple is the only one likely to attend the convention at Dayton this year. A fine luncheon was served at the park after the meeting and a social hour was enjoyed. Davenport florists can surely be proud of their club. Nearly every florist in the three cities is now a member, and every one makes it a point to be on hand at the meetings which are always interesting and instructive.

NOTES.

The month of July in the way of business was the best ever known and florists are looking for a record breaker this fall and winter. And the way the houses are being filled up they will be ready to handle any thing that comes along.

Henry Pauli has completed his new carnation house, 27 x 160 feet, and has it planted with the best of the newer carnations. Mr. Pauli is also building a new palm house.

The new conservatory at Fejervary park will cost when completed nearly $11,000. A cage for mountain lions is also being built at the zoo to cost over $1,000.

Henry Gaethje, of Rock Island, Ill., is quite ill. He was unable to attend the Tri-City Florists' Club meeting, which he seldom misses.

Roses and chrysanthemums are looking fine and every grower is busy housing carnations. More are being planted than ever before.

The Bells Floral Co. is remodeling its store and when finished will be the finest in this part of the country.

Julius Staack, of Moline, is busy glazing and putting the plumbing in his eight new houses. T. E.

LOS ANGELES, CAL.—Frank Hutchinson, gardener to August Taylor, Menlo Park, has been spending a week here on his wedding trip.

JANESVILLE, WIS.—The Janesville Floral Co. will make an exhibit of its new fern, Nephrolepis Amerpohlii, at the Dayton convention.

LOS ANGELES, CAL.—C. W. Reimers, formerly of Louisville, Ky., who recently sold out his business there, is now permanently located here. He does not expect to embark in any business for a year or so.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever he select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907 I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa.

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old, $ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots, 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long, from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size; their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25, $1.50, $1.75, $2.00 to $2.50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them; can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

Nephrolepis Barrowsii, 6-in., large ready for 7-8 in. 50c; 4-in., large, 25c.

Nephrolepis Scottii, 6-in. pots, large, ready for 7-8 in., 50c; 5½-in., 40c; 5 in., 35c; 4-in., 20c to 25c.

Boston Ferns, 4-in., 20c to 25c; have them by the 1000.

Asparagus Plumosus Nanus, 3-in., 6c; 4-in., 10c.

Cycas Revoluta or **Sago Palm,** 6 to 7 in. pots, 7 to 20 leaves, 10c per leaf.

Cocos Weddelliana, 15c.

Areca Lutescens, made up plants, 4-inch pots, 5c.

Solanum or **Jerusalem Cherries,** 2½-in., per 100, $5.00; the same varieties as we sell at Xmas, for from 75c up to $1.00 each.

Ficus Elastica, Belgian importation, 6-in. pots 50c each.

Ferns. A fine assortment of Ferns for dishes large, bushy, out of 2½-inch pots $5.00 per 100; 3-inch, 7c each.

All goods must travel at purchaser's risk. Cash with order, please.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls.
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

GODFREY ASCHMANN, Importer and Wholesale Grower of Pot Plants, 1012 Ontario St., PHILADELPHIA, PA.

Please mention the American Florist when writing.

Buffalo.

Sweltering weather, moderate trade and all praying for rain was the situation the past week.

The energetic committee appointed by President Neubeck has picked out Fort Erie grove for the annual picnic of the Florists' Club. It is in Canada and a beautiful, cool place, very convenient to the city by ferry and the Snake Hill railway. The grove when first opened was known as Buttermilk grove, as all the farmers with an eye for business had a sign on their fences "Buttermilk, 5 cents per glass." However, all should go and a good time will be assured.

Some of the vacationists are returning. W. J. Palmer and family are home and as is also S. A. Anderson and family. Arthur Beyer, manager of Palmer's Genesee store, has gone on a delightful trip for two weeks. A party of six left in a naphtha launch down the Erie canal to Albany, the Hudson river to New York, and thence to Narragansett pier. It is a vacation that is envied by many as one is not dependent upon the time table of any steam boat or railway, but monarch of all he surveys. Miss May Pendergast, of the same store, is rusticating on Hanlons island, the Manhattan beach of Ontario. Miss Gertrude Sauer, of S. A. Anderson's, is sojourning at Consent beach, enjoying the breezes and air that the beach is noted for.

The delegation at Dayton was headed by Wm. F. Kasting and wife, C. G. Guenther and wife, Wm. Scott, Prof. John F. Cowell, D. B. Long, P. Baum, and C. J. Pult, who thoroughly demonstrated the good qualities of cement benches, and many others were of the party.

Visitor: H. W. Jones, of Z. D. Blackistone's, Washington, D. C.

BISON.

Louisville.

TRADE RATHER BRISK.

The previous week business averaged rather brisk, and stock was fortunately obtainable in satisfactory quantities. We have been having what is probably the warmest weather of the season, with little relief in sight. Roses average fair in quality and the supply is very satisfactory. The demand has been unusually good. A few good carnations are being received, but there is not much room for them. Asters of very good quality are in ample supply, and find a very good demand. Gladioli are very popular for window decorating. Lilium album and L. rubrum can be had in adequate quantities, and are used extensively in funeral pieces. L. auratum is no longer seen to any great extent. There are a few Shasta daisies obtainable, but the demand is hardly noticeable for them. Hardy hydrangeas, hardy phloxes, rudbeckias, etc., can be had in very good quantities, and are used extensively about the stores. The supply of green goods is adequate.

NOTES.

The local delegates to the Dayton convention have no doubt enjoyed their stay. Among those who went were Anders Rasmussen and wife, Geo. Thompson, Jr., and wife, Jacob Schulz, August R. Baumer, Louis Kirch and Henry Fuchs.

Henry Nanz has been appointed to look after the floral interests of the Kentucky state fair, which is now a permanent one, to be held annually at Louisville.

Wm. Walker has planted his carnations from the field.

Jacob Schultz's new houses are about completed.

F. L. S.

FOR SALE.

1,200 Carnations, Lawsons mixed and Enchantress at 3c; 500 Chrysanthemums at 2½c each; about 100 Cypripedium plants at 25c, and 6 nice Bougainvillea Trees at $2.00 each.

American Florist Co., Chicago.

Chicago.

TRADE FAIR.

Despite the fact that most wholesale establishments lack their managers, that many retail florists are away at the convention, coupled with the usual dullness of the season and six days of torrid weather, market conditions remain surprisingly good. There is an abundance of stock of all kinds arriving of comparatively good quality, which gradually moves off, with but a small percentage going to the dump heap. It was universally predicted that only poor material would be seen after the humidity of the past few days, although some excellent roses and carnations have been sold at good prices. American Beauty is coming in freely. There is a plentiful supply of Bride, Ivory, and Kaiserin; Meteor and Killarney is rather short. Carnations are in good supply, a trifle short in stems and small in flower with the white varieties predominating. The influx of asters has almost ceased. The quality of this stock has made it a drug for some time but a decided improvement is noticed. Gladioli are over abundant and difficult to move at any price. Sweet peas, while not to be had in large numbers, are in poor demand.

NOTES.

Central exchange telephone girls, in company with the rest of humanity, took their fling at the long suffering wholesale man when some 200 of them objected to being denied entrance to their "boards" by way of the street and quit work very abruptly last Thursday. Irate patrons blamed the unobliging retailer, greenhouse men decided to "tell the city store a thing or two," and the needy wholesaler cursed fluently over the dead wires. The embargo was lifted a little later in the day, much to the relief of all concerned.

Retail flower stores vie with each other in arranging catchy window displays in this season of poor business. Some very creditable decorating has been done, with Boston ferns usually the center of attraction. Several good displays of nelumbiums at H. E. Klunder's flower shop and the Central Floral Co. are creating a good deal of attention. The latter concern is exhibiting a novelty in the form of Tritoma Pfitzerii. commonly called the "red hot poker" which causes many people to stop and wonder what they are looking at.

That the florist trade is rapidly pushing its way farther into the west, would seem evident from a glance at the shipping orders of Kroeschell Bros. They are now sending boilers into remote portions of the extreme northwest. Greenhouse building in Boise, Idaho, Portland, Mt. Tabor, and Salem, Ore., Hamilton, Mont., Vancouver and Ellensburg, Wash., and Vancouver, B. C., has created additional business and prosperity.

According to the Sharp, Partridge Glass Co. a very late start will be made by the glass factories this fall. Already a decided shortage in some sizes of greenhouse glass is noticeable and the prospects are that in a short time a great many sizes will be unobtainable.

Returning conventionites report enjoyable times at Dayton. Everyone who attended is thoroughly satisfied and speaks highly of the town. All unite in thanking the convention managers for the thoroughness of the preparations made for their coming.

G. E. Borkman, a convention delegate from Seattle, Wash., was run down by a teamster August 20. His left side was painfully hurt but after being helped to his feet by a policeman was able to go away unassisted.

H. G. Selfridge, who is now located in England, has loaned his extensive Lake Geneva collection of orchids to Lincoln park for a term of five years.

C. L. Washburn and son, with a party of friends, leave on an extended hunting trip August 25, on the S. S. Northland, camping in the far north.

Peter Reinberg is now cutting a fine lot of his new Marshall Field rose. Most of the stock is from young plants and exceptionally good.

C. W. McKellar is making a feature of a large stock of Gladiolus America, which he is receiving from an Ohio grower.

Scheiden & Shoos have leased the space in the Flower Growers' Market formerly occupied by John Cooke.

Fred Sperry has returned from a three week's vacation trip to Michigan.

O. P. Bassett left on a 10-day automobile trip August 17.

J. P. Degnan spent a few days in the city last week.

Visitors: A. Gude, Washington, D. C., returning from Red Mountain, Co., via this city and Dayton, O.; D. D. England, Winnipeg, Man.; N. B. Stover, Grandville, Mich.; W. G. Matthews, Dayton, O.; G. E. Borkman, of the Woodward Park Floral Co., Seattle, Wash.; H. M. Burt, Battle Creek, Mich.

St. Louis.

TRADE FAIR.

The market this week may be termed fair, not that there was any increase in general trade, but funerals of which there were many caused almost a scarcity on all kinds of flowers. Carnations are improving in quality. Roses still continue to arrive in very poor condition. Very small blooms find no demand, as they do not make any showing in work and they cannot be used to any advantage. American Beauty has a good and steady demand, especially those with stems from 18 to 30 inches. The very short stems are hard to sell and have to be sold cheap in order to get a market for them. There is quite a lot of greens in the market, smilax, Asparagus Sprengeri and A. plumosus, also fine adiantum. These appear to be selling fairly well but are often not quite cleaned out. There has been a fair demand for asters the past week. Tuberoses and gladioli are selling well.

NOTES.

The florists attending the S. A. F. at Dayton, O., left August 20 at 8:15 p. m., over the Vandalia. The following ladies and gentlemen attended: F. H. Ude, Kirkwood, Mo.; J. L. Ammann, Edwardsville, Ill.; Geo. M. Kellogg, Pleasant Hill, Mo.; E. Denker, St. Charles, Mo.; Dr. Halsted, Belleville, Ill.; E. W. Guy and wife, Belleville, Ill.; Mrs. E. A. Moseley, Kansas City, Kans.; Miss Schnell, East St. Louis; W. H. Kruse, J. J. Beneke, C. A. Kuehne, Geo. H. Angermueller, Wm. Young of Young & Sons, Miss Scott, confidential clerk with Young & Sons, J. L. Koenig, Otto G. Koenig, Theo. Miller, wife and daughter, F. C. Weber and wife, F. H. Meinhardt and wife and the Misses Meinhardt.

Eddie O'Rourke, a 14-year-old delivery boy for Geo. Angermueller, proved himself a hero Friday. Hermann, a clerk at an adjoining grocery, was lighting a fire in the yard. While using gasoline his clothes caught on fire. Eddie rushed to him and pulled his clothes off, saving the man's life.

G. E. Ahner, of Kirkwood, Mo., is putting up a new house, 22x80 feet, for carnations and sweet peas to be finished in time for fall planting. His son, A. G. Ahner, also of Kirkwood, Mo., is also putting up 2 houses, 17x100 feet, to be completed this fall.

Wm. Kalisch and wife of the firm of W. Kalisch & Sons, have gone to New York; from there they sail for Europe. They will return about October 1. While abroad their greenhouses in rear of store will have been entirely rebuilt and remodeled.

Max Rotter was very busy the past week with floral work, both of fresh and dried flowers of which he receives direct importations.

W. J. and M. S. Vesey are shipping some good white and pink Cochet to this market also some good Bride and Bridesmaid roses.

Bobby F., ridden by Raymond Foster, son of F. J. Foster, won first prize in the ring saddle show at the house of delegates' picnic.

Alex Waldbart, Jr., son of Alex Waldbart, is recovering from his injuries. He is still in the hospital but hopes to be out shortly.

The flower beds both at the old court house and the new city hall are looking fine. Geo. Ostertag is giving general satisfaction.

Chas. Fleckenstein, formerly wholesale florist here, was in the city attending the funeral of Wm. Schaefer, his father-in-law.

Heller Bros., of New Castle, Ind., are shipping some good American Beauty buds to this market which find ready sale.

Geo. Waldbart is painting and refitting his store and greenhouse preparing for the fall trade.

Geo. Hartman, Kirkwood, Mo., is bringing in some fine tuberoses and gladioli.

Joe Hauser, of Webster Grove, reports trade as very good this summer.

M. M. Ayers is busy cleaning up and getting ready for the fall trade.

Fred Alves has returned from the east ready for fall business.

THE BENTHEY-COATSWORTH CO.

35 RANDOLPH ST. WHOLESALE FLORISTS CHICAGO.

Philadelphia.

The usual mid-August demand about sizes up the situation. Perhaps there is a trifle more than at this time last year. The growers, who are after all the ones who give the impetus to the business by supplying the market ahead of the demand, particularly in the early fall, are sending in good stocks of flowers in all lines, particularly American Beauty roses, which were never better or more numerous at this season. Gladioli are a glut and only the choice sorts realize enough to pay the express charges. There is quite a demand from the seashore resorts, where the regular stores and the street merchants of this city, the majority of whom are summering there, report a lively trade. Only the best is wanted, as most of the customers are guests of large hotels.

Oh, I don't know! It wasn't such a dream in the light of the event of the past week. The S. S. Pennock-Meehan Co., now, another confirmation, and then these two together, and there you are. Well the combination that is receives favorable consideration from the street. Both S. S. Pennock and Chas. Meehan have had a lifetime experience in selling flowers. Mr. Pennock began as a boy in his brother's commission house, the first in the city, and finally bought out the business and succeeded him at his death, some 15 years ago. Mr. Meehan's experience began when shortly out of school with handling the output of the Lonsdale and Burton nurseries, carrying the same from store to store. This he finally resigned to go into business as a grower, and when the growers began looking for a manager for their market project Mr. Meehan's name was first mentioned and he was finally persuaded to take the place. This union will make a very strong combination which, with the affable Mr. Fancourt as secretary and Mr. Faust, the Pennock bookkeeper, as financial man will be a very well systemized concern that will have no trouble to keep itself in the front ranks of the commission business.

NOTES.

The Leo Niessen Co. has sprung a surprise on the street with the announcement that it had leased for a term of years the building at 1209 Arch street, which is now being rebuilt in the most modern way especially to suit this firm's business. The lot is 25 feet wide by 120 feet deep. The company will occupy the basement and two floors above. The basement will have a ceiling 10 feet in height. In this will be installed an auxiliary cold storage room with a capacity of 2,500 square feet, while a similar room on the main floor will have a capacity of 4,000 square feet. These storage rooms, Mr. Niessen says, will be the best so far constructed for the purpose. The entire first floor will be for the sale and handling of cut flowers, the second being given up to the offices and the supply department, which is an important branch of the business. The company finds it hard to keep up in the matter of space for its rapidly growing business, but expects to have room enough in its new building to expand for a year or two at least. Property in this block has been jumping lately and since signing its papers the concern has had an offer of nearly $10,000 for the lease, but declined as there was no other desirable property to be had in that neighborhood. The firm expects to be in the new quarters ready for business by October 1, when Mr. Niessen says it will be the most up-to-date establishment of the kind in this country. The tenants of the Market company, Messrs. W. J. Moore, Berger Bros., Lord & Burnham and some of the stall holders will continue to do business at the old stand, renting as before from the company, whose lease runs until July 1 of next year.

Michael Bogan has a good offer for his property at Llanwellyn from the Philadelphia Traction Co., which is about to open a large amusement park as an attraction for that section of the city. K.

Boston.

TRADE FLUCTUATES.

The market opened for the week with a decided change for the better, but to the great disappointment of both growers and retailers it did not last. There was a general clean-out of both markets Monday, due mostly to an enormous amount of funeral work at the different stores. The rest of the week goods were hard to move as little was needed by the retailer to supply the trade. The early asters, particularly white, are about over, but the later ones are coming in good quantities. Sweet peas and some of the gladioli have not yet fully recovered from the effects of the changeable weather of the past month. There is a good supply of roses in the market. Kaiserin, Carnot, Wellesley, and American Beauty being the most saleable. Bride and Bridesmaid roses are improving in quality. There is plenty of American Beauty, and lily of the valley is sufficient to meet the demand, most of which comes from outside sources.

NOTES.

The midsummer show of the Massachusetts Horticultural Society was held August 18 at Horticultural hall. It was comprised chiefly of gladioli, dahlias and vegetables. John L. Childs, of Floral Park, N. Y., exhibited a large variety of gladioli. Among the prize winners for gladioli were J. K. Alexander, of East Bridgewater, and M. Sullivan, gardener to M. Whitman. Some fine phlox was shown by T. C. Thurlow. Among the dahlias W. W. Rawson & Co. exhibited over 100 varieties of the choicest and newest of the cactus type. Julius Hewrlin, of Braintree, and the Harvard Botanical Gardens, made striking exhibits of perennials. The show was well attended, and being a midsummer one, was most successful.

Welch Bros., of Province street, have just completed negotiations with the owners of the building numbered 226 Devonshire street and will occupy the basement and first floor of the building about October 1. They will have the largest wholesale establishment in New England, comprising of over 10,000 feet of floor space. The street floor is being remodeled and will be fitted up with an extensive cold storage plant. It is located in the heart of the business section of the city and will make an excellent place for their ever-increasing trade.

A ball game between the salesmen of the Park Street Market and the employes of the Waban Rose Conservatories took place on the premises of the latter concern August 18. The team of the Waban Rose captained by Joe Gallagher, defeated the Park street team under Eddie Crowley by a score of 29 to 3.

Among those on vacations are John Ruhal of W. E. Doyle's; Geo. Dunn, James E. Travers, Patrick E. Moran, Miss Jennie T. Coyle of Thos. F. Galvin's; Chas. Algren of J. Newman & Son, and Wm. Crosby of W. B. Bunker's.

There was an excellent display of prize dahlias in the show window of Thos. F. Galvin August 18 and 19, which attracted widespread attention. They were grown by the W. W. Rawson Co.

The annual sale of stalls of the Music Hall Market will take place September 1, and the directors anticipate many new bidders. The company has declared a dividend of 6 per cent, payable October 1.

Among the party which attended the Dayton convention were W. H. Elliott and wife, F. E. Palmer and wife, and W. J. Stewart.

Visitors: H. O. Belcher, Peoria, Ill.; F. R. Pierson, of Tarrytown, N. Y.; G. R. Ludwig, of A. N. Pierson, Cromwell, Conn., and Geo. H. Bartlett, manager of the Franklin Floral Co., of Franklin, N. H. B.

Pittsburg.

DEMAND EXCEEDS SUPPLY.

Business was all that could be desired during the past week. The wholesalers found great difficulty in filling orders for anything but gladioli, which are to be seen by the thousand. The early asters came in with a rush and not half of them were sold. In three days a change came about and not an aster was to be seen. The early flowers were over and the late crop had not come in. White seemed to drop out of sight altogether. At this writing the cut is steadily increasing and the wholesaler can sleep in peace. Some very nice roses are coming in. Ivory has demonstrated that it is a fine summer rose, coming in with long stems and good foliage and buds. A few growers are still cutting carnations from the houses, but stock from the field is much better, although short in stem. There are enough lilies to go around. Dahlias are quite plentiful but sales slow.

NOTES.

A. T. Lorch & Co., DeHaven, have both their new houses all planted. Mr. Lorch expects to have them glazed within two weeks.

Howard Carney, of J. B. Murdock & Co., took part in the races of the volunteer firemen's convention at McDonald, his team winning almost every race it entered.

Martin Reukauf, accompanied by the junior Mr. Bayersdorfer, of Philadelphia, stopped a few days in town.

E. C. Ludwig returned from the Eagles' convention in time to attend the Dayton convention.

Wm. Lauch, New Galilee, is sending the Pittsburg Cut Flower Co. some very fine asters.

The Florists' Exchange is getting specials in New York state.

W. A. Clarke spent a couple of days in Kittanning this week. M.

MARKET CONTINUES DULL.

The market continues most dull and uninteresting. There is an excess of arrivals which makes cleaning out more than a problem, and much goes to the ash barrel. Roses are still generally very poor in quality, the new crop not yet coming in heavy enough to make much of a showing. Picked qualities bring perhaps a penny or two more than general quotations, but as this is nearly always the case in the New York market they are in no way to be taken as a criterion for other grades. Kaiserin, Augusta Victoria, Carnot and Killarney are the varieties of stock arriving in the best shape and sell pretty well. Carnations are more plentiful, but very short in stem and of the quality usually incident to the cutting going along with disbudding. Asters are not quite so plentiful as they have been, and when of good appearance sell fairly well at remunerative prices. Cut hydrangeas are flooding the market and are practically unquotable. A little cosmos and bouvardia are coming in and the demand for them is fair. Lilies are not quite in such good demand as they have been.

NOTES.

The will of James Weir was filed in the office of the surrogate August 17. By the terms of the will, the widow, Margaret A., is devised the property at 236 Twenty-fifth street, and bequeathed $5,000 and all the household effects; to the son, James E., the property at 228 Twenty-fifth street, is devised; the daughters, Jessie M. Hawkins, Mabel M. Miller and Janet R. Weir, each receive $5,000. All the remaining estate is given to the four children who have to pay the widow the sum of $2,500 a year during her life. The son James E., can secure the good will and name of the business, but not the real estate, for $30,000, if he wishes and have ten years to pay for it in.

The chrysanthemum show of the American Institute is scheduled to take place in the institute rooms in the Berkeley Lyceum building, November 7, 8 and 9. Conducted this year on a smaller scale and in very small quarters, the premiums and classes are reduced in number. In the class for groups of flowering and foliage plants the space limit is 60 square feet of table. Entries should be sent to Dr. F. M. Hexamer at the institute.

Joseph Leikens, the Thirty-third street and Fifth avenue florist, came into the city for a few hours last Saturday from Newport. He says business at his Newport store has been very large so far this season, and prospects are very good for a continuance of these conditions well into next month. The New York store will reopen September 15.

Roderick O'Mara, of Peter Henderson & Co., brother of Patrick O'Mara, died last week. He had been for a long time connected with his firm, and was always known as a diligent, painstaking and courteous man, a general favorite in his circle of friends.

The Julius Roehrs Co. of Rutherford, N. J., has just completed five new greenhouses about 100 feet long, which will be utilized for orchids, and relieve the somewhat crowded condition of their other houses.

John I. Raynor's store is undergoing renovation for the coming season. Mr. Raynor does not expect to join the vacationists this year, his business permitting him but little leisure.

Jack Gunther has been taken into the business of his brother, W. H. Gunther, and the business will now be conducted after September 1 under the firm name of Gunther Bros.

John Young is another wholesaler who is taking his vacation out of the hours left to him each day during the season of early closing.

James B. Kidd, formerly with the Hinode Florist Co., is now with Wm. Elliott & Sons, the Fulton street seedsmen.

Brooklyn is to have a new plant, bulb and seed store at 784 Broadway. It will be opened by H. Miller.

J. K. Allen arranged to get back from his vacation in time to join the party for the Dayton convention.

Chas. H. Totty, of Madison, has been spending a few days in the Canandaigua district.

A. M. Henshaw moves into the city this week from his summer residence at Summit, N. J.

Horace E. Froment is spending a short vacation at Lake George.

New York to Dayton.

The New York delegation, with ladies, to the number of about 50, left New York at 2:04 p. m. on Monday in a special Pullman car attached to the Southwestern Limited over the New York Central railroad. The transportation committee of the Florists' Club, cooperating with the house committee of the club, saw that an apartment on the train was well stocked with refreshments, both solid and liquid, and the party soon settled down to enjoy the trip.

At Albany a few members of the Boston delegation boarded the train and were welcomed by their New York friends. Director E. V. Hallock and Mrs. Hallock also joined the party at this point. Other delegates were picked up along the road at Rochester and Buffalo. At the latter place about midnight President W. F. Kasting and Mrs. Kasting, with a party, boarded the train, and felicitations were in order during the morning. Dayton was reached about 10 a. m. on Tuesday after an uneventful but very pleasant journey.

That adage of J. K. Allen, "We open in the morning when the rooster crows," did not work on the Pullman car. Notwithstanding the crowing of a lot of roosters in express transit in the Cleveland station at dawn, and some amateur roosters who tried to work "crows" on him, J. K. refused to open even his eyes.

Most of the male contingent made an exhibition of their capabilities as early risers, and were not a bit disgusted to realize that the latitudinal change in time found them dressed one hour earlier than their boasted "usual." And, strange too, everyone said he had never slept better in his life.

The hearts of many, both Scotch and otherwise, bled with Alex. Wallace and John Birnie at their concert in the smoking room Monday night. At midnight they had still a song and a chorus or two to dispose of, but they finished their programme without interruption.

The mayor of Niagara Falls was on the train and made an informal call on the delegation in their car. The ladies were greatly pleased with the exalted gentleman's visit and he would undoubtedly be conceited had their encomiums been expressed in his presence.

When passing through Springfield, Ohio, the crowd sent up a hurrah as they caught sight of the faces of R. A. Vincent of White Marsh, Md., and his son, passengers on a Springfield street car.

Wm. Scott, of Buffalo, paid the party a cock-crow call Tuesday a. m. William seemed to regret that he had not boarded the train early on the previous evening.

Ex-President Traendly had some difficulty in collecting a certain very necessary part of his apparel Tuesday a. m., they or it having disappeared in the night.

The sterner sex were one and all enthusiastic in their praise of the ladies' efforts to make the car look like the interior of a milliner's shop.

Frank Traendly and Ed. Dorval dispensed the hospitalities of the sideboard with credit and to the great satisfaction of everybody.

Alex. J. Guttman gave an admiring throng a grand exposition of artist's work with a "real" safety razor.

It was a long wait for breakfast Tuesday morning and Charlie Weber got homesick.

Glen Cove, N. Y.

The Nassau County Horticultural Society met at the usual place August 8. There was a very large attendance, with President Harrison in the chair. One new member was elected and there was one nomination for active membership. In the competition for points S. J. Trepess scored 92⅓, H. Meyer 87 and Felix Meuse 81⅓. The silver match safe given for the best six varieties of vegetables was awarded S. J. Trepess. Others in the competition were J. Harrison, Peter Swen and H. Matz. Some good pears were exhibited by James Holloway, Cannas and Dendrobium thrysiflorum by F. Boulon, and Canna King Humbert by Peter Swen. The subjects for competition at next meeting will be dahlias in three classes, each with a box of cigars as a prize, as follows: best collection of single dahlias, best six varieties of show dahlias and best collection of cactus dahlia, all to be correctly named. A very interesting and able paper, entitled "How to Grow American Beauty Roses" was read by C. Bertenzel, of Glen Head, for which he received a very hearty vote of thanks. J. F. J.

"I had a dream the other night," said the joker at a luncheon table recently. "I dreamed I was in business with a rich man, selling potted flowers. But business was bad, and we decided to discontinue business. I wanted the pots and the flowers, and took them."

"What did the rich man want?" asked one of the guests innocently.

"He wanted the earth," replied the wit.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

MELON DAY at Rocky Ford, Col., will be celebrated September 6 this year.

J. E. NORTHRUP, Minneapolis, Minn., has been ordered by his physician to take a month's rest.

CONNECTICUT sweet corn prospects are reported above the average at this date although the season is late.

WISCONSIN PEA reports continue favorable and early estimates are likely to be maintained. Garden beans in Wisconsin are also looking well.

CHAS. HOLLENBACH, son of Peter Hollenbach, is to be married August 26. All wish the young couple the happiest and most properous of careers.

A. EMERICH will sail for the United States September 15 on the S. S. La Savoie in the interest of Vilmorin-Andrieux & Co. He has just been favored with a gold medal as collaborator with his firm at the St. Louis exposition.

THE TEMPLIN CO., which for years has conducted a seed business and greenhouse establishment at Calla, O., has purchased the old stand of the Walker McLean Co., and will make Youngstown, O., its headquarters in the future.

KENTUCKY BLUE GRASS seed which is quoted at $1.65 per bushel is reported to be boosted by three large Kentucky firms who are buying very heavily. Good authorities say it rests with the jobbers as to whether these prices can be maintained, as there is a total of 500,000 bushels available, counting both old and new seed.

SAN FRANCISCO, CAL., August 9.—The seed harvest is in full blast on nearly all lines. The crop is proving to be an average one along most lines, with onion and sweet peas rather shorter than expected. So far the weather conditions have been ideal for harvesting and crops generally are getting ripe earlier than usual.

HENRY W. WOOD, president of the American Seed Trade Association, has issued an address to the public in which he declares the seed dealers will attack at the next session of congress any appropriation for free seed distribution. Mr. Wood calls attention to the fact that the total packet seed trade last year was only 120,000,000, of which the government distributed 40,000,000. This he says is interference with a legitimate industry. The state grangers have been enlisted in the fight against free seeds and many of them have adopted resolutions asking congress to forego the custom.

The A. J. Pieters Seed Co. will shortly engage in the vegetable and flower seed growing business in the San Juan Valley, Cal., and will be ready for planting the coming season. A. J. Pieters, for some time with the United States Department of Agriculture at Washington, is the president and general manager of the new concern.

VISITED CHICAGO: A. B. Haven, of the Haven Seed Co., Lodi, Cal.; A. W. Annandale, representing the Steele, Briggs Seed Co., Toronto, Ont.; J. C. Robinson, Waterloo, Neb., just returning from the Pacific coast; Frank W. Maas, of the Planters' Seed Co., Springfield, Mo.; A. A. Berry, Clarinda, Iowa; John Hume, Port Hope, Ont.

James Vick's Sons, Rochester, N. Y.

The accompanying illustration shows the employers and employes of the James Vick's Sons as they appeared at their picnic at Newport, August 11. Three of the oldest employes in the present business are F. S. Fisher, to the extreme left in second row, Miss Mina Phillips, second lady in the second row from the top on the right of the picture, and J. B. Fuller, who was interested in the printing business with the late James Vick (man with beard in front row), assisted in making up the first catalogue and packing seeds 60 years ago. Both Mr. Fisher and Miss Phillips entered the employ of Mr. Vick in 1868. F. B. King, secretary of the company, is shown on the extreme right of the first row. The bald gentleman in the last row is the treasurer, W. T. Fonda.

EMPLOYERS AND EMPLOYES OF JAMES VICK'S SONS, ROCHESTER, N. Y.
Photograph taken at their annual picnic at Newport, August 11, 1906.

French Seed Crops.

Paris, August 10.—Matters in our leading growing district (western France) are growing worse every day in consequence of the protracted drought prevailing here. What little beet seed that will be saved will be small and not very good looking. Spring radish seed is the worst of all and will be almost a total failure. Happy the seedsmen who have some grown in other parts of France, where the crop is expected to be somewhat better. Anyhow new crop radish seed will be very scarce and the extraordinary poor yield will have the effect of sending prices skyhigh ere long. Seedsmen in many cases will have to be satisfied with seed of the previous crop and as its vitality, in consequence of the wet weather under which it had been harvested last year, did not keep very well, they will be on the safe side by recommending their customers to sow a little thicker than usual. The summer and winter radishes, which early in the season looked more promising than the spring radishes, will fall far below expectations.

Celery, endives, cucumbers, melons, squash, pumpkins and beans are all suffering from the extraordinary dryness and their yield is dependent upon a fair supply of rain within the next couple of weeks, otherwise the result will also be very disappointing. Lettuce is just now in the blossoming stage and needs rain very badly. Carrots bear out the forecast made some weeks ago in my notes and prospects are a little better, although in some regions the grubs are playing havoc. Of chervil, dandelion, cabbage and thyme the yield in western France is light. Sage, corn salad, sorrel, parsley, leek and onion warrant a little more hopeful view, but as already intimated previously when speaking of the latter article, we shall have no seed of the American onions, such as white, red and yellow globes, etc., for export.

The shortage on many articles is alarming and altogether it is a distressing season for the growers. Many seeds drying up prematurely will not be as perfectly developed as usual, but seedsmen must not be over-exacting as regards appearance and germination with the deliveries of the growers, who in many cases will lose a whole year's labor. Many young plants for the 1907 crop, such as onions, leeks, cabbages, etc., suffering also from the abnormal drought, are pretty weak. The growers who started some time ago sowing beets and carrots for next year's crop had to resow their land a second time. But let us not take a too gloomy view of the situation and express the hope that conditions will soon take on a more favorable aspect.

PARISIAN.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.
Braslan Seed Growers Co.
WHOLESALE SEED GROWERS.
SAN JOSE CALIFORNIA.

Boston.

H. E. Fiske, of this city, has organized a stock company capitalized at $30,000 to be known as the H. E. Fiske Seed Co. Mr. Fiske is president and manager and W. C. Briggs treasurer of the new concern. They will be located at 12 and 13 Faneuil Hall square, directly opposite Faneuil hall, about September 15. The building was formerly occupied for many years by the W. W. Rawson Co., and is the best location in the city, controlling an enormous transient trade. It is being remodeled throughout with all modern improvements, new and up-to-date fixtures, and will make one of the finest seed houses in the country when completed. Mr. Fiske has been connected with the W. W. Rawson Co. for the past 17 years, holding the position of manager for 12 years, and through his genial disposition and strictly business ways has made many friends among the growers, retailers and flower-buying people and all wish him the greatest success in his new undertaking. John Clark, well known among the trade, is to be located with the H. E. Fiske Co., where he will be pleased to meet all his former friends.

The W. W. Rawson Co. reports a brisk sale on their Lilium Philippenense, and being an extremely early forcer it will in a great measure relieve the shortage of Harrissi in the market.

Robert Montgomery, Jr., of the W. W. Rawson Co., is to be located with the Schlegel & Fottler Co. about September 1.

There was a fine display of show dahlias in the windows of Schlegel & Fottler Co. the past week.

Wm. Cahill, of the Schlegel & Fottler Co., is sojourning for two weeks at Center Harbor, N. H.

B.

Erfurt Seed Crops.

Our meteorological record for the present summer is a mixture of thunderstorms and torrential rains, with a few hot days thrown in. This has not aided vegetation to catch up the ground lost through the late commencement of spring and things in general are nearly a fortnight behind the usual time. In some places the rains have badly laid the crops. Warmer and drier weather however now seems to have set in to the great relief of our seed growers.

Peas have made a luxuriant growth, and if the weather favors the development of the pods they should turn out a good crop. Beans did not come up as well as usual owing to unfavorable conditions of harvesting last autumn, and any attempt to judge their prospects as yet would be premature. Neither onion, carrot, nor cucumber are in very good shape, while lettuce, radish, spinach and mangel-wurzel are looking all right so far. Cabbage, kale and beet are also doing favorably, though the acreage of these is smaller than usual.

Flower seeds are mostly longing for some warm and not too moist weather. Perennials are yielding well, but some biennials, such as forget-me-not, will naturally be short, owing to the loss of so many plants during the winter. Pansies are not seeding well and badly need some consistent sunshine, the damp atmosphere having hindered the setting of the pods. Sweet peas, though late, look healthy, and the same may be said in general of the annuals, which have, however, a considerable amount of leeway to make up. Some of the more delicate kinds of asters have suffered by the wet and look as if insects had been at them, but on the whole this important culture is in a fairly promising condition. Ten-week stocks are coming along all right, but double wallflowers will only be a small crop. The large-flowering petunias now make a grand show on the stages and form the admiration of numerous visitors, of whom we have had several from England and America, and the same may be said of the stage carnations. Cinerarias, calceolarias and primulas have all yielded satisfactorily. —Horticultural Trade Journal.

F. R. PIERSON CO.
Tarrytown-on-Hudson, New York.

Toronto.

BUSINESS BETTER.

Business has shown considerable increase and stock is continually getting better. Roses show great improvement. American Beauty from young stock is very good. Killarney with its pleasing color and other varieties find ready sale. The past week has seen an increase in prices. Carnations from young plants are showing good quality and are becoming more plentiful. Asters and other outdoor stock have shortened up considerably, which is a good thing for the growers.

NOTES.

Considerable anxiety has been caused the growers through the stand taken by our large department store in notifying them that the sale of plants would be discontinued and that in the near future cut flowers would be treated likewise. This firm has always purchased in large quantities. No doubt the business will return to the small florists and the market.

The Andras-Frances wedding on August 18 was the event of the season. John H. Dunlop had the decorations and bouquets, the details of which were all artistically carried out.

J. S. Simmons and wife had to cancel their European tour the day of sailing, Mr. Simmons being too ill to undertake the voyage. A trip through old Quebec is now being taken.

D. J. Sinclair has returned from Montreal, where he completed arrangements for a wholesale store which he will open on St. James street on September 1.

R. Jennings, Brampton, was a visitor. Carnations and violets, which are his specialties, were never in better shape.

H. G. D.

London, Ont.

The Horticultural Society held its annual flower show August 16 and 17. Gladioli and sweet peas were the main features with a good assortment of annuals and perennials, which filled the hall completely. The firm of J. Gummage & Sons had on exhibition a splendid group of palms and foliage plants including some Nephrolepis Whitmani. The firm of J. Gummage & Sons held its annual picnic at Port Stanley, Lake Erie, August 1. To judge by the happy faces seen there, all had a good time. A vote of thanks was extended to Mr. Gummage by the employes.

HANS.

Fredericton, N. B.

This is the third successive dry summer in this locality. Small fruit has been plentiful. Apples are numerous on the trees, but there has not been enough rain to develop them. Asters, gladioli, dahlias and other outdoor flowers are looking well, but they require the hose daily. J. Bobbington & Son report that their carnations are being housed as rapidly as possible. Their chrysanthemums are looking well, as is also a fine lot of Asparagus plumosus and A. Sprengeri. Trade has been very good here. The funerals of two prominent citizens caused quite a run on the available stock.

SOUTH NORWALK, CONN.—Robt. G. Hanford has a large new greenhouse in course of construction.

Springfield, O.

As a forerunner of the Dayton convention, numerous delegations from distant eastern and southern points arrived here a day in advance (Monday), and visited the extensive greenhouses of the Good & Reese Co., the McGregor Bros. Co., and other plant growing establishments. This afforded members of the S. A. F. an opportunity of seeing the sources of supply from which they have drawn for many years past and more fully realizing the importance of this market in the shipment of plants.

In the matter of rainfall, thunderstorms and oppressive atmosphere, July and August have been record breakers in this locality. The crops of weeds have come on persistently and heavily, and in some cases noticed, outdoor plants are practically out of sight. During such weather, constant vigilance has been necessary, particularly about the propagating frames, where the careless or incompetent grower would be likely to suffer loss of cuttings, while the trained and painstaking expert would successfully carry his crop through all danger.

The Leedle Floral Co. is erecting two new houses 20x152 feet and a "lean-to" 10x105 feet. The space gained will be devoted to the housing of rose plants which are being propagated in large quantities for the floral and nursery trade.

GEO. DALE.

Columbus, O.

TRADE CONTINUES DULL.

The dull season still holds sway and except some funeral work, there is comparative quiet in the flower market. Excessive rain has done great damage to the aster crop, and these flowers, which have been so plentiful, are now on the verge of becoming scarce. There seems to be quite a demand for purple and white asters this week.

The Soldiers' Home at Sandusky, presents a beautiful appearance just now. There are 94 acres, and the grounds are in charge of J. L. Lambert, a most able man. The bedding displays great taste and skill. Mr. Lambert also has charge of several acres of vegetables. He is now designing a grotto which will be one of the finest in the state. The greenhouses are all being overhauled and reconstructed.

The bowling club has been suspended temporarily, during hot weather.

CARL.

Warren, O.

Work has just been completed in putting in a steam heating system at Mrs. Geo. W. Gaskill's greenhouses. Mrs. Gaskill intends building two more houses next spring.

Thos. Phelan has leased the Hoyt greenhouses and reports business very good. Mr. Hoyt has had very poor health of late and went to the seashore July 1.

James B. O'Neil, salesman for Vaughan's Seed Store, Chicago, was in town last week and received large orders from almost all the florists here.

J. H. Adgate and son are building a new propagating house. Mr. Adgate also has greenhouses in Niles, O.

T. J. M.

RICHMOND, IND.—Mrs. E. G. Hill is quite ill.

Bay Shore, N. Y.

The Bay Shore and Suffolk County Horticultural Societies have amalgamated and will henceworth be known as the United Bay Shore Horticultural Society. The officers of the new society are confident that they will have the best show this year ever given and will hold forth on October 25, 26 and 27 at the opera house. The following are the officers of the association: E. P. Strong, president; William Stuart, vice president; Wm. McCullom, secretary; David, McIntosh, treasurer; M. J. Connellon, corresponding secretary. The exhibition committee is composed of John Tobin, Geo. Jayne, David McIntosh, Nathan Yesek, John Rogers, Alfred Rochane and Nicholas Reil.

ROCKLAND, MASS.—Alvin Bates is building an addition to his greenhouse on Salem street.

NUNDA, N. Y.—The management of the Nunda Floral Society announces that about $200 has been cleared from the third annual carnival at the Presbyterian church held in Village building recently.

Gouverneur, N. Y.—I. M. Brainard, for 35 years a market gardener and plant grower at this place, has rented his green houses and land and retired from business. He is now 80 years of age and will spend the remainder of his life with his daughter.

WATERMAN, MASS.—The Homecrofters Guild has secured the Wilson estate on Main street. In the broad space of ground fringed by magnificent shade trees more than 100 children are planting and tending their little patches of garden. It has been found impossible to furnish space for all who have applied.

MANCHESTER, MASS.—The North Shore Horticultural Society held an exhibition of sweet peas July 20. Mrs. Wm. B. Walker made an exhibit of 20 varieties. The Spaulding estate also had a striking display. These two exhibitors were awarded prizes as were also Mrs. Scott Fitz, Mrs. Philip Dexter, and Mrs. H. L. Higginson.

PITTSFIELD, ME.—A. J. Loder recently purchased the Leighton house which is located on Lancey street; also the vacant lots adjoining the property. It is Mr. Loder's intention to erect a commodious greenhouse on the grounds as his present quarters are not large enough to meet the growing demands of his increased business.

NORTH YAKIMA, WASH.—The new warehouse of the Yakima County Horticultural Union was dedicated here July 17. There was a large turnout of the farmers and their wives. Congressman Jones was the speaker of the day. The building is 50 x 160 feet, three stories high, including basement, and constructed of stone. It is the largest warehouse in the Yakima valley.

JACKSON, MISS.—The Jackson Floral Co., incorporated with a capital of $5,000, has purchased a finely located tract of four acres in Belhaven Heights. One acre of the tract is now covered by a lake, and this will be broadened to two acres to be stocked with aquatic plants and game fish. Several large greenhouses will also be built.

VAUGHAN'S PANSIES

ARE BEST BY TEST.

Vaughan's Giant Named Varieties.

" **Cassier,** 3 spotted	.10	.20	1.20
" " 5 spotted, an A1 strain	.25	.45	3.00
" **Bugnot,** the flowers are of enormous size, perfectly round, of great substance	.25	.60	4.50

Giant Bridesmaid. Its ground color is rosy white, rivaling in delicacy and beauty with the finest apple-blossom Trade Pkt., 25c; ⅛ oz., 45c; Oz., $2.60.

BOULOGNE GIANTS. This is a special selection of a French pansy grower; the flowers are of the largest size, of great substance and fine form, and are borne on particularly strong stems. They are mostly 3 and 5 blotched, delicately veined while the colors are rich and varied. Like all high-bred pansies, they are shy seed bearers. Trade Pkt., 50c

VAUGHAN'S INTERNATIONAL PANSIES—The Worlds' Best. This is a combination of as many separate colors, types, blendings and unique kinds as can be found in the world. **It is the best general mixture in existence** and is most widely known and popular. Price per oz., $10.00; ½ oz., $5.00; ⅛ oz., $1.50; trade pkt. 50c.

VAUGHAN'S CUT FLOWER MIXTURE OF PANSY SEED. Especially made from light colored Giant varieties for florists who raise for cut flowers in the house. Trade pkt., 25c; ⅛ oz., 80c; Oz., $5.50.

VAUGHAN'S "ELITE" MIXTURE. This is not a complete mixture like our International; it does not contain any pure white, yellow or any self colors nor any other of the well known kinds. It is comprised of the cream of four Pansy specialists' choicest and most expensive mixtures and such new and novel kinds as listed above. Trade pkt., 50c; ⅛ oz., $1.00

MASTERPIECE. This strain comes nearer to "Double pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across and the color variations and combinations are odd and striking. Trade pkt., 50c; ⅛ oz., 75c; ¼ oz., $1.35; oz., $5.00.

VAUGHAN'S "GIANT PANSY MIXTURE." This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain with its delicate veinings. We have spared no expense to secure the newest, richest and finest sorts. Price, ¼ lb., $14.00; oz., $4.00; ⅛ oz., 60c; trade pkt. 25c.

VAUGHAN'S PREMIUM PANSIES MIXED. Embraces all the varieties of the Fancy German Sorts. Per pkt., 25c; ⅛ oz., 80c; ½ oz., $3.00; oz., $5.50.

CHICAGO PARKS BEDDING PANSIES. "Choice mixed," pkt., 10c; ¼ oz., 30c; oz., 75c; 4 oz., $2.50.

NEW ORCHID-FLOWERED. A most interesting type of Pansies of the Giant Flowered Class containing a mixture of the most surprising, novel, unique and beautiful color combinations. The colors range in the terra cotta shadings as well as in the flesh orange, rose pink and lilac. Trade pkt., 250 seeds, 25c; ⅛ oz.

IMPROVED GERMAN MIXTURE. This is a mixture of three strains from different German growers and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 10c; ⅛ oz., 20c; ¼ oz., 30c; oz., $1.00

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

THE JACKSON & PERKINS CO., of Newark, N. J., has been incorporated for $100,000.

Wm. L. Manning, of Boston, has been in Albany to select a site for the state education building.

MACON, GA.—P. J. Berckmans, of Augusta, was re-elected president of the State Horticultural Society at its annual meeting August 9. J. B. Wight, of Cairo, was elected secretary. The exhibition of fruits was the largest and most complete seen in years.

MISSOULA, MONT.—A fire which threatened for a time to wipe out the entire plant and buildings of the Missoula Nursery Co. broke out shortly after midnight August 12, but by the heroic efforts of the men of the company and neighbors the fire was confined to a packing shed and a tool house, both of which were completely destroyed, with their contents. The loss is estimated by Manager Dallman of the company at $500. The buildings were completely covered by insurance.

The American Apple Growers' Congress.

All the principal apple growing states in the union were represented in the American Apple Growers' Congress which was in session August 14 and 15 at the Planters Hotel, St. Louis. Officers were elected, as follows: Henry M. Dunlap, Savoy, Ill., president; W. R. Wilkinson, St. Louis, vice president; T. C. Wilson, Hannibal, Mo., secretary; Wesley Green, Des Moines, Ia., treasurer; Geo. T. Tippin, Springfield, Mo., statistician. U. T. Cox, Rockwood, O., R. A. Simpson, Vincennes, Ind., J. W. Stanton, Richview, Ill., and Clark Allis, Medina, N. Y., will compose the executive board. A resolution was adopted making the third Tuesday in October national apple day. The congress will be held again in St. Louis next year, on August 13 and 14.

Large Furit Crop.

Judging from the latest reports the fruit crop in the Missouri valley, which is soon to be harvested, will be the largest yield for many years. Weather conditions have been perfect; we have had no destructive hail, and a proper amount of rain fell at the right time to insure a record breaking crop. A report from the territory of Leavenworth, Kans., says this will be the best crop for years. The trees in many orchards which have not borne fruit for five years are loaded with perfect fruit. From near Lee's Summit, Mo., where orchards cover thousands of acres, comes the same assurance of a bountiful yield. It is estimated that in the vicinity of that place over 80,000 barrels of apples will be gathered. From the northern portion of the Missouri valley comes the same story of large yields. It is safe to estimate the yield in that territory at more than a million barrels.

K. C.

Southern Nurserymen's Association.

The eighth annual meeting of the Southern Nurserymen's Association met on Lookout mountain, Chattanooga, Tenn., August 15 and 16. The meeting was well-attended, about 75 southern nurserymen being present and a number of entomologists from about eight states. Papers were read as follows:

"The Retail Nurserymen's Success or Failure," by John A. Young, Greensboro, N. C.

"How Can Nurserymen Realize More Money for Their Fruit Trees?" by C. M. Griffith, Jacksonville, Fla.

"Should the Large Orchardist Get the Benefit of the Wholesale Prices on Trees?" by R. C. Berckmans, Augusta, Ga.

"Who is Making Money in the Nursery Business?" by J. J. Harrison, Cleveland, Tenn.

"Growing Better Nursery Stock," by W. T. Hood, Richmond, Va.

"Preparation and Planting of Nursery Stock and Early Care," by A. A. Newson, Knoxville, Tenn.

"Uniform Standard of Grading Nursery Stock the World Over," by E. A. Easterly, Cleveland, Tenn.

"Growing of Pear, Cherry and Plum Trees; On What Kind of Soil and Stock?" by J. W. Shaddow, Winchester, Tenn.

"The Best Plan for Packing, Shipping and Handling Trees," by Herbert Chase, Huntsville, Ala.

"What Fertilizers Give the Best Results on Nursery stock and How Applied?" by R. C. Chase, Huntsville, Ala.

"Should Nurserymen Grow More Ornamental Stock, or Attempt to Educate the Customers to Plant Valuable Trees That Will Produce Fruit for Profit?" by L. A. Berckmans, Augusta, Ga.

"Why a Nurseryman Should Be a Good Citizen," by Chas. T. Smith, Concord, Ga.

"Is Inspection of Nursery Stock of Advantage or Disadvantage?" by J. Van Lindley, Pomona, N. C.

"Are the Special State License Laws Now Enforced Constitutional, and Should the Nurserymen Not Have Universal Certificates?" by R. I. Smith, Atlanta, Ga.

"Some Practical Points on How to Prevent Root-knot," by Prof. Hedgecock, St. Louis, Mo.

"Are Nurserymen Planting Too Many Peach Seeds?" by J. C. Hale, Winchester, Tenn.

"A Commercial Pecan Orchard as an Investment," by S. W. Peck, Hartwell, Ga.

Following the reading of the above papers there was a general discussion on many interesting and practical questions.

Officers were elected for the ensuing year, as follows: John A. Young, Greensboro, N. C., president; C. N. Griffin, Jacksonville, Fla., vice-president; C. T. Smith, Concord, Ga., secretary-treasurer. The association decided to hold its next annual convention at Richmond, Va., in August, 1907.

THE WITTBOLD WATERING SYSTEM.

FOR FIELDS OR GREENHOUSES.

Wittbold's Watering Device in Operation in Cucumber House at the Establishment of W. B. Davis & Co., Aurora, Ill.

"Will be universally used." is what **Geo. Klehm.** one of the oldest rose growers in the vicinity of Chicago, predicts for the **WATERING SYSTEM.**

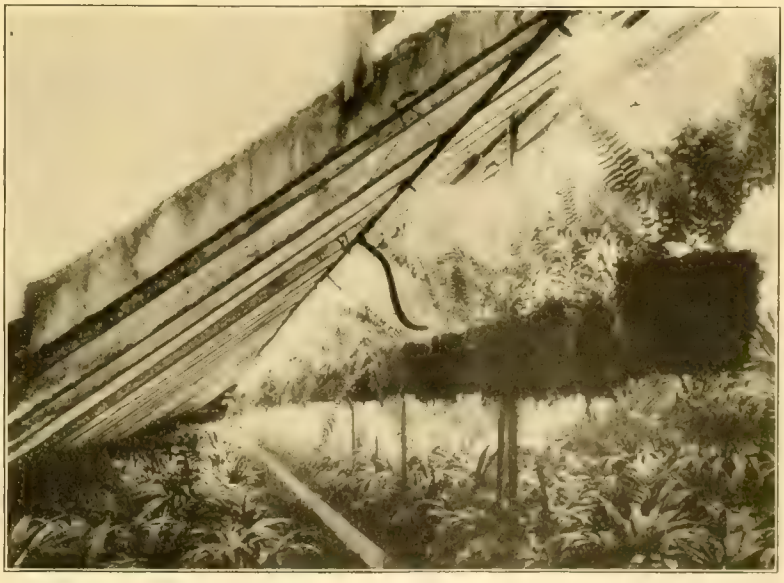
"Saved 90 per cent of my watering labor." is what **W. B. Davis.** of Aurora, Ill., gives as an estimate of the **WITTBOLD WATERING SYSTEM'S** time saving qualities. "I now water my **seven** houses in **one hour,** which formerly required **twelve hours**, and can do better work at that," says Mr. Davis.

IF YOU ARE STILL SKEPTICAL

send for a **Swivel Wheel, $2.00,** with galvanized connections, or **$2.50,** with brass connections, **and six half-inch Nozzles at 50c each.** An investment of **$5.00** will put up a hundred feet of pipe and give it a trial. If only used as an auxiliary to your regular watering it will be the **best investment you ever made. The temperature of your houses** can be kept from **10 to 20 degrees cooler** with a **WITTBOLD SYSTEM** in hot weather.

"The last season I will use a hose," is **Stephen Hyde's** remark. "I grew a crop of lettuce and did not use the hose once, and will equip all my houses another season."

Uncle John Thorpe, one of the best known horticulturists in the country, indorses the **"SYSTEM"** in a recent article on **Mechanical Watering.** and I quote one of his remarks: "Its uses will be so numerous as it gets known, that the system will be appreciated in many ways unthought of now."



This Cut Shows a Row of Boston Ferns being Watered by the Wittbold System. The Same Line of Pipe also Waters Two Benches.

THIS SYSTEM WAS DEVISED FOR GREENHOUSE WORK, but can be used also for outside work with best results. It consists of pipes and tips so arranged that a continuous sheet of water the full length of the house can be supplied to a bench of plants and at the will of the operator can be directed upward from underneath the plants, downward from above the plants or parallel with the bench so that only the soil in the bench is watered. It can also be used for syringing or watering. An entire house can be watered or syringed in only a few minutes. It is a permanent asset after being once installed, as it will never wear out; it is inexpensive and will save its cost in hose and labor in the first six months.

LOUIS WITTBOLD, PATENTEE. 1708 NORTH HALSTED ST., **CHICAGO.**

Annual Report of the Florists' Hail Association of America.

REPORT OF THE SECRETARY.

The 1,416 members of the Florists' Hail Association of America on August 1, 1906, insured glass as follows:

The whole being equivalent to an insurance upon 25,056,546 square feet of glass insured.

The total receipts for the year ending Aug. 1, 1906, as per treasurer's report, have been $18,744.50.

The total expenditure as per treasurer's report has been $8,244.66.

The cash balance at the close of the year is $15,150.49, of which $2,709.92 belongs to the reserve fund for future investment, leaving $12,440.57 on hand for the emergency fund.

The reserve fund now consists of $13,400.00 invested in excellent securities, nearly all of which would command a premium, and $2,709.92 cash, making a total reserve fund on hand Aug. 1, 1906, of $16,109.92.

Sixty-eight losses representing a breakage of 37,321 square feet of single thick glass and 21,046 square feet of double thick glass have been paid during the year. There have been 1,019 losses adjusted since the organization of the association, involving a total expenditure of a little over $101,000.00.

The following table shows losses as reported to the secretary for the past 19 years.

STATES.	No. of hail-storms from June 1, 1887, to Aug. 1, 1906.	No. of losses paid from June 1, 1887, to Aug. 1, 1906.	No. of hail-storms for year ending Aug. 1, 1906.	No. of losses paid for year ending Aug. 1, 1906

South Carolina	1	..	..	..

A series of hail storms in central New York, northern New Jersey, eastern Pennsylvania and Delaware, did large damage, but the members of the F. H. A., with two exceptions, were not touched.

The apparent danger last year of an extra assessment did not materialize, and the association commences the new year with a handsome balance both in reserve and emergency funds.

The unadjusted losses at the close of the year will aggregate less than $500.00, which is the only liability of the association.

By addressing the secretary, a duplicate of any adjustment of loss can be obtained, by any member of the association, at any time.

In these days of insurance investigation it might be well to mention that the F. H. A. has never paid a cent for office rent, fuel or light, and that the officials of the association are both ready and willing, at any time, to give an account of their stewardship.

JOHN G. ESLER, Secretary.

PETER REINBERG,

51 Wabash Avenue, CHICAGO.

MABELLE,

NEW PINK CARNATION FOR 1907.

COLOR . . . . . A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color.

SIZE . . . . . 3 to 4 inches in diameter when established.

ODOR . . . . . Pleasing, but not strong.

STEMS . . . . . Invariably strong, but always graceful, ranging from 12 to 30 inches during the season.

HABIT, ETC. . . . . A very quick, active grower, making specimen plants in a short time, even from late cuttings On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start.

PRODUCTIVENESS Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown.

Stock limited. Delivery January 5 to 10 and later.

Price **$12.00** per 100; **$100.00** per 1000.

It is good business policy to mention the *American Florist* .....when writing to an advertiser.

It Reaches
The Buyers.

AMERICAN FLORIST CO.:—

I wish to express my appreciation of THE AMERICAN FLORIST as a trade paper. My sales have far exceeded my most sanguine expectations and of our immense stock only a few thousand remain and they are moving rapidly. We find that nearly every state in the Union has its consignments, with Canada also getting into the procession, many orders being repeated.

W. J. OLDS.

UNION CITY, PA., July 30, 1900.

ALL Nurserymen, Seedsmen and Florists wishing to do business with Europe should send for the

"Horticultural Advertiser"

This is the British Trade Paper, being read weekly by all the Horticultural traders; it is also taken by over 1000 of the best continental houses. Annual subscription to cover cost of postage 75c: Money orders payable at Lowdham, Notts.

If you do not find what you need in our Ready Reference Department, write us about it.

TWEMLOW'S
Old English Glazing Putty
SEMI-LIQUID,

For Bedding Glass in Sash or for Filling Cracks or Seams in Roof Joints or Frames of Greenhouses or Hot Beds.

THIS PUTTY

Is used in Machine or Bulb.

If too thick for bulb, thin with a little Pure Linseed Oil, boiled.

So thinned, it can be brushed into any crack or leak, making a solid filling.

THIS PUTTY

Makes a solid bed, impervious to moisture, and holds glass in its place, and will stop any crevice or fault.

When once set on dry wood it does not leave.

Manufactured in the United States only by

HAMMOND'S PAINT & SLUG SHOT WORKS,
FISHKILL-ON-THE-HUDSON, N. Y.

THE DAYTON CONVENTION.

Friday's Proceedings.

The meeting on Friday morning, August 24, was lightly attended and of short duration. The present status of the national flower show movement was discussed informally, and the sentiment was quite pronounced in favor of some practical and definite work being started at an early day. Edwin Lonsdale suggested that the preliminary schedules might be compiled in November by the committee on that matter. J. C. Vaughan favored more drastic action and that this should not be deferred until the regular meeting of the executive committee next March. He urged the necessity of beginning the work of preparation forthwith and that the committee should be called together for this purpose.

Secretary Stewart explained that, under the by-laws, 20 members could have a meeting called. On motion of P. J. Hauswirth it was declared to be the sense of the convention that the executive committee should hold a meeting in Chicago in November next.

A report from the committee on final resolutions, embodying a special tribute to President Patterson of the National Cash Register Co., was adopted. Provision was made for an engrossed copy of the latter for presentation to that gentleman. A report of the judges on outdoor exhibits was adopted, as follows:

An exhibit of Canna King Humbert by the Vaughan Seed Store, of Chicago and New York. This is an extra fine exhibit in fine shape. The canna is of fine habit, free flowering; flowers large, of good color and dark bronze, leathery foliage. The same firm makes an exhibit of Baby Rambler rose, also a bed of cannas composed of two unnamed varieties with Papa Nardy and David Harum.

Nathan Smith & Son, of Adrian, Mich., make several interesting exhibits. A bed of Canna Imperial Gardener Hoppe, as growing here, is no improvement over existing varieties. Canna Express is a free bloomer, of dwarf habit and crimson color. By the same firm Canna Director Holtz. Yellow ground, heavily spotted red on smaller petals, others slightly spotted. A very effective color; plants of good habit. Your committee thinks very highly of this variety and recommends a certificate of merit. Also Canna Oscoda. This is not as effective as others in commerce. Canna Martha Washington, by the same firm. Salvia splendens Triumph; of good compact habit, early in flower and of good color. The same firm makes a very interesting display of hardy herbaceous plants. Very effective at the present time are Hibiscus Crimson Eye, Rudbeckia triloba, Boltonia latisquama, B. asteroides, Helenium autumnale superbum and Phlox Mrs. Dwyer, etc.

W. F. Kasting, Buffalo, N. Y., an exhibit of Canna Mrs. Kasting. Fine color of brilliant red; the flower spike carried well above the foliage, making it very effective.

H. A. Dreer, Philadelphia, makes a very interesting exhibit of Delphinium Belladona, petunias, Pennisetum macrophyllum atrosanguineum and Ageratum Inimitable.

Gus. Obermeyer, Parkersburg, W. Va., showed Canna West Virginia. This is an improved souvenir de Antoine Crozy; fine habit and free in flower.

Your committee recommend that the society's silver medal be awarded to John Freudenburger for his care in planting and tasteful arrangement of the outdoor exhibits.

(Signed) PETER BISSET,
EDWIN LONSDALE,
WM. MILLER.

A second report of the S. A. F. committee in charge of the outdoor exhibit stated that 2,800 square feet of space was regularly entered by five exhibitors; also that the labor on and care for the exhibit were kindly furnished by the National Cash Register Co., which kept from two to four men continually at this work. They add:

"The S. A. F. feels under great obligations to this company for their interest and for the good to the community made possible by their generosity. The interest awakened among the citizens of Dayton should prove of benefit to the local florists, and this feature of the 1906 convention, begun in a small way, should be continued, if possible, to ascertain its merits as a business proposition."

The remainder of the day was occupied in a trip to the factory of the National Cash Register Co. and a visit to the Soldiers' home, at which latter place the visitors were received by Governor Thomas and his staff. They were then escorted through the grounds and buildings.

The Date of the S. A. F. Convention.

Last week at the S. A. F. convention in Dayton it was decided to change the date of the annual meeting from August to November, as being a more favorable time of the year in which to hold a horticultural exhibition. Believing, as the writer does, that the strength and usefulness of the S. A. F. has in-

creased with, and to a great extent is the cause of the increase in membership, and believing that any change from the present time of holding the annual convention will tend to decrease the membership of the society, and consequently weaken its strength and lessen its usefulness, the writer would respectfully suggest that a mistake will be made if the proposed change is carried out.

The annual meeting held in August will attract to the society more members than at any other time of the year. At that time the growers with small establishments can best trust their places to inexperienced help—while the storemen and other retailers then have little business to neglect. Again, this being the time when the greatest number of buyers are able to be present, and that, too, before they have placed their orders for the coming season, is what induces all branches of the wholesale and manufacturing trade to make trade exhibits, all of which helps to increase the membership of the society. It is not, however, to be inferred from this that I am opposed to the horticultural exhibition as outlined by Robert Craig, E. G. Hill and Edwin Lonsdale, in their committee report. On the contrary, I think it a move in the right direction, in fact, a positive necessity if the florists of America are to take and hold that position in the front rank of the world's work, to which they are entitled.

By all means have the S. A. F. give us an annual, biennial or triennial horticultural exhibition, but do not mix it up with the annual business meeting of the society. Keep from it the flavor of commercialism, that being held with the trade exhibit would lend to it, and last but not least, do not take from us our summer outing.

FRANK HUNTSMAN.

Convention Echoes.

J. V. Laver, of Erie, Pa., was seriously ill with fever at the Beckel house throughout the convention. A trained nurse was obtained for him, and on Friday morning he was removed to the Miami Valley hospital.

William Scott was around the hotels wearing the hunting coat he won in the shooting tournament. He said it was a cool thing.

Few of the delegates to the convention looked as fresh at its close as J. B. Deamud of Chicago. He seemed to have solved the problem of how to keep cool and comfortable with immense satisfaction to himself.

Following his election to the vice-presidency of the S. A. F., John Westcott received a long telegram conveying congratulations and a eulogy. The sender omitted to prepay the charges and John was up against a disbursement of $1.43. He will frame both telegram and envelope, noting collection fee, and post on the Philadelphia clubhouse walls.

What might have been taken for a stag picnic party on Friday morning was only the last session of the convention held under the shade trees outside the convention hall. At one time it looked as though a straw vote were being taken, but closer observation showed that the effect noticed was due to the fact that a cold liquid had been served around with straws on the side.

The tellers during the election for officers were to be seen hard at work beneath a tree at the rear of the convention hall.

There was much disappointment on the part of exhibitors, due to the fact

Election Tellers at Work at Dayton.

that the general public was admitted to the exhibition hall. The large attendance of people outside the trade at times seriously interfered with the conduct of the usual exhibition business.

Horace M. Frank, chairman of the exhibition committee was escorted to the

cafe on Friday morning where he was quickly surrounded by those in charge of the exhibits. Colonel Castle made quite an oration as he presented to Mr. Frank on behalf of the exhibitors a purse of $65. Mr. Frank feelingly responded, and further by request rendered in fine style, "The Stein," which pleased everybody as being entirely in harmony with the sentiment of the occasion.

Many of the delegates took advantage of the rapid trolley service to run into Richmond, Ind., about 80 miles away, to look over the establishment of the E. G. Hill Co. The establishment of the Good & Reese Co. at Springfield, O., was also on the visiting list.

In one of the windows of J. B. Heiss' retail store there was a well executed country scene, with a grist mill in the distance. On a main road in the foreground was a sign directing travelers to the "S. A. F. Mill."

Additional Trade Exhibits.

The following were omitted in the list printed last week:

James Vick's Sons, Rochester, N. Y., asters.

Nathan Smith & Son, Adrian, Mich., phlox.

The Crowl Fern Co., Millington, Mass., hardy cut ferns and festooning material.

W. E. Gravett, Lancaster, O., white seedling aster.

A. C. Oelschig, Savannah, Ga., Ficus elastica.

Yankee Hose and Pipe Clamp Co., device for mending hose.

H. F. Michell Co., Philadelphia, Pa., oak plant tubs.

C. L. Kimmel, Dayton, O., insecticides, field and garden seeds.

National Cash Register Co., Dayton, O., an exhibit of garden and estate plans.

C. W. Skinner, Troy, O., irrigation system.

Foley Mfg. Co., Chicago, new style of header and gutter.

A. Hermann, New York, baskets and supplies.

J. B. Owen Pottery Co., Zanesville, O., pottery.

D. U. Augspurger & Sons, Peoria, Ill., miscellaneous plants.

Paul Blome & Co., Chicago, plant food.

H. Thaden, Atlanta, Ga., greenhouse roof brace.

Conard & Jones Co., West Grove, Pa., cut blooms of new cannas.

The Ideal Private Gardener and His Work.

BY FRED E. PALMER, BROOKLINE, MASS.

The title of this essay was selected by the executive committee of the Society of American Florists, and assigned to the Boston Gardeners' and Florists' Club, as a fitting subject for its contribution to the literature of this convention. This was perfectly natural, for when questions of a philosophical nature are to be discussed, where else would one turn but to the "Athens of America," the erudite city of the old Bay state. It may be taken for granted, also, that the Gardeners' and Florists' Club of Boston, with its young and virile membership of 325 (this includes ladies) is perfectly able to handle any question that may be presented to it; but when it comes to the individual to whom this essay is assigned, every thoughtful person will agree that, while being greatly honored he is, nevertheless, confronted with a duty both difficult and onerous.

In the first place, an ideal which would be common to a number of men is difficult of conception, in fact, impossible. Ideals are essentially individual, and are more characteristic of the man even than his physical features. They change with him from day to day, as he grows in wisdom, always tantalizingly ahead like the desert mirage, yet always incentive to better work and

nobler aims. With these thoughts in one's mind it is hard to get down to earth, where even the ideal gardener belongs.

Before attempting to draw the picture of a present day ideal private gardener, it will interesting and perhaps helpful, to cast a retrospective glance at types of other days and their environment. They are not so far removed as to be unfamiliar to most of us, indeed many honored examples are with us yet; and as the procession of bygone forms and faces is conjured up, we bow our heads in reverence. Many of them were splendid exponents of the true gardening spirit, were faithful servants, staunch friends of the young gardeners who were committed to their charge, though sometimes severe withal. They bring down to modern times, perhaps more than any other retainer, the spirit of those feudal days, in which the extensive private garden had its birth and early nourishment.

Under old world conditions to this day, the number of private gardens of any size is a fixed quantity; new creations are few and far between and are largely offset by the decay and abandonment of old establishments; so, consequently, the market for head gardeners has always been a dull one. A satisfactory and satisfied incumbent held his position often for life. Not much was required of him in the way of technical or scientific knowledge, in fact, too much of that sort of thing would have spoiled him. He was essentially a retainer, although by common consent ranking considerably above the domestics, conservative to a degree, which is always characteristic of those who lack ambition because of the absence of opportunity, that baneful blight of the old world, supremely happy if a modest pension awaited him, or fortunate if able to end his days as the proprietor of a small grocery or public house.

One can easily realize that under the above conditions, there must have been constantly in existance a small army of rejected ones among the body of journeymen gardeners. Head positions not always being awarded with regard to merit, the under gardeners had little incentive to acquire an education above the common, the chances being that they would end their days in the ranks with the laborer. These things may explain the anomalous condition that has undoubtedly existed up to the present time and still exists, viz., that of a large number of intelligent men, engaged in a pursuit so near to nature, so lofty as to transcend almost all others, and if including agriculture, which it naturally does, so important in the world of economics as to comprehend all the necessary things of life within its scope; and yet who are so poorly equipped with technical and scientific education as to render them, as a class, marked in this respect.

It finds its most harmful expression in a conservatism which is positively suicidal in this new day and country. Failing to recognize the opportunity that is now before them of lifting themselves and their craft from the realm of drudgery and servitude into that of science and art where it properly belongs, cherishing the ideal of "My Lord" and "My Lady" who never interfered, the long hours of labor with small pay, the willing helpers who kept going 14 hours per day if ordered to do so, no horse power —horses had to go to rest early,—no hose, no anything, in fact, that savored of innovation and that required new study. Those were indeed good old days.

Let us turn, however, to the conditions which confront us in this marvellous age and country. The ordinary slow processes of evolution and national growth have been entirely ignored. Development along economic, social and art lines has been so rapid as to defy the average observer and student to trace it. The nation, from a condition of extreme crudity and devouring energy which might aptly be compared to the caterpillar stage, has suddenly emerged into a state of refinement and keen appreciation of beauty and art that is as startling and interesting to contemplate as the bursting forth of the perfect butterfly. Let us hope that this simile may not obtain in its ephemeral sense, however.

During this period of strenuous commercial activity, the earth has been made to yield her treasures most bountifully. Nothing in the world's history compares with the development of the natural resources of this country during the last 50 years. The struggle has been terrific, and the confusion even as that of the mighty rapids and whirlpool of Niagara. Out of this maelstrom and into the quiet waters of work well done, victory achieved, and fortunes made have drifted thousands of men who are now seeking rest, recreation, and happiness, the end to which all previous effort has been but the means. Back to nature is the word, and to the soil which gave them their material wealth they again look for those more subtle elements that satisfy the soul. These are the men who have built themselves gardens and who are looking for partners, rather than for hired help, to enable them to accomplish this end. It is perfectly fitting and proper to consider the ideal gardener in the former relationship rather than the latter, and no intelligent proprieter will demur to the spirit of such association.

AT THE DAYTON CONVENTION, AUGUST, 1906.

What kind of a personality will he have who shall fill the measure of this desire for happiness, and at the same time seize the opportunity to exalt the status of his beloved profession, and raise himself to the high social, economic and educational plans to which he naturally and properly belongs? Let us consider the last part of this theme first and discover what duties will be required of him or, in other words, what is his work, and afterwards try and fit the man to it.

The common idea among young gardeners who are ready and feel qualified to take charge of important places is, that the measure of these duties should be included within the following limits: To be able to grow the regular run of greenhouse stock successfully, including orchids, so that when exhibition times come around they may gather in some prizes and nail the cards up in the potting shed to the great glory of the house, and their own emolument. Incidentally, they expect to supply the house with flowers in limited quantities of their own selection, and to grow fruit under glass. They consider the kitchen garden to be part of their sphere, although, as a rule, having had very little experience in that department, also the pleasure grounds with which they have had still less. At first sight, it does seem that the list includes about all that should be required of the average gardener, and if he were a master in every

branch mentioned, he would certainly be pretty well equipped as a workman.

The duties of the ideal gardener, however, cover a much wider range. He has formed a partnership with the proprietor, the object of which is to produce a certain indefinable, intangible thing called happiness. Primarily the happiness of the latter and also that of his own, as a natural corollary. With this in view, he will seek to discover the bent of his employer and, having found it, to guide it into practical channels. His common sense will often come into conflict with whimsical desires, but with plenty of tact and a desire to serve, this will not be a serious source of trouble. He will be required to plan and lay out an entirely new place, erect greenhouses, put in water supply, survey and grade land, build drives, handle large bodies of men intelligently, to study up-to-date methods, and appliances, such as labor saving machinery, insecticides, and fertilizers; scoffing at nothing because of its strangeness, but testing desirable things intelligently with a view to conducting the place with economy and facility. One of his most delicate duties will be to preserve peace and harmony among his fellow employes, listening to the complaints of his subordinates with a judicial and kindly ear, and pleading their cause with their employer. To the youngest gardeners under his charge he owes a peculiar and sacred duty. Having trod the path before them, he is in a position to know their desires and ambitions, and should use every effort for their upbuilding into ideal men and gardeners. Short hours of labor, liberal wages, libraries, opportunities to attend lectures and exhibitions, encouragement to form or join clubs, and above all, a kindly personal interest in their welfare, easily lie within his power to promote.

In providing the various garden products, he should study the trend of fashionable taste and try and forstall the demand in this respect, it being always extremely pleasing to the proprietor to find himself the possessor of the newest things in flowers, fruits and vegetables. On the other hand, it is bad taste on the gardener's part to persistently attempt to force his own particular hobby on an unwilling employer; this is undoubtedly a rock on which many a good man splits. It is the duty, and should be the pleasure, of the gardener to treat friends of the proprietor with courtesy and respect; this admonition is particularly applicable in cases when married children, or other relatives, locate permanently on the home estate and whose presence there is often considered by the gardener as an intrusion. Generally this involves merely the production of more garden stuff of every kind, which means more labor, a matter which the ideal gardener can easily adjust by frankly explaining it to his employer.

A thousand other duties might be enumerated which attach to the ideal gardener of to-day, which in years gone by were supposed to be outside of his province. Far from considering these added burdens, however, he should welcome them as indications of increased opportunities and tributes to his advanced intelligence.

To successfully meet these requirements, what kind of a man is needed? Certainly one with a most complete education in the knowledge and cultivation of plants that can be conceived. This should have begun in the lowest grades of the grammer school, and continued through every step of school life, not as a theory or dry recital of facts, but out in the garden and field. Happily this important feature in the education of every child, whether destined for the horticultural profession or not, is beginning to be recognized by our public educators. In the case of the ideal gardener, of course, this study should never cease; it should include a knowledge of the lower organisms both vegetable and animal, which we call diseases, also that of the insect and animal world in general, in so far as it affects plant life for good or ill.

A knowledge of physics, especially that branch pertaining to mechanics; of chemistry to the extent that he may appreciate the relative values of different elements in soil, air and water, to know the effects of various chemicals on insect life, and the poisons that are contained in many plants with their antidotes, would be extremely useful. The fundamental laws of art, wherein it is shown that harmony of colors and forms follow as fixed and well defined rules as those that exist in the phenomena of sound, should be understood. This would naturally include a study of the principles of landscape, elementary land surveying and the use of the instruments connected therewith.

All these and a hundred other things may be enumerated as contributing to the mental equipment of a modern first rate gardener. It is a pretty formidable curriculum, especially to the man whose lines of prospective have not carried him much beyond the potting bench, whose chief ambition is to drop into an easy job where the boss is away most of the time, and where no embarrassing questions are asked. Let it not be supposed for a moment, however, that the mere acquisition of all this knowledge in itself constitutes an ideal man. These things are simply tools to be used as means to an end, which is wisdom and

EXHIBIT OF H. BAYERSDORFER, PHILADELPHIA, AT DAYTON.

AT THE ROHRERS ISLAND GUN CLUB, DAYTON.

EXHIBIT OF SAMUEL S. PENNOCK, PHILADELPHIA, AT DAYTON.

this finds its highest expression in the ability and desire to serve.

If in the course of all these years of study and application, he has not discovered that his own measure of happiness is commensurate with the service which he renders others, then his time and labor have been largely wasted. Unselfish service is the philosopher's stone. He who possesses it scatters happiness where e'er he goes, to his employer, his fellow laborers, in fact, to all with whom he comes in contact. He possesses a pleasing personality, is interesting in conversation, and tactful in manner. Of him, his employer makes a friend and companion. He is not only an ideal gardener but an ideal man.

Present Status of the Peony.

President C. W. Ward of the American Peony Society addressed the members of that society on this subject at its annual convention, at Boston, Mass., June 15-16, 1906, as follows:

Another year has passed since the organization of our society and since our first exhibition of peonies which was held in Chicago, and we are now able to compare the results of the two exhibitions and to judge as to whether we are making substantial progress or not. The exhibition of peonies at Chicago was admitted to have been the finest display of peonies ever seen upon the American continent and the display of our favorite flower now staged in the adjacent hall is even more complete and more interesting than that held in Chicago. This we had confidently expected and had we not been able to make fully as good a showing here in Boston as was made at Chicago, we would have been disappointed.

Our fellow peony growers in the vicinity of Boston are to be complimented upon the splendid display of flowers which they have staged and we all hope that future exhibitions will be as complete, as interesting and of as much educational value as this has been. The magnificent exhibitions which we will be able to stage of peony flowers in the future will without doubt cause a constantly increasing interest in the peony and will more fully justify the existence of our society. There is no doubt in my mind that what we have been able to accomplish in displaying peonies at this exhibition will be much improved in the future.

At the Chicago exhibition we secured considerable knowledge and experience in the shipping and staging of flowers and this knowledge has been substantially added to by the experience gained in staging the present exhibit.

In order to secure a large display of flowers from different sections of the country, it is necessary that growers in those sections where the peony blooms early in the season, ship their flowers in the bud form for cold storage, as in the more southern sections of the country the peonies are out of bloom before any flowers can be had in the latitude of Boston, Cleveland, Detroit and Chicago.

My own experience in attempting to store peonies in an ice box for exhibition purposes has proved a signal failure this year and of several hundred blooms so held, I have been able to stage but a hundred or so in passable condition.

At the Chicago exhibition some 2000 blooms were shipped and held in a cold storage plant some 6 to 14 days and many of them came out in good condition and made a passable display. But at Boston no cold storage plant could be found which would receive the peonies and I was compelled to accept the kind offer of one of Boston's representative firms who tendered the use of a large florist's ice box and took excellent care of the blooms while in storage, but the blooms came out in bad shape, having been rotted at the base of the petals because of excess of moisture in the ice box.

When placed in a regular cold storage plant an even temperature and a dry atmosphere can be maintained and better results will be obtained, but my experience with ice box storage indicates that peonies cannot be successfully carried any great length of time in florists' ice boxes and make a creditable showing on the exhibition table.

When placed in cold storage the blooms should be tied six to 12 in a bundle and the buds wrapped in waxed or oiled paper extending 6 inches beyond the buds but open at the ends, and the stems plunged in water one-half to two-thirds of their length. This uncertainty in storing and keeping peony blooms renders the gathering together of a representative exhibition from different points of the country at one time an exceptionally difficult task and it is a foregone conclusion that our peony displays must depend very largely upon those growers in the immediate vicinity of the locality where the annual exhibition is held.

In my address read before the con-

EXHIBIT OF BENJ. HAMMOND, FISHKILL-ON-HUDSON, N Y., AT DAYTON.

EXHIBIT OF J. STERN & CO., PHILADELPHIA, AT THE DAYTON CONVENTION.

vention at Chicago I was compelled to offer apologies to the members of the society because work properly chargeable to me had not been done. This season I am again compelled to apologize to the members because of the same lack, the only excuse that I can offer is the fact that I have been absent from home the most of the time since the Chicago exhibition and have at the present time so much detail work upon my shoulders that I am not sufficiently strong to carry it all out and to give the matters of this society proper attention and it is my hope that you will select some other member to fill the office of president who not only can spare the necessary time to look after the interests of the society properly, but who also will be more energetic and take a more active interest in the society's affairs than I have been able to do the past 2 years as president of your society.

The necessity of continuing everlastingly at the task of straightening out the monenclature of the peony has been most emphatically impressed upon me by my experience in purchasing peonies from both foreign and American growers during the last 3 years.

In my last annual address I referred to the variety purchased under the name of Henry Murger, wherein I received two absolutely distinct peonies under this name from the same firm at different periods. This spring the attempt to determine whether the names attached to the various varieties growing in our peony test plot were the true names, developed a state of affairs which has caused me not a little chagrin and I find that I have the same peony in many instances under several names.

Some 2 years ago I purchased from one of the most reliable firms in Holland quite a quantity of a peony under the name of Mons. Chas. Leveque, paying therefor an exceptionally large price under the impression and representation that I was getting something especially good. The plants are blooming for the first time this season and prove to be nothing less than the variety sold by French growers under the name of Mlle. Leonie Calot, introduced by Calot in 1861. We have been purchasing this variety from the most responsible French and German growers and while the peony is of a very beautiful color, it is weak in the stem and the blooms fall upon the ground and it has little value as an effective sort in the field. The color is a beautiful shade of salmon pink, the flower is medium in size and has the merit of being a good keeper and may have some value as a cut flower variety, but if the firms who have introduced this peony under a new name, thus giving the impression that it is a new variety, have done it knowingly, they have perpetrated a fraud upon American peony buyers which will not be soon forgotten by those who have been unfortunate enough to purchase this variety at a much higher price than they could have secured it under its true name from the French and German growers.

Two distinct sorts came to us from reputable firms under the name of Delachii, one being a deep purplish amaranth, the other much darker in color and with a decided crimson cast. The habits of both varieties are quite different and one sort is much more valuable than the other. I have not as yet been able to determine which is the true sort as either one would answer fairly well to the introducer's description of Delachii which is "deep purple."

From one of the most responsible American peony firms we got the variety Mme. Ducel under the name of Model of Perfection, others have the name of Mons. Jules Elie attached to their stock of Mme. Ducel. Under Modiste Guerin come two varieties somewhat similar in habit and similar in color, but the true variety is much better in color and a more valuable peony than the false one.

Mme. Coste comes to us under the name of Souv. d L'Exposition Universelle. Under the same name we get two dark pink varieties which are far inferior to Souv. d L'Exp. Universelle and which we have not as yet been able to identify.

Marie Stuart comes to us from one of the most prominent western peony firms under the name of Baroness Schroeder. Under the name of Mme. de Verneville we get a mixture of Mme. de Vatry, Jeanne d'Arc and the true Verneville. Jeanne d'Arc comes to us under the name of Marguerite Gerard; Agnes Marie Kelway came under the name of La Tulipe, and La Tulipe comes also under the name of Multicolor.

Two common dark pink peonies come to us under the name of Mme. Camille Bancel. Under La Tendresse we get a common flesh pink semi-double peony which shows the seed pods prominently in the center. The true La Tendresse is creamy white, absolutely double, shows no center or seed pods and is a much dwarfer grower than the false variety.

Some 3 or 4 years since we purchased from a Holland firm quite a stock of a good solid pink peony under the name of Rose d'Amour. All of the stock we received from the firm the first year proved to be true to habit and color. The second order to the same firm for

EXHIBIT OF REED & KELLER, OF NEW YORK, AT DAYTON.

the same variety brought a mixed lot of pink peonies, all varying shades of dark and light pink and purple and but 11 plants out of 100 received proved to be the same kind sold us originally by this same firm as Rose d'Amour. An investigation of the variety and comparing it with the true Rose d'Amour which we purchased from a French firm and which answers to the originator's description, disclosed the fact that none of the peonies shipped us by the Holland firm in question were the true variety. Many common sorts come to us under the names of well known, valuable varieties. In some instances where a quantity of a valuable sort is purchased, one or two plants in the lot will prove true to name, the balance being frequently nothing but a lot of mixed varieties running through shades of color somewhat similar to the variety ordered but of totally different habit and frequently a totally different period of blooming.

In many instances where a pink variety is ordered we receive various shades of dark and light pink, white, flesh colored and even the deep purples and amaranths. In some instances where a delicate flesh colored pink peony was ordered, the variety received proved upon blooming to be a deep purple.

These experiences have been the result of my observations during the past 5 years while attempting to accumulate a stock of peonies true to name by purchasing them from Holland, French and German peony firms as well as from American firms. Our plants are now 3 and 4 years old and are developing normal blooms showing the true characteristics so that for the first time we are able to identify the varieties in a practical way provided the originator's description is sufficiently definite.

In Holland they have a peony association which is endeavoring to straighten peony nomenclature by holding annual exhibitions of peony blooms and thereby settling mooted questions of nomenclature and they have identified a number of varieties which they claim to be able to furnish true to originator's name and description. Nevertheless, in many instances when we buy of them they prove to be wrong when we get them in flower here.

Our own American firms do not seem to be in much better condition and it would seem as if we are at present almost hopelessly mixed in our peony nomenclature which seems to be too confused even for our American firms to deal intelligently among themselves.

Take for instance, the peony Delachii. Should we need 1000 of this variety for massing in a large piece of landscape work, if we ordered it from two or three different American firms we would receive possibly two or three different shades of purple that would spoil the effects of the mass of color if used together, and barring a very few sorts if we should get an order for 1000 plants of one variety, I do not know where we could get the order properly filled. Before peonies can be used largely and effectively in landscape work the nomenclature must be straightened out so that peonies can be purchased in quantity from different firms true to name, color, height and time of blooming.

As most of you know this society is making an effort to straighten out and identify peonies in this country by cooperating with Cornell University, at Ithaca, N. Y., in planting a test plot of several thousand varieties from different sources and we are in hopes that by this means we shall be able to settle on a list of 40 to 50 sorts, sufficiently distinct, and accummulate a sufficient quantity of true stock to enable us to do business with each other on a satisfactory basis.

There are too many varieties now under name and there is not enough stock of the best sorts to supply any great demand and as these better sorts are sold at good prices, there is a great temptation for a certain class of dealers to put in a few of the true sort ordered and then to fill up the box with roots of common kinds. We have found three or four firms in Europe who are making an honest effort to send out reliable stock true to the originator's name and who are willing to guarantee their stock. We have adopted the practice of requiring such guarantees and not paying for stock until it has bloomed with us and proved true and the most reliable firms are willing to guarantee their stock in this way. But even with such guarantees we get too great a percentage wrongly labeled probably due to inefficient systems of keeping stock or carelessness of workmen in handling and packing shipments. As it takes 3 years to fully identify peonies, this receiving unreliable stock is a most serious detriment and obstacle both to the commercial dealer as well as to the amateur who is often keenly disappointed in getting something entirely different from what was expected from the catalogue description or from what was seen and noted on the exhibition table.

Much yet remains to be done in the way of advertising the merits of the peony and disseminating a general knowledge of its culture among the people at large and some system of cooperating among the members of this society for this purpose would seem to

WAITING FOR THE OPENING OF A SESSION AT DAYTON.

THE LAST SESSION OF THE DAYTON CONVENTION.

be feasible and desirable and ought to be thoroughly considered and investigated by its commercial members.

Our next annual meeting, should it be held at Ithaca, would prove the most instructive and interesting of all our meetings and should certainly be attended by every member of our society. It is satisfactory to note a substantial increase of membership as well as a sen-

ruary until the hot weather comes. For the May and June crop sow early in March in cold frames or in pots and plant outdoors as soon as the weather permits. For July, August and September flowering sow in May and June two or three weeks apart. For October and November flowers sow the latter part of July or first part of August in frames.

especially during rainy or inclement weather.

SUPPORTING THE VINES.

When the plants reach a height of six inches they should be given support, and the best method is as follows: Stretch one wire on bottom and another wire about six feet above that, and connect with strings, from time to time helping the plants to climb.

INSECTS.

The first insect which will appear is the green worm, similar to the cabbage worm. These must be picked off every day before they become too numerous. They will be found almost always on the top or upper leaves. After several hard frosts the worm will disappear. The green fly is a very bad enemy of sweet peas, but light fumigating or syringing with a light solution of [illegible]tine from time to time, will check the insect if done in time.

ANT. C. ZVOLANEK.

EXHIBIT OF M. RICE & CO., PHILADELPHIA, AT DAYTON.

sible accummulation of funds, both of which augur well for the future of the peony society.

Forcing Sweet Peas in Winter.

The highest light houses should be chosen for sweet peas. Fill the benches, or well drained solid beds, with a good compost of about three parts sod and one part old horse manure. Drop four to five seeds about 12 x 20 inches apart; water thoroughly, keep always on the wet side and in a steady growing condition.

White seeded sweet peas, such as Florence Denzer, should be started in sand, as they seldom germinate if sown directly in soil. Or, soak them over night in water; next morning put them in damp sawdust or some similar material for two to four days until roots about one-fourth inch have started. As soon as this start has been made, sow them in moist soil which should stand a few days without watering. Plant either in the benches where they will grow, or in pots. After the plants start to grow, which will be in two or three days, give them some water and in a few days more they can be watered just as heavily as black seeded ones. If the space on the benches is not ready, sow in 4 or 5-inch pots, and then plant in benches after three or four weeks, but be very careful with the watering, as over-dry or pot-bound plants will never produce good flowers.

TIME TO SOW.

If a crop is wanted from November to April sow seed the latter part of August or first part of September. October sowing will yield a crop from New Year's to June. November and December sowings will bring a crop from Feb-

To obtain good long-stemmed blooms from outdoors the soil must be well prepared and watered. If possible protect the plants from the hot noon-day sun. Good short old manure mulch will be found of great advantage.

TEMPERATURE AND VENTILATION.

Ventilation is one of the most important in growing sweet peas successfully. As soon as sown, all the air possible should be allowed. The best temperature is 45° to 50° at night, 56° during cloudy and 65° to 70° on bright sunny days. As soon as cool nights arrive let the steam run in two to four pipes. At the same time the ventilators should be kept open as long as possible, especially when the first buds appear. This will prevent the dropping of buds

Cacti at the Missouri Botanical Garden.

The illustrations herewith show the two sides of one end of one of the cactus houses, and a wing of the yucca house, at the Missouri Botanical Garden. The front edge and pockets are built up with perforated limestone which is found along the Merimec river near St. Louis and sometimes called Merimec river stone. This was placed on the ground, which had been given the proper grade, and the soil filled in and plants set out, after which small pieces of the stone were scattered between the plants, thereby producing a more natural appearance.

The house is heated by hot water, the pipes running in a pit along the wall, and slabs of rock placed over them at intervals to support the soil, and 10-inch sewer pipes cut lengthwise and placed vertically against the wall to allow the heat to come up. This structure is connected with the yucca house, which is a dome house, with an open archway.

The illustrations show only three groups, cereus on the west or right hand side (Fig. 1) and opuntias and echinocactus on the east or left hand side (Fig. 2). These plants will be allowed to remain in this house throughout the summer and winter and therefore only represent a portion of the large and beautiful collection of succulent plants that can be seen in the

A FIRING SQUAD AT THE SHOOTING TOURNAMENT AT DAYTON.

CACTI AT THE MISSOURI BOTANIC GARDENS, ST. LOUIS, MO.

Fig. 1.—A group of cereuses.

different houses in winter and outside in beds in summer at the garden.

The genus cereus consists of some 200 distinct species which are distributed over the tropical and temperate regions of America, extending to the Galapagos or Tortoise Islands, 200 miles off the coast of Peru. In these islands Darwin found several small kinds of cereus, some of them growing near the snow line in exposed places on the highest mountains. In the West Indies some of the night flowering ones are very common. They cling to the rocks with their aerial roots and sometimes even grow on exposed trunks of trees, where their large, fragrant flowers open just after sundown. A large number of the species of cereus will not grow in cultivation and therefore cannot be seen except in their native habitat.

Some of those shown (Fig. 1) can easily be found, and I will name a few illustrating their different habits of growth. Starting at the lower right hand corner is C. Engelmanni, which is a late species. The large round cluster just above it is C. Phoenicius. The tall one next above is Pilocereus Hoppenstedii. The two large ones at the top are both C. giganteus, which in its native habitat (Mexico and Arizona) reaches 60 feet in height and has two or more branches. Between these two specimens is C. polycanthus, and directly in front of it is C. Sargentianus with its porcupine appearance. The smaller ones with the white tops are the favorite old man cactus or C. senilis. The tall one at the extreme end is C. marginatus. Scattered among these are such species as C. eburneus, C. cometes, C. paucispinus, C. stramineus, C. Nichelsii, C. Pringeli and C. geometrizans. At the end of this house are found such of the climbing varieties as C. grandiflorus, C. irradians, and C. compressus.

In figure 2, starting at the upper end, are shown several opuntias. This genus comprises about 150 species, all of them natives of the American continent and the West Indies, though a large number have become naturalized in different parts of the world. They are easily distinguished from all other cacti by their peculiar characters in spines and leaves. They vary from a small plant never more than 6 inches high to a large bush-plant 8 feet to 30 feet in height. Hedges are made in some countries of O. Tuna or O. horrida which are impassable to either man or animal. They grow in the very poorest of soil and even on bare rock, and as they grow very fast are much used in Africa, Australia and India for fences.

The flowers are produced on the edges of the stems, which usually are flat, but in some species are not, as for instance, in O. cylindrica. The floral beauty of these plants is not to be recommended, though if the same flowers were on plants of less repulsive appearance they would be admired by all. They are exceedingly curious but less ornamental than many other succulents. Two species besides those used for hedges are of economic value, O. Ficus-Indica, the prickly pear, and O. coccinellifera, on which the cochineal insects are reared.

The tall one with its many branches is O. Amyclæa, and the one with the broad, flat stems is O. Dillenii, while the one in the corner is O. Engelmanni. The others that are scattered through are O. leucotricha, O. crassa and O. microdasys. There is quite a collection of these in one of the other cactus houses.

The group of cannon balls as some call them represent the genus echinocactus. For the most part these are globular in shape, though some get as high as 6 or 8 feet, and are densely covered with spines which in some species assume huge proportions. The flowers which are usually borne on the apex are in most instances brightly colored. They are very closely allied to the cereus, but botanists claim that they can separate the two genera by their seed vessels; but when not in flower there is very little from their more conspicuous characteristics to distinguish one from the other.

The large plant at the top is E. Emoryi. On the same level is the barrel cactus or E. Wislizeni. Directly in front of E. Emoryi is E. longihamatus. Scattered here and there are the golden-spined E. Grusoni and such others as E. peninsulae, E. pilosus and that beautiful red-spined traveler's plant or E. cylindræcus E. Lecontei, E. ingens and many others.

There is also a large group of mamillarias in this house, one corner of which can be seen on the left of figure 2.

M.

CACTI AT THE MISSOURI BOTANIC GARDENS, ST. LOUIS, MO.

Fig. 2.—Opuntias and echinocacti.

Massachusetts Horticultural Society.

The schedule of the 1907 spring exhibitions of the Massachusets Horticultural society has been issued. Some noteworthy features of interest are the bringing out of several old-time favorites which have not been seen in the lists for many years, as well as some novelties which appear for the first time. Among these are camellias, schizanthus, imantophyllums (clivias), fibrous begonias, forced lilies, and Darwin and late single tulips.

In addition to the numerous classes of spring bulbous plants are the classes of Indian azaleas, ericas, acacias, "Easter plants," herbaceous spireas, and climbing and Rambler roses. There is also a class of forced bulbs for amateurs only. The very liberal prizes offered should insure a good competition at these exhibitions.

For the March exhibition the Julius Roehrs Co., of Rutherford, N. J., offers special prizes to the amount of $25 for the best groups of hard-wooded flowering greenhouse plants, such as acacias, camellias, azaleas, rhododendrons, etc., to be competed for by private gardeners only.

Accompanying this preliminary schedule is a circular announcing three special prizes for decorated dinner tables to be awarded at the chrysanthemum show of November 2-4, 1906.

These prizes are for the best decorated tables laid for six covers, and the judges are to be three ladies selected by the committee on exhibitions. The prizes offered are as follows: First, $75 and a silver gilt medal; second, $50 and a silver medal; third, $35 and a bronze medal.

Copies of the schedule and circular and any further information desired concerning these exhibitions can be obtained on application to the secretary, Wm. P. Rich, 300 Massachusetts ave., Boston, Mass.

Gunnar Teilmann Abroad.

Gunnar Teilmann, of Marion, Ind., who has been abroad visiting relatives and friends in Denmark and other northern European points, writes that on the ninth day of their trip the north of Scotland was passed and the next day anchor dropped at Christiansund, Norway, for a couple of hours. Toward evening they sailed up through Christiania fjord. The ship lay in the harbor about six hours.

As the greenhouses which supply Christiania with flowers are located in the outskirts of the city and several miles from the center, there was no opportunity to visit them. All that was seen in that line were a couple of flower stores and a few smaller places of mixed flowers and vegetables. The city is most beautifully located, its homes and other buildings being scattered along the sound with the pine-clad hills near by.

On the next day, July 17, Copenhagen was reached. During the four days' stay several of the greenhouses and parks were visited. Among the more notable things seen were the fine park bedding and the collections of tuberous-rooted begonias with flowers five inches in diameter, and collections with some of the finest colors, both double and single and shading from the most beautiful pink to dark crimson and a fine yellow. In partially shaded places there is nothing more beautiful as also in porch boxes and as a pot plant. Most of the bulbs come from Belgium, but one florist in Copenhagen had his own strain produced from his own seed and he had some wonderful creations.

Another plant which is much more used in bedding in the Scandinavian countries than in America is the beautiful blue lobelia Kaiser Wilhelm. This produces a beautiful contrast with the other white and red flowers used. We never see so much blue in them in our beddings. Is it the variety, the climate or the treatment? It is certainly most effective.

Most of the chrysanthemums grown in Denmark are grown in pots, some of them in very large ones. One or two progressive growers had planted them out in beds, solid beds at that, and who disbudded them more than most do. They also had some very early varieties. If these can produce flowers as early and as large in America they certainly would be money makers. As it is they are well worth a trial.

Then there were some beautiful specimens of Crimson Rambler roses, with the most luxuriant growth of both plants and individual flowers. In the botanical gardens of Copenhagen there were a couple of plants so large that one would think they were of a new and larger flowering variety, but upon inquiry it was found that they were not. The large clusters and flowers were produced with very strong culture, both manure and manure water.

Some strikingly beautiful roses are grown in the open in Denmark, notable for variety of colors and the size of the plants and flowers, and far ahead of anything grown in our country. Perhaps the climate is more suitable, but perhaps we do not get the best varieties suitable for outside culture and then do not cultivate them strong enough when we do get them. Almost every garden in Denmark has its roses and they are as large and perfect as those produced in greenhouses, not excepting American Beauty. The latter rose was not seen. One specialist in roses close to Copenhagen is said to have almost 15 acres in roses. Recently this grower exhibited 50,000 cut blooms from outdoor grown rose plants. It was a most magnificent display.

On a large boulevard about 200 feet wide and close to a park located in the central section of Copenhagen a flower market is held every morning from 4 to 6 o'clock. From 50 to 100 gardeners and florists congregate here with their wagons loaded with choice flowers and fruit. They take their places as they arrive one after another in a long row. The stock is unloaded and sold wholesale either to passersby or the eager shopkeepers. Promptly at 9 o'clock everyone reloads what is left on his wagon and leaves for home. In about 10 minutes everything is cleared off and that part of the street and sidewalk is again open for the regular traffic. These markets are a great help both to the wholesalers and the buying public, but one has to get up early in the morning and strictly observe the police regulations.

Greenhouse Heating.

ED. AMERICAN FLORIST:—

I have three houses, connected, running east and west, each 20 x 112 feet. The gutters are six feet from the ground and 13 from the ridge. The north wall is of wood, the rest being almost entirely of glass. I have a 40 H. P. boiler to be placed at the northwest corner. How many flow and return pipes, and of what size, will be needed to maintain a temperature of 60°, the mercury outside never falling to zero?

L. T.

Houses such as described could be readily heated by means of two 2-inch flow pipes and eight 1¼-inch steam returns. Just how these should be arranged will depend upon the class of plants to be grown in the houses as well as upon the arrangement of the walks and benches or beds. For some purposes the mains can be upon the side walls near the plates and the returns can be carried lower down upon the walls. However, when it is possible to do so it is well to have one or two of the returns under each of the benches. The mains can also be carried upon the purlin or ridge posts. In the latter case one 2½-inch flow could be substituted for the two 2-inch recommended above.

L. R. T.

St. Louis.

MARKET DULL.

With the weather over 90° in the shade there has been very little doing. Everything has been at a complete standstill, and to make matters worse the quality of the stock was very bad, especially in roses, which arrive off color, soft and small. Carnations in many instances, especially those grown outside, show the effect of heat, and also of water soak. The handling of American Beauty by the wholesalers these warm days has been a very hard matter. It has been in demand, but if the blooms arrive at all open the retailers will not purchase, as they cannot afford to lose them. The growers are busy getting ready for their fall crops. Violets are looking well in some places, while others are not quite so good looking on account of dry weather.

NOTES.

The Victoria Regia lilies at Tower Grove park have taken the advantage of hot weather and have broken the record for large growth. Natives of Brazil, they have to be kept in water all the time in this climate. The largest leaf measures over six feet over the flat surface. The blossom opens at sundown, but closes to the size of a bud by morning. The first night the bloom opens it is white, second pink, and the third morning sinks to the bottom of the lake, where the ripening of the seed pod begins.

The bronze statue of St. Louis to be presented to the city by the Louisiana Purchase Exposition Co. is about completed. It is an exact reproduction of the plaster statue which stood in the Plaza at the world's fair. It is 22 feet high and mounted upon its granite pedestal before the palace of fine arts in the park will stand 40 feet above the ground. The statue will be unveiled at Forest park October 4.

Andrew Meyer, Jr., city forester, has received the thanks of the Southwestern association for the interest taken by him in the preservation of city shade trees. He compelled the transit company to protect the trees from their wires.

Philip Goebel, Jr., of Webster Grove, is bringing in some good Enchantress. His carnations are housed, but the glass is not yet on top. He expects to have his houses completed by the middle of September.

Alex. Siegel and John Burke are taking a rest. They visit the wholesale market in the morning only long enough to say "Howdee" or perhaps buy a string or two of smilax.

Geo. Angermueller is going around visiting his consigners. After leaving Dayton he went to Cincinnati, New Castle and Fort Wayne, Ind.

Miss Mina Myers is now bookkeeper at Geo. H. Angermueller's. This will give Geo. and Fred Alves more time to wait on customers.

Frank Buckshat, formerly retail florist here and lately working at the greenhouses in Forest park, is now in the employ of Ostertag Bros.

Chas. Ebele, of New Orleans, was a visitor here on his return from Dayton. He was accompanied by his wife and daughter.

Mrs. Adolph Brix has just returned from Europe, where she has spent the last three months.

W. W. Stertzing has been bringing some fine asters into the market the past week.

J. F. Quinn reports trade as very good, especially in funeral work.

Miss M. S. Newman has gone on a vacation to southeastern Maine.

H. G. Berning and wife are away on a two weeks' vacation. W. F.

Toronto.

EXCELLENT SUMMER TRADE.

Business for summer is the best ever experienced. The visit of the British Medical association created unusual activity and the large number of banquets which were given in its behalf were fairly well distributed among the florists. Fairly good roses from young stock are now coming in and meeting with good demand. Carnations are no longer a rarity and are fairly plentiful, Enchantress blooms being equal to midwinter stock. Asters have shortened considerably, and the recent rains have spoiled most of the sweet peas.

NOTES.

Wm. Jennings, of Brampton, was a visitor. Carnations of good quality are being shipped by him in quantities. Mr. Jennings has just completed his new violet section, and the young stock which has been grown in the benches is large for the early season.

A. C. Jennings has opened a retail store at 129 King street West. Mr. Jennings for a number of years managed the department store flower section and has had considerable experience with a large personal connection.

J. H. Dunlop has returned from Dayton, O. The reception afforded the visitors and the trade exhibit were very commendable in Mr. Dunlop's opinion, but the weather was too hot to be mentioned.

Robt. Abbs has remodeled his entire plant. Roses which predominated heretofore have been discarded and the entire place has been planted in carnations and a few chrysanthemums.

Fred Griffin, of Cleveland, O., was a visitor, he has sold quite a number of his new flower stands, which met with success wherever shown.

The Bedford Park Floral Co. is cutting Bride and Bridesmaid roses of good quality for new stock.

The Dale estate, of Brampton, is shipping well grown American Beauty from young stock. H. G. D.

New Orleans.

A BUSY WEEK.

The past week was a very good one for all those engaged in the cut flower and design trade. Nearly all the flowers were used for funerals and by Saturday night not a flower could be had at any of the principal flower stores on Canal street or vicinity. The shipments from Chicago arrived nearly three hours late, which means close to midnight on Saturday. Nearly all of the florists declare the past week the best during the last two months and it broke the spell of the extreme dull season. Although we have had several days with a temperature as high as 97°, we do not suffer half as much as the people farther north. In contrast to reports from other cities we had only one prostration from the heat. The heavy rains have stopped and everything indoors and outdoors is doing fine. The majority of the tourists are still out of town, but the brightest prospects prevail for an exceptionally good business during the coming season. Wherever one goes there is activity among the growers, both wholesale and retail, and all are well prepared for a big demand in all kinds of plants and the principal cut flowers.

The Late Wm. McMillan.
See obituary.

NOTES.

Nearly a dozen of our local florists, several accompanied by their wives and daughters, left the city a little over a week ago to visit Dayton, the convention city, and nearby towns of horticultural interest. Among them were U. J. Virgin and wife, Otto Abele, J. A. Newsham, Harry Papworth, Harry Ellwell, Matthew Cook, Miss Carrie Cook, Henry Rehm, Chas. Ebele, W. Rehm, John Rink and P. P. Vorburgh. Harry Papworth, one of the foremost florists in this city, acted as one of the judges at the convention. So far only two of them, Messrs. Abele and Newsham, have returned. Both speak very highly of the convention, the exhibits, especially the novelties in plants and cut flowers shown, the city of Dayton as a convention place, the cordial welcome to all visitors by the mayor and the entire population, and last but not least, the grand entertainment given by the National Cash Register Co. to all the visitors and local florists, their families and friends. J. A. Newsham has attended almost every convention during the past 15 years and declares the Dayton convention, on account of the splendid and central location, one of the best held during that time. He returned August 25, after visiting only a few of the principal cities close to Dayton. The writer met Otto Abele, of the firm of Abele Bros., only 15 minutes after his return. He spoke very enthusiastically of everything seen, but declares that the same and even better results in growing certain plants and cut flowers could be obtained in this city if things were grown under the specialty plan. The only complaint made by both arrivals was against the scorching heat up north and they welcomed the cool breezes of the Crescent city.

Frank B. Faessel harvested a fine crop of Bride, Bridesmaid, Kaiserin and Golden Gate roses planted on raised top, glass covered benches, the sides of which are open, and a fine fall and winter crop can be predicted. His chrysanthemums grown in the same manner without glass are exceptionally fine.

Robt. Reineke prides himself on having the largest and finest specimen adiantums of different varieties in the city.

CRESCENT.

OBITUARY.

William McMillan.

Wm. McMillan, of Boston, who passed away August 22, had been an invalid since 1899, but had been able to be outdoors on pleasant days until 10 days before his death, when he suffered from a paralytic stroke.

Mr. McMillan came to this country from Scotland in 1886. He soon obtained a situation with W. W. Rawson & Co., of Boston. Here his genial ways, good nature and always ready joke won for him at once the regard of his employers and fellow employes. The market gardeners soon found in him a friend upon whom they could always depend. "If Mac put up the order it must be all right," became a common saying. His faithfulness was rewarded by his being given charge of the vegetable seed department, which position he held until suddenly taken sick December 31, 1899.

The funeral service was held at Forest Hill cemetery, where interment took place August 24. There were many beautiful floral pieces from his friends and former employer. His immediate relatives are all in Scotland and England except one brother in the west.

THE Herendeen Mfg. Co. has just issued a booklet giving some handy tables and lists.

CONVENTION PHOTOGRAPHS.—A. L. Bowersox, 137 South Main street, Dayton, O., advises us that he can supply copies of the convention group photograph in two sizes, that 16x20 inches at $1.50 per copy and the smaller size $1.

LORD & BURNHAM Co., the well known greenhouse designers and manufacturers, 1133 Broadway, New York, have issued a very attractive illustrated pamphlet entitled "The Pleasure and Profit of Cold Frames." There is in it a large amount of information pertaining to cold frames condensed into small space and all those who grow plants under glass will do well to send for a copy of this brochure to learn of the many ways in which the cold frame can be made to serve the grower, large or small, of tender stock.

The American Carnation Society.

At the meeting of the executive committee of the American Carnation Society, held at Dayton, August 22, all the members of that committee were present except J. F. Wilcox of Council Bluffs, Ia. At this meeting the last year's premium list was adopted, and it was decided that papers were to be read at the Toronto convention, which will be held next January, on the following subjects: "Greenhouse Construction," "Are There Too Many Carnations Introduced?" "American Carnations Abroad," and "Carnations From a Canadian Point of View." The authors of these papers will be announced later.

The Violet Gall Fly.

ED. AMERICAN FLORIST:—

Please describe the gall fly that troubles the violet and give preventive of the trouble if there is any.

A. SUBSCRIBER.

Poughkeepsie, N. Y.

The gall fly is a minute, slender and delicate two-winged fly, measuring about one-twentieth of an inch in length. It has long and slender legs and antennæ. The larva or maggot, which is usually found folded up in the leaf of a violet in such a manner as to bring the upper surfaces together in what has been termed a gall, is a minute, legless creature of a whitish or yellowish color. After the formation of the gall what is known as wet rot is apt to set in and destroy the leaves. This has the ultimate effect of dwarfing the plants and of arresting the development of the flower buds. Air-slaked lime, thrown into the crowns and allowed to reach the soil, would greatly lessen the injury. With this the best cultural condition possible should be maintained, such as good ventilation and a frequent stirring of the soil. The free use of Buhach, or Persian insect powder, at the time when the mature gall flies are seen flying about the greenhouse and upon the windows, would also be of considerable value in lessening their numbers. Hydrocyanic acid gas is another remedy that should prove effective.

Greenhouse Building.

Waterville, Me.—H. R. Mitchell & Son, one greenhouse, 40 x 200 feet.

Lenox, Mass.—Mrs. Geo. Westinghouse, one orchid house, 16 x 90 feet.

Woburn, Mass.—Lewis R. Jackson, one greenhouse.

Pascoag, R. I.—Amos F. Darling, one large greenhouse.

Findlay, O.—S. J. McMichael, greenhouse to cost $1,500.

El Paso, Ill.—El Paso Carnation Co., 20,000 feet of glass.

Washington, Pa.—Warrick Bros., one propagating house on cement foundation.

Lexington, Mass.—E. Wood, one new greenhouse, 34 x 195 feet.

Syracuse, N. Y.—Bard & Davis, one house; P. R. Quinlan & Co., some additions to plant.

North Bridgton, Me.—Chas. L. Chadbourne, one carnation house, 20 x 50 feet.

New Bedford, Mass.—Robt. Woodhouse, addition to greenhouse plant.

North Abington, Mass.—Sidney Littlefield, one greenhouse, 50 x 300 feet.

Pittsfield, Me.—A. J. Loder, one greenhouse.

Templeton, Mass.—Geo. W. Sutherland, one small greenhouse for violets.

Snohomish, Wash.—Fred Gall, an addition to greenhouse.

Rockland, Mass.—Sidney Littlefield, one greenhouse, 33 x 200 feet.

West Pittston, Pa.—Robt. Ellis, rebuilding greenhouses.

Princeton, N. J.—M. Taylor Pyne, four greenhouses.

Rockland, Mass.—Alvin Bates, addition to greenhouse.

Kirkland, Mo.—G. E. Ahner, one new greenhouse, 22x80 feet; A. G. Ahner, 2 greenhouses, 17x100 feet.

Warren, O.—Mrs. Geo. W. Gaskill, two new greenhouses in the spring; J. H. Adgate & Son, one propagating house.

Pittsfield, Mass.—John A. Spoor, one greenhouse.

East Mansfield, Mass.—John W. Conrod, one new greenhouse, 30 x 147 feet; also a 50-foot addition to another house.

East Palestine, O.—O. D. McArtor, one greenhouse.

Rockland, Mass.—Alvin Bates, an addition to greenhouse.

South Norwalk, Conn.—Robt. G. Hanford, one new greenhouse.

Stockbridge, Mass.—Dr. L. Bolton Bangs, one new greenhouse.

College Point, N. Y.—Mr. Finger, three new greenhouses.

Long Branch, N. Y.—Johnston Heating Co., several new greenhouses.

Jamestown, N. Y.—Lake View Rose Gardens, 45 new greenhouses, each 20 x 200 feet.

Atchison, Kans.—Mangelsdorf Bros., two new houses.

Dighton, Mass.—The Dighton Nursery Co., one new greenhouse 25 x 100 feet.

Coming Exhibitions.

(Secretaries are requested to supply any omission from this list.)

BOSTON, MASS., September 5-6, 1906.—Annual plant and flower exhibition Massachusetts Horticultural Society. Address Wm. P. Rich, Horticultural hall, 300 Massachusetts avenue, Boston Mass.

BOSTON, MASS., November 2-4, 1906.—Chrysanthemum exhibition Massachusetts Horticultural Society. Address Wm. P. Rich, Horticultural hall, 300 Massachusetts avenue, Boston, Mass.

CHICAGO, November 6-12, 1906.—Annual exhibition Horticultural Society of Chicago. Address Willis N. Rudd, Blue Island, Ill.

MADISON, N. J., November 1-2, 1906.—Eleventh annual flower show Morris County Gardeners' and Florists' Society. Address E. Reagan, Box 315, Morristown, N. J.

NEW HAVEN, CONN., November 6-8, 1906. — Annual exhibition New Haven County Horticultural Society. Address Thos. Pettit, 90 Prospect street, New Haven, Conn.

PROVIDENCE, R. I., November 9-10, 1906.—Chrysanthemum and carnation exhibition Rhode Island Horticultural Society. Address C. W. Smith, 27-29 Exchange street, Providence, R. I.

FOR SALE.

At a sacrifice, greenhouse well stocked and long established business of the late J. P. Coen, Lexington, Mo one of the best paying little businesses in the country and in perfect condition; no competition within 30 miles. The place consists of 3 greenhouses 85x20, 1 lean to and cold frames, 1½ acres of ground, an excellent 7-room house, with all modern conveniences, steam heat, electric light, etc., out-houses, good barn, laundry, chicken houses etc. The entire place is lighted with electric light, heated with self-regulator steam boiler, and city water throughout the grounds and houses. Good wholesale trade as well as retail. Lexington is noted for its colleges and schools; one boys' military academy, two girls' colleges and a number of minor schools, all of which keeps the cut flower business very brisk during the school season. The place can be bought for $6,500, which amount wouldn't pay for the improvements; $2 000 cash, balance to suit. For further information address ARTHUR NEWELL, 12th & Baltimore Aves., Kansas City, Mo.

For Sale—Worthington duplex steam pump, capacity 30-40 gal. per minute in good condition, $45 00; No. 1 receiver and fittings for pump, good as new $50.00. Dean pump for hand or steam, almost new, $20.00; 6-inch pressure regulator, used two seasons, $50.00; 2½-inch pressure regulator, $18.00. Carnation supports $15.00 per 1000; $125.00 for 10,000. JAMES W. DUNFORD, Clayton, Mo.

Ants on Lawns.

ED. AMERICAN FLORIST:—

What are the best means of ridding lawns of ants?

New Jersey. W. L. H.

See answer to W. B.

Ants in Roses and Lawn.

ED. AMERICAN FLORIST:—

Kindly let me know through your valuable paper what is the best way to get rid of ants which are infesting the roses and a new made lawn.

North Carolina. W. B.

Excellent success has been had in destroying ants with the use of bisulphide of carbon applied in their nests. Pour an ounce or two of this into each of a number of holes made in the nest with a stick, promptly closing the holes with the foot. The bisulphide penetrates through the underground tunnels and kills the ants in enormous numbers, and, if applied with sufficient liberality, will exterminate the whole colony. Large colonies of ants may frequently be uncovered on turning over stones in yards or lifting flagging in paths. Drenching such nests with boiling water or saturating them with coal oil are effective means of abating the nuisance.

PITTSFIELD, MASS.—Although a fortune of $2,000 awaits John Nettleton, of Norfolk, Conn., if he will come to this city to get it; he has so far refused to come. The fortune came from the estate of his brother who died years ago.

MINNEAPOLIS, MINN.

We are now settled in our new quarters, and our facilities for handling Cut Flowers and Florists' Supplies cannot be surpassed, which makes us in a position to handle your business to the best of advantage—shipping trade especially. The Cut Flower market is in good shape for the summer months; receipts of roses good and stock choice, comprising Liberty, Richmond, Moulton, Chatenay, Maids and Brides. Asters of first-class quality. Dahlias, and greens of all kinds. Wild Smilax on hand the 1st of September. We solicit your patronage.

SOMETHING NEW Branches of the Huckleberry Tree.

A most elegant decorative green. It is largely used by florists of the Pacific Coast, Washington and Oregon in decorations. The branches are flat, very thickly furnished with exceedingly lustrous, green leaves, and it seems to adapt itself to almost any position in decoration that the Wild Smilax can be used in.

New crop Hardy Ferns, now ready. Fancy $1.25 per 1000; Dagger, $1.00 per 1000.

CALDWELL, the Woodsman, EVERGREEN, ALA.

Southern Smilax

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever be select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907, I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa.

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. $ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old,. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots, 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size: their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2 50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them: can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

Nephrolepis Barrowsii, 6-in., large, ready for 7-8 in. 50c; 4-in., large, 25c.

Nephrolepis Scottii, 6-in. pots, large, ready for 7-8 in., 50c; 5½-in., 40c; 5 in., 35c; 4-in., 20c to 25c.

Boston Ferns, 4-in., 20c to 25c; have them by the 1000.

Asparagus Plumosus Nanus, 3-in., 6c; 4-in., 10c.

Cycas Revoluta or **Sago Palm,** 6 to 7 in. pots, 7 to 20 leaves, 10c per leaf.

Cocos Weddelliana, 15c.

Areca Lutescens, made up plants, 4-inch pots, 5c.

Solanum or **Jerusalem Cherries,** 2½-in., per 100, $5.00; the same varieties as we sell at Xmas. for from 75c up to $1.00 each.

Ficus Elastica, Belgian importation, 6-in. pots 50c each.

Ferns. A fine assortment of Ferns for dishes large, bushy, out of 2½-inch pots $5.00 per 100; 3-inch, 7c each.

All goods must travel at purchaser's risk. Cash with order, please.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl –
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls.
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

GODFREY ASCHMANN, Importer and Wholesale Grower of Pot Plants, 1012 Ontario St., PHILADELPHIA, PA.

Chicago.

TRADE ENLIVENED BY WEATHER.

The market is again assuming a prosperous appearance under the influence of the icy weather which followed the torrid wave of the preceding week. To use a slang expression, "wholesalers are beginning to sit up and take notice." Retailers from various parts of the city drift in more frequently and their chats are shorter in duration. Clerks are again busy with boxes and bookkeepers find no time for social intercourse. Stock of all kinds is arriving freely, and in excellent condition, as a whole. The variety of roses on the market this week is a trifle more extensive than usual. Some fine long-stemmed American Beauty is to be had in a dozen different establishments; Bride, Bridesmaid, Killarney, Kaiserin, Ivory and Chatenay are not overabundant, but enough is available to supply all demands. As a whole, the rose situation is quite good, as nearly all stock is excellent, moves well and brings normal prices. Carnations also show a decided improvement. Although still small in flower, the material is good and sells well. There is a good deal of long-stemmed stock on the market, with the red varieties predominating. Enchantress and Boston Market are somewhat scarce and good figures are realized from their sale. Asters are over-plentiful. It would seem that the influx of these flowers would never cease. The material has improved a trifle in quality and size, but owing to the superabundance of these blooms, they move very slowly. Sweet peas are scarce and sell well. Outdoor flowers arrive in good condition, but are sold in small quantities at indifferent prices.

NOTES.

The windows of the Eaton Floral Co. are objects of much interest because of an exceedingly attractive window display arranged by the company's new decorator, C. H. Grant. By a skillful blending of earth, rocks, ferns, bark, and Japanese dwarf plants, an excellent imitation of a Japanese landscape is obtained. In the center of the scene is a tiny glass lake, studded with grass growing heads and surrounded by paths of white stone which lead down to the water. The entire landscape is dotted by Japanese dwarf plants, many of them 60 years old, growing from large stones. From the jungle seen in the extreme background, through the canebreak which marks its approach, and amid a labyrinth of pebbles, ferns and bark, a clay elephant can be seen dashing down to the lake. Japanese figures, clad in native costume and a straw house lend an air of life and action to the scene.

There are various ways of becoming famous; invent a hair-restorer, face lotion or organize a religious cult, and your name will be lauded from sea to sea. But probably Geo. Scott, of Winterson's, knew a short cut when he bowled 93 in the second game of the finals at Dayton last week. A dozen wholesale houses are displaying mammoth placards which bear the following inscription: "Dayton, O. Great Scott! 93-70=23. Skidoo." And, by the way, Scott is now visiting in Dayton.

L. P. Davis and wife, Mobile, Ala., were among our visitors last week. Mr. Davis attended the convention and visited, some of our leading commercial establishments. The itinerary of the genial southerners includes Buffalo and New York, returning home from the later city by steamer.

Illinois Central railroad landscape gardeners who are traveling over the system in search of ideas and information relative to their work, passed through this city last week. Several of them stopped over a few days to visit friends.

Police Sergeant Carey has been suspended 10 days and fined 10 days' pay for locking up and holding in jail 24 hours August Gutzloe, an aged gardener, because he sought to make a complaint to the desk sergeant.

H. E. Phillipot left last week for Toronto where he will attend the convention. He will then return to his home in Winnipeg which he left two months ago.

The Schiller estate reports large sales of cut flowers for funeral purposes last week, as the death rate caused by the hot weather is said to have been very high.

Percy Jones seems to have been the sweet pea man for the past few weeks. He is receiving several thousand daily, which he says are sold out early in the day.

Frank Neiglick died August 24, at the Lakeside hospital. Blood poison is given as the cause of his demise, which occurred very suddenly.

Wm. Kalisch and wife of St. Louis, Mo., were recent visitors returning from Toronto. They are now spending a few days in Wisconsin.

There have been many visitors in the city during the week, most of them returning from Dayton or extending their convention trip.

Weiland & Risch are opening the season by some heavy cuts of choice roses. They are bringing in a fine lot of Killarney.

R. H. Warder, superintendent of Lincoln park, who has been ill for some time, is now able to attend to business.

Vaughan's Seed Store is showing good blooms of two excellent new asters, Hercules and Unicum.

Peter Reinberg and a party of friends left this city last week for a fortnight's hunting in Minnesota.

Miss Tonner of the A. L. Randall Co. left Liverpool, England, on her way home August 27.

Edw. Amerpohl left this city August 26 for his home in Janesville, Wis.

Visitors: C. E. Newbury, Mitchell, S. Dak.; H. Roth, La Fayette, Ind.; L. Henderson, Omaha, Neb.; U. J. Virgin and wife, New Orleans, La.; O. L. Baird, Dixon, Ill.; Mr. Swoboda, of Hess & Swoboda, Omaha, Neb.; and Miss Buel, daughter of Peter Buel, New Orleans, La., A. L. Barnett, representing Reed & Keller, New York; Emil Schloss, of Schloss Bros., New York.

KANSAS CITY, MO.—We have had a postal card from Arthur Newell, of this city, who is prospecting in New Mexico, and he says it is a great country.

MILWAUKEE, WIS.—Employes of Holton & Hunkel Co. and Currie Bros. Co. played a game of baseball last week, the former team being victorious. Score 10 to 12.

Kansas City.

BUSINESS VERY QUIET.

Market conditions remain practically unchanged. Roses are improving some, still few are to be had that are worthy of the name. Carnations are very poor and scarce. Asters are plentiful and some very fine ones are to be had. Although there has been quite a little funeral work in some quarters this week the stores generally report business as very quiet.

NOTES.

A miniature cloudburst on Wednesday morning, six inches of water falling in less than three hours, caused considerable damage about the city. Two sewers near Elmwood cemetery burst, flooding the lower part of the cemetery with 10 feet of water.

J. E. Meinhart, who is opening an up-to-date store in Leavenworth, Kan., was in the city placing orders for decorative plants and supplies. The first item on his list was a subscription for THE AMERICAN FLORIST.

Miss Peterson, of the Miss Peterson Co., who has been very sick for the past month, is improving but it will be some time before she will be able to resume her duties at the store.

J. M. Kessler and wife, of Topeka, stopped over on their way home from Chicago.

Miss Lou Boggess, of Freudenthal's force, is spending her vacation in Colorado.

A. Newell left Wednesday for the Pan Handle, Texas, on a business trip.

Mangelsdorf Bros., of Atchison, Kans., are building two new houses.

K. C.

Columbus, O.

THE MARKET.

The long continued hot weather has made it almost impossible for local florists to obtain or keep any great supply of good roses. If it were not for gladioli and asters, the florists would be decidedly "up a stump." Asters are holding out well. There is a good supply and a demand that is entirely in accordance with the supply. Some fine gladioli have been received during the past week. The spikes are large, well formed, and the variety of colors is splendid. At the present writing the hot weather has just broken. The thermometer has dropped about 8°, much to the relief of the trade.

S. T. Stevens and son, Gus Drobisch, John R. Hellenthal, C. A. Roth, and Messrs. Knopf, Ludwig, Bauman, and Seibert attended the convention last week.

CARL.

DENTON, TEX.—Miss Herta A. Toeppen, of St. Louis, Mo., has been appointed instructor in floriculture at the School of Industrial Arts for Young Women, assuming the duties of the position September 1.

THE MARKET.

Business the past week has been very dull and there are plenty of flowers for all that is doing. American Beauty and other roses are improving and are, we believe, in better shape for the season than we have ever seen them. Asters and gladioli are still overstocked, only the best grades bringing satisfactory figures. Dahlias are now coming to market in good shape, but prices are low, $1 to $1.50 being the prevailing prices.

NOTES.

We are happy, we are more than happy. We are satisfied beyond measure. We succeeded beyond our most sanguine expectations. First, thanks to silver tongued Robt. Craig, who presented the invitation and advantages of the city in such a convincing manner and who was so ably seconded by John Westcott with his heart to heart speech, this city won the coveted prize, the convention of 1907. Then sturdy John Westcott, against his strenuous protest, was elected vice president. As if this were not enough our five good men and true won the bowling match, carrying off the beautiful Beatty cup, which now belongs to them, and the custody of the Kastings trophy which confers the championship for the year of 1906. Then the exhibits of the plant and supply men of this city were far and away ahead of those of any other city. All this is pretty good for slow Philadelphia. The boys reached home on Saturday and barring the heat, which they seemed to feel considerably, said they had a splendid time. Mr. Westcott stated that more business was transacted and more real work done than at any previous meeting. The presentation of the prizes at the Algonquin on Wednesday evening was an occasion that none who attended will ever forget. Mr. Beatty, although he had done so much for bowling with his generous offering of such beautiful cups, would have it that he be also host on this occasion. After he presented the trophies the large cup was filled and passed around, each person adding his word or song to gladden the hour. Robt. Craig was in fine fettle, his humorous arraignment of Deacon Harris being in his best vein. He also sang several songs.

Brother Carmody, now that he has President Roosevelt coming his way on the spelling question, should feel highly gratified that his efforts in this direction have at last produced such good results. Perhaps he may also persuade him that his "bilers and other contrapshuns" are just the thing for the White House conservatories and thus kill two birds with one grate bar.

The first Tuesday night in September will be a great gathering of the club and the ball will then be set rolling for the event in the history of the society.

S. S. Pennock is spending a couple of weeks at Ocean City, where yachting and fishing are excellent.

Chas. Meehan and wife are visiting relatives in Ohio. K.

DIGHTON, MASS.—The Dighton Nursery Co. is building a new greenhouse 25 x 100 feet.

Boston.

TRADE INDIFFERENT.

The market of the past week has been the most deplorable of the summer season. Some mornings there were but 10 or a dozen buyers in the market. The growers had an abundance of stock, a great deal of which was of poor quality. Yet the average amount of the better grades had a hard time moving at any price. Outdoor flowers of all kinds are coming to market in large quantities, including lilies, gladioli and branching asters of the Semple type. The asters are good varieties and fine flowers. Carnations of the new crop are more plentiful, with the colored varieties predominating. Sweet peas, while there are but very few in the market, are improving in quality. There are plenty of roses to be had with Kaiserin, Carnot, Killarney and American Beauty still holding the lead. The new crop of Bride and Bridesmaid are fair flowers but of short stem. The lily of the valley and gardenias used at the retail stores are coming mostly from outside sources. Sweet peas this summer have been a failure to both grower and retailer, due mostly to the fact of there being so much changeable weather. At this season last year the market was overburdened with them. This year there has not been a sufficient supply to meet the demand. The quality has been poor and short stemmed and after remaining in the stores two or three hours they do not look very inviting.

NOTES.

Owing to the prolonged and serious illness of City Forester Wm. J. Doogue, Mayor Fitzgerald deemed it necessary to appoint an acting superintendent. With great wisdom he selected one Chas. Logue, whose qualifications for the position seem to be his entire lack of knowledge of the business. His former occupation was that of a carpenter and builder, also a member of the schoolhouse commission. It is very humiliating to the trade and public in general that the mayor could not see fit to appoint the late acting superintendent or one of his assistants until such time as Mr. Doogue shall recover or a permanent man is appointed.

Houghton & Clark of this city furnished the floral decorations for the weddings of Miss Emily Sargent and Baron Ludwig Knoop, and Miss Naneen C. Mitchell and Quincy A. Shaw, Jr., celebrated August 25, at Magnolia, Mass. Killarney roses and hardy hydrangeas predominated at the Sargent decoration, while Lilium lancifolium and hydrangeas were used profusely at the Mitchell house. The bridal bouquets were made of lily of the valley.

Wm. Moran of the Waban Rose Conservatories spends his spare evenings this summer entering the dancing contests held at the several beach resorts, and so far has captured the first prize in every contest in which he has participated. He is the proud owner of several medals.

The genial and popular Patrick O'Mara of the Peter Henderson Co. passed through this city August 24, on his way to Mansfield, Mass., to attend the funeral of Miss J. H. Capron, for the past 20 years head stenographer for the Peter Henderson Co.

J. Newmann Fennelly of Thos. F. Galvin's has just returned from his pleasure trip abroad, and after a week's sojourn in New Hampshire will again return to business duties.

Once again the old Bay state has had honor thrust upon her with the election of Wm. J. Stewart as president of the Society of American Florists.

A. Leuthy has just returned from his annual business trip abroad and informs us he has purchased a fine collection of palms, azaleas, etc.

Andrew Christensen sailed August 29 from New York on an extended trip through Denmark, his former home.

Visitor: Henry Siebrecht of Siebrecht & Sons, New York. B.

Pittsburg.

STOCK PLENTIFUL, DEMAND FAIR.

With plenty of all stock excepting white asters, the past week has been one to give satisfaction all around. Some very fine asters are arriving. American Beauty roses are both plentiful and good. Lilies are very plentiful and the wholesale houses are alive with gladioli. Americus is the only variety which finds ready sale. Many dahlias are coming in, but there is practically no sale with these. Green stock has been rather scarce during the week.

Chas. Hoffman of De Haven is in Utica, N. Y. Charley states that this is the only time of the year he gets a chance to get away, his asters being done and all his houses planted for the winter.

E. C. Rineman, John Bader and T. P. Langhaus are back from Canada, having stopped at the convention on their return trip.

H. L. Blind & Bros. have a fine crop of American Beauty in bloom. They would prefer to have them a month or two later.

The wire department of the Pittsburg Florists' Exchange has to run overtime in order to keep up with the demand.

Harry Graves of C. T. Siebert's is back at his old post, having returned from a visit in Ohio.

Joseph Cruell of A. W. Smith's has resigned. At present he is located in McKeesport.

Ed Weaner of Randolph & McClements is spending his vacation in the country.

Lee Riley of the Florists' Exchange is spending a fortnight in West Virginia.

J. B. Smith and wife, of McKeesport, are rusticating at Cambridge Springs.

Julius Ludwig and family are back from their eastern trip. J.

Hartford, Conn.

Carl U. Fohn, who has been forester at Keney park during the past three years, has been appointed superintendent on the extensive property of Gen. Palmer, at Colorado Springs, Col., and left Hartford August 17 to assume his new duties. Mr. Fohn has been an active and popular member of the Florists' Club and the Connecticut Horticultural Society and his many friends in both bodies presented him on the evening preceding his departure, with a massive silver loving cup. In horticultural and social circles here Carl will be much missed and he carries with him to the west the warmest good wishes of the entire craft here.

AUGUST BREAKS RECORD FOR DULLNESS.

The month of August now closing will go on record as one of the worst summer months in recent years, and not a few are willing to give it the palm. Its closing days, in so far as existing business would allow of predictions, do not make the prospect for a speedy resumption of business on a profitable scale very bright. Arrivals are quite heavy in all lines and values suffer in a way, but losses go more generally with poor and over abundant stock. Good quality roses and carnations bring their money without difficulty, but this kind of stock is exceedingly limited. Off quality stock goes at anything that can be got for it, and average shipping returns to some growers, taking the box run of stock, will hardly reach 50 cents per 100 on roses. Good summer roses, like Kaiserin, Carnot and Killarney, are profitable, but growers claim that it does not pay to grow such summer roses under modern glass. Carnations are not improving any in quality, and the demand for such as are offered is not great. One or two new shippers to this market might profit by the experience of others. At this writing some large shipments of cut carnations have come in, and the shippers have evidently given the box layers a vigorous sprinkling with the result that the flowers are all but spoiled and stand a good chance for ash barrel consumption. Large quantities of cut hydrangea are coming in, some in very fine shape, but the price obtained, maximum $1 per 100, hardly pays for the shipping charges and commission. Dahlias are getting quite plentiful, at least as far as the lower grades are concerned. The fancy varieties have not yet made their appearance, nor are they expected before September 10 at the earliest. Gladioli still come in quantities, and move at prices about the same as during the past two weeks. Red varieties, however, seem to be shortening up a bit. Salvia is presented in large quantities as a cheap bright offering and sells fairly well for specific purposes.

NOTES.

F. R. Pierson, of Tarrytown, was in town on Monday, and seemed pleased to meet with any of the returned convention delegates. He has just completed the planting of his two new mammoth houses at Scarboro, 40,000 carnations being planted inside of two weeks.

Traendly & Schenck have "wet paint" signs generally displayed in their stores, and are in readiness for the active resumption of business. F. H. Traendley is following his trip to the Dayton convention with a few days spent at various points along his return route.

Wm. Starke, the Twenty-ninth street plantsman, has just finished the repainting of his store, and has commenced to put in plant stock for the coming season's trade.

Gunther Bros, the Twenty-ninth street wholesalers, have the necessary changes made in their store front for the commencement of their new firm business September 1.

A. M. Henshaw is receiving a nice cut of the new crop of Bride and Bridesmaid roses, with a fair proportion of them in the fancy and special grades.

Wm. H. Donohoe leaves this week for Boston, where he has quite a large undertaking to put through, and where he will spend a few days' vacation.

W. H. Kuebler, the Brooklyn wholesaler, was to be found at his usual post on Monday morning, looking well after his western trip.

Mrs. A. Warendorff took a prize for a decorated team at the Avenue floral carnival.

J. K. Allen was at his post at cock crow on Monday morning, well pleased with his trip to Dayton.

Washington.

GLOOM IN THE MARKET.

If there is one word more appropriate than others to express the prevailing sentiment, not only in our own but other lines of business, at the time these lines are penned, that word is gloom. This is more applicable from the viewpoint of the growers, for only another season or a liberal outlay of cash can replace a stock of ruined plants. Rain, rain, rain! Humidity and a soaked and saturated soil makes it a certainty that carnations yet in the fields are greatly damaged. Candor compels the statement that for these conditions the growers themselves are largely to blame. There has been ample warning; the whole season has been a succession of warnings, but hindsight instead of foresight seems to have been a leading characteristic of the growers of this district. We have here men who range the country from Boston to Pike's Peak, as promoters of flower shows, but all they have ever done to raise from mediocrity the growing of commercial blooms might be written on a fly's wing.

This is no reflection on the hard-working growers who have tried by conscientious and intelligent effort to raise the standard of horticulture in the district. In the retail business nothing is being done but funeral work. The summer tourists that are returning home seem, as a rule, to be more in need of the services of a physician than a florist, for the same stories of rain, humidity and malaria come from all points.

We have a few crumbs of comfort left, however. The score of the Washington bowling team at Dayton, agreeably surprised everybody here — including the team itself. Then, it is a fact that Secretary Stewart has long been popular with many members of the craft in this city. His elevation to the head of the S. A. F. should please them. Though in the matter of toadying to officials, high or low, the early education of the writer was sadly neglected, he bears no grudge against the president-elect. His election seems a fitting climax to the long years of service as secretary of the society.

Both H. B. Beatty and P. J. Hauswirth are well known and popular here. The re-election of the one and the election of the other to their respective offices should be eminently satisfactory to the craft in general. In the case of Mr. Beatty, if promotion is the just reward of faithful and disinterested services it is hoped that the next S. A. F. convention will not overlook this most faithful servant.

In the consideration of great horticultural centers, Chicago, New York, Philadelphia and Boston have such a lead that others are but mere whistling stations. Philadelphia, being for the year to come, the point of interest, it is proper to state that she can do anything in the horticultural line she undertakes, and do it well. S. E.

CONESUS, N. Y.—The Floral Society held an exhibition August 24 and 25. There were about $100 offered in premiums.

NEW YORK, N. Y.—Dr. N. L. Britton, director of the New York Botanical garden, sailed August 25 on the steamship Siberia, of the Atlas Line, for Kingston, Jamaica, for the purpose of botanical investigation and collection in the island.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

RUST is very bad again this year on California asparagus.

ONION SEED crop reports from California August 13 continue unfavorable.

R. W. POMMER, of D. I. Bushnell & Co., St. Louis, Mo., is making a Pacific Coast trip.

LEM BOWEN of D. M. Ferry & Co., Detroit, Mich., is expected home from Paris in September.

THE death of the late Wm. McMillan, formerly in charge of the vegetable seed department at W. W. Rawson & Co's. Boston, Mass., is recorded in our obituary column.

J. Chas. McCullough.
Fishing at San Gabriel Canyon, California.

ERFURT, August 16.—Owing to the continued wet weather in July and up to the present time crops are about two weeks behind other years. Asters have suffered from the wet and the better classes are being attacked by disease. Larkspurs are harvested and proved a short crop. Verbenas and dianthus, while late, still look well. Carnations will be very short. Stocks and pansies are under middling, while wallflowers will be a poor crop.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.
Braslan Seed Growers Co.
WHOLESALE SEED GROWERS.
SAN JOSE, CALIFORNIA.

VISITED CHICAGO: J. E. Northrup, Minneapolis, Minn.; R. G. Craig, Memphis, Tenn.; E. V. Hallock and wife, Queens, N. Y.; A. B. Haven, Lodi, Cal.; S. B. Dicks, London, Eng.; Otto Wiese, representing David Sachs, Quedlinburg, Germany; W. Brotherton, of the Jerome B. Rice Co., Detroit, Mich.; A. Currie, Milwaukee, Wis.; J. S. Michaels, Sioux City, Ia.; James J. Comont, representing James Carter, Dunnett & Beale, London, Eng.

NEW YORK, August 27.—The S. S. Brooklyn, belonging to Frank Zotti & Co., sailing from Marseilles for this port, recently went ashore at St. Michael's Isle. This boat was carrying in the neighborhood of 1,400 cases of French bulbs, Roman hyacinths, Paper White narcissus, etc. At present the cargo is being lightered and part of it is in bonded warehouse in St. Michaels. We understand this company has no other boat, and it may therefore be some time before a vessel can be secured to bring the cargo to America. The New York agents are not informed at present what the prospects are for getting the cargo here.

Boston.

The local dealers have received their shipments of French bulbs consisting of Roman hyacinths, Lilium candidum and Paper White narcissus and are shipping out all early orders.

The W. W. Rawson Co.'s retail bulb catalogue will be issued to the trade this week, and as for cover and illustrations it is a work of art.

Wm. J. Sherry, manager for the Johnson Seed Co., of Philadelphia, Pa., with his family is visiting relatives here.

Wisconsin Pea Crop.

Writing under date of August 27, the John H. Allan Seed Co., of Sheboygan, Wis., has the following:

"The pea crop in the vicinity of Sheboygan, Wis., so far as delivered, proves to be about equal to our expectations, and is a fair average crop; and nearly all of it having been harvested under favorable conditions, we have a bright, sound, handsome sample; and as there was plenty of bright sunny weather, the berry is of good size and high vitality.

"In the section north of here, including Sturgeon Bay, all crops suffered from the drought, which set in just as pods were filling, and the yield is materially shortened on this account; and although deliveries in that section have hardly begun, we expect about two-thirds of an average crop of bright, sound peas.

"Beans in this state, so far as our observation extends, promise to be a fair crop, and with brighter weather than for the past two seasons, there is less rust and blight than usual; and we are looking for a crop of good quality and fair average yield, should no unfavorable conditions arise before or during harvest."

QUINCY, MASS.—Arnold & Johnson have moved to 1361 Hancock street.

Paper White Grandiflora Narcissus is always a money-maker. Plant at once for earliest crop, which is the most profitable.
White Roman Hyacinths, finest quality bulbs, 12 to 15 cm., about 1,800 bulbs to the case, $2.50 per 100; $23 00 per 1000.
Freesia Refracta Alba, finest Bermuda-grown bulbs ½-inch up, $7.50 per 1000.
Bermuda Buttercup Oxalis, $1.00 per 100; $7.50 per 1000.
Lilium Harrisii, 6 to 7-inch bulbs, 335 to the case, $13.50 per case; less quantites, $5.00 per 100. Larger sized bulbs all sold out.
F. R. PIERSON CO.
Tarrytown-on-Hudson, N. w York.

Lawrence, Kans.

At the meeting of the Douglas County Horticultural Society, August 18, at the home of C. H. Hoyt, a communication was read condemning the practice of distributing garden seeds by the government. After a general discussion the following resolution was unanimously adopted:

Resolved, That the Douglas County Horticultural Society does hereby condemn the free seed distribution of the United States Agricultural Department through members of congress. That we would favor a test of rare varieties from foreign countries. That we consider success in vegetable planting dependent upon the careful selection of varieties based upon class of soil. That the government seeds we have tried have proved inferior. That we know the people at large consider free government seeds a sort of graft looking toward influencing votes, and that we petition our congressmen to restore the distribution to its original intention, or to respond to the sober good sense of the people.

SPRINGFIELD, O.—McGregor Bros. are building residence houses for sale and improving the lands adjacent to their plant establishment here.

VAUGHAN'S SEED STORE, 84-86 Randolph Street, CHICAGO. 14 Barclay Street, NEW YORK.

Greenhouses and Nurseries and Trial Grounds, Western Springs, Ill.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

SYRACUSE, N. Y.—Geo. E. Kessler, the landscape architect of Kansas City, was engaged at a meeting of the board of estimates to establish a park and boulevard system in this city. Mr. Kessler is engaged for a term of three years to begin October 1, 1906.

MINNEAPOLIS, MINN.—Park Commissioner Chas. M. Loring, sustained his title as father of the city parks by offering to the park board to defray the cost of a pavilion in Loring park. The offer was of course accepted. The cost will be from $8,000 to $10,000.

SYRACUSE, N. Y.—The board of estimate and apportionment met recently and decided to place $2,000 of the park fund at the disposal of the park commission. This will leave about $8,000 in the park budget. The $2,000 will probably be spent by the park commission for hiring a landscape architect and incidental expenses connected with the work.

THE DAVENPORT NURSERY CO., of Davenport, Ia., filed articles of incorporation with the county recorder August 20. The incorporators are Adolph Arp, who will be president; H. G. Bryant, who will be vice president, and Margaretha Arp, secretary and treasurer. This is the new company planned some time ago by the former head of the Central park greenhouses.

BERLIN, MD.—Members of the Maryland Horticural Society to the number of over 400 were entertained recently at Harrison's nurseries. Addresses were delivered by leading horticulturists of the state and neighboring states. The members of the society were then taken in carriages through the 1,000 acres of Harrison's nurseries. The winter meeting will be held in the Fifth Regiment armory, Baltimore, December 5 and 6.

Peonies and Their Uses.

There are few hardy plants more deserving of recognition than peonies, and of some of the choicer varieties it can been said that but few things, hardy or otherwise, equal them in exquisite beauty. Besides the beauty of the flowers and the hardiness of the plants, peonies have several other points to commend them to general favor, first because from among the species may be selected subjects for almost any kind of situation, next because of the fact that insect pests do not bother them, which is in itself quite a consideration. For border planting peonies are unrivaled, especially when large numbers can be planted either in rows as background for other and dwarfer herbaceous plants or when planted in groups judiciously placed in among or in close proximity to shrubberies. On large places beds of peonies on the lawns, or where large beds are out of the question, peonies planted singly are seldom inappropriate.

Although peonies delight in sunshine they also thrive remarkably well in partial shade. Peonies must have plenty of good food. Therefore when planting if the soil is not already in good condition, it ought to be thoroughly trenched and, if poor, enriched with a liberal addition of cow manure. They are gross feeders, but the results obtainable from gratifying their desires will amply repay the expense and trouble. Peonies are propagated from seed and by division of roots. The latter method is by far the most practical and the roots ought to be secured from a reliable dealer to insure that the stock will be true to name, which is a matter of the utmost importance if the planting is to be done on a large scale. Even when only a few are required it is better to be reasonably certain of getting the varieties asked for.

The following are among the best peonies for planting in large or small groups: Festiva maxima, white with a

Peony Festiva Maxima.

little scarlet in the center. This and Queen Victoria are the two best in white. Grandiflora alba is another good white. Victor Moorish, Floral Treasure, fragrans, rosea superba and Humei are of the best pinks. Baroness Rothschild is also an excellent pink of a different shade from any of the others. Mons. Rousselon, delicatissima, Hericartiana, Eclante and rosea superba are good varieties of their color. For deeper red and crimson, rubra triumphans, Andre Lauries, grandiflora rubra and tenuifolia flore-pleno are excellent varieties. Agida is another good red, while Duchess d'Orleans is a fine variety of rose with salmon center. Magnifica is a splendid variety, a free bloomer and very early. In color it is blush with salmon shadings. There are many others and perhaps equally good varieties, but these we have seen and admired more than others.

The Japanese single peonies are very good for beds and when a mass of them is in bloom the effect is simply grand. Their flowers are large and soft, resembling immense roses.

The old-fashioned peony, P. officinalis, is distinct from the others and comes into bloom about two weeks earlier. Three good varieties of this sort are alba, rubra and rosea.

No place should be without a large or small collection of peonies. They are a source of much pleasure and seldom disappoint whoever plants them. When once planted they are there to stay, requiring but little attention and year by year increase in value and interest.

M.

American Cemetery Superintendents.

The twentieth annual convention of the Association of American Cemetery Superintendents was held at the Hotel Cadillac, Detroit, Mich., August 21-23, 1906, with an attendance of 168. The visitors were welcomed by Police Commissioner F. W. Smith and an extensive and interesting programme followed. The secretary reported the death of three members during the year.

Edw. G. Carter, of Chicago, was directed, as chairman, to organize a committee to represent the association at the horticultural congress which it is proposed to hold in connection with the Jamestown Exposition next year.

The officers elected for 1907 were as follows: J. C. Cline, Dayton, O., president; F. R. Diering, New York, vice-president; Bellett Lawson, Paxtang, Pa., secretary-treasurer.

The following local associations were represented: New England, Ohio, Michigan, Illinois.

The next convention will be held at Providence, R. I.

JACKSON & PERKINS CO., Newark, Wayne County, New York.

NEWS NOTES.

ROCKLAND, MASS.—Alvin Bates is building an addition to his greenhouse, on Salem street.

EAST PALESTINE, O.—O. D. McArtor is building a greenhouse near his residence on Mill street.

LOWELL, MASS.—J. J. McMannon has a large and very fine display of phlox and has invited the public to call and see the plants.

PITTSFIELD, MASS.—New buildings planned at "Blythewood" by John A. Spoor, of Chicago, include a gate-house and greenhouse.

GRAND RAPIDS, MICH.—Miss Elsie Stoves will have charge of Eli Cross' new store in the Wonderly building, on Monroe street.

EAST MANSFIELD, MASS.—John W. Conrod is erecting a new greenhouse 30 x 147 feet. He is also adding a 50-foot addition to another house.

PEKIN, ILL.—Geo. A. Kuhl and wife stopped off at Dayton, O., for the convention, returning from a New England holiday of seven weeks duration.

CHESHIRE, CONN.—Miss Nettie Smith is having the Clover Leaf Greenhouse thoroughly repaired and alterations made for preparation for her fall and winter trade.

SPRINGDALE, ARK.—Robt. Newcomb, formerly of Chicago and Des Moines, is recovering from an attack of typhoid fever, which is very prevalent in this section.

WAKEFIELD, MASS.—F. C. Bisacre, of Swampscott, is the purchaser of a piece of land here, where it is understood he intends building extensive greenhouses in the spring.

COLLEGE POINT, N. Y.—Louis F. Hess has received the contract to erect three greenhouses for Mr. Finger at Bayside, and several similar structures for the Johnston Heating Co. at Long Branch.

CLEVELAND, O.—A large number of guests visited the Euclid Avenue Gardeners' Club's first annual gladiolus show, which opened in the log cabin in Euclid Beach park August 15. The show was open to the public for five days.

STOCKBRIDGE, MASS.—Dr. L. Bolton Bangs is to build a greenhouse and to make other extensive improvements on his place where he is now completing a handsome new villa. The proposed improvements will cost over $20,000.

WORCESTER, MASS.—Lawrence G. Dodge, of the U. S. Department of Agriculture, has been in Worcester for a few days. Mr. Dodge is touring the country in the interests of the bureau of plant industry, and is studying the methods used for marketing and growing throughout the country.

TOLEDO, O.—Superintendent Moore has informed the council that the animal house and greenhouse at Walbridge park will cost $25,000 or $30,000, instead of the $12,000 appropriated some time ago. While there is a disposition on the part of the council to save money, the appropriation may be increased because of the pressing need for larger greenhouse quarters for the entire park system.

PROVIDENCE, R. I.—John J. Johnson is being sued for possession of the store and basement that he occupies by the J. B. Barnaby Co. The legal point at issue is as to whether Mr. Johnson is a monthly tenant. He claims that he is a yearly tenant, paying rent in monthly sums, and that his term has still nearly another year to run. There is no question of non-payment of rent on the part of the florist, but the Barnaby company has other plans for the occupation of the premises. The case, having been decided against Mr. Johnson in the district court, now goes to the superior court.

JOS. H. CUNNINGHAM, Delaware, Ohio.

Louisville.

TRADE VERY SATISFACTORY.

Business the past week was very heavy at times and averaged very satisfactorily. The week was the warmest we have had for some time, and one day three or four deaths occurred. Stock in general is averaging fair so far as quantity is concerned. Roses can be had in adequate quantities and the quality and demand are very satisfactory. Not much can be said as yet of the quality of carnations, but they are not missed much owing to the great supply of asters, some of which are excellent in quality and find a satisfactory demand. Lilium album and L. rubrum are still coming in in great quantities and find an occasional demand. Outdoor stock, such as hardy phlox, rudbeckias, etc., is becoming scarce, and will be greatly missed, especially in window decorating. Green goods can be had in good quantities and of fair quality.

NOTES.

The regular monthly meeting of the Kentucky Society of Florists will be held Tuesday night, September 4, place to be announced on cards. Arrangements will be made for the outing next month and members are urged to attend.

The Sunday-closing law has caused several of the local florists to pay small fines. The business done probably justified keeping open.

S. S. Skidelsky of Philadelphia was with us for a day or two as was also G. S. Walters of St. Louis.

The delegates to the S. A. F. convention returned and seemed delighted with their stay.

J. E. Marret has been doing some remodeling. F. L. S.

Albany.

Reinhold W. Zobel, who on April 28 purchased the establishment of John Dingwall, Garbrance Lane, Troy road, has spent several thousand dollars this summer in improvements. The greenhouses have been thoroughly overhauled and are now like new structures. Mr. Zobel has other improvements in mind which he will carry out later.

Under the direction of Superintendent W. S. Egerton the park greenhouses owned by the city are now undergoing extensive repairs and improvements. They will soon be ready to receive the plants for winter. Preparations will be begun shortly to remove some of the accumulation of silt from the edges and bottom of the park lake. R. D.

Newport, R. I.

TRADE GOOD.

Trade in general is good, and great entertainments are expected during horseshow week. This means a large demand for flowers of all kinds, especially gardenias. Hydrangea paniculata is very much admired. This is grown extensively on nearly all the estates.

NOTES.

Among the many dinners given last week Mrs. Stuyvesant Fish's entertainment, musical and dinner was the principal event. The house was entirely decorated by Wadley & Smythe, of New York, with palms, Hydrangea paniculata, oak branches and Asparagus plumosus. The parasol arrangement over each of the nine dinner tables was very pretty and unique. The parasols were covered with Asparagus Sprengeri and pink roses were used for the shower effect. The base of each parasol was decorated with pink roses and Asparagus plumosus and finished the table decoration. On top of each parasol a pretty little willow basket contained a canary bird which sung to the delight of the guests.

V. A. Vanicek has bought 40 acres of land for his constantly increasing nursery stock.

Oscar Schultz is building another house for general stock.

Montreal.

With all the exhibitions going on at present business seems to get little attention. Everybody is competing, judging or attending at exhibitions. The private gardens of the city and those of some of the suburban towns have been judged and prizes awarded. The different exhibitions will follow in due time.

At the last euchre of the Gardeners' and Florists' Club, President Gibb and E. Hayward were the lucky winners. The latter had just returned from a trip to the old country and was heartily welcomed by the boys.

The executive committee of the Horticultural Society has secured the new armory of the Fifth Royal Scots, Bleury street, for their exhibition to be held September 5 and 6.

A. C. Wilshire is adding a new greenhouse, 20x100 feet, to his plant at Bloomfield avenue. It will be heated by a sectional hot water boiler.

J. C. Eddy is off on a two months' trip to the great Canadian west.

Visitors: J. Davis, superintendent of Major Hill park, Ottawa; also Messrs. Rennie, Thorley, Wilson and Gongon, all of the same town. LUCK.

San Francisco.

Last Saturday there arrived in this port 7,000 orchids of nearly every variety. They came from Manila and were collected by Manuel D'Yriarte, a wealthy Filipino, and are in transit to the white house at Washington. The flowers are in crates and when the cold latitudes were reached they had to be transferred from the hold of the vessel to a place near the fireroom. Manuel D'Yriarte, who is contributing this beautiful aggregation of orchids for the white house conservatories, met the Taft party during its recent visit to the far east, and so great was the admiration of those members for his gardens and particularly his orchids that he determined to send to Washington some of the choicest orchids in the Philippines.

Communications received at the University of California by friends of Dr. Hugo de Vries, the eminent botanist of the University of Amsterdam, who recently gave a course of lectures here at the state summer school, state that the professor is preparing an article for publication in defense of Luther Burbank. Professor de Vries is a strong personal friend of Mr. Burbank, and while in California this summer passed several days at Burbank's gardens and experiment station. At that time he spoke highly of the work done by Burbank and stated that he had the greatest admiration for his ability and interest in his work. The article which the professor is preparing in defense of the Santa Rosa wizard is called forth chiefly by recent adverse comments by an English botanist on the work of Burbank. Dr. de Vries is one of the most noted botanical authorities of the present day, and his defense of Burbank is expected to carry great weight.

JESSE WHITE.

Omaha.

The Omaha Florist Club held their annual picnic at Krug's park, August 16. Almost 100 people attended, young and old. A well-arranged lunch was the climax of the day. The park having no bowling alley other amusements were on the programme such as boat riding, switchback, merry-go-round, etc. After late hours all went home happy and contented.

OUTING OF THE OMAHA FLORISTS' CLUB AUGUST 16, 1910.

R. Timmler, the florist of Krug's park, is to be complimented for the way he keeps the park up-to-date, in fact there is nothing better to be seen at Lincoln park, Chicago.

Miss Margaret Torelson, with Hess & Swoboda, has returned after a three-weeks' visit to the Michigan lakes.

L. Henderson is building one new house, 26x150, and rebuilding two houses the same size.

The past 10 days were very hot and life was no dream for those who had to work under glass.

Planting is more or less all done now and some of the florists are cutting young stock.

Geo. Swoboda and wife and L. Henderson attended the Dayton convention.

Peterson Bros. are erecting five new houses 12x50 each, all for carnations.

GRIPPE.

ARAUCARIA EXCELSA.
(Norfolk Island Pine).

Saves Many Times
ITS PRICE.

$2.00

Postpaid to any address.

THE AMERICAN FLORIST COMPANY'S DIRECTORY saves many times its price to every one who catalogues or circularizes the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 476 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, foreign merchants, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

Published annually by the

AMERICAN FLORIST CO.:—

I wish to express my appreciation of THE AMERICAN FLORIST as a trade paper. My sales have far exceeded my most sanguine expectations and of our immense stock only a few thousand remain and they are moving rapidly. We find that nearly every state in the Union has its consignments, with Canada also getting into the procession, many orders being repeated.

W. J. OLDS.

UNION CITY, PA., July 30, 1906.

ALL Nurserymen, Seedsmen and Florists wishing to do business with Europe should send for the

"Horticultural Advertiser"

This is the British Trade Paper, being read weekly by all the Horticultural traders; it is also taken by over 1000 of the best continental houses. Annual subscription to cover cost of postage 75c; Money orders payable at Lowdham, Notts.

THE RETAIL TRADE

THE use of autumn leaves in decorative work has acquired such proportions that some retailers arrange for regular shipments throughout the fall.

Recent Improvements in Retailers Methods.

Paper read by Irwin Bertermann, Indianapolis, Ind., at the Dayton convention of the Society of American Florists August 23, 1906.

In the time of the great Roman, Nero, the methods of arranging and presenting flowers were in keeping with that wonderful period. The Romans understood how to combine flowers with statuary, make wreaths and designs for classic pieces, to furnish sparkling fountains with plants, to use artistic vases, to blend colors and to decorate in a manner the leading florists of this great country are earnestly striving after. To be sure they did not watch or have the details of the present times—paper boxes of various hues, green, pink and white wax paper, pins to match the various flowers, cords, tassels, gauze, mattings and many other accessories were unknown to them, but the beauty and detail of their flower arrangements are a standard which all of us may look to.

A compartment the size of a small room refrigerated by the establishment's plant, with glass shelving on either side and backed by mirrors, is the "proper caper" these days. This enables the store man to take his customers into the box, without disturbing the flowers or causing them to suffer from different temperatures.

The florist's window is now also an all important factor. It has long been recognized as his most efficient advertising medium, but it has only been of late years that expert trimmers were employed and the minutest details carefully observed. The flowers in the window must be arranged so that the colors blend or separate parts of the arrangement must contain a massing of one variety. The florist's window must attract the eye of those passing, and surpass in beauty and artistic value all the windows in the city, for in arrangement and neatness it must be equal to them and the beauty of the contents naturally surpass all others.

The subject of the writer does not permit of a sermon, but this is a most opportune time to impress upon my listeners that so much is sacrificed for commercialism in the present day. Everything is made and arranged according to the ledger account. In this we find our German and French brother far superior. Not only is the commercial side of the florist's business taken into consideration in Europe, but the idealistic side is also well attended to. It is not only necessary to arrange a wreath or basket hurriedly, but it is also necessary to arrange it in an idealistic and artistic manner. I would refer every American retailer to the Bindekunst, a German trade paper. The illustrations therein will easily convince the reader that we are far behind in detail and symbolical work. The Berlin and Parisian florists not only put forth work which earns the dollar, but arrange pieces which signify much more than is found in our ordinary run of baskets, wreaths, pillows, etc.

Great improvement has been noticed in late years in the arrangement of the flower stores. It is essential that the arrangement of the up-to-date flower store be such that it is just a trifle beyond the finest customer who enters, if it is to elicit, particularly from the feminine flower expert, the admiration, respect and last but not least, the patronage. Hampers and baskets, also vases and boxes of flowers are at all times in plain view and furnish suggestions and ideas to any one entering. Often times many of these arrangements go to waste, but they give prestige to the retailer who has energy enough to gain ideas and present them to his customers in a practical manner.

An apology is no longer a necessity in the flower business as it was years ago. Suitable stock can be had at all times, though of course this varies with the season. The store man who takes it for granted that a customer should know without being shown, how to use flowers, is lost. It takes constant arrangement and a lot of new ideas to please the better class of customers. It was but a few years back that all customers looked alike to the clerk as they entered the store room. It is now necessary to grasp the idea of catering to different classes of people. The rich,

the poor, the artistic, those of poor taste, those who want a lot for their money, those who want only the best, arranged in the most artistic manner, those who want certain color combinations, these qualities must all be grasped at a glance by the clerk, or he will lose many a customer who would have been well satisfied had the clerk been a better judge of human nature. The clerk no longer presents his wares in the timid way of years gone by; he knows the value of his stock and is not to be bluffed by any customer, but stands firmly by any position he may take.

Advantage is now taken of the peculiarities of each plant; a ribbon bow or cord placed in the proper manner and to the advantage of the plant, a pot cover in perfect harmony, a bit of moss or a little foliage, enhances the value from 10 to 50 per cent. It is the neat and natty plant or flower that attracts and sells quicker and at a better figure than a more expensive plant carelessly arranged.

One of the most recent improvements the retailer has is the great net work of interurban systems which are being built throughout the country. This is particularly true of my own state, Indiana. The close proximity of the greenhouse and the store, due to the electric lines, makes it possible for the retailer to have fresh stock at all times. There is no longer room for old stock as this is many times due to carelessness in ordering. It only takes a telephone call and fresh stock will be on hand in a few hours, whereas in years gone by large amounts had to be ordered at one time.

As we all know the day of the stereotype flower piece is a thing of the past. The florist now confines his funeral work almost entirely to baskets, bunches, wreaths and blankets. The view is now taken by those who are accustomed to buying flowers that offerings are sent to lighten the suffering of the bereaved, not to make it look more funereal like. As many colors are used as may be consistent with good taste.

The general public now appreciates the various flower seasons. They understand that chrysanthemums are not to be had in March, or Alpine violets in July. They look for the store man to have select, seasonable stock on hand at all times. It is possible for him to keep things moving lively almost the entire year. The dull summer season is not nearly what it used to be, and the energetic tradesman can make much of it by handling and arranging the choicest seasonable stock. Seasonable novelties are now always sought for in the flower shops. Small turkeys, ducks, and various novelties must be on hand at Thanksgiving. Chimes, bells, wreaths, etc., must be on hand for Christmas and so on for every festive period. The public has learned to know that the flower shop is the proper place to obtain novelties which are not to be had elsewhere.

Flowers are no longer offered in receptacles which were formerly supposed to heighten the beauty of the contents by contrast with their shabbiness. The grower now affords good glass vases and his swell brother, the retailer, finer articles, not excluding cut-glass, or precious metals.

The growth of the retailer has been such that the modus operandi is patterned after the larger department stores and matters are systemized so that, for instance, an employe who supposedly does nothing but wait on customers, does not hide the broom or emerge from the cellar looking as if he had been in an encounter with the coal pile or moss bin.

The use of the telephone, long distance and local, in offering flowers is increasing in enlightenment of the public in regard to them. A fair estimate of the amount sold in this manner is 40 per cent of the gross sales, so the importance of having the 'phone answered in a proper manner is readily seen. The brainiest, shrewdest, best informed and most resourceful man in the establishment is now employed to answer the telephone. The fisherman at the 'phone must offer the most tempting bait, play with the game, hook the fish, reel it in and place it securely in the net before his work is accomplished. In many instances two or three telephones are placed in one store so that the impatient customer may not turn to a competitor.

The art, and it is one, of arranging boxes of select long stemmed flowers, skillfully finished with violets, mignonette, pansies, and lily of the valley has now reached the point where to the uninitiated "Excelsior" need no longer be proclaimed. It is here where proof of skill and discernment of color and deftness in arrangement are most apparent Often times choice boxes are lined with silk and the exterior ornamented with bows of ribbon or bunches of violets, lily of the valley and roses, softened with sprays of maidenhair ferns and Farleyense ferns. This perfection in the make-up of cut flower boxes is one we flowers, like the American Beauty, gained prominence with us—the Americans.

The Street Flower Merchant.

In glancing over your paper of August 11, my eye was caught by the discussion on the curb stone fakir. It is refreshing to read something from a retailer who has ideas beyond the potting bench. I refer to Mr. Blackistone, who takes sensible, economic and scientific views. Catering to the satisfaction of human wants, the jewelry trade having a history since the days of Cleopatra, one does not read of reputable jewelers making a noise about the sellers of snide jewelry. Cheap jewelry and cheap flowers appeal to those of limited means and short mental range and their wants are met by the shortest cut, brought to their notice on the streets. The knights of the curb can carry on their business on a mere handful of circulating capital, while the kings of the big shops are tied up to an immense fixed capital and a tidy sum of circulating capital must be held in readiness to conduct the business.

MICHAEL SULLIVAN.

A New York Dinner Decoration.

Wadley & Smythe arranged most of the decorations at the large dinner and musicale of Mrs. O. H. P. Belmont at Newport, R. I., last Saturday evening. The dinner was served in the spacious coach house at Belcourt, the business nature of the building being concealed by the decorations. A corner of the garden of Versailles was reproduced. Trellised niches about the building were covered with vines which partially hid pieces of statuary. In front of the niches were beds of flowers giving the appearance of a formal garden. The inside walls at each end of the building were completely covered with English ivy, and at intervals were disposed panels of flowers and fruit, yellow and white.

A huge fountain occupied the center of the room and immense vases of fruited orange trees were arranged at suitable points. Green vines paneled the ceiling and through the vines electric light bulbs were artistically grouped. There were eight tables, the two principal ones decorated entirely with white flowers, and the remainder with flowering vines and baskets of Killarney

STORE OF THE GEO. WITTBOLD CO., CHICAGO.

roses. In the Gothic room of the mansion, where the musicale was held, the decorations were confined to vases of American Beauty roses.

The Birthday Bouquet.

Every hustling retail florist ought to use his energy and push the "birthday bouquet"—help make it a fad. Just think of how many more flowers would be sold the year round in every large city if it became a more general custom. Take for instance St. Louis with 700,000 population. Out of that number about 400,000 would be eligible to receive a birthday bouquet. Suppose that 50,000 would buy only $1 worth (which would be the smallest amount) there would be spent $50,000 a year more for flowers in St. Louis and every florist would be greatly benefited thereby.

It's up to the hustling retail florist to develop every branch of the business to its utmost and this is surely a big field to work in. Why are so many flowers bought for the dead? It has become a custom. So let it be with the birthday bouquet. Its promotion would make two hearts happy, the one who receives the flowers and the good old florist that sells them.

VINCENT J. GORLY.

An Elaborate Cluster.

This rather gigantic arrangement, standing something over six feet in height, is an appropriate funeral offering for a body of men who have raised quite a sum of money for the purpose. It was composed of long stemmed American Beauty roses at the top and sides, then auratum lilies in front of which were laid Kaiserin roses. At the foot, the spikes projecting the other way were white gladioli. In the center or as it appeared where the cluster was fastened together, were cattleyas and lily of the valley, the bow being of wide orchid ribbon. The whole was built up on an easel with cycas leaves as a background. Such a piece is very showy as every individual flower stands out and all are seen at once, thus affording the best possible effect. Such a design should readily command from $50 up, according to the season. K.

AN ELABORATE CLUSTER.

Canadian Horticultural Association.

The ninth annual convention of the Canadian Horticultural Association was held at the Ontario Agricultural College, August 29 and 30. There was an attendance of some 50 for the opening session, later trains swelling it to 100. The first session opened with an address of welcome by Prof. Reynolds, who took the place of President Creelman, detained by family bereavement. He stated that the work of the Ontario Agricultural College was similar in many respects to that of the Canadian Horticultural Association. Both led to the beautifying of the homes, and the home life. He referred particularly to the work in horticulture and floriculture in Guelph, and asked the florists assembled to call upon the college at any time for aid. In conclusion, the professor granted the delegates the freedom of the institution.

President Fendley in his address expressed the feeling that every delegate should make himself at home, and be benefited by the convention. The florists' trade was only in its infancy in Canada, and would be furthered greatly by close attention to the discussions. Florists should be taught to fill every available space around their premises, and the public would take notice. The trade should have a telegraph code, and should be able to get the standing of every florist in the business, so that goods will not have to be sent C. O. D. where the orders come from dealers unknown to the florist.

The report of Secretary Ewing showed that there were 81 members in good standing. Out of these, 45 were resident in or near Montreal, 12 Toronto, and 24 from other places from Manitoba to Nova Scotia. The large number from Montreal is due to the fact that the convention was held in that city last year. This is the first time that the convention has been held in a small city, and it was a good move because the smaller city requires the benefits the convention imparts more than the larger ones where the trade is wealthier. The aim of the association was to lift up and carry forward all that tends to advance the interests of horticulture.

The report of Treasurer Simmers showed a balance on hand of $92.91. A question that evoked much discussion was "How many stock plants should one keep to produce 4,000 geraniums, by the end of May?" The general opinion was that the question could not be answered satisfactorily, because some varieties propagate more readily than others. E. I. Mepsted said that about 150 plants would be required, and in some conditions less. Thos. Manton said there were plants in the vicinity of Hamilton that would give that amount from 75 to 80.

The trade exhibition in connection with the convention was not large, but creditable. Some excellent specimens of plants and cut oflwers were shown. E. I. Mepsted, G. A. Robinson and Thos. Manton acted as judges. Certificates of merit were awarded to A. Gilchrist, Toronto, specimen of Nephrolepsis Whitmani; R. Brooks, Fergus, double tuberous begonia; J. Campbell, Simcoe, new gladiolus Peace. Diplomas were awarded Wm. Colvin, Galt, for

gladioli; Wm. Gammage, London, for collection of foliage plants.

At the evening session Prof. Harcourt gave an interesting talk concerning the nature and purpose of fertilizers, and the action of certain elements on certain soils. It was largely a matter of observation and experience on their part to adapt the different commercial fertilizers to make up the necessary constituents needed in their respective soils to produce the kind of growth and plant wanted. John Morgan, Hamilton, spoke of his methods of growing carnations. He used lime to prevent root rot. Other florists said they had not had much success with lime.

At Thursday morning's session London was chosen as the next place of meeting. J. H. Dunlop, Toronto, discussed development of roses for decorative purposes, and their special requirements. Dr. Bethune took Mr. Jarvis' place and talked on greenhouse insect pests, illustrated with natural and preserved specimens of plants and insects. Both papers were thoroughly discussed.

At Thursday afternoon's session Geo. Vair gave a paper on conifers, showing how the evergreens and other cone-bearing plants could be used for decorative purposes. Prof. Hutt told of the horticultural department and experimental work at the college, and then conducted the party on a tour of the college buildings and grounds.

At 5:30 an "at home" was held on the grounds near the gymnasium, and a very interesting group it was. After partaking of sandwiches and a cup of coffee, daintily served by Miss Hardie, assisted by a number of obliging young ladies, while McLaren's orchestra furnished music, J. H. Dunlop, Toronto, on behalf of the association, paid a compliment for their reception and the co-operation they had received from the horticulturists in Guelph and the college, and called on E. Shuttleworth, of Guelph. Mr. Shuttleworth said he was pleased to be with the association at this meeting. He drew attention to the fact that Guelph was an inland town, and that the horticultural society here could not be expected to make the same progress as in larger cities.

Principal Young congratulated the association on its representative meeting of members from Winnipeg to Nova Scotia, and interested gentlemen from the country to the south. No better place could have been chosen for the meeting. He briefly referred to the work done by the society here, and more especially to that of the schools in horticulture, which had been taken up three years ago. The success of the step was a great surprise to all, in the interest the pupils took in raising plants provided them. The work was of an educative character and of great benefit to the children.

P. H. Moore, of St. George's school, said he took a deep interest in wild flowers, and strongly advocated the importance of their protection. He had seen children gathering them in the basketful, and destroying them. They should be allowed to grow and reproduce, as they are becoming less numerous.

Wm. Gammage referred to the growth of the association and its efficiency, after which he presented the retiring president and his lady with a cut glass tea service, which was suitably acknowledged.

Archie Gilchrist made a happy speech, tracing his connection in the working of the Guelph society, what it had done and evidently is doing. He told of some laughable incidents while he was a resident.

H. Simmers gallantly replied to the vote of thanks to the ladies, which was sung with "For They Are Jolly Good Fellows," and all the other honors.

In the evening W. C. Hall gave a practical address, giving a number of pointers to the retail trade on the manner of dressing up their stores, keeping up and displaying their stock and conducting their business.

Officers for the ensuing year were elected as follows: W. J. Lawrence, president; J. Walsh, first vice-president; G. Dale, second vice-president; H. Simmers, treasurer; A. H. Ewing, secretary.

W. J. Lawrence.

President-elect Canadian Horticulural Assoc.

A matter discussed by the convention was the visit of the American Carnation Society to Toronto next January. It was the first time they had visited Canada for 20 years. The convention decided to donate a trophy for competition in some special class at the Toronto meeting. The value will be $50.

A committee was appointed to consider what aid the Ontario Agricultural College could give the florists, and resolutions of thanks were passed. The greater number of the party went down Friday morning to visit the Dale greenhouses at Brampton.

The florists were much pleased with the success of their meeting, and the welcome given them by Prof. Hutt and others of the staff. They were especially grateful to Mr. Hunt of the horticultural department, for his indefatigable work in making the arrangements for the convention, and in looking after the details which made the visit to Guelph such a success.

THE TRIP TO BRAMPTON.

After leaving Guelph the majority of the members visited Brampton on the invitation of Manager Duggan of the Dale estate, and while in the city visited the establishments of W. Fendley and R. Jennings. At the Dale estate everything was noticed to be in tip-top order. The roses, a specialty with this establishment, were looking extremely well. The Canadian Queen, one of the firm's own productions, gives promise of good quality blooms in large quantities, In the lily of the valley forcing house there were thousands of pips planted, many of which were coming into flower, and when it is known that there are 1,225,000 pips purchased each year by this firm, an idea can be had of the vast business in this specialty alone which is done by the firm. The orchids were looking exceedingly well; many of them are in bloom, but as there are 2,000 plants, it would be difficult to dispose of the entire cut at one time, and some are brought in at different seasons. In the chrysanthemum houses some of the earlier varieties are already showing color. There are 90,000 plants which will last until after Christmas. Four new houses 25x80 feet and three 25x 150 feet have been added this year.

Mr. Jennings' carnations, of which there are none better grown in Canada, were found to be in the best of order. Enchantress and Lawson, in the white, and some variegated varieties, are being cut in quantities, and from the general appearance of the place indicate a continuous crop for the season. A new range has been erected for violets, the plants of which were placed in solid beds. Buds are showing and it will only be a few weeks before flowers will be ready for cutting.

At Mr. Fendley's violets predominate and the plants are looking unusually healthy and give great promise. Carnations look well and the other miscellaneous stock around the establishment is all in good shape.

H. G. D.

THOSE PRESENT.

Among those in attendance or represented were the following:

D. MacRorie, South Orange, N. J.; R. Brooks, Fergus, Ont.; Fred Clark, Bracondale, Ont.; H. A. Bunyard, New York; S. Foster, Hamilton; R. King, Toronto; G. C. Arnott, Toronto; Albert Houle, Toronto; D. J. Sinclair, Toronto; D. Dunbar, Arthur, Ont.; A. G. Steven, London, Ont.; F. Dicks, London, Ont.; Adam Dunn, Galt; W. Muston, Davisville, Ont.; J. Gilchrist, Guelph; J. Dickenson, Woodstock; Geo. Douglas, Davisville, Ont.; Ernest Collins, Toronto; C. C. Fraser, Moncton, N. B.; Geo. Vair, Toronto; T. McVittie, Wychwood Park, Ont.; David McLeod, Hamilton; A. W. Annandale, Toronto; Jas. A. Fraser, Prescott, Ont.; E. Dale, Brampton, Ont.; G. Manton, Eglington, Ont.; Thos. Manton, Eglington, Ont.; W. J. Lawrence, Eglington, Ont.; J. Campbell, Simcoe, Ont.; J. Walsh, Montreal; G. Trussell, Montreal; Camille Legare, Montreal; G. A. Robinson, Outremont, Que.; Mrs. G. A. Robinson, Outremont, Que.; J. Bennett, Lachine, Que.; W. Williams, St. Anne de Bellevue, Que.; R. Burrows, St. Anne de Bellevue, Que.; G. Hopton, Montreal, Que.; Mrs. G. Hopton, Montreal; A. C. Wilshire, Montreal; D. Flett, Mt. Forest, Ont.; C. Nisbet, Davisville, Ont.; J. Morgan, Hamilton; W. Taylor, Barrie, Ont.; John E. Riggall, Toronto; A. Gilchrist, Toronto Junc.; Blackie Bros., Halifax; W. Iler, Berlin, Ont.; W. Hunt, Guelph; H. Simmers, Toronto; W. Fendley, Brampton, Ont.; L. Williamson, Ottawa; J. Cranston and son, Hamilton; J. H. Dunlop, Toronto; W Gammage, London; E I. Mepsted, Ottawa; T. Lawson, Hamilton; W. Hall, Montreal; W. Jay, Toronto; R. Ellis, Leamington, Ont.; W. Wilshire, Toronto; H. E. Philpot, Winnipeg; W. Kehoe, Ottawa; A. H. Ewing, Woodstock, Ont.

W. J. Lawrence.

W. J. Lawrence, the newly elected President of the Canadian Horticultural Society, was born in Toronto, in 1866, and has had a life long experience in all things pertaining to horticulture. Commencing when 14 years of age as an apprentice at "Chestnut Park," the residence of the late Sir D. L. Macpherson, serving five years under George Vair, he then went to Hamilton and was with F. G. Foster for two years. Returning to Toronto he took charge of the store business of the James Fleming estate, and then was some time with Granger Bros., and afterwards was with John H. Dunlop for about four years.

Mr. Lawrence commenced for himself in 1898 and by his ability, energy and push has built up a large business. His property is situated on Kensington avenue, North Toronto, and comprises about 60,000 feet of glass, all of up-to-date King construction, besides several acres of grounds, the soil and situation being admirably adapted for the cultivation of roses, carnations, etc.

Mr. Lawrence by his integrity and kind and genial manner has made many friends; he is a councillor for the town of North Toronto and chairman of the water and light committee. He is also well known as a vocalist, being a very popular singer. His portrait herewith is reproduced from a photo taken six years ago. H. G. D.

THE CARNATION.

Seasonable Notes.

The carnations in the houses should be thoroughly established by this time and are now making growth and of course need very careful attention, specially in the matter of watering which must be attended to in a most thorough manner. As soon as the plants have taken good hold of the soil it is beneficial in more ways than one to give them a light mulching of mushroom manure or some other light top dressing. It contains very little nourishment but is ideal for keeping the surface of the soil in the benches loose, and preventing it from drying up so quickly, as well as saves considerable time in watering. If the shade has not already been removed from the houses that should be attended to at once. From now on the plants need all the sunshine they can possibly get, as well as air. Give all the air possible in the houses night and day if the weather permits, but care should be taken to keep the end doors on the houses closed to avoid draft or the result will eventually be a good dose of red spider.

The indoor grown stock should be well advanced and beginning to throw up good flowering stems and should be pinched back no more. Keep them closely disbudded as they need it and above all keep them well tied up, as many a good crop of flowers has been compelled to grade as second and third rate on account of not having been properly tied up in time.

There are various ways of tying up carnations and it is hard to state which is the best, all points considered, as several of them have their merits. Amongst them are one or two new ones exhibited at the Dayton convention that appeared to have all the earmarks of good carnation supports, but it is safe to say that the majority of the carnations in the country are tied up with ordinary wire and strings, running the wire lengthwise and tying with strings crosswise over the benches, allowing two strnigs to each row of plants. If this method is kept up from the start, it is as good as any, in fact it has the advantage over the rings and stakes in that it allows the plants more space and at the same time leaves as much space between the rows on the benches. We use No. 18 wire for the outside rows and No. 22 for the rest of the bench and at the end of the season we only retain the outside wires, as we find it cheaper to cut the other wires in a few places and throw it out with the plants than to try to roll it up and save for another season. The wires are kept in place by uprights nailed on the inside of the bench about every 10 or 12 feet, using lumber 1 x 1½ inches and the same material across the bench.

Fumigate regularly no matter whether green fly is seen or not. One ounce of preventative is better than a pound of cure. It is better to get ahead of the pest in the house than to let it get ahead of you. J.

Carnation Comment.

As lifting and transplanting to the houses proceeds, it develops that field losses in carnations will not be so heavy as was anticipated 10 days ago. In places where the subsoil was hard and heavy the plants rotted off at the roots, but where the substrata was sandy, little damage has been done. It is also noticeable that the fields that had been well cultivated and hoed through the earlier part of the season came out the best. I am convinced from this year's experience, that if there was more care and attention given the carnations in the field we would hear less of stem rot and other diseases in the houses. For some varieties, notably Lawson, I believe in planting from 3-inch pots to the benches in May or June, but other varieties do better in the field, and growers should not be afraid that they will ever cultivate or hoe them too often. It pays to go through them every week. This may not be news, but please remember that eternal vigilance is the price of good flowers.

I note that one of the all-wise writers on carnations advises that they be dropped, as summer flowers. I emphatically disagree with that proposition. "Good carnations always sell," say the retailers. But good summer carnations cannot be had by planting out the tailings of stock, for that purpose. Plants for summer blooming should be propagated the latter part of November or early in December, carried on to 3-inch or 3½-inch pots, and planted out by the first of April, at least in those parts of the country south and west of Philadelphia. Such plants will stand a heavy white frost, and thrive

on it, if they are kept cool in the house.

I have this year noted that the Enchantress, if properly handled, will make an ideal summer carnation, and now that most growers have a reasonably large stock of it on hand, I have no doubt that it will be more generally tried for that purpose, for as an all around carnation Enchantress "has them all beat a mile."

SPECIALIST.

Commercial Carnations.

Paper read by John Morgan, of Hamilton, Ont., at the annual convention of the Canadian Horticultural Association, at Guelph, August 29-30, 1906.

Commercial carnations and their culture is a subject that has been dealt with a great deal by the different trade papers, and what I have to say may possibly be a repetition of what you have already read, but most of the papers on this subject have been chiefly for the benefit of the large grower, and my remarks are intended chiefly for the small grower. I, myself, am a small grower and can only give you my experienec as such.

One of the greatest mistakes a small grower makes is in attempting to grow too many varieties; seven or eight varieties are ample for the average florist. It is well known that different varieties require different treatment, and the fewer varieties you bother with the better, providing you have a range of color. Find out which varieties you can grow best and then stick to them until you are positive there is something better. I do not mean never to try any new variety; by all means try a few of one or two new varieties each year, but do not spend all your profits in buying new varieties, for instead of getting a gold mine, which one would almost expect to get from the description, in most cases you get what is commonly known as a gold brick. The outside or description is very glittering, but the article itself is a fraud and imposition.

The list of varieties I have found most profitable are: In light pink, Enchantress and Fair Maid. In dark pink, Mrs. Lawson, although some growers are superseding this with Nelson Fisher; but so far, this variety has not proved as profitable with me as Lawson. In scarlet, Estelle is still the best with me; Red Lawson is a good one to grow, but cannot be called a scarlet, and the color is objected to by some. In crimson, Harlowarden is the only one I have found worth growing. In white, White Lawson, Queen and Boston Market have proved themselves the best. Lady Bountiful is a nice white, but I do not think it will give as good returns as the others mentioned. I might mention that Boston Market is the best keeping carnation in commerce, and is also one of the best perfumed. The yellow and variegated classes I do not grow, as I am convinced that to be profitable you need to get a fancy price and I notice that the large growers are not growing so many of the fancy varieties, as they used to, but are planting more largely of the varieties I have mentioned.

In regard to culture, I believe in propagating early, say in November, for at this time you will have a finer lot of cuttings than at any other time during the season. When your cuttings are rooted, put them in pots or flats, whichever is most convenient, and grow in a low temperature, that is in a violet temperature, and they will be fine strong plants when the time comes for planting out in the field. It is needless for me to say to keep the plants free from weeds, and to keep them well cultivated. August, I find, is the best month for planting in the houses; I have planted in July, but the plants seem to get stunted with the heat. In August, the nights are longer, and the plants recover much more quickly. I notice one of the largest growers in Chicago has given up planting in July. Do not open the ventilators very wide for two or three days after planting, but syringe every few hours, and your plants will soon go ahead; then give all the air possible, and only syringe to keep down red spider. Do not syringe just for the sake of seeing the water fly, for I am convinced the less carnations are syringed during the fall and winter months the less disease there will be.

Crimson Fountain Grass.—Fig. 1.

One of the principal things in growing good carnations is to give plenty of fresh air during the winter months; do not nail the ventilators down, as I know one florist did, for that poor fellow is out of the business now, but try and open the ventilators every day, even only if for an hour at noon. During the season of heavy firing, the plants are apt to get soft and subject to disease, but fresh air will keep the plants hardy and in good health, and it will be found that the bloom will keep much longer than if grown in a stuffy atmosphere.

Carnations, like other plants, are subject to various diseases, and one of the most dreaded is stem rot; the starting point of this, I believe, is the propagating bed. I bought two batches of rooted cuttings, which anyone could see had been left in the sand too long, the bark being quite soft, and as I expected, they had a good dose of stem rot. They died off in the field, and also on the benches, after planting, but after giving them three heavy applications of air-slacked lime, the disease was entirely stopped, so if troubled with stem rot, try the lime cure, and I do not think you will be disappointed.

Now a few words regarding the bloom. Don't let the flower fully develop before cutting; you may have to sacrific size some, but the public will get more benefit from them. People are beginning to tire of buying sleepy carnations, and will buy other flowers instead, unless we give them blooms that will last at least three or four days.

CHRYSANTHEMUMS

Cultural Notes.

Although the chrysanthemum is an easily grown plant yet the growing season is short for the amount of work that has to be done, and it is highly important that all cultural details be carried out in proper season. This is the crux of the whole matter, for there is nothing really difficult or requiring exceptional skill from first to last. The plant is an omnivorous feeder, and now that the roots have taken a thorough hold of the soil frequent applications of manure water should be given, always when the soil is moist and preferably in dull rather than very bright weather. Care is needed in applying it to keep it off the leaves or these will be ruined in appearance and the value of the flowers reduced.

Should there be any beds or parts of beds in which the plants are not well rooted no liquid manure should be given and clear water must be sparingly applied, the roots to get well on the dry side before watering and then giving only just enough to well moisten them. Overhead watering should now be discontinued in the afternoon and only sufficient given in the morning to keep insects in check. Where aphides are troublesome an insecticide should be used, one pound of soft soap and two quarts of tobacco water to 20 gallons of clear water being a cheap and effective home-made article. Many of the proprietary insecticides are good, used according to the makers' instructions.

Taking the bud as it is termed by growers consists of removing the shoots from around the crown bed that appears in August and September. Among the light colored and white varieties this bud has usually a stiffer footstalk than that of the terminal and unless too early for the purpose this bud should be selected. In the darker crimson and purple shades the terminal bud usually produces flowers of higher color, and on this account is preferred by some growers.

It is important that if the crown bud is chosen it be taken early, before the surrounding shoots have robbed it of nutriment. In the natural course this bud is starved by the development of these side shoots and to attempt to save it after these have attained an inch or two in length usually ends in disaster. When the plants are run on to terminals these too must be disbudded early to obtain good single flowers. Sprays formed by leaving all the buds are not finding as much favor as formerly in the markets.

The support of the plants must be regularly attended to, and after the buds are formed it is well to place a few up-

right stakes among the plants. Birds often do a great amount of mischief by alighting on the buds and having something stouter to cling to prevents this.

Plants that were plunged in their flowering pots will now need to be shifted and stood farther apart unless ample room was allowed at first. If they stand and root through the bottom they are bound to suffer badly when moved. A neat central stake and the side branches loosely tied to this is all the support these need, and it must be done at once so that the foliage as it develops hides the stake.

These plants being now well rooted must have abundance of water and frequent applications of liquid manure up to the time the flowers show color. Otherwise the lower foliage will suffer, turning yellow and falling prematurely; the flowers also will be deficient in size and substance.

The Crimson Fountain Grass.

One of the most interesting things of the season, with us, has been the trial of a packet of the seed of the so-called Pennisetum macrophyllimo atrosanguineum (crimson fountain grass). This is said to be native to New Guinea, while the well known purple fountain grass, P. Ruppellii, comes from Alupsinia. For several years we have been propagating this crimson fountain grass by division, never having been able to get seed that would germinate. This year, however, the seed, which we bought germinated to the extent of about 25 per cent. Among the seedlings are at least six well defined varieties, and three of these seem worthy of perpetuation. Some of the forms are as shown in Fig. 1, which is practically the same as the form we have had for two years or more. Figure 2, it will be observed, differs very widely and more nearly approaches P. Ruppellii.

There are still narrower leaved forms than this. Indeed the majority are anything but large leaved. They are not on that account less beautiful, but, on the contrary, they are, to my taste, much more graceful and effective. The variation in color is as remarkable as the variation in form—the deepest toned ones closely matching Black Beauty canna, while some are plain green. The plumes do not differ essentially in color, so far, from those of P. Ruppellii, nor in form either; except that the inflorescence seems to become bolder as the leaves increase in width. Were this the only experience with this new plant, we should be inclined to believe that it is only a variation or mutant from P. Ruppellii. Perhaps some of the people who have been instrumental in putting it before the public, can tell us more about it.

Whatever its origin or botanical relationship may be, the thing itself is certainly a most desirable addition to our list of ornamental grasses and lends itself kindly, as a border for cannas or other tall growing plants, when a color scheme is to be carried out. The photos herewith reproduced are from plants from seed sown February 1, 1906.

OLYPHANT, PA.—E. J. Hull is erecting a new greenhouse at the rear of his home.

THE ROSE.

Summer Roses.

As I write this article there stands beside me two vases of roses, one of Killarney, the other Richmond. They are full bloom and one could not wish to behold anything prettier in the rose line than either of these roses. As I predicted last winter that these two roses gave great promise, I find they have proved their worth beyond my expectations. Richmond is, of course, rather single; too much so for an ideal summer rose, unless it is grown in a cool climate, but Killarney, although as single as Richmond, is better adapted for growing as a summer rose, and young stock planted early for summer bloom, gives some very fine midsummer flowers. The second year after Killarney is shifted from raised benches to solid beds it does equally as well, but is perhaps a little later in producing long stems.

I am inclined to believe that some of the somewhat single varieties are growing in favor, and as I look at two such varieties, namely, Richmond and Killarney, near me, one a beautiful, velvety red holding onto its color to the last, and the other a delicately shaded pink, both so fragrant, I wonder if any one could wish for anything more gorgeous in roses.

But the general demand seems to be for the more compact formed buds such as Bride, Perle or Kaiserin, and until our friends, the store men, can educate the rose-loving public to the fact that some of our most beautiful roses are the semi-double varieties, we will have to pin our faith to the full-petaled sorts.

As an ideal white summer rose Kaiserin has proved indeed a queen and in my estimation leaves nothing to be desired. It is prolific, fragrant, a good keeper, and a ready seller, and it is as much better than the Bride in the summer as the Bride is ahead of the former in the winter. One rarely sees good Kaiserin after December 1, unless grown in the southern states.

But we cannot grow white alone for summer so Carnot fills the bill for a very light pink variety and is a prime favorite. Like Kaiserin, this is truly a summer rose. For a deeper pink we have Wellesley. Much like the old La France, but much better and from what I have seen and can learn this rose is an exceptionally fine summer variety and when it becomes better known it will perhaps supersede some of the older pink varieties. For winter forcing it is one rather difficult to handle, but it is expecting a great deal to have a fine summer rose to do equally well in winter.

Next year, from all accounts, there will be several new roses of merit to receive a trying out, and I trust we may find them even more desirable than their predecessors, but right here I must say they have got to be good ones to make those we now have to select from take a back seat. But who knows?

By the way, you will find that Richmond and Killarney are great feeders and consequently the soil is rapidly filled with roots, so have a care how these two varieties are cultivated. Look out for surface roots and cultivate accordingly.

As the days grow shorter and as they will soon become cooler, syringing once a day will be sufficient, but if the temperature at noon reaches well up in the nineties, a very fine spraying overhead will brace up the plants wonderfully, but just enough so the plants will be thoroughly dried by sundown, for the evenings are somewhat cooler even now and we must guard against black spot. It usually appears at the time when it is hardly cool enough to start the fires. Varieties such as American Beauty, Liberty and Richmond will require especial care as regards watering

CRIMSON FOUNTAIN GRASS.—Fig. 2.

and should not have the soil under them on the wet side at night, or their surroundings too damp.

Ventilating will from now on take some of our time, and when the night temperature drops as low as 70° the sashes can be lowered down to a crack a few inches in width, raising them very early mornings.

OUT DOOR EXHIBIT OF NATHAN SMITH & SON, ADRIAN, MICH., AT DAYTON.
Showing bed of Canna Oscoda.

The old plants being carried over should now be breaking freely and it is still rather early to let only the best blooms be cut. The short stemmed flowers should be kept cut back to firm eyes and if the Golden Gate and Ivory have too much brush or twiggy growth now is the time to begin to prune it out while they are growing vigorously. I would suggest pruning a little every month or three weeks on them, rather than to take off too much wood at one time.

It would not be a bad idea to make doubly sure that the boilers and piping are in working order, for at this season one may have a rather cool, rainy day when a fire can be started and a pipe turned on for sulphuring purposes if only for an hour; this does far more good than five times the amount of sulphur applied with blower. I may be rather early in referring to cool weather while it is yet very warm, at the same time to treat the subject universally one should assuredly be on the safe side by September 1. E.

LONG BRANCH, N. J.—G. J. Nordell has retired from business and relinquished control of the houses and gardens established in Belmont avenue by his father in 1868.

LEXINGTON, KY.—D. B. Honaker has the management of the plant and flower display that will be given at the Blue Grass fair. The sum of $200 was set aside for the largest and best collection of palms and decorative plants; a like sum for the largest and best collection of cut flowers; and $60 for the best floral design made from natural flowers. It has been decided that the entire lower part of the Floral hall will be devoted to this exhibit.

PALMS AND FERNS.

Seasonable Notes.

During the period of rapid growth that is covered by the months of July, August and September, these plants soon become crowded and are quite liable to grow out of shape or to become one-sided. This condition is especially noted in the outside rows of the plants, where they naturally turn toward the light, and unless the benches are rearranged from time to time there will soon be a number of crooked plants that cannot be sold for first class stock.

It is but the work of a few minutes to swing around the outside row of plants on a bench or bed, and thus to encourage them to pull up into an erect and shapely growth again, though it is still better to set over the entire lot on the bench, and to grade them into their various sizes, so that there will be little time lost in selection of plants when the busy season opens. This operation also gives an opportunity for the removal of all weeds and rubbish from among the plants, besides disclosing any dirty plants or leaves that may have been hidden from a cursory view of the whole, and altogether will prove to be time well spent Of course these trifling details of culture will be looked after by the man in charge of the house if he really manifests any interest in his work, but at the same time it sometimes becomes necessary to offer some such reminders as these "lest we forget."

The warm days and humid nights make the palms grow very rapidly, but also make free ventilation very much needed, and unless fresh air in abundance is supplied the growth of the plants soon becomes thin and spindly, the final result being a lot of ill-balanced plants that are only of use as fillers in a lot of made-up stock.

There is little danger of hurting the ordinary commercial species of palms by hard syringing with a hose, though plants in small pots are sometimes knocked over by the force of the stream, but vigorous work with the hose at this season while the plants can assimilate a large supply of water, will do much to keep down the ever-ready crop of destructive insects.

Seedling palms also push along with the heat and moisture so bountifully supplied by nature, and as this young stock gets in condition to be handled it should be potted off and carefully watered until the disturbed root system has taken a fresh hold, it being sometimes best to cover these young plants with papers for a few days if the weather should prove very windy and dry, but unless such conditions do prevail, the ordinary shading on the roof of the house will be quite enough.

The raising of palms from seed does not by any means imply a succession of quick money crops, for this young stock is liable to be on hand for quite a length of time before it becomes saleable, and in addition to this there is always more or less loss from imperfect seeds. From which it will be readily understood that it becomes necessary to give the seedlings proper care if there is to be much profit from the work.

After the seedlings are established in

the small pots much less shading will be required, and by the middle of October little or none will be needed. The first few days after potting most of the palm seedlings will be benefited by a light spraying overhead two or three times a day during bright weather, but this should not be heavy enough to make the soil sodden.

A recent potting of Latania Borbonica has given between 96 and 97 per cent of seedlings from the batch of seed, and such a percentage is not at all unusual for this palm, provided the seed has been ripe and fresh, but cocos and kentias seldom approach such a percentage of germination as this.

The dwarf Phœnix Rœbelenii is evidently coming into the market in much larger quantity than in former years, both plants and seeds being offered more freely than formerly, and when this palm can be sold at a somewhat lower price, it seems quite probable that it may prove useful. It is a very pretty little palm with quite enduring foliage and graceful form, but in common with most of the members of this genus is rather slow in growth while young. The handsomest of the phœnix family is undoubtedly P. rupicola, but this is far too slow to be a profitable trade palm, and in consequence has been almost entirely dropped by the majority of the trade growers.

In the fern house it will be found that some of the early stock is quite ready for shifting into 3-inch pots in preparation for filling ferneries during the early winter, and while it is not best to repot this stock too early, yet it will not pay to get it long and starved in the 2-inch pots. Ferns for table ferneries should be short and stocky, and well furnished, and as they progress quite rapidly when put into the larger pots, one must do this work in accordance with the time the demand opens, and also run them in such successive lots as the market seems to warrant.

A fumigation with nicotine occasionally will do much to keep them free from thrips, and will do the ferns no harm unless very carelessly applied. The small brown scale and its white progeny that are so frequently found on nephrolepis spread very rapidly at this season and require a careful watch on the part of the grower, the result of an attack from these insects being found in a series of yellow spots that soon become visible on the upper sides of the affected leaves. As these injured leaves will not regain their former color, it is useless to try to save them, the best treatment being to cut out and burn all such affected fronds, after which the spread of the insects on other parts of the plants may be checked by frequent syringings with extract of tobacco, while any plants that are intended to be kept for stock for the following season should be carefully selected from clean runners only. This is a most destructive insect and has given much trouble to growers of these ferns in many parts of the country.

There is still time to pot off young plants of the nephrolepis varieties, in order to prepare them for Christmas sales, the end of the summer and the autumn both providing many weeks of good growing weather before the short days curtail the growth of all plants.

W. H. TAPLIN.

WITH THE GROWERS

John Lewis Childs, Floral Park, N. Y.

While there is always something peculiarly attractive to visitors at the establishment of John Lewis Childs, Floral Park, N. Y., a look over it at the present time is worth a long journey. The gladiolus season is on and a drive through the gladiolus farms is delightful. There are over 100 acres in bloom, presenting a gorgeous color view. As there are about 80,000 bulbs planted to the acre the spikes run to many millions. Conspicuous among them all is the new Gladiolus America now being disseminated. In color it is a soft lavender pink, very light, almost a tinted white, spikes two and three feet long, very large spreading blooms, and luxuriant dark green foliage. It is evidently a favorite with florists already, bringing more than any other variety in the New York cut flower market. When cut it lasts in water a week or more, the blossoms retaining their vigor and delicate coloring to the last.

It would be impossible to enumerate all the different handsome sorts seen in the field, but some are too striking to pass unnoticed: Attraction, deep dark rich crimson, with a pure white center and throat; Wild Rose, delicate bright rose; Blue Jay, rich deep blue, said to be the only real blue in the market; Cardinal, bright scarlet; Deborah, dark red tinged with amaranth; Harlequin, white and dark crimson, striped, mottled and spotted; Irene, a fine pink; Jay, large flowered bright crimson pink, flamed

darker, with mottled throat; Los Angeles, large pure white, freely marked, penciled and blotched with bright rosy crimson; Melrose, white flaked pink, with bright crimson center; Nezinscott, bright blood scarlet with deep crimson black blotches and white mottlings in throat; Wm. Falconer, clear light pink with enormous flowers; May, extensively planted for cut flowers, almost pure white, with markings of bright rosy crimson; Contrast, intense scarlet, with large distinct pure white center neither tinted nor mottled, a most striking variety; and Sulphur King, a beautiful clean sulphur yellow, are varieties which should be seen by everyone.

Upward of 20,000 spikes are cut daily for the New York market, and packed in two grades, spikes with fairly tight buds in crates, and spikes with fully open flowers in cases, the latter being mainly the finer sorts and bringing better prices.

In the home grounds 40,000 tuberous begonias are seen in frames covering many varieties, good sized plants, many double sorts with flowers rivalling the camellia in size and purity of color. There are also about the same number of gloxinias to be seen. An unusual sight is a large bed of Lilium Philippensis in flower. While this variety does not seem to attain, in the open, the height of other lilies its extraordinarily long white trumpets and heavy fragrance would seem to compensate for the deficiency.
